1. DATE DR 25 October 1958		2. LOCATION Yucca Valley, California		12. CONCLUSIONS ☐ Was Balloon ☐ Probably Balloon ☐ Possibly Balloon ☐ Was Aircraft ☐ Probably Aircraft ☐ Possibly Aircraft ☐ Was Astronomical ☐ Probably Astronomical ☐ Possibly Astronomical ☒ Other <u>Reflection</u> ☐ Insufficient Data for Evaluation ☐ Unknown	
3. DATE-TIME GROUP Local _____ GMT _____		4. TYPE OF OBSERVATION ☒ Ground-Visual ☐ Ground-Radar ☐ Air-Visual ☐ Air-Intercept Radar			
5. PHOTOS ☒ Yes ☐ No		6. SOURCE Civilian			
7. LENGTH OF OBSERVATION 6 seconds		8. NUMBER OF OBJECTS one			
		9. COURSE stationary			
10. BRIEF SUMMARY OF SIGHTING Mr. [REDACTED] brought a film strip of six frames to the pentagon with a claim that the photo represented proof of UFO's. No information as to the location or date of sighting or camera used. The strip was sent to photo for analysis.				11. COMMENTS The object was stationary. Total duration about six seconds. Photo analysis indicate that the object photographed was a reflection. The report indicated a possible hoax on the part of Mr. [REDACTED]	

27 October 1958

Dear Major Friend:

Mr. [REDACTED], personally visited the Pentagon on 25 October 1958 and left the inclosed roll of 8 mm film on unidentified flying objects for analysis and identification.

Please see what the film looks like and give me an opinion to forward with the film when I return it to Mr. [REDACTED]

Sincerely,

Incl

1. The ATIC had those portions of Mr. [REDACTED] film containing the so-called UFO enlarged for detailed analysis. The enlargements did not reveal any more detail than did the observations of the projected image or inspection of the film under a microscope.

2. The analysis of the film indicates the object was stationary, yet Mr. [REDACTED] was not concerned enough to get closer photographs revealing greater detail. It is the opinion of the ATIC that the obvious reason is photographs taken closer would not have stood up under inspection.

3. The object was photographed for a total time of approximately six seconds. This was determined by counting the frames on which the object appeared and knowing the running rate of the camera.

4. In view of the limited data available, the ATIC is unable to come to any definite conclusion as to what the object is. However, it appears to be a reflection of some sort. Knowing the reputation of Mr. [REDACTED], it is conceivable that he arranged for this reflection, and/or knows exactly what was photographed.

5 January 1959

Dear Mr. [REDACTED]:

I am returning herewith the film you submitted to the United States Air Force for evaluation which you thought contained a photograph of an unidentified flying object.

The Air Technical Intelligence Center had those portions of the film containing the so-called unidentified flying object enlarged for detailed analysis. The enlargements did not reveal any more detail than did the observations of the projected image or inspection of the film under a microscope.

The analysis of the film indicates the object was stationary and was photographed for a total time of approximately six seconds. This is based upon counting the frames on which the object appeared and knowing the running rate of the camera used.

It is the opinion of the ATIC that this is a photograph of a reflection.

Sincerely,

15/
