8. Unusual Conditions? None- ~~None~~ *The moon was in its third day of last quarter and approx 10° above horizon.* claims that it was a perfectly clear moon-lit night, and the only light he saw was the reflection of the moon on the object.

9. Interception or identification action taken: Subject followed object in his car for approximately $\frac{1}{2}$ mile, lights off, staying parallel and a little behind of it.

10. Air traffic in the area: Unknown

11. Position title and comments of the preparing officer, including his preliminary analysis: Intelligence Officer, Intel Div, D/O, Hq AC&SC. The B-3 analysis by Mr Vaughn is important, as the only explanation which appeared to the writer is a wx freak. This theory was discounted by the AWS, which related absolutely normal conditions. There was no inversion at the time of the incident.

Area air traffic was not investigated, in order to expedite this report, and also because of the nature of the UFO.

12. Existence of physical evidence: None
