Dear Sir:

At 10:25 a. m. on December 10, 1958, I saw an U.F.O. I was looking north and the object was traveling east. It was an oval, silvery object and seemed to be going quite fast. It crossed an arc of about 60 degrees in approximately 3.5 seconds. I estimate its altitude at 500 feet. It was about 30degrees above the horizon. Its length was about 50 feet. This was also its diameter. Its height through the center was about 20 feet.

DATE Dec. 24, 1958

I was in a classroom, looking out the window, when I saw a shiny silvery object pass through my field of vision. I followed it as far as I could until another portion of the building, to my right, obscured my vision. I saw no wings or fins on the object. I looked at the clock in the room and it was 10:25 A.M., Eastern Standard time. I told the student behind me of my sighting but he had not been looking. I was sitting sideways in my seat, looking north. The chairs were arranged pointing eastward. The object reflected the rays of the sun as it passed a few degrees east of north.
