5. MAY 1959

SUBJECT: ([REDACTED]) UFO's in Sweden

TO: Commander
Air Technical Intelligence Center
Wright-Patterson Air Force Base, Ohio

1. ([REDACTED]) During the month of December 1958, there was reported a UFO sighting near Göteborg, Sweden. In January 1959, the Air Attache in Stockholm requested USAFE ATI cooperation with Swedish Air Force intelligence officers in evaluating the circumstances of the reported sighting. The ATI representative joined the Swedish group in classifying the reported sighting as a deliberate hoax. There was no intelligence report submitted by this Directorate since it was decided that the verbal report rendered by the ATI representative upon his return to this Headquarters was sufficient.
2. ([REDACTED]) The ATI representative was shown secret Swedish Air Force reports indicating that many of the reported UFO sightings are Soviet attempts to test Swedish radar and other defensive installations.
3. ([REDACTED]) Up to now, Swedish Air Force Intelligence has been able to discount all except one reported UFO sightings in Sweden as deliberate hoaxes or Soviet prying attempts. This one was a phenomenon observed over the Swedish island of Gotland on 15 October 1957. The case was a sighting of so-called "angel's hair" which was drifting in a northwesterly direction over the island. Some "hairs" were found and analyzed chemically at the University of Uppsala. They were shown to be slightly spun natural silk which had been subjected to mechanical stress. Swedish Air Force intelligence experts pointed out that the case is similar to the "angel's hair" cases reported by Keyhoe in his book, "The Flying Saucer Conspiracy", on Page 227.
4. ([REDACTED]) The Chief of the Swedish Air Force Intelligence requested the ATI representative to ascertain through ATIC if there were any logical and natural explanation of this phenomenon, such as high altitude A- or H-bursts, high altitude balloons, etc.

5. ([REDACTED]) Inasmuch as there is excellent cooperation between USAF and Swedish Air Force Intelligence on several projects of interest, it is requested that any information which can throw light on this matter be forwarded to this Directorate to be included in a briefing to Swedish Air Force Intelligence.

6. ([REDACTED]) This correspondence is classified ~~CONFIDENTIAL~~ because of intelligence cooperation between two governments. Downgrading date cannot be determined. *RH*

OFFICE OF RECORD

22 MAY 1959

SUBJECT: UFO's in Sweden

TO: United States Air Forces in Europe
ATTN: ATI Directorate, DCS/Intelligence
APO 633, New York, N. Y.

1. The only case in the ATIC files which can in any way be associated with the Swedish angel's hair case of 15 October 1957, occurred at Maywood, California on 1 February 1954.

2. The witness described the object as round, shiny, silver colored, luminous, fuzzy or cloudy looking around the edges. When tilted the object appeared bell-shaped and a radiant red-orange in color. Object was in sight approximately 30 seconds.

3. The witness alleged that a residue or substance of some sort drifted down from the object and was gathered. This residue, which would evaporate upon contact with air, was put in a jar and the sample forwarded to the ATIC with the report of the sighting. Laboratory analysis of the material indicated that it was a cobweb.

4. Contact with the Taft Sanitary Engineering Center, Air Pollution Division, Cincinnati, Ohio reveals that residue from textile, paper, and other such mills have on instances polluted the air with a fine fibrous material which, due to a relatively high static electric charge, tends to cling together. This material tends to disintegrate when handled. A factory from which this material originates normally has a very poor or no filtering system.

5. It is suggested that the area of the Swedish sighting be investigated for a silk processing plant. There are several possible causes for this material to be in an area where it probably has not been seen before and each should be given consideration:

- Filtering system of a nearby plant has broken down,
- Break wind blowing from a direction entirely uncommon for the area.
