PROJECT 10073 RECORD CARD

1. DATE 1. Jan 59 3. DATE-TIME GROUP Local 9:30 P.M. GMT_01/1230Z 5. PHOTOS D Yes CO:No	Kilburn, S. Aus 4. TYPE OF OBSERVATIO CK Ground-Visual Telescope D Air-Visual Civilian		000 000	Was Balloon Probably Balloon Possibly Balloon Was Aircraft Probably Aircraft Possibly Aircraft Was Astronomical Was Astronomical Possibly Astronomical Possibly Astronomical
7. LENGTH OF OBSERVATION 3-5 secs	8. NUMBER OF OBJECTS	SE	000	Insufficient Data for Evaluation Unknown
Two dull white (not very bright) bbjs with eerie misty appearance. Objs traveling in a straight line with no change in relation to each other. Objs were oval shaped about 2/3 size of full moon.		Duration of sighting and distance travelled indicates that this was the observation of a "bolide" type meteor that had already exploded into two objects.		

ATIC FORM 329 (REV 26 SEP 52)

SOUTH AUSTRALIA

Jes, but not self illuminated while (not very bright) The second secon NAME OF TAXABLE PARTY OF TAXABLE PARTY.

Répont on U.F.O. vere two (2) oval shaped dises. Travelled in straight line NNN -> 5.5 E. 21 No idea of height so Scouldnot state its dimensions. 22) Each dise was about 3 the size of the

26) Sulmob of deleticide (residential and industrial) Member of Astronomical Society of South distraction.
It was brought to my notice by a friend. (mot in a cour)
