TRAIN and RETAIN

Lynons, Colo.
June 18, 1959

Dear Sirs:

Another report on
a flying "Object".

We live ~~in the~~
east of Lynons, in ~~the~~
~~area~~. This morning at about
eight my wife heard a
terific noise overhead
which was unlike either
a jet or a commercial
airliner. Rushing outside,
she was unable to see
any plane but swears up
and down that about six
or seven thousand feet up
and a little to the south she
spotted an object something
like this:-

← It was
tumbling point first

Toward the north, slow
enough for her to identify
"three" points  on
the object but actually
moving thru the air faster
than any jet we've ever
seen around here.

It was a dull grey,
with no glisten or shine.

The terrific noise
did not follow the
object but seemed to
drift off toward the
mountains and fade out
entirely.

Sounds like the
re-entry of a nose cone,
doesn't it?

Yours truly,

I saw this early in the morning, in a clear sky, almost directly over-head, from the south to the north. The object was traveling at terrific speed but at the same time slowly tumbling end over end.

The roar which caused me to rush outdoors did not follow the object but continued for a few seconds and then faded out towards the west.

It was dull grey in color with no brightness of any kind. It looked heavy & awkward as it tumbled in the sky but the over-all speed was terrific.
