				☒ Other Hoax ☐ Insufficient Data for Evaluation ☐ Unknown	
10. BRIEF SUMMARY OF SIGHTING Stationary obj which gave off a glowing phosphorescent light, 30-40' in diameter, 15-20' in depth. Tree tops could be seen 150' away by the light given off by the obj. Light was similar to a radium watch dial. When obj took off, a blast of deep blue fire was expelled fm the bottom. Obj rose to 400-500', the flame went out, & the obj traveled horizontally out of sight.				11. COMMENTS The residue of Kerosene, the perfect circle on the burned out area, seems to substantiate the theory that this was probably a hoax.

ATTN OF:

SUBJECT:

UFO Report as Received from Capt. Parker, Mil. Flight Service, Ext. 59225

TO:

Capt. Parker received report from Indianapolis Air Route Traffic Control at 2230Z, 13 Sept. 59.

STATE 44177

Report originated from Moorhead, Ky, State Police who reported it to Huntington, W. Va., Radio who in turn reported it to Indianapolis ARTC.

Moorhead State Police received a call from a Mr. [REDACTED], Wallingford, Ky., on Sept. 7, 1959. He saw the object at 0230 EST on that date. Mr. [REDACTED] stated object looked like a plastic balloon about the size of a pumpkin along Route 559 at Wallingford, Ky.. The object was about 50 feet in the air and climbed straight up to about 500 feet and moved East at a high rate of speed. No sound but it left a blue ring of smoke which remained for 15 minutes. No speed estimate. When object moved East a bluish flame observed. Moorhead State Police investigated and reported a burned circular area about 40 feet in diameter remained on the ground with an 8 inch ring of grass around the edge of the circle. This is apparently still visible and State Police are apparently still at the scene. These are Moorhead, Ky., State Police who are still at the scene.

Maj. Friend was contacted and he said he would call to get this report Monday morning and then take the necessary action.

1. On 14 September 1959, the Lexington Field Office, Lexington, Kentucky, Region V, 109th CIC Group, was informed by the Federal Bureau of Investigation, Cynthiana, Kentucky, that an unidentified flying object had been sighted in the Wallingford, Kentucky area. The Lexington Field Office in turn contacted Headquarters, Region V, 109th CIC Group, Louisville, Kentucky, and relayed the following information:

On 7 September 1959, at approximately 0230 hours, an unidentified flying object was sighted by ~~XXXXXXXXXX~~, Rural Mail Carrier, Route ~~XXX~~, Wallingford, Kentucky. The object was approximately 30 to 40 feet in diameter, 15 to 20 feet in depth, and gave off a glowing phosphorescent light. The object appeared to be approximately 400 yards north of State Highway 559, and seemed to be resting stationary in the air, 40 to 50 feet above the ground. Tree tops could be seen 150 feet away by the light given off by the object. The light was such that it did not bother Ogden's eyes. It was described as being like a light given off by a radium dial on a watch or clock. Ogden watched the object from 30 seconds to one minute, when suddenly a blaze of deep blue fire resembling a gas flame was expelled out of the bottom of the object. The object rose perpendicular to the ground at a tremendous speed to a height of 400 to 500 feet. The flame went out and the object traveled horizontally to the ground in an easterly direction and out of sight.

(F-6)

2. On 14 September 1959, an investigation was conducted by Region V, 109th CIC Group personnel at the approximate scene of the reported incident. A ring was burned in the ground approximately 8 inches wide around a circumference of approximately 12 feet 3 inches. Dimensions estimated by the Kentucky State Police in two directions across the circle were 12 feet 3 inches, and 12 feet 4 inches. The circle was burned on an approximate 1 to 2 degree slope, forming an almost perfect circle. The ground was a hard, white soil. No foreign objects were found in the area which was estimated to have been traversed by approximately 150 people on 13 and 14 September. The ground in the burned-out area smelled of a fuel product similar to kerosene. Since the object was seen, there had been a rainfall in the area on 9 September 1959 estimated at from approximately .3 to .5 inches.

SPECIAL HANDLING REQUIRED
This report was loaned to the Air Force by another investigative agency. The report and the information contained therein will not be disseminated to unauthorized persons nor will dissemination be made outside the USAF without the written approval from the Director of Special Investigations. When this report has served its purpose, it will be returned to the OSI activity which furnished it.
