5. PHOTOS ☐ Yes ☒ No	6. SOURCE Military		
7. LENGTH OF OBSERVATION 15 mins	8. NUMBER OF OBJECTS one	9. COURSE West to NE	
10. BRIEF SUMMARY OF SIGHTING Rnd or oval, red or orange red - size of basketball at arm's length - obj described as egg shaped with point down and bright spot near base - triangular through a 30 power telescope.		11. COMMENTS The angular velocity indicates that this obj was an a/c of some type, (possible). However, it was viewed through a 30 X telescope and no details were apparent. Also the 15 min duration is rather excessive for an a/c sighting. Duration too short for a balloon observation. No rptd a/c in vicinity at time of rpt. Case listed as unidentified.

k. Position Title and Comments of preparing Officer:

Chief of Operational Intelligence, Hq 13 AF, APO 74, San Francisco, California.

The following possibilities were offered by the personnel making the sighting but none of them really believed these possibilities constituted an adequate explanation:

(1) A hot air balloon with a fire in a suspended pan underneath.

(2) Re-entry and burning-up of a Soviet moon shot which occurred on the same date as the sighting.

Neither of the above explanations seems satisfactory. However, this office can offer no further possibilities.

1. Existence of Physical Evidence:

Negative.
