7. LENGTH OF OBSERVATION 4 sec	8. NUMBER OF OBJECTS  One	9. COURSE  E then N	Other  Insufficient Data for Evaluation Unknown	
Long, possibly pointed object, no wings or tail visible, appeared to be aprox 20 times as large as a B-47. Sighting at dusk. Color not determined due to sun reflecting off object. Haze layer present. Witness heard jet and looked up.		report is classified as insufficient data. The object was possibly an ac, although none were reported in the area. Witness

## UFO ANALYSIS SHEET

Location Vicinity Waco, Texas
Date 10 May 1960 Hour (2) 00222
WX Clear, vis 15-20 mi in light haze, winds N & NW at 5 to 45 knots
Description Long-possibly pointed like pall pt pen, size 20 times as large
as a B-47, heard jet acft and looked up, first seen at 345 deg elev tink,
disapp 025 deg elev unk, flt path to E., made 90 deg turn to N. with no
apparent change in direction of flight, disapp due to loss of eye focus, seen for 4 seconds.  Direction of Motion East, then North
Satellite: (AFCIN-4F3, Phone 69219) Ruled out
Astronomical Phenomena (Meteor, Comet, Planet, etc) Ruled out due to the reported maneuver
Radar Analysis (AFCIN-4E1) None
Natural Phemomena (Ball Lightning, etc) Ruled out
Aircraft, Balloons, Airships, etc. Poss Acft; however, the reporting officer stated that there were no known acft in the area
Other Insufficient Data (1 witness)
Evaluation of Source Reliability

Analysis and Conclusions: The witness said that he heard a jet acft, yet the reporting officer stated that there were no known acft in the area. The witness could not determine the color due to the sun reflectiong off of it. If the object was as large as the witness reported, it was anourmous. Anything as large as the witness reported would have been seen and reported by many people. Only one witness saw it, so this report is evaluated as insufficient data, I witness.
