10. BRIEF SUMMARY OF SIGHTING Unknown shaped object observed as orange in color. Sighted at 200 deg az and 20 deg elevation moved to 45 deg elevation, azimuth not given. Object would move in a straight line and slow down and speed up. Also moved at right angles back and forth. Light intensity did not change.				11. COMMENTS Object was observed in the northwest. There was a visibility of 10 mi in light snow with .9 cloud cover. The azimuth of disappearance was not given. A balloon was launched at 1100Z it is possible that this balloon remained in the area long enough for association as a cause of this sighting, however the evidence is not conclusive. There is insufficient data available for a valid conclusion to the sighting.
