UFO Sighting [REDACTED]

1 NOV 1960

SAFOI-3d (L/Col Tacker)

1. On 9 October 1960, seven persons, probably students, at Schreiner Institute, Kerrville, Texas reported the observation of an unidentified flying object.
2. The report of this sighting was made to ATIC by Lackland Military Training Center, Texas. The information contained in the report was sketchy and of little value for accomplishing an analysis.
3. The little information gives indication that the object viewed was probably a meteor of the "fireball" class.
4. Suggest you forward seven ATIC Forms #164, dated February 1960, to Mr. [REDACTED] to be completed by Messrs [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], and himself. The completed forms to be forwarded directly to ATIC.
5. Mr. [REDACTED] address:

[REDACTED]
Schreiner Institute
Kerrville, Texas

6. Suggest Mr. [REDACTED] be informed that each person should complete his form individually.

FOR THE COMMANDER:

NICHOLAS POST
Acting Deputy
Science and Components

4 November 1960

Dear Mr. [REDACTED]

This is to acknowledge your recent communication concerning the unidentified flying object sighted by seven persons on 9 October 1960 near Kerrville, Texas.

Your letter contained insufficient information for a valid conclusion. Therefore, we ask that the seven witnesses each fill out, independently, the attached Air Force questionnaires and forward the completed documents to the Commander, Aerospace Technical Intelligence Center, Wright-Patterson Air Force Base, Ohio for their analysis and/or evaluation.

From the little information given in your letter, it is believed the object viewed was probably a meteor of the "fireball" class.

Sincerely,

Inclosure

LAWRENCE J. TACKER
Lt. Colonel, USAF
Public Information Division
Office of Information

Dear Sirs;

On the night of October Ninth an object was seen in northwestern sky. The object appeared about forty degrees above the horizon and covered the distance of twenty degrees in five seconds from first observation at 8:05 P.M..

Upon sighting I immediately compared the width of my thumb to the object and found it was about the size of a half-dollar at arms length. There was no wind, at that time, and no sound heard.

My observation ran thus: A pastel green object traveling from north to west-south-west at a forty-five degree angle. It appeared self-luminous rather than to be reflecting light. The object seemed to be a ball with an irregular glow. The stars were visible around the object so there was no cloud bank.

The place it was sighted from was the Student Center Lounge. The moon was on the opposite side of the building to the object. Sighted while watching television, only few of us saw the object. There were no comets near the signs of vision and no halo around sun or moon.

This is a sketch of the object.

Incl. #1

These people saw the object:

[REDACTED]

It was not like any meteor, comet, or search light reflecting on a cloud.

I hope that this is able to shed some light on this thing. If you could, would you write and tell me what this thing is.

Sincerely,

[REDACTED]

CLASSIFICATION

COUNTRY OF ACTIVITY REPORTING USA	REPORT NO.	(Leave blank)
AIR INTELLIGENCE INFORMATION REPORT		
COUNTRY OR AREA REPORT CONCERNS South Central Texas	DATE OF INFORMATION Postmarked 16 October 1960
