April 4. 1961.
Dear Sirs! A.S.

I want to report to you
a flying unknown object which I
have seen in County Darmstadt
near Frankfurt (Germany)! The
day I can't remember too good, it must
have been in the week from the 20th
March to the 25th. But I think it was
the 20th March. The sky was 100%
clear. I spotted this object with my
12x50 binoculars. The surrounding
area was full of woods and no towns, but
a lot of hills. The sun shone bright and
she was a little in back of me, but not
too much. Time: 11 A.M. The object's shape
was from round to oval and had a
milky glowing. I followed it move a
couple of seconds, then it gained speed

and it started to turn its color to orange, then it moved faster and the color went to light orange or yellow. When the object's color went back to white and then to orange it went suddenly a different direction, now the object was slowing down and the color turned to white (milky). Then it arranged the same happening over again till to the yellow color and disappeared. A human being could never hold out the pressure which I think the object recorded. So therefore I assume it could have come from another planet of our solar system or a different system which is very fantastic to believe.

How I have seen this object

I hope this information is of good
use to you.

Yours Truly

Dear Mr. [REDACTED]

Your letter of April 20th concerning unidentified flying objects has been received. I have forwarded it to the Air Force Aerospace Technical Intelligence Center for evaluation of the facts you present therein.

For your information and possible use, I am enclosing a questionnaire which we use in gathering information on UFO sightings. If you should have more detail than that presented in your letter, you may complete this form and forward it to me.

Your interest in this matter is appreciated and you may rest assured that your letter will not be published.

Sincerely,

WILLIAM T. COLEMAN, JR.
