7. LENGTH OF OBSERVATION		8. NUMBER OF OBJECTS		9. COURSE	
10. BRIEF SUMMARY OF SIGHTING Objt hovered at distance of 1 1/2 miles, yet able to determine that it was a disc with top and bottom of equal proportions. Even able to tell that the center was 1/4 as high as the disc was wide. The witness saw this plus other details at the distance reported. Observed over a fairly large city, yet no one else reported seeing it.				11. COMMENTS Possible that it was an altocumulus cloud, however, in view of this being a one witness sighting with lack of a corroborating witness this is called as insufficient fdata.
