ported that they saw a lighted UFO fall from the sky, and that the object followed their car at speeds above 25 mph. The sighting, plus an explosion ac-

Contraction of the Contraction o

companying it, was confirmed by many people over a wide area, but the story told by the two young men was the strangest. They said that they approached to within a short distance of the object, which was on the ground, and then got out of their car. As they did so, it started moving toward them. The UFO was about "half or 3/4 of a block long and about a street's width wide," according to the boys. It was a plain white light, dim around the edges and flat on the ground. It did not seem to have any height or to be a solid.

Strange Lights In S.D.' Neb.

On Thursday, 18 October, residents of Rapid City, S. D., as well as an employee of the FAA in Cheyenne, Wyoming, reported a huge, bright meteor. In westtern Nebraska several reports were made to authorities concerning a strange bright object in the sky. Highway Patrol officers at Scottsbluff reported a motorist said what he thought was a fragment of a meteor set a grass fire near Kilgore. Fire trucks sent to investigate and extinguish the fire found nothing, however.

Two Ogallala, Nebraska high school boys reported that same night that a glowing object landed north of the town in the hills. A search Thursday night disclosed nothing, and a continuing search Friday yielded the same. One 16year-old driving on the north edge of Ogallala said he saw a round, green light descending out of the northwest onto a hill just north of the city. He told police he picked up a 17-year-old friend and they drove about 700 yards into the hills where they saw a white, glowing object parked on the ground, and estimated its size as 100 yards by 30 to 40 feet high. Search later yielded nothing naturally.
