COURSE<br>east                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 10. BRIEF SUMMARY OF SIGHTING<br>Four small round glowing dots crossed field of vision of observer while he was lying down looking through skylight. No trails or exhaust. Believed objects to be extremely high. Skylight 4 x 8 ft. Flight was from SW to E and previous observation of jet a/c in the same path indicated speeds much slower. No known a/c in area. |  |                                                                                                                                                                                                       |  | 11. COMMENTS<br>Glowing dots indicates possible bolide sighting, witness indicated that the speed was excessive for a/c. Objects apparently solid. Insufficient data for evaluation.                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
