The preparing officer is a Senior Investigator, GS-9, Security and Law Enforcement Division, Hill AFB, Utah. Preliminary analysis indicates that the observer is a mature individual who is convinced that the object was not a conventional type aircraft or a shooting or falling star. He has witnessed falling disabled aircraft during World War II and does not make comparison with them to the object observed. The observer was the only reported witness to this sighting. There are no known experimental aircraft or missile firings other than static tests in the area at the time of sighting. All logical leads have been developed and reported with regard to this sighting.
