Summer 64

AUG - 9 1965

Dear Mrs. ~~XXXXXXXXXX~~

The Air Force does not disregard any reports officially submitted to them for evaluation. The phenomena which you observed last summer is puzzling. Had the sighting been reported to the Air Force at that time, an investigation would have been made. However, at this late date it is not feasible to attempt an investigation toward an identification of the object you observed.

Regarding the articles from the Philadelphia Inquirer which you enclosed in your letter, a copy of an AP release stating the cause for the stoppage of electromagnetic clocks is attached.

The balloon observed over Portugal and the Azores was probably launched by NCAR from India.

The phenomena observed in the Antarctic was a possible refraction of an astronomical body. This evaluation was made by Hugo Morlando of an astronomical observatory in Chile. These observations have not been officially reported to the United States Air Force.

The alleged incident in the article by ~~XXXXXXXXXX~~ was not reported to the Air Force.

The attached report on Project Blue Book represents the Air Force position on the UFO program to date.

Sincerely,

To whom it may concern I want to say first of all that I do not understand why the Air Force consistently discredits reports on sighting unidentified objects whatever they may be.

I was startled to read the article by John Carr on the front page of the Philadelphia Inquirer recently.

I have a cat who refuses to come in at a reasonable hour at night but in the middle of the night she gets up on my window sill and scratches at the screen until I know I must get up and let her in or she will keep it up until I do. One night last summer I got up to let her in and as I stood at the door waiting for her a luminous something - I don't know what to call it came floating diagonally across the yard. It was not up so very high and seemed

to be circular like a huge tire, the whole
thing glowing with a luminous light.
There seemed to be no sound from it.
From where I stood in the door I could
not see what Mrs. [redacted] reported she saw, -
a sort of cockpit, and antennae.

I got a raised eye brow when I described
it to my son and some of my friends but
I know what I saw even tho I do not
know what the object was.

I am seventy years old and never before or since have seen anything like it.

I suppose you people in the Air Force
will say it was a "natural phenomena".

yours very truly
