Lansing, Michigan

1. Reference telephone conversation between TSgt David Moody, Wright-Patterson AFB and your organization concerning various unidentified flying object sightings in and surrounding Lansing on the night 21 - 22 Jul 64. From the information presented it appears that aircraft similar to those flying night photographic missions during the latter part of May 64 are again operating in your area. These aircraft fly low level missions (altitude about 500 feet) with their landing lights on. The equipment includes a generator or alternator which makes a very loud shrill sound that is of higher intensity than the aircraft engine. These planes fly at slow speeds. We have not established the origin of these flights, however, many of the missions have a security classification due to the equipment, operational matter or end product of the work being performed.

2. We are attaching about twenty copies of FTD Form 164 as requested by your office. We would appreciate your forwarding any completed forms to:

Major Hector Quintanilla, Jr
Hq FTD (TDEW/UFO)
Wright-Patterson AFB, Ohio 45433

3. Again, Sgt Moody wishes to express his appreciation for the cooperation and courtesy which your office extended to him and Bill Powers from Northwestern University during their investigation of the May sightings in Lansing.

Sincerely,

HECTOR QUINTANILLA, Jr
