Dear Gentlemen:

At about 4:45 A.M. Eastern Standard time, [redacted] sighted 6 shining objects flying in a triangular formation. Later, we lost sight of 2, but kept sight of one of these through a telescope and high-powered binoculars.

Through these we saw the shape of this object. It was shaped as a paramecium and seemed to be releasing some kind of energy in sparks and along with fumes.

We lost sight of the object about 6:10 E.S.T. when the

sun rose and the object was
covered with clouds.

Yours truly,
