[redacted]

September 4, 1964

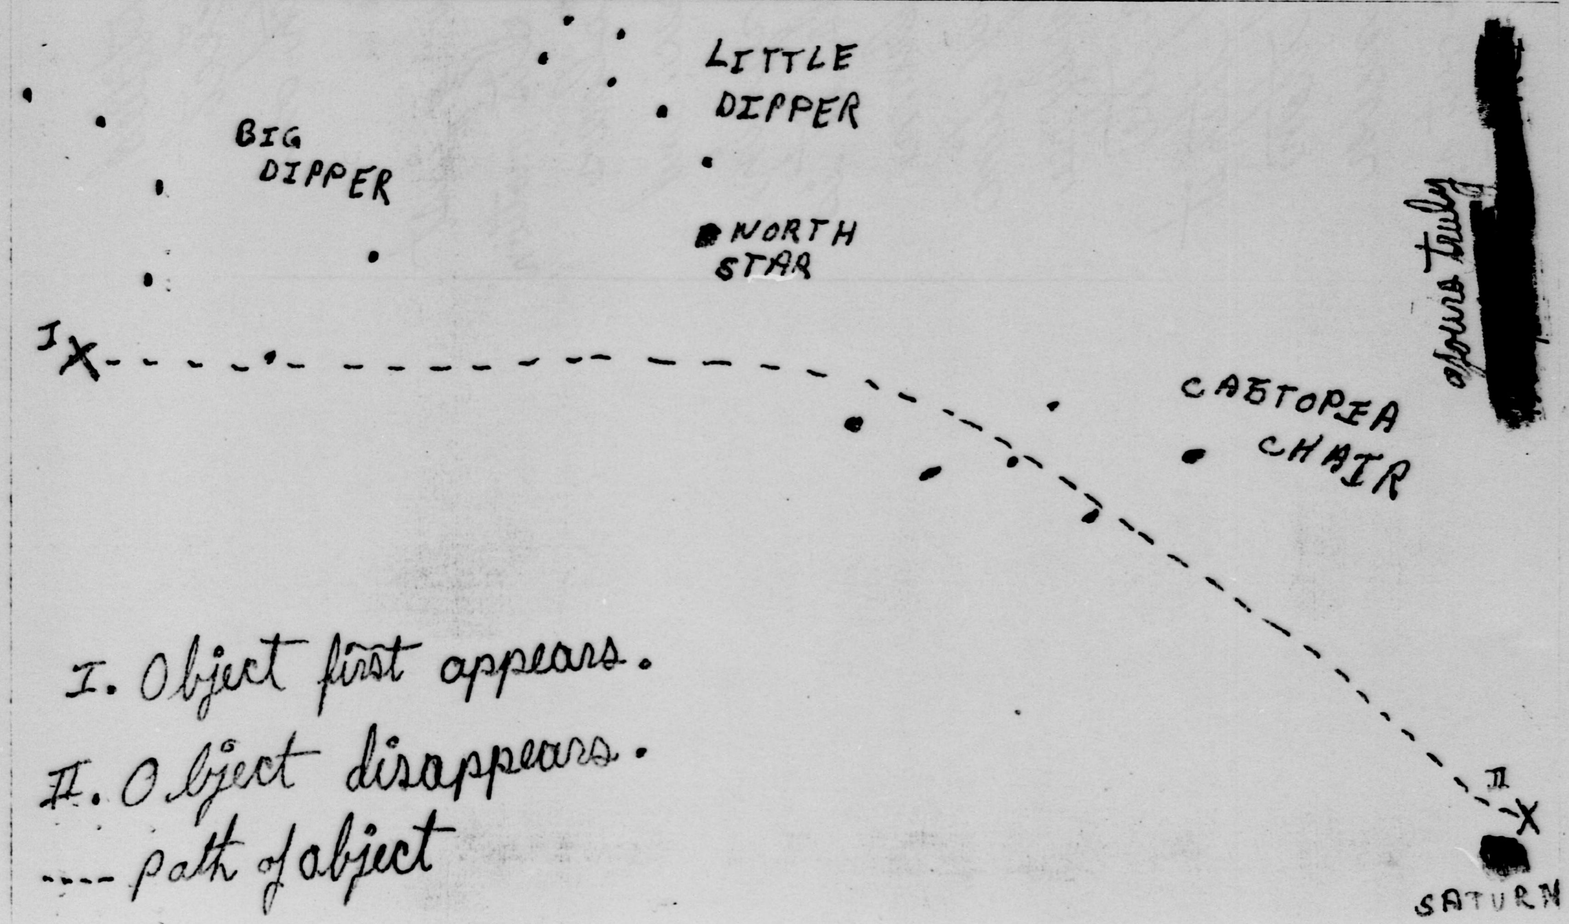

Dear Sirs:

The information I received is not to what I would like to know.

I ask if you could send a brief report of almost 6 out 20 reports, hoxes, balloons, etc. and ~~information~~ some information on your analysis procedures are ~~[redacted]~~ conducted and how you evaluate reports. If you possibley could send a photograph or two of some UFO's.

I have been mystified by a bright object which I watch on some clear nights.

It comes in view just under the big dipper. Its motion varies in speed it slows down for about 20 sec. and then it speeds up again. In 5-6 sec. intervals it is changing brightness from real bright to a very dim so dim you could barly see it. It travels from the NW to SE and then it gets very bright and then goes so dim its never seen again. It goes out of site near the planet Saturn.

I. Object first appears.

II. Object disappears.

---- path of object

TO: Hq USAF SAFOI PB (Mrs Gaiser)
Wash D C 20330

1. Reference the attached letter from [redacted], dated 4 Sep 64, requesting information on unidentified flying objects. This office has received previous correspondence from Mr Lehman in Aug 64 and at that time he was forwarded one copy of the Fact Sheet.

2. The following information is provided to assist in answering the attached letter:

a. Since there are over 8,000 UFO cases in the Air Force files it would not be possible to "send a brief report of almost 6 our of 20 reports, hoxes, balloons, etc." The Fact Sheet provides information on analysis procedures and how reports are evaluated.

b. Due to the large expense involved in duplicating photos, they are not available to the general public.

c. The bright light that he has observed on many occasions has the characteristics of a satellite. The satellites most commonly observed are ECHO I and II.

August 4, 1964

Dear Sirs:

Im very much interested in the present UFO problem. We have had many UFO repots which have studied [redacted] reports from the news papers, books and my friends.

Im only 15 years old and know enough about science and the universe to know and understand what I am reading.

I would like to know if you could send some information of the UFO reports since 1947 when Arnold reported flying saucers, while on a mercy mission and up to date on 1964.

Yours Truly

OCT 26 1964

Dear Mr. [redacted]

We are providing the following information in response to your letter of 18 September 1964.

Since there are over 8,000 UFO cases in the Air Force files, it would not be possible to "send a brief report of almost six out of twenty reports, hoaxes, balloons, etc." We forwarded a Fact Sheet to you in August of this year. It provides information on analysis procedures and how reports are evaluated.

We do not have any photographs of unidentified flying objects. Some photographs have been submitted to us from time to time, but they have been determined to be hoaxes.

The bright light that you have observed on many occasions has the characteristics of a satellite. The satellites most commonly observed are ECHO I and II.

Sincerely,

MASTON M. JACKS
