

1. DATE - TIME GROUP 2 August 65 02/0645Z	2. LOCATION Kansas City, Missouri
3. SOURCE Civilian	10. CONCLUSION SATELLITE
4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION 15 Minutes	11. BRIEF SUMMARY AND ANALYSIS White to green object larger than a star but with the appearance of a star in flight to the South. Had exhaust with zig-zag pattern. Faded slowly.
6. TYPE OF OBSERVATION Ground-Visual	
7. COURSE South	COMMENTS: Appearance more consistent with Satellite than a/c. Duration for both a/c and satellite rather long however satellite duration usually exceeds time of a/c sighting. No ECHO or PEGASUS passes visible at the reported time of observation. Possible that one of the more than 30 satellites visible was over Kansas City at that time. Regarded as Satellite sighting.
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No
