Air Force Intelligence Washington D.C.

Dear Sir,

You must get quite a lot of flying saucer reports every so often, some are from cranks, and some are because of weather, heat, dust, ect. What ever the case you must get quite a lot. I have something that may interest you. Something different then a flying saucer story.

This evening I went to a drive-in movie

at the Waterford Drive-in in Waterford, Connecticut to see a historical movie intitled Genghis Khan and its co-feature The Rain Must Fall which I saw before. It was about twenty five minutes of nine, the sky was clear and the moon was out. I happens to glance up at the moon because since I had seen The Rain Must Fall (which played first) before I wasn't very interested in it. I was alone in the car as I did not have a date for the evening. So, I was looking at the moon when I noticed a very dark speck or object moving \*\*\*\* across the face of the moon, in a straight line. In fact the speck or object was traveling across the mm middle of the moon surface. I continued to watch the moon for about ten minutes and I noticed that this object was \*\*\* mribble or object the moon three times every two minutes I could tell this by watching my watch in the bright light from them dash board. Now the bright side of the moon reflecting the sun's rays is always towards us and to the naked human eye the \*\*\* mribble training\*\*.

I could see this black speck or object moving maxima across the maxima moon's surface. The object must have been quite large to inable me to see it as a black speck. After looking at the moon for ten minutes I then went back to look at the movie. About a half an hour later I looked at the moon again and observed this same object still orbiting the moon, but I noticed that the object reaching maxima the maxima moon's surface stopped for about five minutes then continued its orbit. I am staying in Niantic, Connecticut with my family for the summer and our house or rather the house that we are renting is on a hill over looking the ocean and on nights that I can't sleep I lay in bed as my room faces the water looking at the moon thinking about the next day's work. This is the first time that I have ever seen this object crossing the moon's surface.

Gentlemen I am not in a habit

of making up stories for ha for the fun of it just to get my mame in

the paper. I don't need the publicity. I am 22 years old im with

two years of college in business with my father, who owns a large

furniture store in Norwich, Connecticut called

or Furniture Company. I am soon going to

open my own business called The Company selling

Zenith T.V., Heat Point Appliances, ect. and all I ma need is

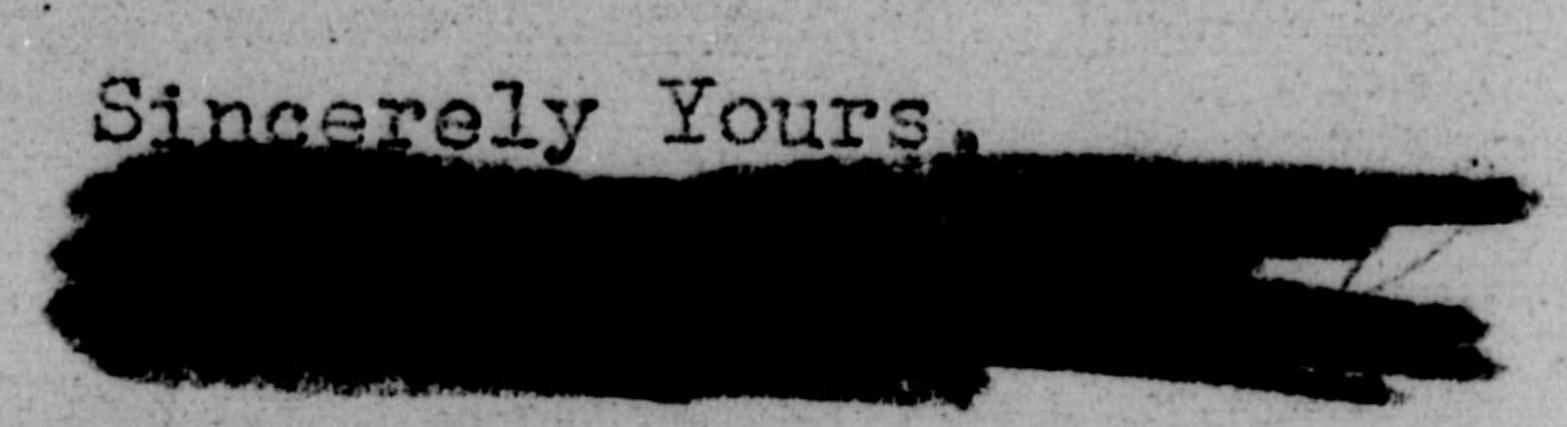

people hearing that I am seeing flying saucers, flying objects, ect;

Why they might think that I was a nut parden the expression and
that would be bad for business. How ever I did see this object

and whether it is something or not is up to you, I am telling

you that I have never seen it crossing the moon before this evening

when I looked at the moon and this evening the moon was the clearest that I have ever seen it, the sky was clear with a few clouds but I could see the mann's surface or rather what is seen by the naked eye and I saw this object. In fact I just looked out my bedroom windoward and while the moon looks fatherwayay. A farther away I can still see this majaxak object crossing the moon's surface. It is probably nothing but I just thought that you might be interested in hearing about it. Thank you for your time in reading this letter.

- P.S. Please, I do not want any publicity at all.
- P.S. Please for give me for max the mistakes I can't type very well.

P.O. Norwich, Connecticut
