FORM
FTD SEP 63 0-329 (TDE) Previous editions of this form may be used.

13-16 Aug ~~17 Aug~~ URBANA, OHIO
NIGHT

13 Aug

Received a call from Sgt ~~Stilling~~ Stillings, Urbana Sherriff on 16 Aug 65 regarding observations by Deputy Sheriffy P McCullough, Court-House, Urbana and [redacted] Urbana, Ohio 43078. Forms were sent to them on 17 Aug 65. They had two calls last night and a deputy also observed the objects. Saw five or six objects out of East going West, very bright then headed North. Weren't too high. Objects observed for ½ hour.

Sgt Moody explained about the low level flights being made from Lockbourne AFB during this period of time. However, we would send them forms to fill out.

Received a call from [redacted]r on 17 Aug 65. He has seen flying saucers for the past four straight nights. What happened last night he said he couldn't put on paper. They flew in straight form over the field last night, practically all night, 3 am to daylight. Tried to get up to a height, one had trouble and another one went to his rescue approximately 1hr and held him in tow when the rescue plane came. Snow white objects, four straight nights. He wanted Major to tell the control tower people about these. Majr onvinced him that he should go ahead anyway and fill out the forms and then Major Quintanilla would inform the control tower personnel. Mr [redacted] seemed very happy after this explanation and said he would fill out the forms right away because he didn't want anything to happen and he would be out looking again tonight.

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

Vanish from yellow to green

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other _____

13. Did the object: *(Circle One for each question)*

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

14. Did the object disappear while you were watching it? If so, how?

It would dim - then appear a short distance away.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

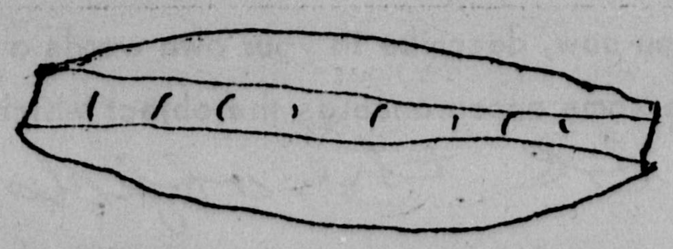

a. Sound No sound

b. Color Varied from yellow to green

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

at high altitude it was about the size of a match head - at low altitude 3 times as large

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

The objects traveled in any direction at ease.

20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? Fast as a falling star

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
(c. Outdoors)
d. In an airplane (type)
e. At sea
f. Other at home

d. Near an airfield? 18 (miles north of) WPAFB
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North	c. East	e. South	g. West
b. Northeast	d. Southeast	f. Southwest	h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

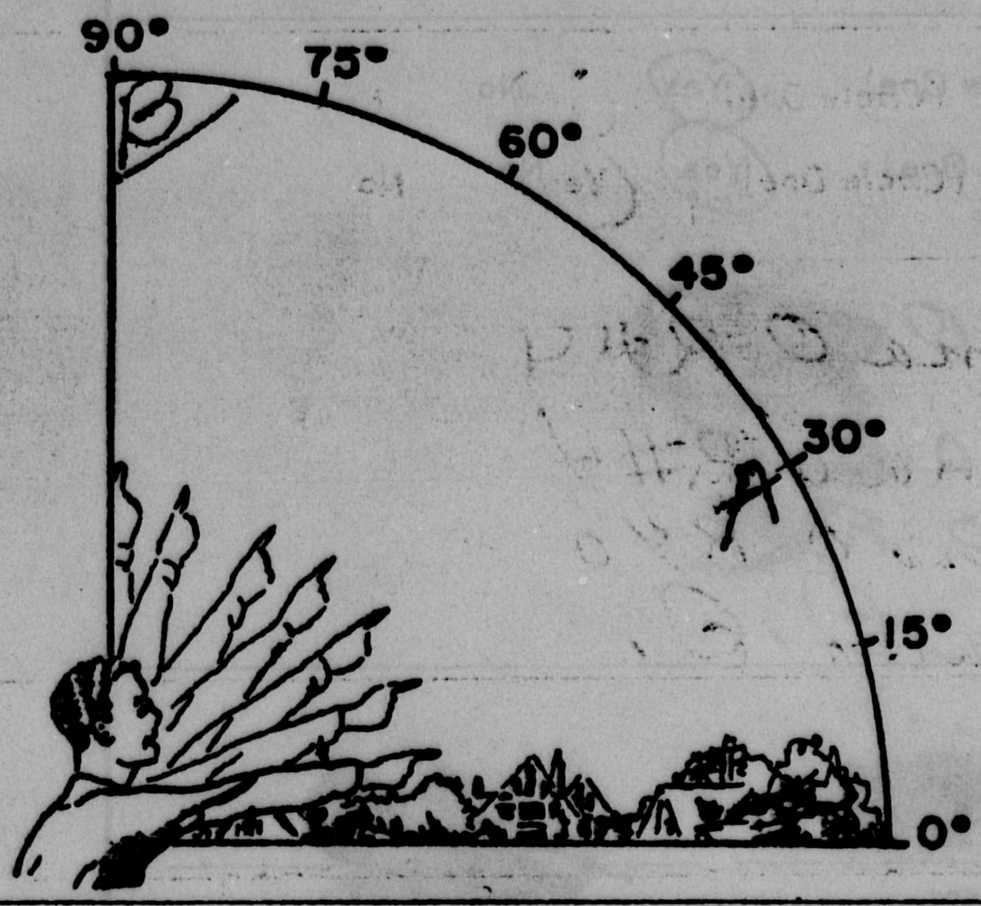

25. Did you observe the object through any of the following?

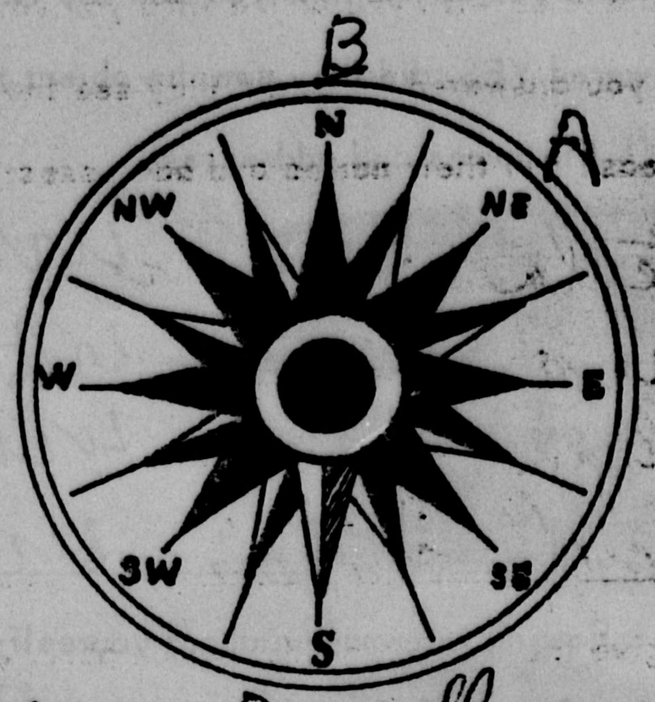

a. Eyeglasses	(Yes)	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It's very hard to describe the objects In a common statement they acted as a waters flight on water. (statement on later sheet)

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

Came Directly over head
Then went North

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

It would be almost impossible to show the path of object as it went in every conceivable direction but mostly on a line of travel

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

saw only one tonight

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

(Never)

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* (Yes) No

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

Tonight all the sight~~seers~~ left me at about 1:00. I was not sleepy so I watched the objects alone. at about 3.30. The 8th object appeared directly in the east coming in very low. It seemed to be in trouble trying to keep elevation. It tried very hard to go up. but it would go up a short ways then drift down again. It continued the operation for about an hour. but was getting lower all the time. In the meantime there were 2 object setting stationary about over the air base to the south. The one to the North. went to its aid. connected a cable or some object to it but couldnt lift it an higher The were not over 20 to 30 thousand feet up at the time. (Estimate) Just as the sky started to show light in the east a larg object appeared

over

on the scene and the disabled object was hoisted onto the lower section of the large Object.

By this time the light was brigh enough at that height that I got a very good look at the thing. It was to my estimation, about 200 feet long and 100 feet wide. The bottom was flat but the top was dome shaped. I had numerous windows in its sides. When the lower door was closed it went nearly straigh up bearing to the East, and in 30 to 45 second it was out of sight. The or object remained the same locality for another 5 or 6 minuets of Brood day light. I Came down very low and I saw it plain. I was snow White Then it returned to its position west of its orgunal Position. I got a very good view

I'd like to talk to any person on this subject
