Dear Sir

On Aug 27, 1965 at 0330 I looked out the bathroom window which faces due south. In the sky I saw 9 round lights. They were heading due north right over head. I could only follow them till the obstruction of the top of window which cut off vision. The lights were not bright, but a light like from a star.

They moved in a set pattern, in one motion, with no glare as looking at a car light or landing light. The pattern is shown below-

COMMENT: Although Mr. [REDACTED] treated this occurrence with definite seriousness, the time that the sighting took place was about the time that we had the tapering off storm which was in this area. This could have been approaching aircraft to O'Hare IAF.
