22 April

Mrs. [REDACTED]  
Katrina Falls Rd.  
Rock Hill, N. Y. 12775

Saturday, April 23

Dear Sirs,

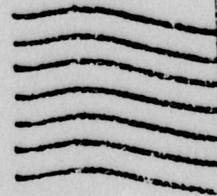

I read in today's newspaper of some people having contacted you after seeing the bright object in the sky on Friday night. I, too, saw it, and thought I should notify you, in case the government wants information of these sightings for their records or investigation.

I was taking wash off the clothesline around 7:10 Friday night, when I saw a large bright light with a kind of "tail" travelling low in the North East sky. It was visible only a few seconds before being hidden behind the treetops. It reminded me of a falling star, but seemed much larger than the stars appear. The brightness reminded me of the white "sparklers" the children light and hold on the 4th of July, and it seemed to have flicks of sparks coming from it, such as these "sparklers" do.

I told my husband about it, and he teased me about "flying saucers", and then we did not give it more thought, till I saw the article in the Record. I felt it best to notify you for any records you keep on such happenings.

Sincerely

Mrs. [REDACTED]
