35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

When we spotted the lights, we first thought a plane was in trouble and was being tailed. We thought it was coming our direction + would land in the field. We pulled up to a clearing and stopped. My husband said, No, it was not going to land, he thought it was a permanently-fixed light as on a tall pole - we decided to drive closer.

we were here - ^{about 1/4 mile} turned left on 571 (state route)
We watched it continuously as we made a left turn and drove about 1 1/2 miles. We both fully expected to drive a little way and suddenly realize "oh that's a lighted advertisement or so that's what it is," but we saw that it was too high for that. My husband stopped the car + got out. Suddenly the bright light went out - there was a very loud roar + away it went up very fast. Then the red light was going up and down

not round and round as it flew off + out of sight. The up and down motion of the red light looked like it was moving in a range of several yards.
