U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

31st (Day) July (Month) 1966 (Year)

2. Time of day: 5 a.m (Hour / Minutes)

(Circle One): (A.M.) or P.M.

3. Time Zone:

(Circle One): a. (Eastern)
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. (Daylight Saving)
b. Standard

4. Where were you when you saw the object?

2 Miles West of Hedgesville (Nearest Postal Address) | Hedgesville (City or Town) | West Virginia (State or County)

5. How long was object in sight? (Total Duration) ½ (Hours) _____ (Minutes) _____ (Seconds)

(a. Certain)
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes ✓ No ____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	a. Bright ✓
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

Capella 60° A? Yo'EL

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

_____

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember

e. Other _____

13. Did the object: *(Circle One for each question)*

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

14. Did the object disappear while you were watching it? If so, how? No

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: ____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: ____

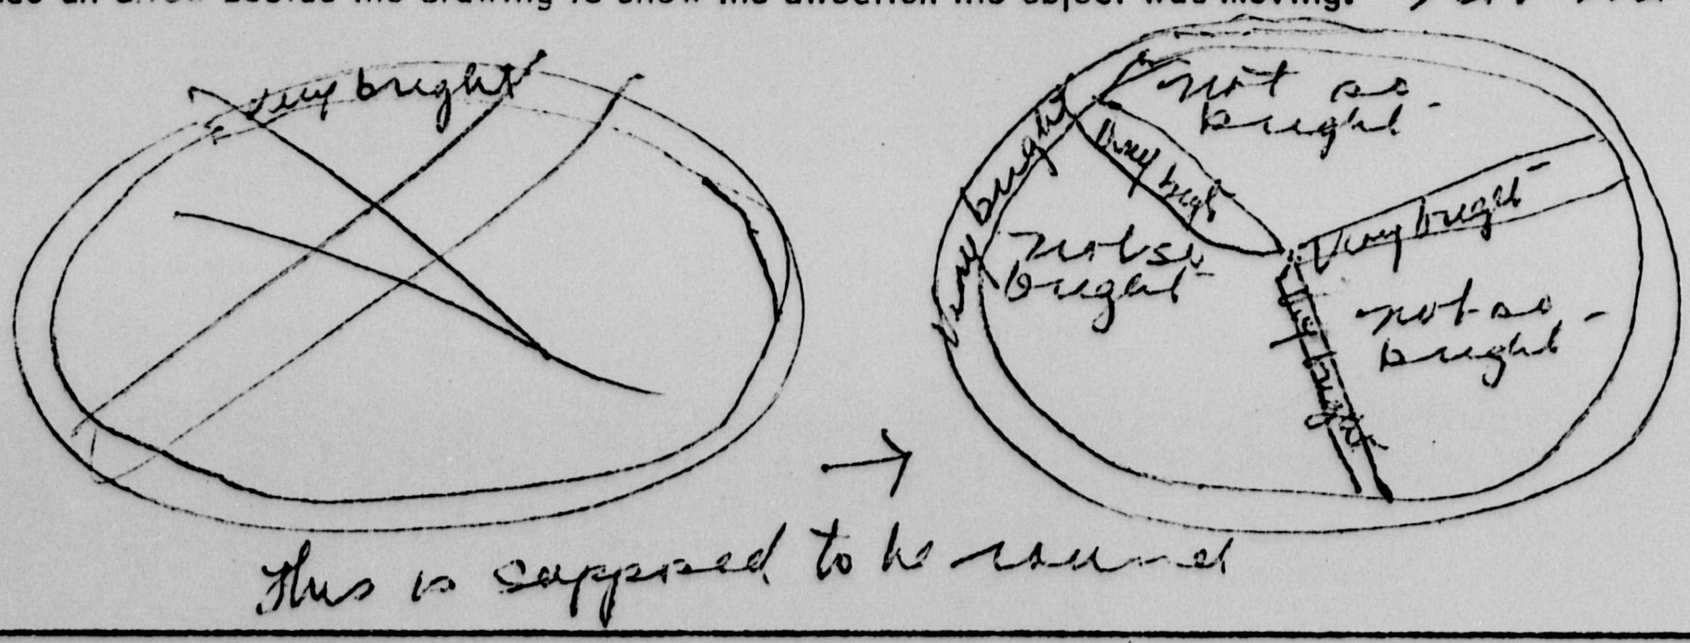

17. Tell in a few words the following things about the object:

a. Sound No sound

b. Color very bright

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving. Not moving

Thus is supposed to be viewed

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
c. (Outdoors)
d. In an airplane (type)
e. At sea
f. Other Also from my bedroom Window.

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
c. (In open countryside?)
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

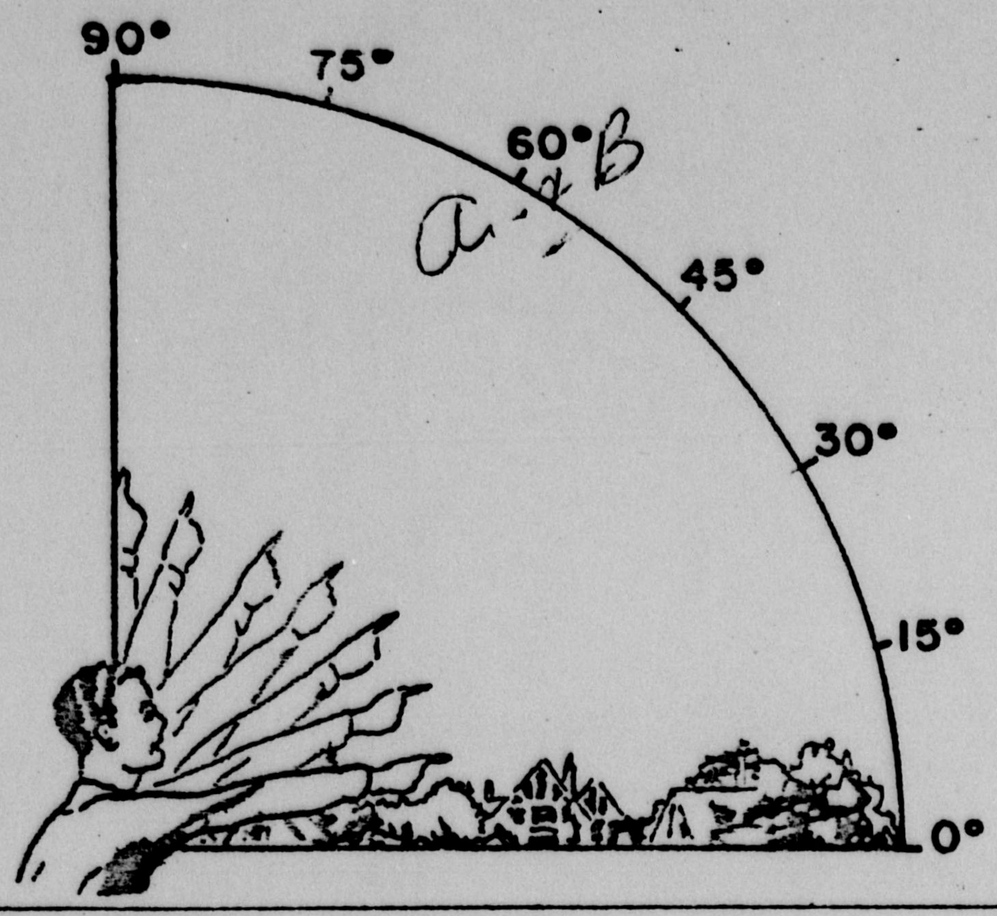

25. Did you observe the object through any of the following?

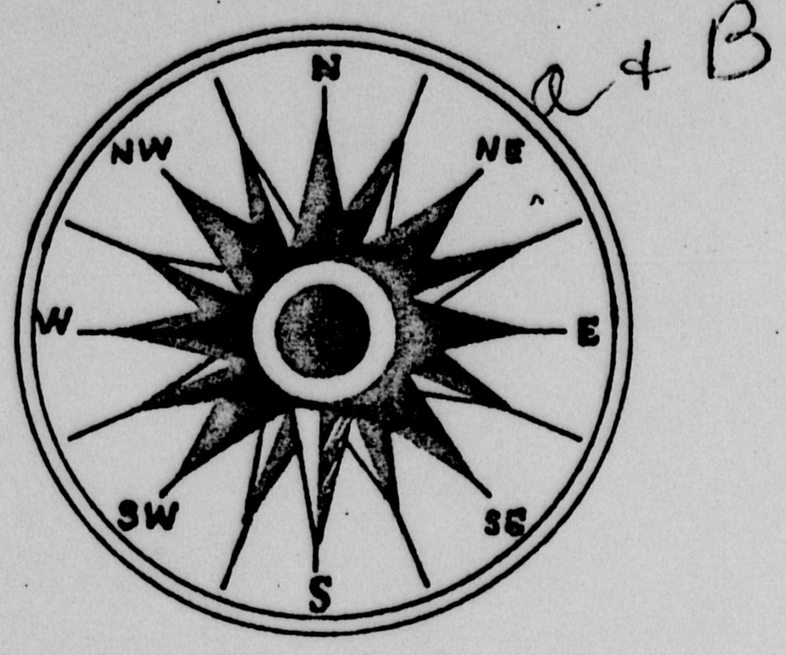

a. Eyeglasses	Yes	(No)	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	Yes	(No)	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It looked like a large dinner plate, the face of it looked like a clock

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

Did not move

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No

31. Was anyone else with you at the time you saw the object? (Circle One) (Yes) No

31.1 IF you answered YES, did they see the object too? (Circle One) (Yes) No

31.2 Please list their names and addresses:

My husband — [redacted]
Arlington, West Va 22202

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS [redacted] (Street) Arlington (City) 22202 (Zone) Virginia (State)

TELEPHONE NUMB [redacted] AGE 70 SEX Female

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object? To Pentagon

July 31 (Day) July (Month) 1966 (Year)

34. Date you completed this questionnaire: Monday 15th August 1966
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

Arlington, Va 31 July 66

FTD (TDETR) /1+L
Wright-Patterson AFB, Ohio 45433
11 August 1966

Mrs. [redacted]
Arlington, Virginia 22202

Dear [redacted]

Reference your unidentified flying object report of 31 July 1966. The only indication of azimuth and elevation of the alleged UFO was given as just above the morning star. Assuming Venus to be the morning star, the planet was rising on an azimuth of 75° degrees and at 0400 EST was at an elevation of 18 degrees.

Request you complete the enclosed FTD Form 164 and enclose a sketch of the alleged UFO in relation to the morning star.

Your cooperation is appreciated.

Sincerely,

HECTOR QUINTANILLA, Jr, Major, USAF
Chief, Project Blue Book

We are sending the following information to you in case it should check with other information you might receive concerning this sighting. Mr Van Hook states that he has no opion as to what this object might have been.

DATA:

Place of sighting********** Marion, Indiana

Time of Sighting********** 2305 E. S. T.

Date of sighting********** 6 July 1966

Direction of sighting ********** 270° Azimuth

Sky conditions********** Cloudless and full moon

Position of viewing********** Inside of house thru an open 3 ft. window

Direction of motion********** East to West in an arcing path

Length of viewing********** Approx. 1/4 sec in view from the left side of the window to the right side of the window.

Speed of the object********** Unknown

Size of object********** Oval with a projection on one side, length over minor diameters appeared to be equal to the dia. of the moon that nite.

Color********** White with a bluish border fringe.

This information may or may not be of any information to you, but I felt it my duty to make this report to your office....

Sincerely yours

34. Date you completed this questionnaire: 19 (Day) February (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

We were on a camping trip that night. I noticed a pulsating ~~star~~ object ~~that~~ and called Bennie's attention to it. We also noticed that it was blinking in series red, yellow, blue and green. We began looking and saw about 10 such objects (the reason that I didn't include these is that they were quite far away) This was at 11:00 P.M.. ~~and~~ We tried to signal one with a flashlight (We wanted to try for a contact). After about 10 minutes of signaling We gave up. A little while later we noticed several of these objects moving into a position which seemed to circle us. At about 2:30 A.M. we saw some of these take off. They would be standing still then all of a sudden they would take off.

They would leave a white trail behind them about ~~2~~ inches long (in comparison) and then just disappear. From this factor I

think that I light, (they h that they would up instead of do nothing else - down and wat Roney Houle ju We looked and a U.F.O. we - a small stre about 75 ft and The object came ~~a~~ 5 ft higher th side of the stre when it was ab started to come d 100 yards and positions, mean circle until I believe we co had thought of know where and went to sle last ~~of~~ these is

Force UFO form continued

Page 7

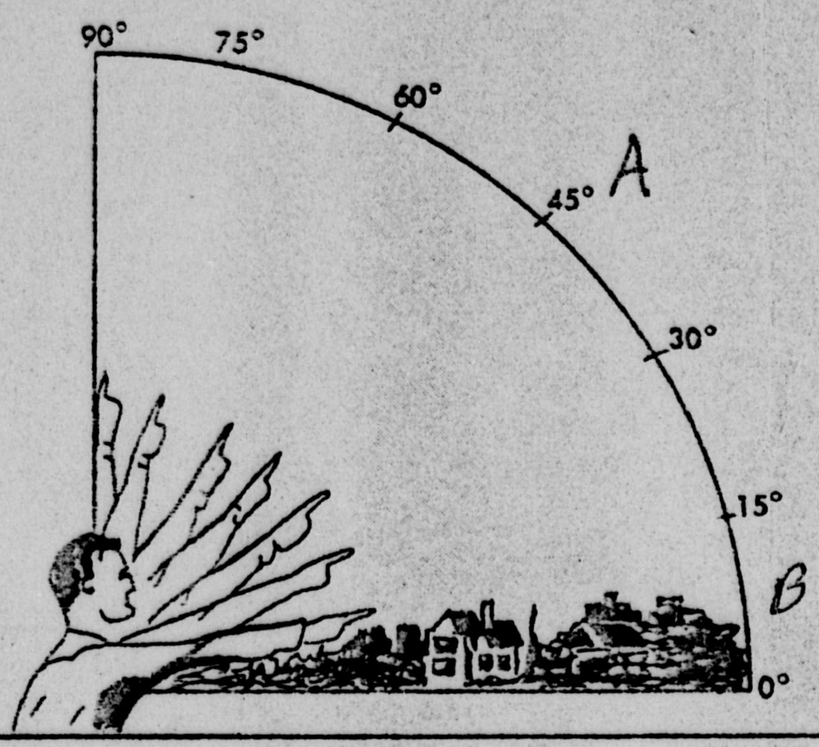

Page 8

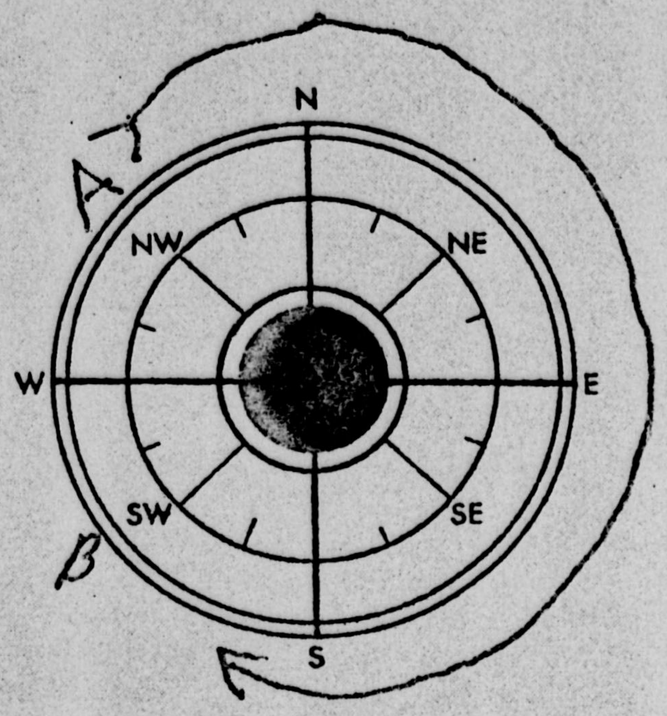

think that they probaly passed the speed of light. (They looked somethings like meteors except that they would be standing still and they were shoted up instead of down.) At about 3:30 we decided nothing else was going to happen so we lay down and watched them take off. At about 3:45 Nancy Noble pointed to the sky and said "look!"

We looked and there coming straight toward us was a U.F.O. We were camped on a bluff overlooking a small stream. from us to the other bank was about 35 ft and the bluff was about 40 ft. high. The object came straight toward us it leveled off about 2 or 3 ft higher than us (laying down) and on the other side of the stream and started circling around us when it was about halfway around there other objects started to come down to. They came within about 100 yards and then retreated to their original positions, meanwhile the first continued to circle until we lost sight of it behind the trees. I belive we could have made contact that night if we had thought of yelling or trying someway to let them know where we were. After that we went to bed and went to sleep. About 2 miles East there is a high tension power line.

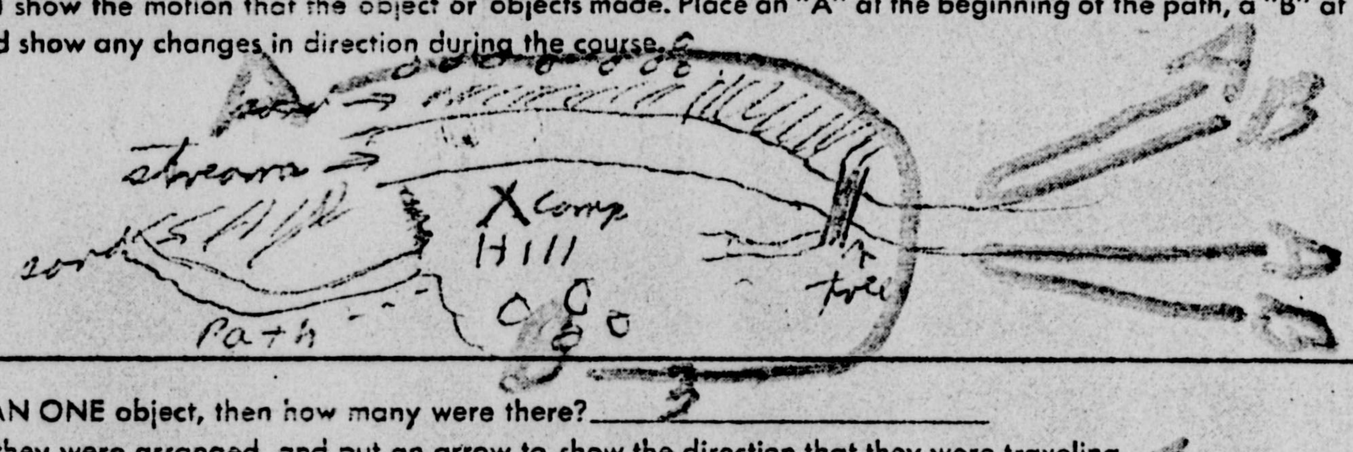

Official U.S. Air Force UFO form c

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

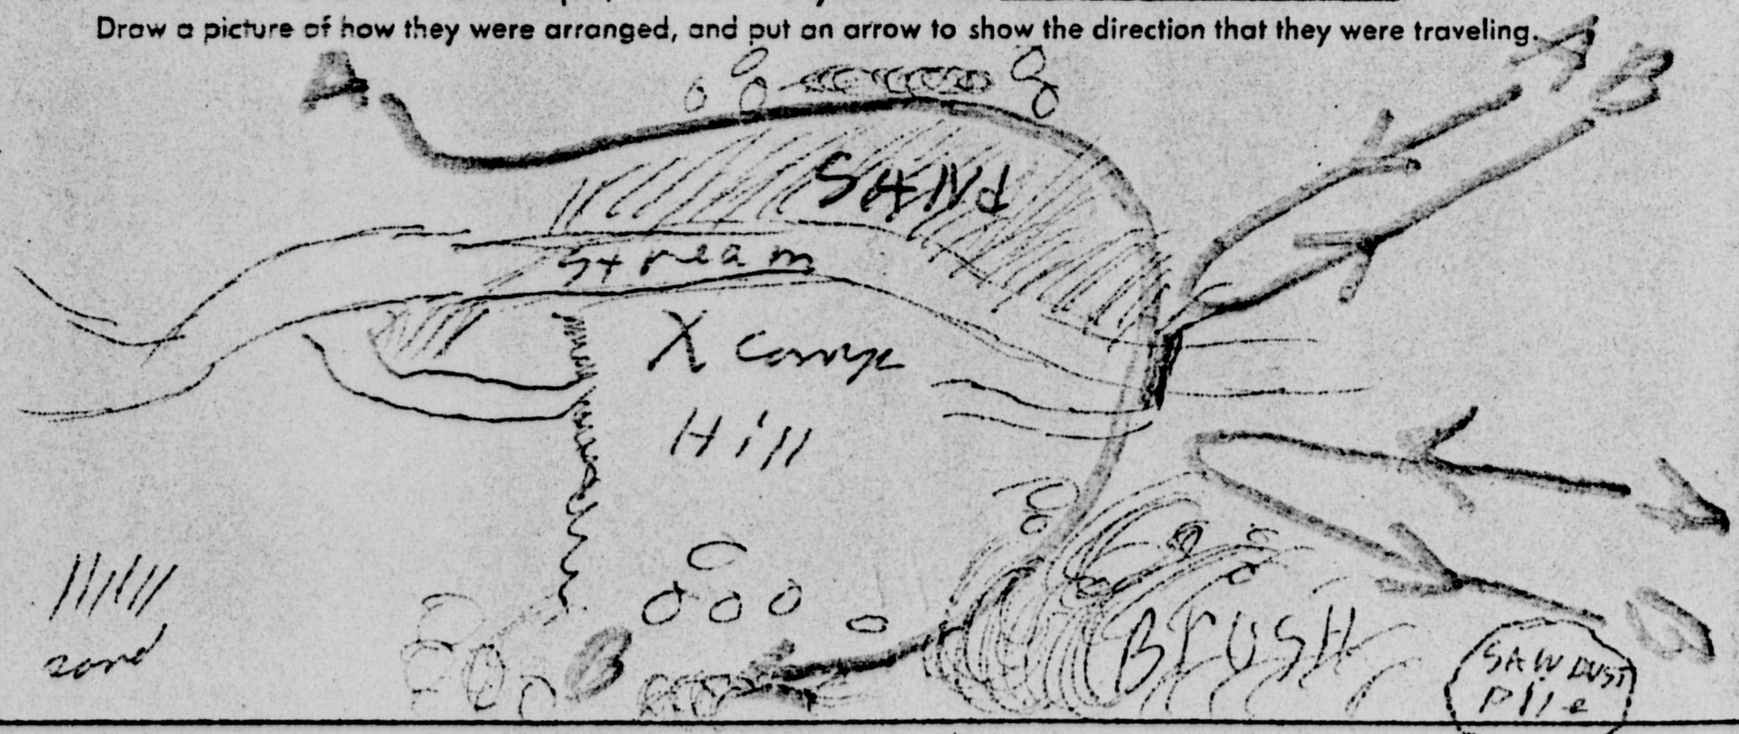

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there?_____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

KANE REPUBLICAN 22 JULY

UFO Hovers In Sky Here Last Night

Large Object, Close To Hilltop, Viewed Over Half-Hour

Last night a huge circular object with a bright white light — and flashing red lights—hovered over a Greendale Road area two miles east of Kane for more than a half hour before streaking away at an incredible speed. This has been verified by five persons who watched the UFO. As it flashed away, other Kane residents were attracted by the light—thinking they saw a meteor.

Last night at 9:45 o'clock, three Kane young men, Robert Holland, Pat Scutella and Harold (Corky) Haight, were driving a jeep on the road connecting Route 321 with the Greendale Road via the "Waterworks."

. . .

This is their story:

They saw a bright light ahead as they drove onto the Greendale Road. They turned off the jeep lights and motor to note a large round object "close to the ground," hovering in a fixed position. They watched it several minutes—noting flickering or flashing red lights at the edge. The object began moving, almost an undulating movement, rising and lowering—soundless.

Not trusting their own eyes, they drove to the home of Mr. and Mrs. Ron Peterson on the old Smethport Road where the Peterson family came out and watched the object. The Peterson children also watched the object — and were frightened.

They observed the "bright light" of the object for some minutes. There were sounds of a jet plane approaching and the object, which had been rising and lowering slowly, became "jerky in movement" and suddenly flashed away with with meteor-like speed "toward the moon."

The young men came into Kane sub station of State Police to report their experience to Sgt. John Dussia and Corporal Murray. A description was drawn—agreed by all observers. Sgt Dussia said it matched previous UFO reports.

Authorities are convinced the youths saw "something."

A check with Greendale Road residents revealed that two residents saw an unusual red light in the sky three weeks ago.

As the several Kane residents agree on what they observed—to minute details — it is expected others who have seen the objects will report their sightings.

But, as they all agreed, "We could hardly believe our eyes—and how can we expect others to believe what we saw? We do not know what we saw ourselves."

JUN 16 1967

Dear [redacted]

This will reply to your letter of June 7th reporting your unidentified flying object (UFO) sighting.

We appreciated learning of your unusual experience and will file your letter for information puposes. At this late date, it would be impractical to undertake a detailed investigation. It is important that a witness report his observation as soon as possible to the nearest Air Force installation. This enables Air Force analysts to perform a comprehensive investigation.

What you saw was obviously unfamiliar to you. We define a UFO as an aerial phenomenon or object which is unknown or appears out of the ordinary to the observer.

A copy of the report on Project Blue Book is inclosed. I am certain it will be useful to you.

Sincerely,

BARNETT B. YOUNG, Lt Col, USAF
Civil Branch
Community Relations Division
Office of Information

Dear [redacted], This will reply to your letter of June 7, requesting your unidentified object (UFO) sighting. We appreciate learning of your unusual experience and will file your letter for information purposes. At this late date, it would be impractical to undertake a detailed investigation. It is important that a witness report his observation as soon as possible to the nearest Air Force installation. This enables Air Force ~~analyst~~ analysts to perform a comprehensive investigation

What you saw was obviously unfamiliar to you. We define a UFO as an aerial phenomenon or object which is unknown or appears out of the ordinary to the observer.

~~Thank you for your~~

~~letter~~ A copy of the report on Project Blue Book is enclosed. ~~I~~ I am certain it will be useful to you.

Sincerely

Dear Sirs, June 7 ([redacted] 1962)

My name is [redacted] + I am seventeen yrs. old and I would like to tell you about my experience with three U. F. O's. Last July 26, 1966 I went out to call my brother to come + eat supper. when I looked up in the sky toward the lake, I always have a bad habit looking up at the sky to see what kind of a day its goning to be when I saw three objects that looked oval shaped + was very shiny like a quarter in the sun. Well I noticed they had no wings + no tail + they moved up + down + across like they were playing jump the frog. Well I was fastinated by then ~~at~~ I thought they were helicopters but I realized they had no sound. + went out of formation like a square is shaped. It was about 3 P.M. + the sky was clear they were 100 ft from me + were up about 1 mile. Then 2 wks later I saw a green light coming toward me + I thought it was a lightning bug but well

I got scared because it was a big round ball that kept bouncing up + down moving from side to side + went around me + went up straight into the sky. My girlfriend A.F + I saw it together. Well I would like you to find out if I have some kind of thing with them I mean why should I see them + other people cannot? Why am I fortunet to see them. I want to get in contact with M[redacted] from another galexy. but I try + nothing happens I think real hard but I cant get contact with him, Oh well I hope I didnt take up all your time so I'll go now.

Sincerly, Yours
[redacted]

P.S. Write
Back
Soon

P.S. I belive in U.F.O's + Im a very religous person.

July 30, 1966 [redacted]

Tyler, Texas, 75701

Sir -

Over some 50 yrs. I've viewed the moon with awesome admiration. My bifocals are X3, made in Japan some 40 yrs. ago. (I took the rt. small eye piece, put it face down on the large left eye piece and secured it with tape) and this is some of my views. What am I seeing? Reflection of my own eye sighter? No.

My point of focus is the moon.

If I am seeing my own eye pupil then it is indeed a remarkable discovery to me, and would call for more writing than I care to do at this time.

I can name a few things, I am not. I am not an astronomer, an artist OR neurotic and I have this in print.

Now for my letter. I begin to view the moon about 7:15 p.m. & I marvel at it being bright so early in the p.m. No. 1 & 2 were viewed near 10 p.m. at the same time = no reflection, ~~I~~ because I saw to it, there was none. By another

planet, it is closer than earth to the moon. My last account of ♀ is June 30, 1966 4° ♌, (& for July 29, ♁ is leaving ♎). The big black spot was near ¼ of the moon's area. No 3. The moon dimmed out, spinned, to barely visible, then returned to No. 4, to something similar to sea sponge or silvered metal, it glistened but not a glow. It returned to a state similar to no. 3 again, & returning to no. 5, with about a ¼ of it missing. No. 6, 7, 8, 9, & 10 are views at other hrs. on the 27th 28th and 29th. No. 11 is my view of a "glow ball" & could be a tornado eye. No. 12, A full moon, with valcano or water sprout action being struck by nimbus-Cubmulus Clouds, Feb. 5, 1966. (by black, billowy, rolling clouds).

I have never read or heard of the moon having any other changes other than the by monthly that we are so acquainted with, but I believe it is one that we have been missing over many centuries.

Thank You for your time, I am

Respectfully

M L [redacted]

Washington, D.C., 20330

Dear Sir:

Monday, Aug 1, 1966, 9:P.M.

ooo an object like a 2. mag. star went east, about 90° A. & in the south east, and seemly some 25 to 28,000 ft. alt., more of a floating action, than a sail. No signals flashed. You have my notes mailed Aug. 1st., and I have a number more, in fact, too many to attempt to discribe in a letter. If you have an address in Tyler that I might visit, and tell my findings to, it would be very enlightening both ways. I've lived in Tyler some 57 yrs. just a plain old human being with good intentions, I will assure you.

By the way, sir, that "missing part" from the D is still gone (D)

over, Please.

Major H. Quintanilla Jr.,
Project Blue Book,
Wright - Patterson AFB.,
Dayton, Ohio,
USA.

Dear Sir,

On Sunday July 31st /66 at 1 30 am at a point in Northern Ontario (latitude 46° 02'; longitude 80° 49') an object was spotted traversing the sky from south to north at approximately satellite speed (1E; an angle of about 30° was traversed in approximately 5 minutes). It was observed to be generally heading towards the North star (Polaris) when it appeared to slow down and subsequently change course to a due east. The slowing down phenomena was clearly a result of the curvature in the flight path as the object was changing course. After changing course, the object was visible for only about 1 to 2 minutes.

Because of the altitude or smallness of the object, no details were observed of its structure or shape, even though it was observed through binoculars. The sky was exceptionally clear that evening and as a result, many stars were visible. No luminous tail was observed on this object and no audible sound could be detected. It possessed brightness of the same intensity as an Echo satellite for example, or a very close star. The brightness did not vary and no

I appreciate the fact that the object may have been a very high altitude ~~the~~ aircraft, although the speed with which it traversed the sky and the absence of any sound lead me to suspect otherwise. Be that as it may, I felt that this observation (made by my three adult companions and myself) might possibly be of interest to you. Since you have access to flight paths of balloons, aircraft, satellites etc I felt perhaps you might offer an explanation to us. If I can be of further assistance to you regarding this matter, I shall be happy to do so.

Sincerely,

[redacted]

TEL. MELROSE 5-0310

I appreciate the fact that the object may have been a very high altitude jet aircraft, although the speed with which it traversed the sky and the absence of any sound led me to suspect otherwise. Be that as it may, I felt that this observation (made by my three adult companions and myself) might possibly be of interest to you. Since you have access to flight paths of balloons, aircraft, satellites etc I felt perhaps you might offer an explanation to us. If I can be of further assistance to you regarding this matter, I shall be happy to do so.

Sincerely,

[redacted]

Dear Sir,

On Sunday July 31st /66 at 1 30 am at a point in Northern Ontario (latitude 46° 02'; longitude 80° 49') an object was spotted traversing the sky from south to north at approximately satellite speed (ie; an angle of about 30° was traversed in approximately 5 minutes). It was observed to be generally heading towards the North Star (Polaris) when it appeared to slow down and subsequently change course to a due east. The slowing down phenomena was clearly a result of the curvature in the flight path as the object was changing course. After changing course, the object was visible for only about 1 to 2 minutes.

Because of the altitude or smallness of the object, no details were observed of its structure or shape, even though it was observed through binoculars. The sky was exceptionally clear that evening and as a result, many stars were visible. No luminous tail was observed on this object and no audible sound could be detected. It possessed brightness of the same intensity as an Echo satellite for example, or a very close star. The brightness did not vary and no

Dear Allen,

Here is an interesting case which I think needs further investigation. If you, o[redacted], could check this out, I would appreciate it. Please forward your reply so that I may base my answer on your evaluation.

Sincerely,

HECTOR QUINTANILLA, Jr, Major, USAF
Chief, Research and Aerial Phenomena Division
