One object remained stationary while the other traveled toward the west. One object disappeared behind some trees in the western sky. Objects became dimmer and faded from view. Various colors were noted. One description is consistent with that of an aircraft, while the other is consistent with that of an astronomical sighting if said object actually remained stationary. This is the fifth sighting reported by the observer since the last of March. It appeares that observer reports anything he sees in the sky.

Dear Sir:

On Sept. 15th last I wrote to Al Schottelkotte of the Scripps-Howard Broadcasting Co. Cincinnati Ohio. about what I saw in the sky on the night of Aug. 24th 66, asking him to direct me to some one interested. Mr. [redacted] told me to write to you. I am sending the drawing to you. As shown when I first saw it the moon was clear, (1) and in (2) the shadow was on, and in (3) the angle of the light shafts had changed as shown and were fading out. At that time they were taking pictures of the moon, via satellite. Did that have anything to do with it. Thanking you for any help I am sincerely Yours

12. GIVE A BRIEF DESCRIPTION OF THE PHENOMENON, INDICATING WHETHER IT APPEARED DARK OR LIGHT, WHETHER IT REFLECTED LIGHT OR WAS SELF-LUMINOUS AND WHAT COLORS YOU NOTICED. DESCRIBE YOUR IMPRESSION OF WHETHER IT WAS SOLID OR TRANSPARENT, WHETHER EDGES WERE SHARP OR FUZZY. DESCRIBE THE SHAPE OR INDICATE IF IT APPEARED AS A POINT OF LIGHT. INDICATE COMPARISONS WITH OTHER OBSERVED OBJECTS, LIKE STARS, A LIGHT OR OTHER OBJECT IN YOUR FIELD OF VIEW.

Very large, bright light. Definite self-luminous & orange color. Solid & had edges that, because of brightness of light, appeared fuzzy. It was circular or possibly oval (slightly). It appeared as a very large point of light. Can't think of anything to compare it with. Quite unlike anything I have seen before.

14. WHAT DREW YOUR ATTENTION TO THE PHENOMENON?

Ile brightness. It was
just starting my car & glanced out the right
front window. It was unmistakably the
brightest thing in the sky.

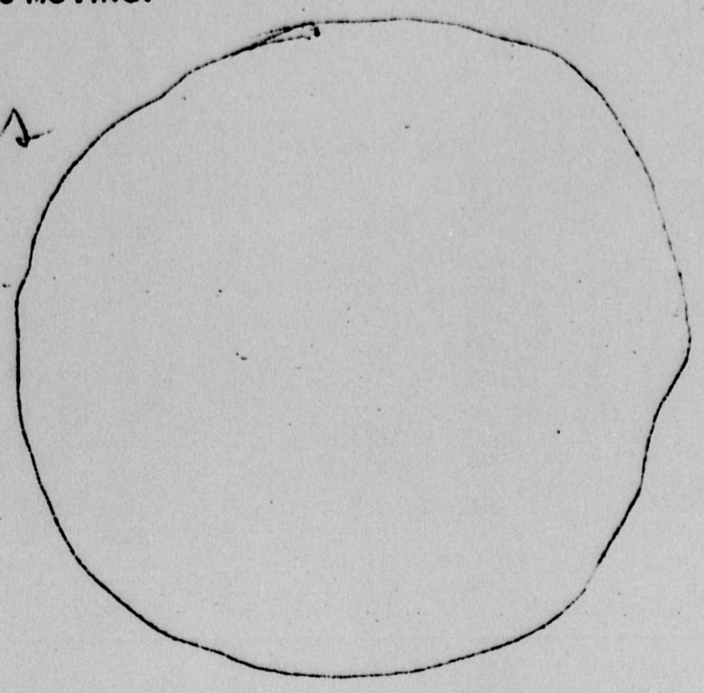
A. HOW DID IT FINALLY DISAPPEAR? Its irradic movement, generally
downward, it moved to the left & descended
behind a large hill. Ile departure time
took no more tha— 1 or 2 seconds.

B. DID THE PHENOMENON MOVE BEHIND OR IN FRONT OF SOMETHING, LIKE A CLOUD, TREE, OR BUILDING AT ANY TIME?
☑ YES ☐ NO. IF "YES," DESCRIBE.

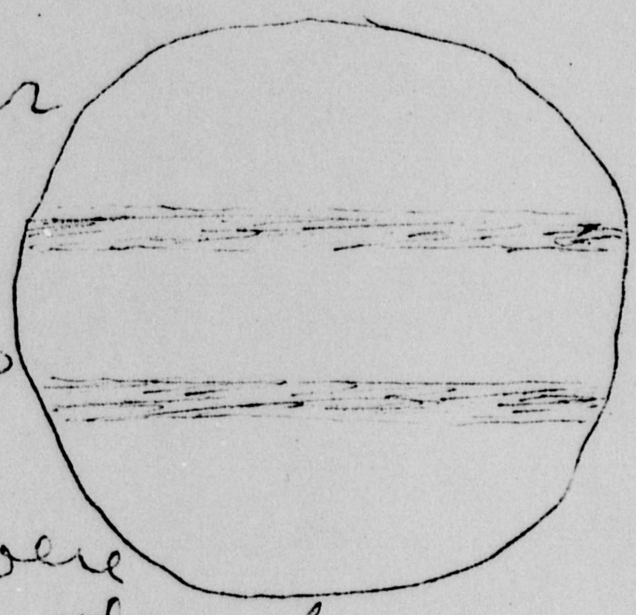
A tree, or trees actually.
Ile trees cover Ile top of a hill

15. DRAW A PICTURE THAT WILL SHOW THE SHAPE OF THE PHENOMENON. INCLUDE AND LABEL ANY DETAILS THAT MIGHT HAVE APPEARED AS WINGS OR PROTRUSIONS, AND INDICATE EXHAUST OR VAPOR TRAILS. INDICATE BY AN ARROW THE DIRECTION THE PHENOMENON WAS MOVING.

Bright light as observed with naked eye.



I had binoculars in car & when I looked at object through them it appeared as though there were two dark lines. These were quite apparent with the glasses.



16. WHAT WAS THE ANGULAR SIZE? HOLD A MATCH AT ARM'S LENGTH IN FRONT OF A KNOWN OBJECT, SUCH AS A STREET LAMP OR THE MOON. NOTE HOW MUCH OF THE OBJECT IS COVERED BY THE HEAD OF THE MATCH. NOW IF YOU HAD BEEN ABLE TO PERFORM THIS EXPERIMENT AT THE TIME OF THE SIGHTING, ESTIMATE WHAT FRACTION OF THE PHENOMENON WOULD HAVE BEEN COVERED BY THE MATCH HEAD.

Possibly three-quarters would have been covered.

17. DID YOU OBSERVE THE PHENOMENON THROUGH ANY OF THE FOLLOWING? INCLUDE INFORMATION ON MODEL, TYPE, FILTER, LENS PRESCRIPTION OR OTHER APPLICABLE DATA.

	EYEGLASSES		CAMERA VIEWER
	SUNGLASSES	✓	BINOCULARS Tasco - 8x40 mm - 502 at infinity yds. (coated optics)

A. DO YOU ORDINARILY WEAR GLASSES? ☐ YES ☒ NO

B. DO YOU USE READING GLASSES? ☐ YES ☒ NO

18. WHAT WAS YOUR IMPRESSION OF THE SPEED OF THE PHENOMENON? GIVE ESTIMATE OF SPEED 200 mph.

19. WHAT WAS YOUR IMPRESSION OF THE DISTANCE OF THE PHENOMENON? GIVE ESTIMATE OF DISTANCE 3/4 - 1 mile

20. IN ORDER THAT WE MAY OBTAIN AS CLEAR A PICTURE AS POSSIBLE OF WHAT YOU SAW, DESCRIBE IN YOUR OWN WORDS A COMMON OBJECT OR OBJECTS WHICH, WHEN PLACED IN THE SKY, SIMILAR TO WHERE YOU NOTED THE PHENOMENON, WOULD BEAR SOME RESEMBLANCE TO WHAT YOU SAW. DESCRIBE SIMILARITIES AND DIFFERENCES BETWEEN THE COMMON OBJECT AND WHAT YOU SAW.

The sun, if it were somewhat smaller would have given roughly the same effect except that the phenomenon was slightly oval ○ on the vertical axis. It was not sun reflection through the clouds.

21. DID YOU NOTICE ANY ODOR, NOISE, OR HEAT EMANATING FROM THE PHENOMENON OR ANY EFFECT ON YOURSELF, ANIMALS OR MACHINERY IN THE VICINITY? ☐ YES ☒ NO. IF "YES," DESCRIBE.

A. DID THE PHENOMENON DISTURB THE GROUND OR LEAVE ANY PHYSICAL EVIDENCE. ☐ YES ☒ NO. IF "YES," DESCRIBE.

It did take two other people to the area where I thought it may have landed (if it landed). The area was wooded & we found nothing on that night or the following day when I went on foot through the woods.

22. HAVE YOU EVER SEEN THIS OR A SIMILAR PHENOMENON BEFORE? ☒ YES ☐ NO. IF "YES," GIVE DATE AND LOCATION. The other sighting was in California - 1965 - in the San Angeles mountains. Much to anticipation to even suggest the possibility of U.F.O.

23. WAS ANYONE WITH YOU AT THE TIME YOU SAW THE PHENOMENON? ☐ YES ☒ NO. IF "YES," DID THEY SEE IT TOO? ☐ YES ☐ NO.

A. LIST THEIR NAMES AND ADDRESSES

At the time I was a College student working for Great Lakes Canning Co. as Pest Control supervisor for acreage in my home town of Prophetstown. I am a pilot & therefore have the basic knowledges of Meterology & viewing aircraft identification. I am quite up on the various types of American aircraft in use today. I have always carried a set of binoculars in my car. I am not prone to claim something different as what has come to be called U.F.O! unless I have eliminated everything within my scope of knowledge. What I saw I can't explain away as anything but U.F.O.

25. WHEN AND TO WHOM DID YOU REPORT THAT YOU HAD SIGHTED THIS PHENOMENON?

NAME Project Blue book DAY Appx 22 MONTH Nov. YEAR 67

26. DATE YOU COMPLETED THIS QUESTIONNAIRE.

DAY 26 MONTH Dec YEAR 67

For the sake of clarity, I am putting the last question on your questionnaire on a type written sheet. This is what I saw--to the best of my knowledge.

The date, August 16,1966, is an estimation which I believe comes rather close to the actual date of the sighting of the phenomenon being reported. If it appeares that this sighting could be of any signifigant help to your deptartment, I can go back through company records and get the exact date. I seems like it was on the sixteenth.

I was working for Green Giant Canning Co. (as [redacted]) in my hometown of Prophetstown, Ill. in the summer of 1966. On the particular night of the sighting of this incident, I had just completed a spraying job on some beans. I finished the job, drove the tractor and sprayer into Prophetstown, and bummed a ride back to the field to retrieve my car. The car was sitting directly behind the farm house--about 50 yards behind-- and because of the hour(between 9:30-10:00 P.M.) I had my ride drop me off on the highway so that I would not wake the farmer by making his dogs bark. I jumped the fence and ran through the bean field to my car. The car was facing south. I got in and started the engine. Then I glanced out the far right front window and saw a very bright light 15 to 30 degrees above the horizon and to the west of me. I shut off the car and pushed the button that rolled dowm the window. I could see, by watching it from this position, that it was not moving(or at least not at 90 degree angles to my position. I thought that whatever it was, it might be moving directly toward me and therefore I would eventually see it lift higher above the horizon. I pulled my binoculars from under my car seat and got out to get a better fix. I checked constantly for movement directly at me and there was none. I looked at with my field gasses and when I finally got them into exact focus, I could see two horizontal lines running parallel to each other, evenly spaced on the circular light. I could not see the lines without the glasses. I checked and rechecked positions relative to the ground etc. in order to get an approximate size and location. I finaly guessed. It appeared to be 30-50 feet in diameter and about one mile away. This is just a guess. I can't really say for sure because everything seems to change at night. After watching it sit motionless in the sky for what seemed to me to be about five minutes , it seemed to drop,shoot to my left, drop again, shoot to the left agin and then finaly go below the horizon probably four or five hundred yards from where it had been resting motionless. That was the last I saw of it.

Whatever it was it had mass. It was quite close to me and I have very good eyes. It was quite strange and to me, unexplainable. The reason I am reporting this now is,because,through an article I read a couple of weeks ago I learned that there were numerous sightings on that particular night in August . This is one more.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I first saw it (near the star - Sadr - in the constillation of Cygnus - looking thru my 6" reflecting telescope with a 55 power eyepiece) at approximately 20 hours, 19 mins., - in Right Ascension, and plus 38 degrees 50 mins. - in Declination. Using the 1950 Coordinates, of the (Atlas Borealis Maps, by Dr. Antonin Becvar, Czechoslovak Academy of Science, Published in the United States by Sky Publishing Corporation, Cambridge, Massachusetts.)

It was traveling in a West - North West, direction. I know that there is no satellites that travels in that direction. If it did, it was moving too slow and it would have fallen out of its orbit and burned up in the Earth's Atmosphere.

I know it wasn't an asteroid, because there is none that orbit the sun in that direction that I know of and that no one was to pass by the constillation of Cygnus in that mouth, and beside it was traveling too fast for an asteroid.

I know that it wasn't a meteor, because it was moving too slow and for a meteor to be seen, it must be going into the atmosphere, which it wasn't. So I ask you (WHAT DID I SEE).
