ETD (FB 62 0-329 (TDF) Previous editions of this form may be used.

DATE 16 Sept 66

UFO REPORTS

1. IDENTIFICATION OF OBSERVER(S):

a. Name [redacted]

b. Addr[redacted]t., Hawthorne, Calif.

c. Phone [redacted] Age 28 Occupation Housewife

d. For Military Only: Grade _____ Duty _____ Organ. _____

2. DESCRIPTION OF THE OBJECT(S):

a. Shape nose cone

b. Size 50 times larger than airplane

c. Color white light - no glow on outside

d. Number 1 Formation, if more than one _____

e. Discernible features or details no glow on outside

f. Trail or exhaust and size _____

g. Sound no sound

h. Other pertinent or unusual features _____

3. DESCRIPTION OF COURSE OF OBJECT (S):

a. What called your attention to the object? Son called attention to it

b. Elevation & heading when first seen about as high as an airplane

c. Elevation & heading upon disappearance _____

d. Maneuvers, if any None

e. How did they disappear? (instantaneously to the North, etc) _____

Straight to the south

f. How long were they visible? 10 seconds

4. MANNER OF OBSERVATION:

a. Statement as to optical aids, telescopes etc. None

5. DATE AND TIME OF SIGHTING:

a. Zulu time-date group of sighting 0440 Z 16 Sep 66

b. Light conditions, Night, Day, Dawn or Dusk night

c. Location of observer(s)

d. Weather conditions Clear

6. PHYSICAL EVIDENCE:

a. Photographic (Still or Motion pictures)

b. Type & make of camera

c. Type, focal length, and make of lens

d. Brand & type of film

e. Shutter speed used

f. Lens opening used ("f" stop)

g. Filters used

h. Was tripod or solid stand used

i. Was "panning" used

j. Direction camera was pointing with relation to true North and its angle with respect to the ground

k. Would you be willing to let the AF have the pictures and/or negatives?

7. DUTY CONTROLLER INFORMATION:

a. Controllers name and grade

b. Date-time of this report

DATE 16 Sept 66

UFO REPORTS

1. IDENTIFICATION OF OBSERVER(S):

   a. Name [redacted]

   b. Address [redacted], Los Angeles, Calif.

   c. Phone No. [redacted] Age 27 Occupation Designer

   d. For Military Only: Grade _____ Duty _____ Organ. _____

2. DESCRIPTION OF THE OBJECT(S):

   a. Shape Front area swept wing - 2 small spots in fuselage area

   b. Size Difficult to determine

   c. Color Silver - not metallic - gloved

   d. Number 1 Formation, if more than one _____

   e. Discernible features or details _____

   f. Trail or exhaust and size Trail about twice as long as body

   g. Sound No sound

   h. Other pertinent or unusual features _____

3. DESCRIPTION OF COURSE OF OBJECT (S):

   a. What called your attention to the object? Bright Light

   b. Elevation & heading when first seen 3/4 miles high going east southeast

   c. Elevation & heading upon disappearance same

   d. Maneuvers, if any None - straight

   e. How did they disappear? (instantaneously to the North, etc)

   Disappearing trail - like disappearing into clouds

   f. How long were they visible? 8 or 9 seconds

4. MANNER OF OBSERVATION:

a. Statement as to optical aids, telescopes etc. None

5. DATE AND TIME OF SIGHTING:

a. Zulu time-date group of sighting 0500 Z 16 Sep 66

b. Light conditions, Night, Day, Dawn or Dusk night

c. Location of observer(s) at home in west Los Angeles

d. Weather conditions Clear

6. PHYSICAL EVIDENCE:

a. Photographic (Still or Motion pictures) None - did make a sketch

b. Type & make of camera

c. Type, focal length, and make of lens

d. Brand & type of film

e. Shutter speed used

f. Lens opening used ("f" stop)

g. Filters used

h. Was tripod or solid stand used

i. Was "panning" used

j. Direction camera was pointing with relation to true North and its angle with respect to the ground

k. Would you be willing to let the AF have the pictures and/or negatives?

wE will let AF have dopy of sketch

Bryan, Ohio
Nov 17-67

Dear Sir

Bryan, Ohio is about 180 mi N of Dayton, Ohio.
I clipped these articles of the Tol & Bryan papers.
I have read about all there is printed about flying
saucers around. Last fall I got some good stories around
Hamilton, Indiana about strange things on the RR tracks
and 1 man said he saw 1 flying saucer go down in the woods
Blaine Wantler and I saw something that looked like
a glowing light moving very fast in the nite sky. We
were very excited for a while because it was not usual.

If you are interested in talking to some of these people
I will give my cooperation

Sincerely yours

[redacted]

BRYAN TIMES

Officers Report Seeing Unidentified Flying Object

Law enforcement officers from five different departments kept their eyes skyward early this morning as they watched an unidentified flying object that appeared in the area.

The Williams county sheriff's department was notified of the object's presence at 4:26 this morning when officers of the Indiana State Police told them they had spotted the object in their state and were following it along Route 20 when it appeared to cross the state line.

Paul Snivley, night desk man at the sheriff's department, notified both the Montpelier and West Unity police departments and they continued the watch. Both Remi Vanhaerents of Montpelier and George Robinson of West Unity reported seeing the object.

Both officers stated the object gave off a bright light and appeared to be about the size of a basketball. They stated it hovered overhead for between 25 minutes and three-quarters of an hour and then moved in a southeasterly direction.

Robinson stated he notified his wife of the object and she reported seeing it as late as 7:00 this morning and it didn't disappear until daylight.

According to the county sheriff's radio log, officers of the Fulton county sheriff's department and in Defiance county also reported the sighting. The Defiance officers stated that the object appeared to be hovering over Kingsbury Park in that city.

According to local authorities an attempt by officials at the Toledo Express airport failed to detect the object's presence on radar.

UFO Is Reported In Ohio, Indiana

TOLEDO BLADE

Police Say Object Tracked Many Hours

From The Blade Correspondent

MONTPELIER, O.—Police agencies in two states observed an unidentified flying object for several hours early this morning as it traveled from Indiana into northwestern Ohio.

Several observers described it as "round, brighter than the moon, and as big as a basketball." It was still visable at 7:15 a.m. southeast of here, according to Remi VanHaerents, Montpelier police officer.

The Williams County sheriff's department dispatcher was notified of the object by Indiana state patrolmen at 4:26 a.m. Indiana authorities reported that they had tracked it across the state.

Police officers from Williams and Fulton County departments along with private citizens obobserved the object. Local police from West Unity, Montpelier, and Stryker also saw it.

Observers said that the object moved up and down and back and forth. It was "quite high" according to Officer VanHaerents, and moved higher after dawn.

The object was not recorded on radar at Toledo Express Airport.

Dear Mr [redacted]

This replies to your recent correspondence concerning your observation of an unidentified flying object (UFO) last fall. Your sighting will be filed for information purposes only since, at this late date, a meaningful scientific investigation is not possible.

Without essential information such as flight characteristics, angular velocity, weather conditions, I am hesitant in making any kind of explanation. It is important that an individual report his observation as soon as possible to the nearest Air Force installation.

Thank you for your interest in the Air Force UFO program.

Sincerely,

BARNETT B. YOUNG

Gentlemen:

I write you long hand because I do not want anyone to know, except you, of this incident.

Last fall, the day of the Syracuse University - Florida State football game, my two sons and I were driving north on Route #81 from my home in Tully. I was sitting in the rear seat, my two sons in the front. We were talking about the game and about deer hunting. Conversation was somewhat animated. It was about 2:30 PM.

After awhile, whereas we were about at Nedrow, I noticed some odd objects

in the sky ahead of us and, it seemed to me, directly over north Syracuse. Having been an AAA officer I idly speculated, almost sub-consciously, that they were AA bursts. Suddenly I realized that they could not be AA bursts. The objects were large, smoke-gray, and moving slowly in a sharp bend from south back to north and in line. They also were tilting East and West. As they tilted one way they were fairly plainly seen. As they tilted back the other way they became almost invisible.

Realizing this in a very brief

space of time, I called out, "Look Look there! Look at that!" The boys naturally looked at the hillsides for deer, at the road for "hot" cars etc. They could not see that I was painting. By the time they checked with me the road had bent, we were behind a hill mass and when the North was no longer obscured from view we could not see the objects. Anyway, a modern car certainly limits view of the sky.

My two sons did not see the objects I excitedly described to them

The objects were somewhat the

shape of a derby hat. They were by my judgment perhaps 1,2,000 feet high in the sky. There in number and were not tilting in unison, although all were tilting at the rate of about one complete movement every five seconds. In size I would say they must have been the size of a bi-motor passenger plane. They were in my view perhaps 1½ 1 minutes. Unfortunately, after I realized what I was viewing they were in sight perhaps fifteen to 20 seconds.

It was no mirage. It was not "swamp gas" I saw. It was in no way anything I'm familiar with.

Naturally I kept quiet. I looked in the papers for accounts of other witnesses. There were none. This I do not understand.

I am not easily excited. I have been in a number of campaigns. I was at Pearl Harbor during the attack. I was an artillery advisor to the ROK Capital Division and 11th Division on the front.

Perhaps there is a logical explanation for this sighting but I fail to arrive at one in my own mind.

Sincerely

Dear Sirs:

I have here a report. It may be of some use to you.

The object was seen about September of 1966. The place was about one mile north of Black Jack, N.C. in Pitt County. Black Jack is about 12 or 13 miles from Greenville, N.C. It was first seen coming from the SW and going toward the NE. It passed almost directly overhead. It was seen for about 1 or 2 minutes. It did not leave a track or make a noise. It looked like a star that was moving. It looked to be at a tremendous altitude. The sky was clear and there was not any clouds in the sky. If you wish to know any

over

Anything else just write me.

Yours very truly,

Forwarding ltr. from "AF Base" military, etc.

(Sept. 1966)

("April 7, 1966"

"On march 30, at 5:20 A.M. until 6:30 A.M. I watched what I first thought was an unusual looking star hanging in the air next to a certain tree about 50 FEET east of my home. I had been sound asleep and suddenly my eyes flashed wide open. I looked out of the window and took a good look at it. I looked at the clock and it was just 5:20. Then looked around at the sky for other stars, but there were none —— it was just dawn. Then when I looked at it again it was ~~moving~~ next to another tree nearby, so I knew it was moving but it did not appear to be." These are the words of (Miss) J. E., who wrote her report to you. This story is very, very true. Because during the year of SEPTEMBER-OCTOBER 1966, I went out in my

yard during the night in the summer and winter to was stars and this certain star does or did appear at night and in the morning when all other stars could not be seen. One night while I was out, I happened to notice it and decided to watch it. It was queer the way it moved. When I watched it, it never moved then I turn around just for a second or two and it's in a different position! I have something that I haven't told you! Quite a few things! One night I was out in my back yard, and there is a short of medium sized tree in the neighbor's yard. I looked over at it and saw an eye, (somewhat like a cat's eye glowing at night) I moved from one side of the yard to the other and the eye moved too! I was going to go see what it was, but I got scared.

Next morning I went to the tree and found the limb where IT was

and measured about three feet above the limb where the eye was while ~~oh~~ watching me.

This next story is also true. One night one of my friends, about 11 years old was out playing with other friends when he ran around the corner and something grabbed him and started to run off with him. He started to yell and just before it dropped him and disappeared he managed to turn around and get a good look at it. You probably won't believe this but it had one eye, covered with long hair, and had long fingernails. (I am only 15 years of age and with all the paper ~~clipping~~ clippings and paperback books and UFOs, I am really quite a good ~~l~~ expert on UFOs for my age.)

It would please me very much if somehow you would be able to contact Joan Whitemour who is an UFO investigator, who investigated the Brooksville, Florida: Case History of a Saucer Landing. It is very important to me that you contact her or at least try. I have quite a few questions to ask her about her investigation at Brooksville, Florida. She has a theory that there may be a base somewhere around and I am pretty sure from reading her notes and being a somewhat good UFO expert for my age, I sure that there <u>is</u> a base around the area. If you do contact her, tell her to send her address so that I can send her my questions that are to be answered. (The book in which I read about her investigation is entitled "Flying Saucers Are Hostile".)

Sincerely,

[redacted]

P.S. Please try and answer this letter as soon as possible, this is very important to me that you answer this letter. And with all I know so far about Brooksville, Florida, ~~for~~ with my information I say that there really is a saucer base there, you can investigate it too!

There's a big hill which may be or probably is or are underground caves filled with water. Sometimes there is a piercing high-pitched sound that comes from the hill as if they were drilling an underground base!

No Case Info only
to old to investigate

Sept 66
MINN.

Proposed reply to letter from Mrs. [redacted] 12 March 1967

Dear Mrs. [redacted]

Reference your letter of 12 March 1967 concerning your unusual observation in September 1966. I appreciated your kind letter and definitely feel you must have observed something most unusual; however, I can not offer too much in the way of an explanation. The only thing that comes to mind would be an artificial cloud release that occurred on 24 September 1966 from Wallops Island, Virginia. A rocket was launched at approximately 0413 EST. At altitudes of 310 and 570 statute miles, there were two enormous cloud releases. This was seen and reported as a UFO by individuals from as far west as Indiana. It did light up the eastern sky. I am very doubtful that this was what you observed. This, of course, is only a shot in the dark. I was wondering if the sound and visual observation were unrelated. Another possibility is a static discharge, but this also is just a guess.

Your information will definitely be kept on file which adds to our data base. The late date would not permit a detailed investigation at this time. Thank you for reporting your observation to the Air Force.

DET/USAFO Official file copy

1 Sept 18 Apr 67

Sunday, March 12, 1967

Major H. Quintanilla, Jr.
Dayton, Ohio

Dear Major Quintanilla,

Todays' Sunday paper gives your name as the person to report UFO sightings to. Altho' Ihave not experienced a sighting of an object, still I saw a frightening phenomenon and heard a terrifying noise, one night in September of 1966. May I tell you of it?

Ihad been asleep in my bedroom, alone in the house, as is usual. My bedroom window faces the east. At precisely 15 minutes to four, I was awakened by a loud noise. Ican only describe it as a tremendous hum, a level, flat sort of buzzing. It lasted for seconds, then was followed by a light...not like an electric light but more like the high intensity tensor lites that are marketed now...that seemed to illuminate the entire eastern sky. This was through my window shade. I lay there, a bit frightened, more curious. In a matter of perhaps a minute, not more, it was followed by the same events...first the low, flat humming or buzzing sound, very loud and continuous..then the blinding flash of light. Iarose then, opened the shade, stood watching and listening. Ihad the shade up all the way...my back yard is quite deep, has an alley behind it, and the neighbors' back yards abut the alley, so there was no danger of my being seen in my night clothes. In a matter of a few seconds, after I'd arisen, the hum came again, in total darkness. At its' completion the entire eastern sky, for as far as Icould see in either direction, was illuminated with this intense light. It seemed to be in the distanc nowhere near our town of Faribault, perhaps as far away, if not further, as Rochester, a large city. I could have read by this light, so bright was it. It lasted for a few seconds, then abruptly turned off...that is the only way Ican describe it. It didn't wane..it was there for a few seconds, then was off. I went back to bed, noted the time...ten minutes to four in the morning..and phoned the police. When an officer answered, Iasked, "Wat was that noise and light?" He said he hadn't heard it, which was to be expected since the police station is in the heart of our downtown district, the office itself is without windows that are not shaded by adjacent buildings, and the radio call system for police is on all the time. Itold him what I had seen and heard, and he said he would contact the prowl cars. The next morning, Iwas still disturbed about this, thought of several reasons for its' happening and began to track each possibility down. Iphoned our hospital, thinking that there had been more than one power failure, that the auxiliary powers had been turned on, and they had failed, too! I spoke to the night man himself, he said there had been no failure. Then, in turn, Iphoned the Saint Marys' School for girls, Saint Lucas Geriatric and Care Center, Shattuck Military Academy, Saint Jones School for Boys, Pleasant Manor Nursing Home....all of which are east of my home. No power failure had been experienced at any of these places. I phoned the police station again, was told the prowl cars had seen nothing, except some one doing drilling on a street about five blocks from my home, using a light for illumination. Iexplained that the light I had seen had suffused the entire sky, in the east, and was very brilliant.

Ad could not possibly have been confused or mistaken for any other light I'd ever seen. I then phoned our radio station and the daily newspaper, asking if anyone else had reported seeing and hearing what Ihad seen and heard. No one had !! I called our power plant.. there had been no failures there.

I have a close friend, living on the east side, some distance from my home. She had seen and heard nothing..her two little girls had meant to spend the night sleeping out doors, had been installed in their sleeping bags, the family had settled down for the night. The little girls became frightened, and wanted into their own beds, about two in the morning. My friend said by the time she and her husband got the girls in, along with their paraphernalia, and had all gotten to sleep again, it must have been nearly three in the morning, and she had then slept, as she put it, "the sleep of the dead," hearing nothing until the alarm went off at seven in the morning.

Ikept at this for several weeks, trying to find just one person who had seen and heard what I did. I wrote my son in Salt Lake City, Utah, all about it..he is a physics grad student there, working for his doctorate, on a teaching assistantship. Finally, Ibecame discouraged, since my inquiries became the source of jokes against me, and dropped it. But I knew what I had seen, I knew what I had heard, we had had no storms or rains for several days, it was not thunder and light-ning, it was as far from that noise and those lights as is possible to get.

Recently, I tho t I'd give it another try..it really bugged me ! I phoned the police station to get the exact date... Iknew it was in September since my son had left home after his summer vacation and he left the middle of September, driving back to school, and I had written him all about it. I know that a record is made of every call to the police station and believed it would be a simple matter to get the exact date. But then I got the run-a-round. I would call at one time of the day, get a man who was willing to help but who could find nothing. Since my call was not a "complaint," it should have been listed as a "report," but it wasn t. Iwould then get a man who openly scoffed at the whole thing. The man on duty that night was located, remembered my calling in, tried to find the record of the call, could not. A few were really interested but could not or were not to give me (put in "allowed" back there) my date. So Iquit.

Idid not see any object at all, in the skies. I didn 't see any flashing lights at all, and there were no colors, at all. Just this blinding illumination of the entire eastern sky for a matter of seconds. There were only the three double events...the flat, level hum or buzz..like a million planes flying in the distance..followed by the blinding, brilliant light. Thes three events happened within a period of five minutes, at the most. Iknow Iphoned the police staion at exactly, precisely ten minutes to four in the morning, and that it was in September, Ithink sometime after the 17th of that month. Iwas not dreaming.. I was on my feet, at my window, with the shade up, watching, when the third one occurred, and saw the other two and heard the other two hums (for want of a better word)through the shade. I do not drink, Iam a level, hard-headed woman...have had to be since I have been alone with the responsibility of raising two sons alone.. Iam not a youngster, seeking thrills or attention because of this. But, darn it, I'd sure like to know about it !

I don't think I'd get anywhere, reporting this to our local, county or state police. I think if I were to report it to the nearest Air Force base, their investigations would be hampered as mine was, with the local police. This is not to say they have not been courteous, only that they will not give me the date of my call, and without that, who can do anything? I didn't make a note of it, thinking that I could find out about it myself the following days. But since information is asked for in this paper today, I'm sending mine on. For what it is worth. I hope you can make something of it.

Very sincerely,

[redacted]

SAF-OICC/MrsCassel/bp/79079/21 Apr 67

APR 21 1967

Dear Mrs. [redacted]

Major Quintanilla has asked that I reply to your letter concerning your unusual observation in September 1966.

Your kind letter is appreciated and I definitely feel you must have observed something most unusual; however, I can not offer much in the way of an explanation. The only thing that comes to mind would be an artificial cloud release that occurred on September 24, 1966 from Wallops Island, Virginia. A rocket was launched at approximately 4:13 a.m. Eastern Standard Time. At altitudes of 310 and 570 statute miles, there were two enormous cloud releases. This was seen and reported as an unidentified flying object by individuals as far west as Indiana. It did light up the eastern sky; however, I am doubtful that this was what you observed. Another possibility is a static discharge, but this also is just a guess.

Your information will be kept on file which adds to our data base. The late date would not permit a detailed investigation at this time. Thank you for reporting your observation to the Air Force.

Sincerely,

GEORGE P. FREEMAN, JR.

Proposed reply to letter from [redacted], 15 February 1967

Dear Mr. [redacted]

Reference your letter of 15 February 1967 concerning your observation of an alleged unidentified flying object in north-central British Columbia. If you wish to complete the inclosed FTD Form 164, the information will be accepted; however, a comprehensive evaluation of the data cannot be made at this late date. The information will be added to our data base.

Thank you for reporting your observation to the Air Force.

The Commanding Officer
"Project Blue Book"
ATIC, USAFAF, Dayton, Ohio

Dear Sir,

Would you be interested in any particular sighting of a "Flying Saucer"? I refer to all if a "UFO" as another witness and I were privileged to watch for at least 15 minutes at a distance of less than half a mile, I would be most obliged to cooperate if you would send me the particular questionnaire. The sighting took place last year in September in North Central British Columbia in an uninhabited and mountainous area, around midnight. I am a surveyor by profession.

Thank you
Yours Sincerely

[redacted]

f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

14. Did the object disappear while you were watching it? If so, how?

It went over the horizon - which consists of buildings.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): (Yes) No Don't Know. IF you answered YES, then tell what it moved ~~behind~~ beside a vapor trail of a jet

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of:

17. Tell in a few words the following things about the object:

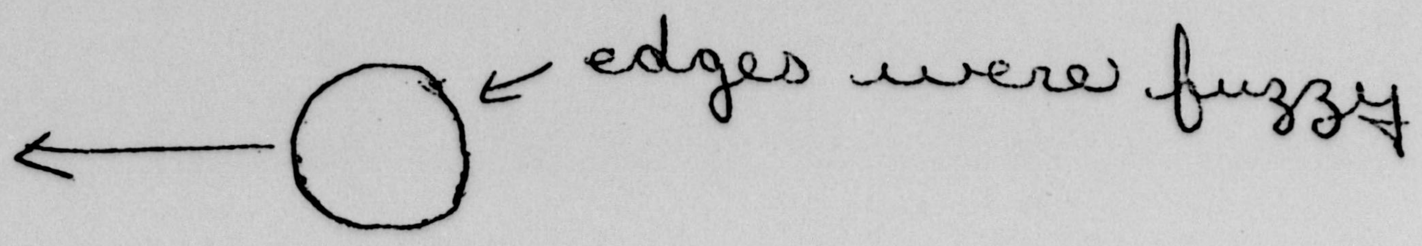
a. Sound ~~white~~ no sound

b. Color white like clouds

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

about $\frac{1}{25}$ of the object.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.



20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? 150-200 mph

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 15,000'

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
(c. Outdoors)
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
(b. In the residential section of a city?)
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

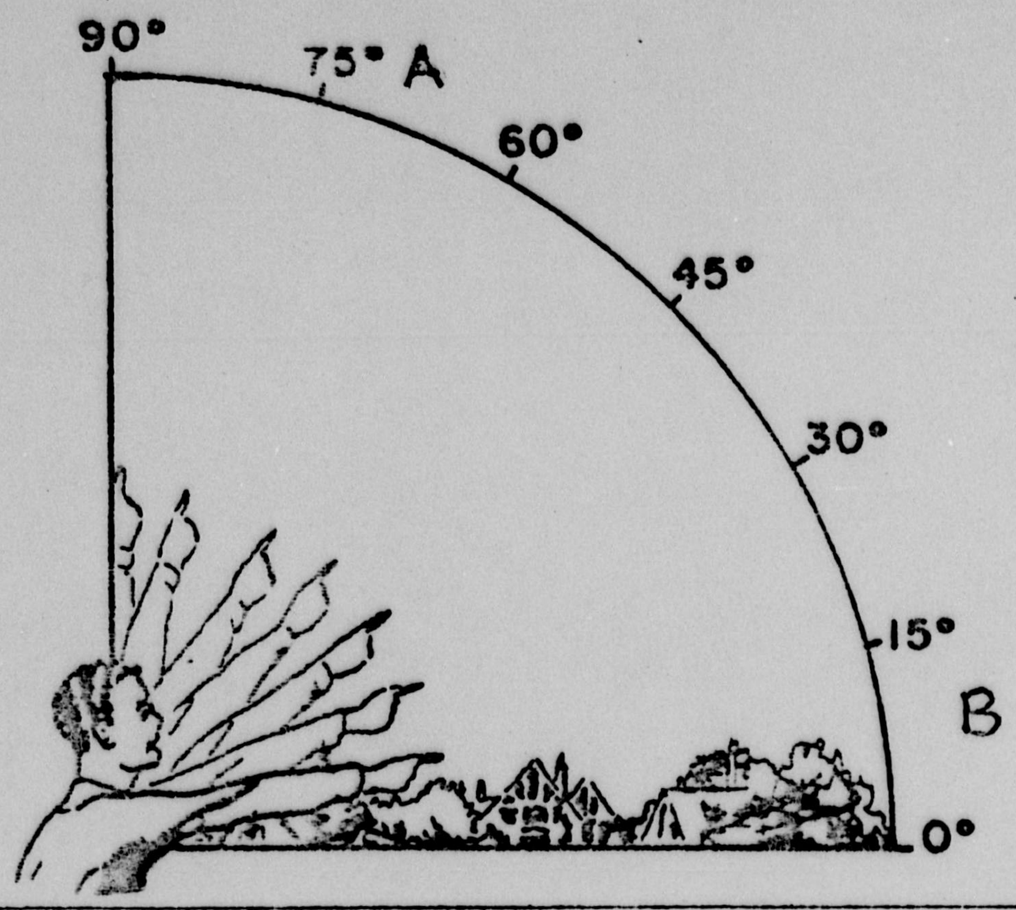
25. Did you observe the object through any of the following?

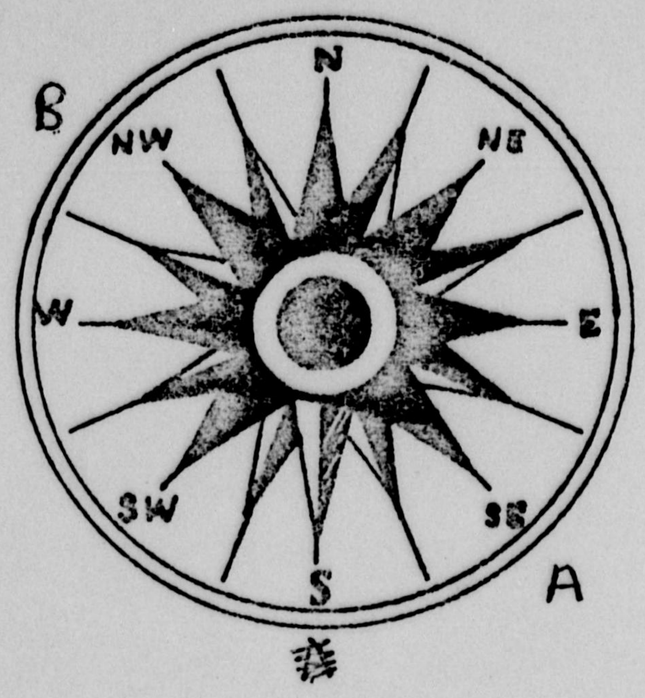
a. Eyeglasses	Yes	(No)	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	Yes	(No)	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

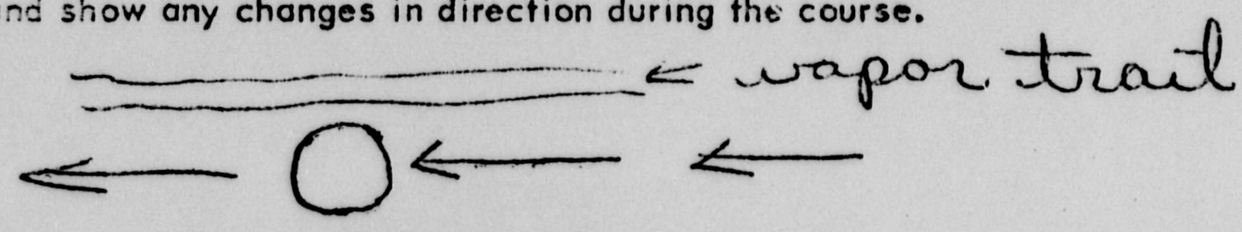
The only thing it resembled was a cloud in colour but not in shape. It moved faster than the clouds.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.



29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No.

31. Was anyone else with you at the time you saw the object? (Circle One) (Yes) No

31.1 IF you answered YES, did they see the object too? (Circle One) (Yes) No

31.2 Please list their names and addresses:

SAF-OICC/Mrs Cassel/bp/79079/15 May 67

MAY 15 1967

Dear [redacted]

Reference your recent completed FTD Form 164 describing your September 10, 1966 observation of an alleged unidentified flying object (UFO).

A study of the submitted information did not reveal a positive identification. The only explanation I can offer is that an aircraft was observed; this, of course, being only a possibility. There is a high speed, low-level aircraft training route slightly west of Cairo, Ohio. Aircraft operating on the route fly toward the southwest. Since aircraft records are normally destroyed after 30 days, it is impossible to check the records for any aircraft activity on the day of your sighting. It is extremely important to report an observation as soon as possible so that a meaningful investigation can be made.

Thank you for reporting your observation to the Air Force.

Sincerely,

GEORGE P. FREEMAN, JR.

Proposed reply to letter from [redacted]

Dear [redacted]

Reference your recent completed FTD Form 164 describing your observation of an alleged unidentified flying object. A study of the submitted information did not reveal a positive identification. The only explanation that I can offer is that an aircraft was observed; this, of course, being only a possibility. There is a high speed, low level aircraft training route slightly west of Cairo, Ohio. Aircraft operating on the route fly toward the southwest. Since aircraft records are normally destroyed after 30 days, it would be impossible to check the records at this time for any aircraft acitivity on the days of your sighting. It is extremely important for one to report his observation as soon as possible so that a meaningful investigation can be made.

Thank you for reporting your observation to the Air Force.

REPLY TO ATTN OF: TDET/UFO

1 February 1967

SUBJECT: UFO Observation, 10 Sep 66

TO: Mr. [redacted]
[redacted]et
Cairo, Ohio 45820

Reference your unidentified observation. The information which we have received is not sufficient for a scientific evaluation. Request you complete the attached FTD Form 164 and return it in the envelope provided. Thank you for reporting your observation to the Air Force.

JAMES C. MANATT, Colonel, USAF
Director of Technology and Subsystems

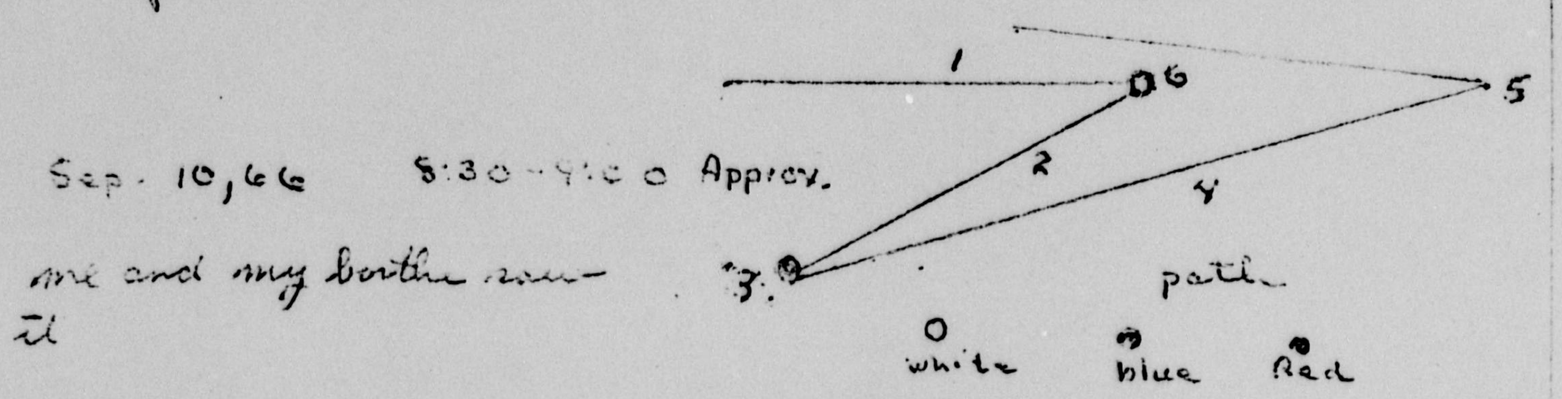
FTD Form 164 w/envelope

TDET/UFO OFFICIAL FILE COPY

[redacted]
Cairo, Ohio,
45820

Dear Sir:

I just got your address and I thought I'd send you some information on the object I saw. You may not think what I saw was a U.F.O or flying saucer, but I can tell when I see an aplane or an object of earthly make. Here's the description as close as I can explain it.



Sep. 10, 66 8:30 - 9:00 Approx.

me and my brother saw-
it

We sighted an object going East to West at a distance. It was going in a collision course with an object which I thought was a star. but when it collided with it the object turned red (5) it came at us at a SW-NE direction. It kept getting closer till it looked like it was 1/5 of a mile away, very large, made no sound, then it changed (2-3) to blue-white, travel a few seconds than changed course (3), white

Send 164

then came back (4) after it vanished out
of site and it was blue-white again (5)
SW-SE After this we didnt see it again.
The closest it came was from 4 miles
to ½ mile approximate, height was 500 to
1500 feet, no noise, lights on our house flickered.
When it came towards us it was brighter than
the first magnitude One steady glow, but
changing colors.
I've might have saw something
of an earthly nature, so I'm going
to let you decide. I would be very grateful
for a reply and if in any way I can
help you, let me know because I've
done alot of reserch and I work in my
spare time with astronomy and
work with meteors

Thank you for
taking time out to read this.

Your friend,

[redacted]

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

10 (Day) September (Month) 1964 (Year)

2. Time of day: 8 (Hour) 40 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): (a.) Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

[redacted] (Nearest Postal Address) Cairo (City or Town) Allen County, Ohio (State or County)

5. How long was object in sight? (Total Duration) _____ (Hours) 15 (Minutes) _____ (Seconds)

a. Certain
b. Fairly certain
c. Not very sure
(d.) Just a guess

5.1 How was time in sight determined? by a clock in the house

5.2 Was object in sight continuously? Yes ✓ No _____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	[a. Bright]
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, jul 61, which is obsolete.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
(c.) Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
(c.) No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

(a.) Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

(a.) Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
(d.) As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
(c.) About the same
d. Don't know

11.1 Compare brightness to some common object:

It was of about the 1st Magnitude

12. The edges of the object were:

(Circle One)
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember

e. Other It was like a star but it had a destinct shape of a sphere

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	(Yes)	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	(No)	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	(Yes)	No	Don't know
f. Change shape?	Yes	(No)	Don't know
g. Flash or flicker?	Yes	(No)	Don't know
h. Disappear and reappear?	Yes	(No)	Don't know

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? about 1/10 to 2/10 a mile at its closest approach

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
(c.) Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
(b.) In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It gave an appearance of an airplane in flight Except it didn't have the same lighting as an airplane. An airplane has many lights while this was one point of light, changing when it maneuvered. It had no sound. It was going slower than an airplane should have been going

14. Did the object disappear while you were watching it? If so, how?

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: It did pass behind some trees for a few seconds

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: _____

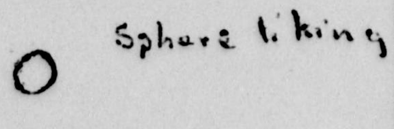
17. Tell in a few words the following things about the object:

a. Sound There wasn't any sound from it.

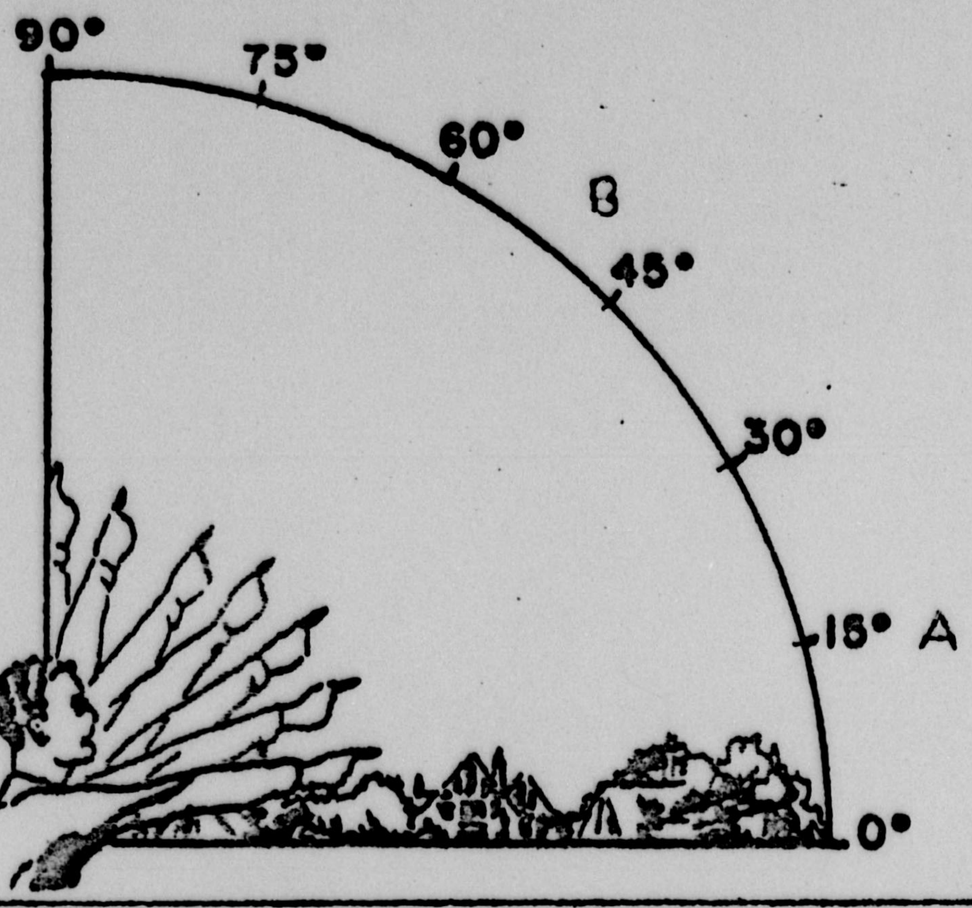
b. Color It had 3 color phases White to Red to blue to white again in slow change. Colors changed when it changed direction

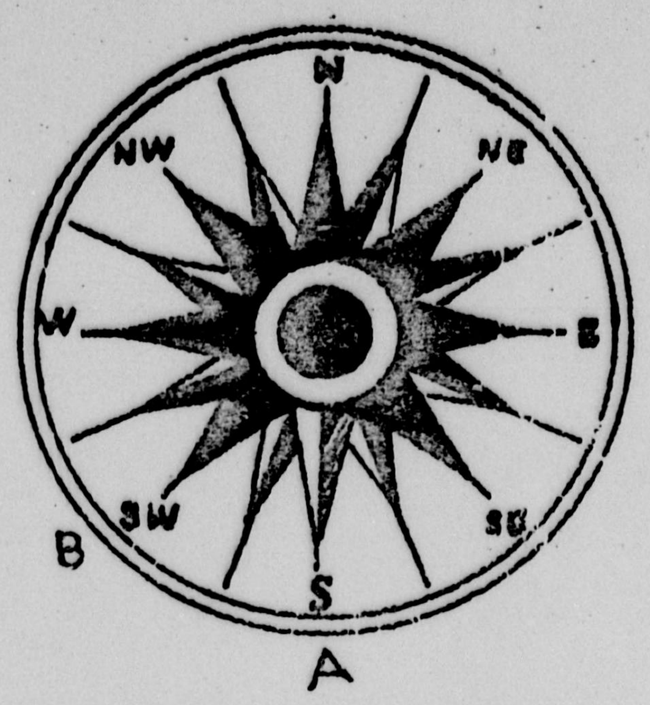
18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? The head of the match is about the same size of the object at its closest approach

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

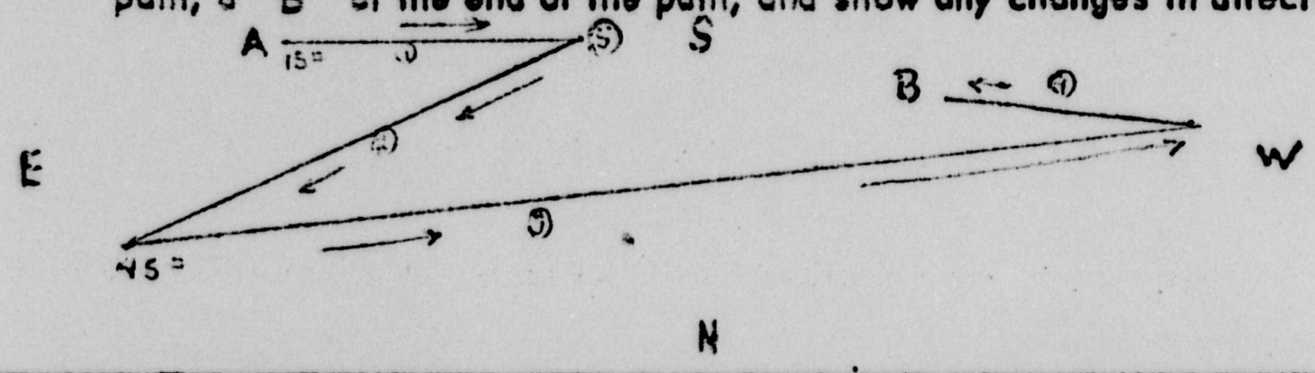


27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.



1. white
2. red turning blue
3. blue turning white
4. white
5. Red

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? (Circle One) (Yes) No

31.1 IF you answered YES, did they see the object too? (Circle One) (Yes) No

31.2 Please list their names and addresses:

and me

It was at a distance of it at point A going west then went into the house. so he didn't see much.

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS 6 [redacted] (Street) Cairo (City) (Zone) Ohio (State)

TELEPHONE NUMBER [redacted] AGE 17 SEX male

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

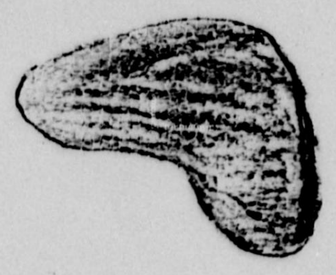
(Day) (Month) (Year)

I reported it to you later on in the months but I've only told my parents and some one else which is seen one which was different than mine They saw it this year.

34. Date you completed this questionnaire: 3 (Day) February (Month) 67 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting. No sound
Steady glow

When it came pretty close for it to seem destintly we thought it was coming at us, so we went inside. We had a television on and it showed a large amount of interference. After we went back out it started to go away. I walked down the block to keep it in sight but finally lost it.



shape described ↗

p.s. I know some one who's seen a UFO which was conpicuous. It hovered over a house also, and I guess then was a black out and after the lights came on it speed off at a terufic speed. When it speed up its brilliancy increased. 3 or 4 saw it. I was at the house also but I didn't see it, maybe because if it was above the lights of the diamond would produce enough glare where I couldn't see it. But later on the night I saw an object flying which seem to be a mile high. A bright moving at a high speed

12 Sep 66
Lowell, Mass
17 Sept 66

Operation Blue Book

Dear Sir

On the evening of 12th September 1966 I was passing over Beacon street in Lowell Mass. Beacon Street is the highest point in the city, you can see for miles, as I approached the playground area between Methuen an 18th Streets I noticed a tie up in traffic, I slowed up to see what it was all about! Off to the left was a undescribable glow high in the sky. As I watched the object I became mystified. This object was in the North west, it was many times as big as the largest star, it was also much brighter. The main reason I am letting you know about this is because it was still light approximately 6:45 P.M. This object did not move but seemed to have some kind of a motion around the outer portion — I can not clearly define it. Earlier in the day a report from W.B.Z in Boston made mention of a U.F.O. being spotted in New Hampshire by a State trooper an a few other people. This object I am talking about could have

been in the same vacinity.

I may not be able to define this object clearly but I can tell you for sure it was not an Aircraft or a natural phenomen. I am wondering if you got a report from anyone else, there were quite a few people looking, or should I say staring at this object. I hesitated writing this letter because of the many unreal reports you must receive but the more I thought it over the more I decided to write.

Mr [redacted]

SAF-OICC/cassel/bev/79079/27 Oct66

OCT 27 1966

Dear Mrs. [redacted]:

Please excuse the delay in replying to your letter regarding your photographs of unidentified flying objects. A heavy backlog of correspondence and reports has precluded a prompt response to your letter.

The Air Force would be interested in analyzing your photographs. However, we will need the original negatives and pertinent camera information (type of camera used, shutter speed, "F" stop, etc.). Upon completion of the analysis, the negatives and a copy of the report will be returned to you.

It is requested that the attached FTD Form 164 be completed as fully as possible and returned with the negatives.

Your interest in Air Force matters is appreciated.

Sincerely,

GEORGE P. FREEMAN, JR.
Lt Colonel, USAF
Chief, Civil Branch

2[redacted], Stamford, Connecticut 06903

Sept. 10, 1966

Gentlemen:

While taking some pictures from the surface of the ocean (and slightly below) into a sunset I have some pictures that look quite like all those I have seen of flying saucers. (I do not believe they are flying saucers - but rather a form of light refrac tion.)

However I believe you have some investigative committee that looks into such reports and I'd be glad to forward them on if anyone is interested in seeing them.

I'm unsure where to send either this letter - or the transparencies. Thank you for any information you can give me.

Yours truly,

[redacted]

SAFOICC/Mrs Cassel/jad/79079/28 Feb 67

MAR 1 1967

Dear Mrs [redacted]

Reference your letter of September 10, 1966 in which you stated that you had photographs taken from the surface of the ocean into a sunset.

A photographic analysis of your color transparencies revealed the following: The photography provided indicates central refraction with an undetermined number of secondary refractions or reflections of the iris diaphragm in and on the optical system. The circles within the hexagon shapes are defraction patterns. This is a perfect textbook example of a camera imaging its own lens diaphragm.

I have inclosed your negatives and four enlargements. We wish to thank you for enabling the Air Force to review the photographs.

Sincerely,

GEORGE P. FREEMAN, JR.
Lt Colonel, USAF
Chief, Civil Branch
Community Relations Division
Office of Information
