35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I have had two professional photographers look at this picture. One said he did not know what it was. He made an enlargment of the picture. The other is with the National Geographic and he said it was a reflection. He did not see the negative.

I saw nothing when I took the picture of the clouds. I used sun glasses as a filter thinking I had black and white film in camera. I have done this in the past with good results in taking cloud formations but never a reflection such as this. I am sending you this for what is worth. Enclosed you will find picture in question.

1. PURPOSE: This report is in reply to Work Order Number 67-57 submitted by Major Quintanilla, TDET/UF, requesting photo analysis be accomplished on a photograph of an 'unidentified object' to determine what the object may be. The photograph was taken between Custer Park, South Dakota and Gillette, Wyoming.

2. ANALYSIS: Examination of the referenced photograph and the attached report reveals that the image appears to be a possible reflection resulting from the subjects use of sun glasses as a filter or a possible internal lens reflection. However, the possibility exists that the image may be the result of a light leak in the camera or a chemical or water blemish on the film. The fact that the subject had not observed the 'unidentified object' at any time tends to eliminate the possibility of it being a tangible object.

Wright-Patterson-Maj Rademacher/SAFOICC/ljs/79079/31 July 67

JUL 31 1967

Dear Mr. [redacted]

Reference your photograph on which a lenticular-shaped object appeared.

Examination of the photograph by Air Force photography experts revealed that the image appeared to be a possible reflection resulting from the use of sun glasses as a filter or a possible internal lens reflection. The fact that you did not observe the object at any time tends to eliminate the possibility of it being a solid object. There was no evidence that the object was other than some type of reflection.

Inclosed is your photograph. Thank you for reporting your observation to the Air Force.

Sincerely,

BARNETT B. YOUNG
