U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

Day	Month	Year
	Oct.	1966

2. Time of day: 8 (Hour) 30 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): (a. Eastern)
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
(b. Standard)

4. Where were you when you saw the object?

Nearest Postal Address	City or Town	State or County
Back Yard	Fall	Pa.

5. How long was object in sight? (Total Duration)

Hours	Minutes	Seconds
0	10	0

(a. Certain)
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes ✓ No ____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a. Bright)
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

RELEASE IN PART

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
(b. A few)
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
(c. No moonlight – pitch dark)
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

(a. Clear sky)
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

(a. Dry)
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
(d. As a light)
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

(a. Brighter)
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

Brighter than Headlights of A Car

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
(c. Sharply outlined)
d. Don't remember
e. Other _____

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	(Yes)	No	Don't know
b. Suddenly speed up and rush away at any time?	(Yes)	No	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	(Yes)	No	Don't know
f. Change shape?	(Yes)	No	Don't know
g. Flash or flicker?	(Yes)	No	Don't know
h. Disappear and reappear?	(Yes)	No	Don't know

14. Did the object disappear while you were watching it? If so, how?

It came down behind some trees

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): (Yes) No Don't Know. IF you answered YES, then tell what it moved behind: a trees

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): (Yes) No Don't Know. IF you answered YES, then tell what in front of: our BARN

17. Tell in a few words the following things about the object:

a. Sound None

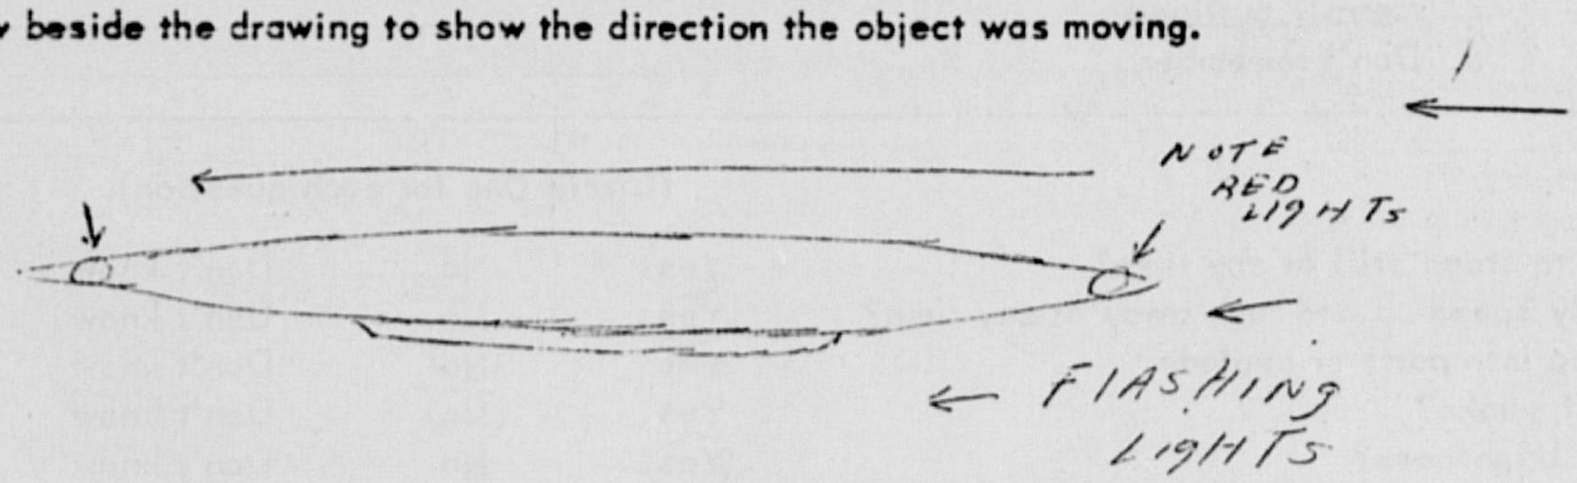

b. Color It change colors like from red to white Blue to Orange

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

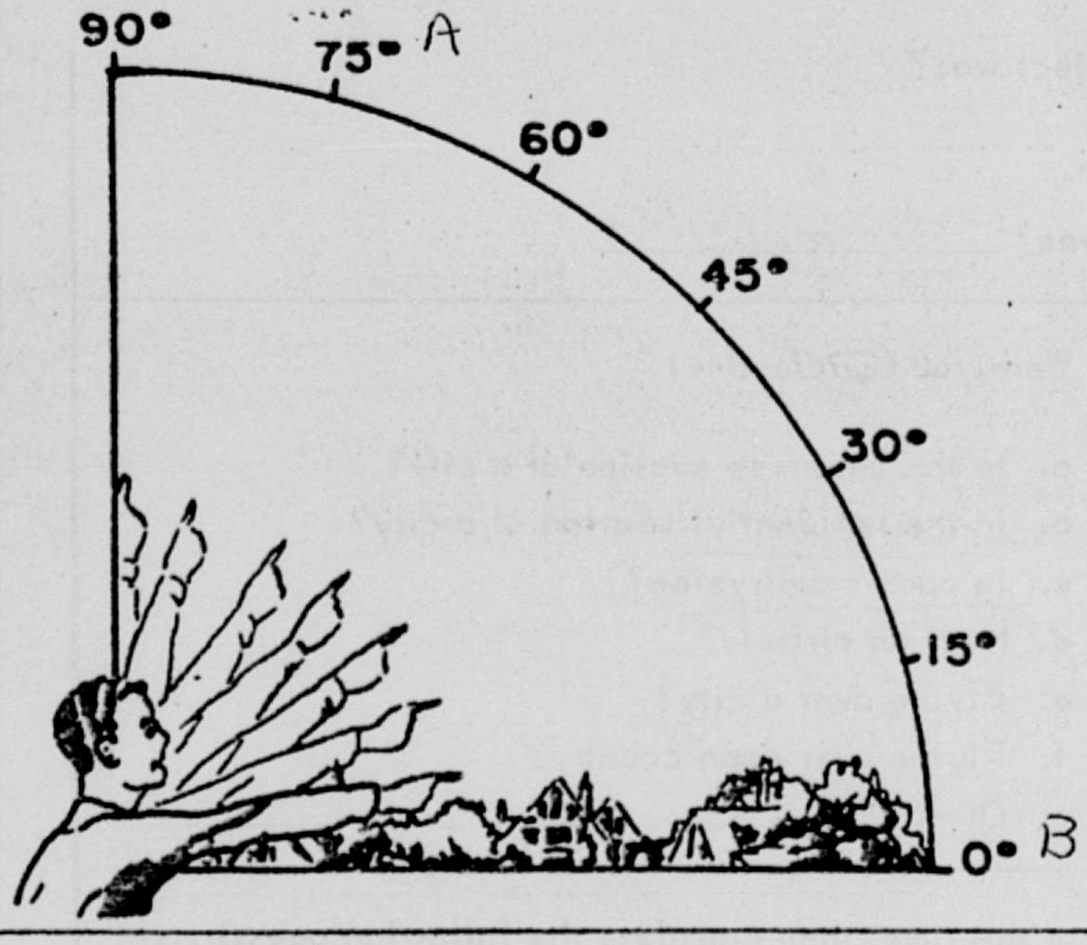

A tiny part

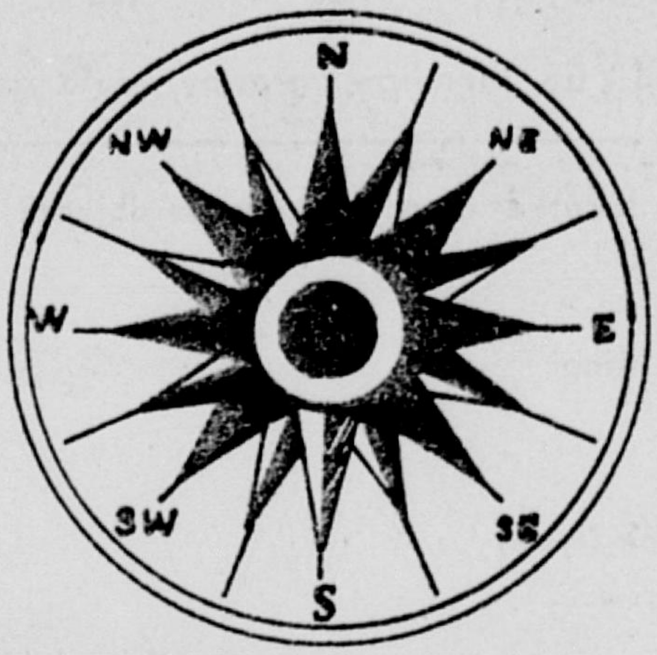

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

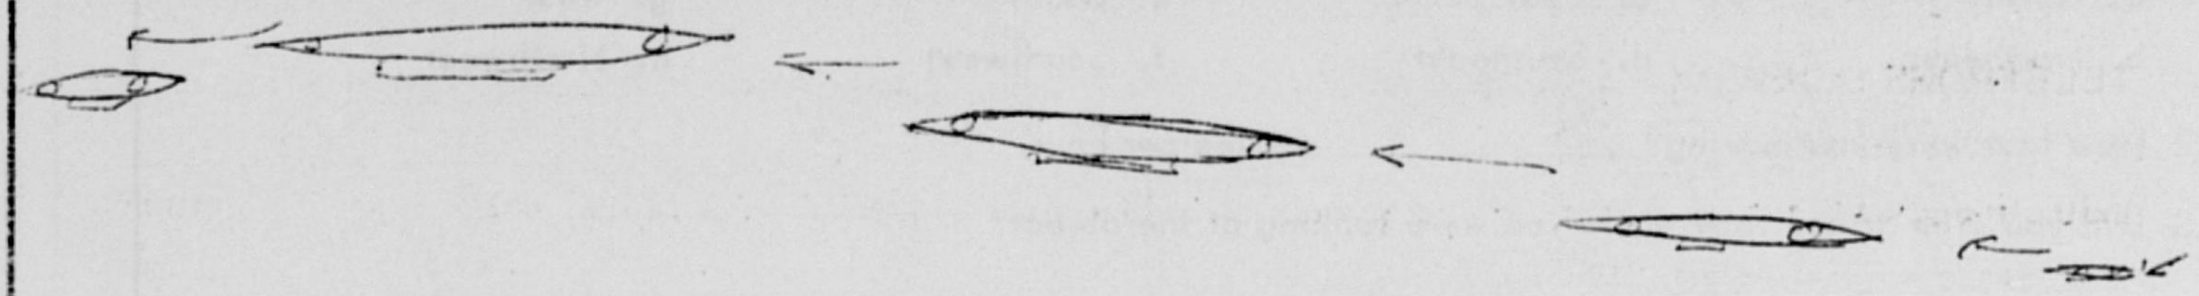

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? 150 mph

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? ¼ mile

22. Where were you located when you saw the object? *(Circle One):*

a. Inside a building
b. In a car
c. (Outdoors)
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you *(Circle One)*

a. In the business section of a city?
b. In the residential section of a city?
c. (In open countryside?)
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? *(Circle One)*

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	(No)	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	Yes	(No)	g. Theodolite	Yes	(No)
d. Window glass	(Yes)	No	h. Other NAKED EYE		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

A long cigar shape object that change color every 10 sec with a bottom piece that had flashing red lights and a red light at each end.

34. Date you completed this questionnaire: 29 (Day) APRIL (Month) 1966 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO

31. Was anyone else with you at the time you saw the object? (Circle One) (Yes) No

31.1 IF you answered YES, did they see the object too? (Circle One) (Yes) No

31.2 Please list their names and addresses:

[redacted] RD [redacted] Falls Penna 18615

My mother and brothers

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS RD [redacted] (Street) [redacted] (City) (Zone) PA 18615 (State)

TELEPHONE NUMBER [redacted] AGE 13 SEX MALE

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

30 (Day) MARCH (Month) 1967 (Year)

FTD (TDETT/UFO
WRIGHT-PATTERSON AFD
DAYTON OHIO

FORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight—pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

(a.) Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

(a.) Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

(a.) Solid
(b.) Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

12. The edges of the object were:

(Circle One): (a.) Fuzzy or blurred
b. Like a bright star
(c.) Sharply outlined
d. Don't remember
e. Other Edges were sharply outlined when the center appeared to be transparent.

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	(Yes)	No	Don't know
b. Suddenly speed up and rush away at any time?	(Yes)	No	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	(Yes)	No	Don't know
e. Change brightness?	(Yes)	No	Don't know
f. Change shape?	(Yes)	No	Don't know
g. Flash or flicker?	(Yes)	No	Don't know
h. Disappear and reappear?	(Yes)	No	Don't know

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

Late Oct 1966
Day Month Year

2. Time of day: Approx 4 30
Hours Minutes

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): (a.) Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

2
0

4. Where were you when you saw the object?

[redacted]
Nearest Postal Address

Tarrytown
City or Town

New York
State or County

5. How long was object in sight? (Total Duration) _____ 5 to 8 minutes
Hours Minutes Seconds

a. Certain
b. Fairly certain
c. Not very sure
(d.) Just a guess

5.1 How was time in sight determined? Estimated

5.2 Was object in sight continuously? Yes _____ No ✓

6. What was the condition of the sky?

DAY	NIGHT
a. Bright clear	a. Bright
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
(d.) To your left
e. Overhead
f. Don't remember

FORM
FTD OCT 62 164 This form supersedes FTD 164, jul 61, which is obsolete.

UFO form continued

20. Do you think you can estimate the speed of the object? Faster and at times slower and at times the same as the jet plane

(Circle One) Yes No

IF you answered YES, then what speed would you estimate?

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

IF you answered YES, then how far away would you say it was?_____

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building
b. In a car
(c.) Outdoors
d. In an airplane (type)
e. At sea
f. Other_____

23. Were you (Circle One)

a. In the business section of a city?
(b.) In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other_____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving?_____miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	(Yes)	No	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	Yes	(No)	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other_____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It looked different from anything I ever saw.

64

Official U.S. Air Force

14. Did the object disappear while you were watching it? If so, how? It disappeared several times and appeared at a different spot a short distance away.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, ~~particularly a cloud?~~

(Circle One): Yes No Don't know. IF you answered YES, then tell what ~~in front of~~: It moved at various points around a jet plane flying north to south

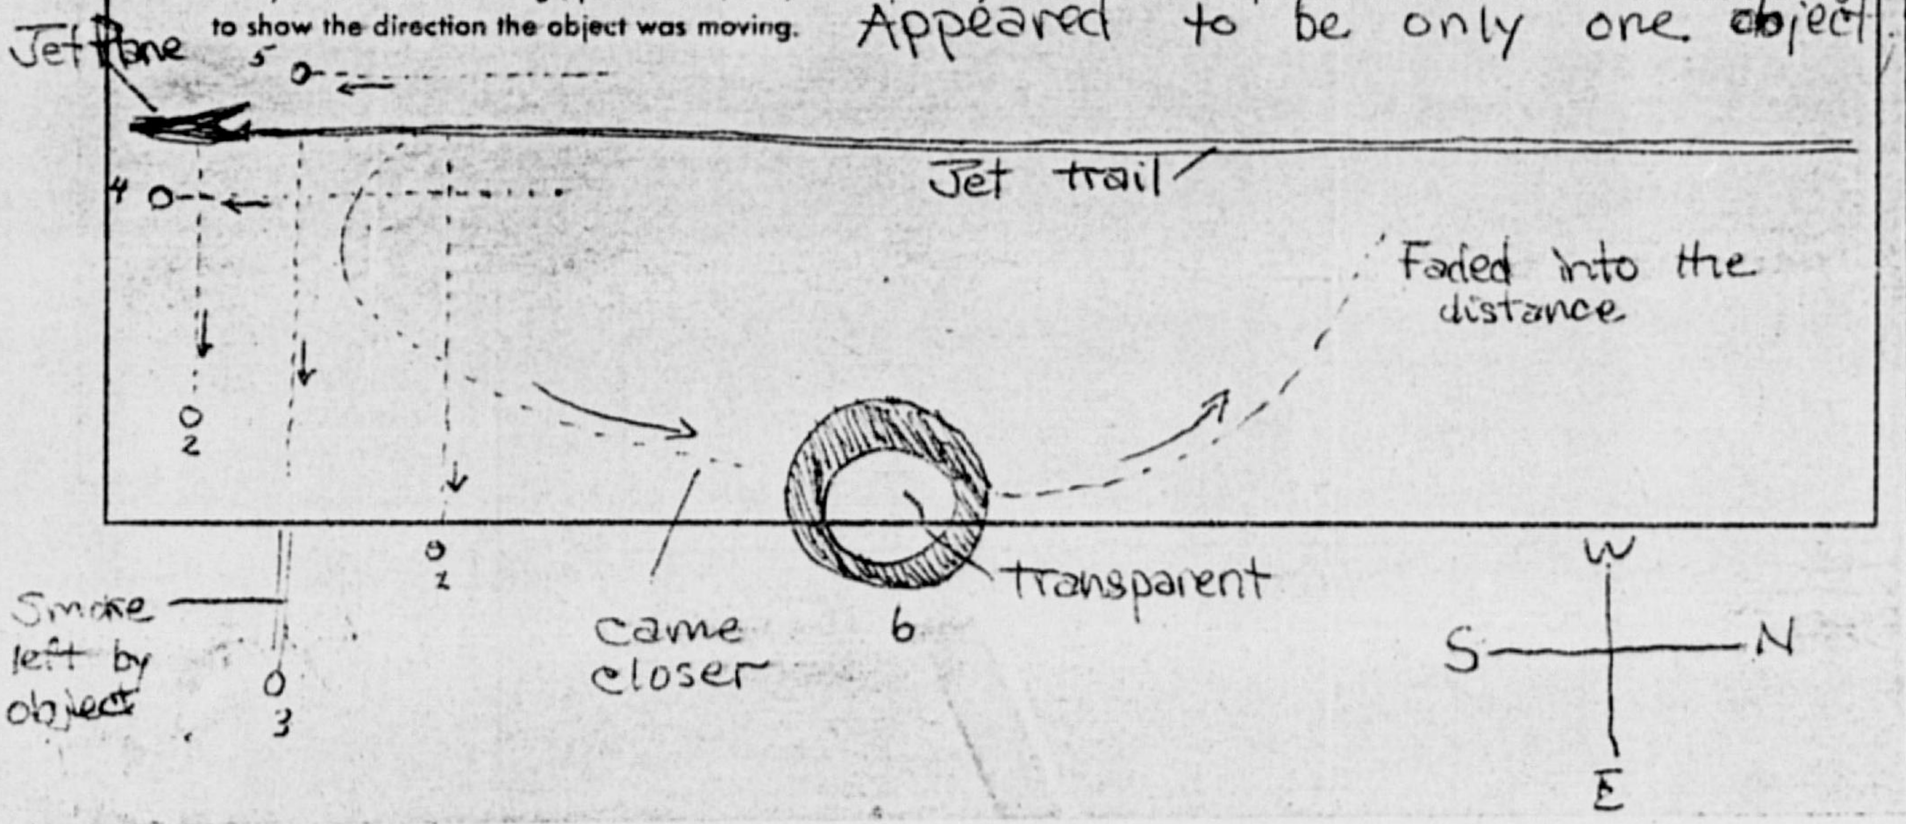

17. Tell in a few words the following things about the object:

a. Sound None

b. Color At times silver gray or bright and shinning

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? Most of it except at one point where the match head could not cover it.

19. Draw a picture that will show the shape of the object ~~or objects~~. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving. Appeared to be only one object.

UFO form continued

30. Have you ever seen this, or a similar object before. If so give date or dates and location. A few minutes before the black-out I saw something: ~~No~~ Yes

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses: children (two 3yr olds) at the playground where I was. I was the only adult.

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS [redacted] (Street) Rd. Tarrytown (City), New York (State)

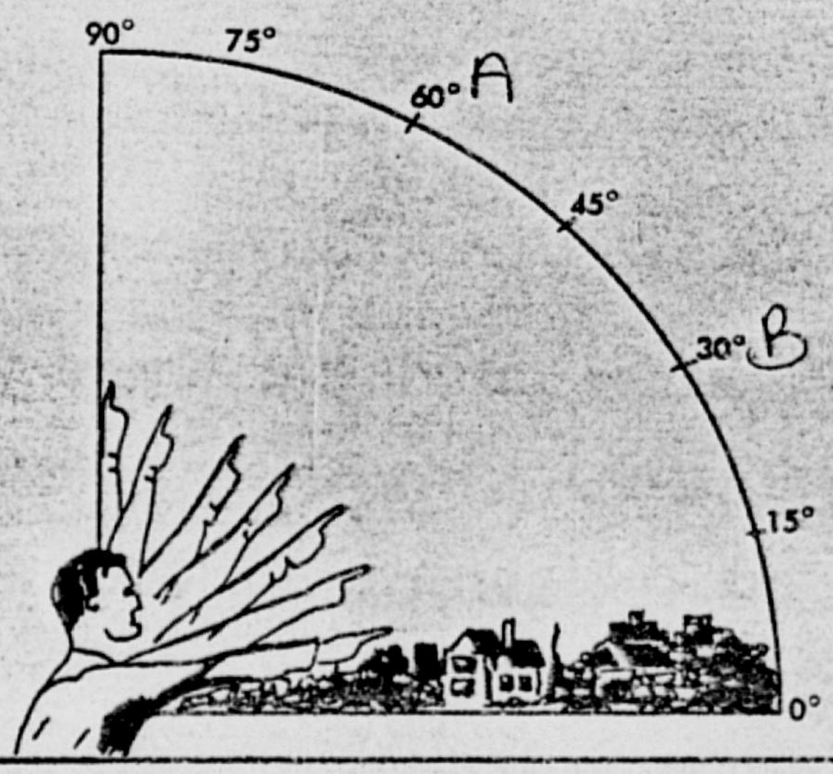

TELEPHONE NUMBER [redacted] AGE 18 SEX Female

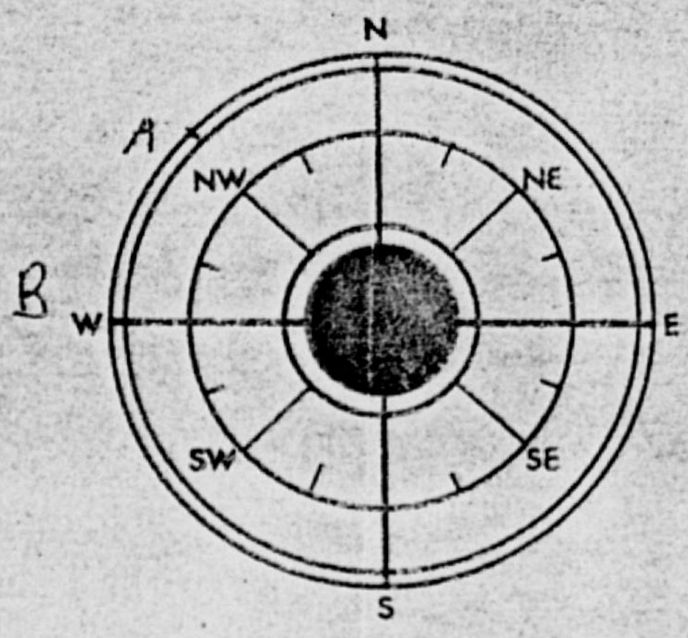

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object? No one officially. Told some friends.

____ Day ____ Month ____ Year

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

see 19

29. IF there was MORE THAN ONE object, then how many were there? Appeared as the antics of only one object but may have been more than one.
Draw a picture of how they were arranged. and put an arrow to show the direction that they were traveling.

Official U.S. Air Force

34. Date you completed this questionnaire: Feb (Day) 3 (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I continued to watch about one hour but did not see the object again. The jet plane appeared not to have changed course but went on its' way. The smoke left by the object was similar to the trail left by the jet plane.

29. IF there was MORE THAN ONE object, then how many were there?_____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

no!

FO form continued

20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? 8 UC

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? ½ mile

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building
b. In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other [illegible]

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

Hot dog in a
Hamburger bun

UFO form continued

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

no!

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes (No)

31.2 Please list their names and addresses: My Brother Peter

32. Please give the following information about yourself:

NAME [redacted] Last Name [redacted] First Name [redacted] Middle Name

ADDRESS [redacted] City [redacted] Zone [redacted] State

TELEPHONE NUMBER [redacted] AGE 10 SEX Male

Indicate any additional information about yourself, including any special experience, which might be pertinent.

nothing and dont understand

33. When and to whom did you report that you had seen the object?

[redacted] Day [redacted] Month [redacted] Year

Official U.S. Air Force U

34. Date you completed this questionnaire: 11 (Day) Feb. (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

It shot a ray of light that damaged a trailer.

FORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight—pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

Airplane lights

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other At first it seemed to be an airplane. But it just stayed & didn't without moving — no sound.

13. Did the object:

	(Circle One for each question)		
a. Appear to stand still at any time?	(Yes)	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	(No)	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	Yes	(No)	Don't know
f. Change shape?	Yes	(No)	Don't know
g. Flash or flicker?	Yes	(No)	Don't know
h. Disappear and reappear?	Yes	(No)	Don't know

OFFICIAL U.S. AIR

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

Day: ____ Month: Oct. Year: 1966

2. Time of day: 8 (Hours) 00 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): (a.) Eastern, b. Central, c. Mountain, d. Pacific, e. Other ____

(Circle One): (a.) Daylight Saving, b. Standard

4. Where were you when you saw the object?

[redacted] AVE (Nearest Postal Address) NEW MILFORD (City or Town) N.J. 07646 (State or County)

5. How long was object in sight? (Total Duration) ____ Hours ~~##~~ Minutes 45 or less Seconds

a. ~~Certain~~
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? ____

5.2 Was object in sight continuously? Yes X No ____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a. Bright)
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you, b. In back of you, c. To your right, d. To your left, e. Overhead, f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, jul 61, which is obsolete.

64

Official U.S. Air Force

14. Did the object disappear while you were watching it? If so, how? I went back into the house to tell my son Michael (he had just got new a telescope for his birthday oct. 28) When we came out it was gone.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

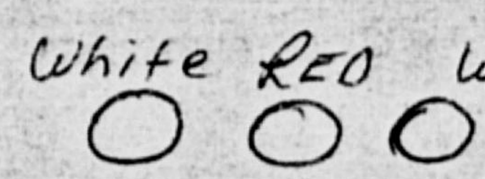

a. Sound none

b. Color White light on either side of a red middle light.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

about the middle.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

I watched these lights in amazement because they did not move or flicker. I purposely waited there to see if they would — but they did not.

UFO form continued

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate?_____

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 2000 feet

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building
b. In a car
(c. Outdoors)
d. In an airplane (type)
e. At sea
f. Other_____

23. Were you (Circle One)

a. In the business section of a city?
(b. In the residential section of a city?) Suburbs
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other Outside my house. (front)

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving?_____miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses Yes (No)
b. Sun glasses Yes (No)
c. Windshield Yes (No)
d. Window glass Yes (No)
e. Binoculars Yes (No)
f. Telescope Yes (No)
g. Theodolite Yes (No)
h. Other naked eye

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

First it appeared as airplane lights. I studied them I waited for it to flicker on + off. No flicker. Then I listened for sound. - No sound. I waited a few seconds - I ran inside to get my son Michael. When we came out they were Gone. I was flabbergasted. I purposely studied these lights closely because I also noticed telephone wires and as the way I moved so that I could see these lights with - out interference of these wires. And I honestly saw the lights. I also waited to see ~~if~~ if it was a helicopter. But no sound - no movement.

UFO form continued

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes (No)

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME [redacted] Middle Name

ADDRESS [redacted] - NEW MILFORD 07646 N.J.
Street City Zone State

TELEPHONE NUMBER [redacted] AGE 35 at the time SEX female
Now - 36

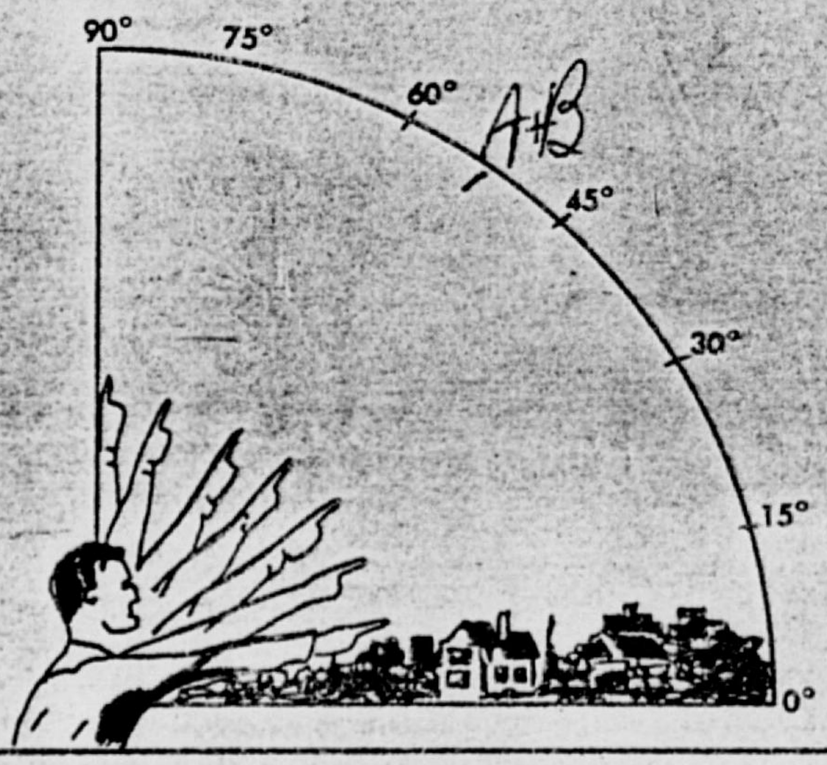

Indicate any additional information about yourself, including any special experience, which might be pertinent.

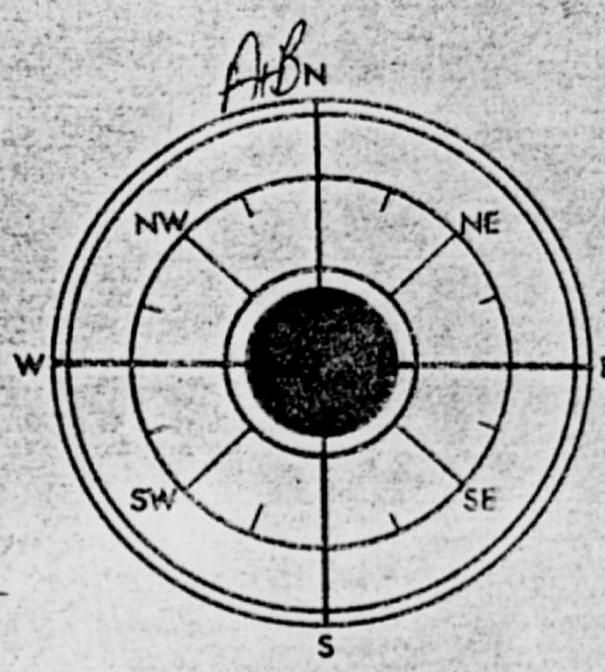

33. When and to whom did you report that you had seen the object?

____ Oct. 1966
Day Month Year

Only to family & friends

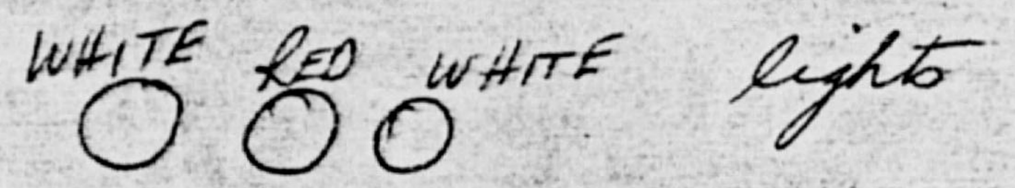

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

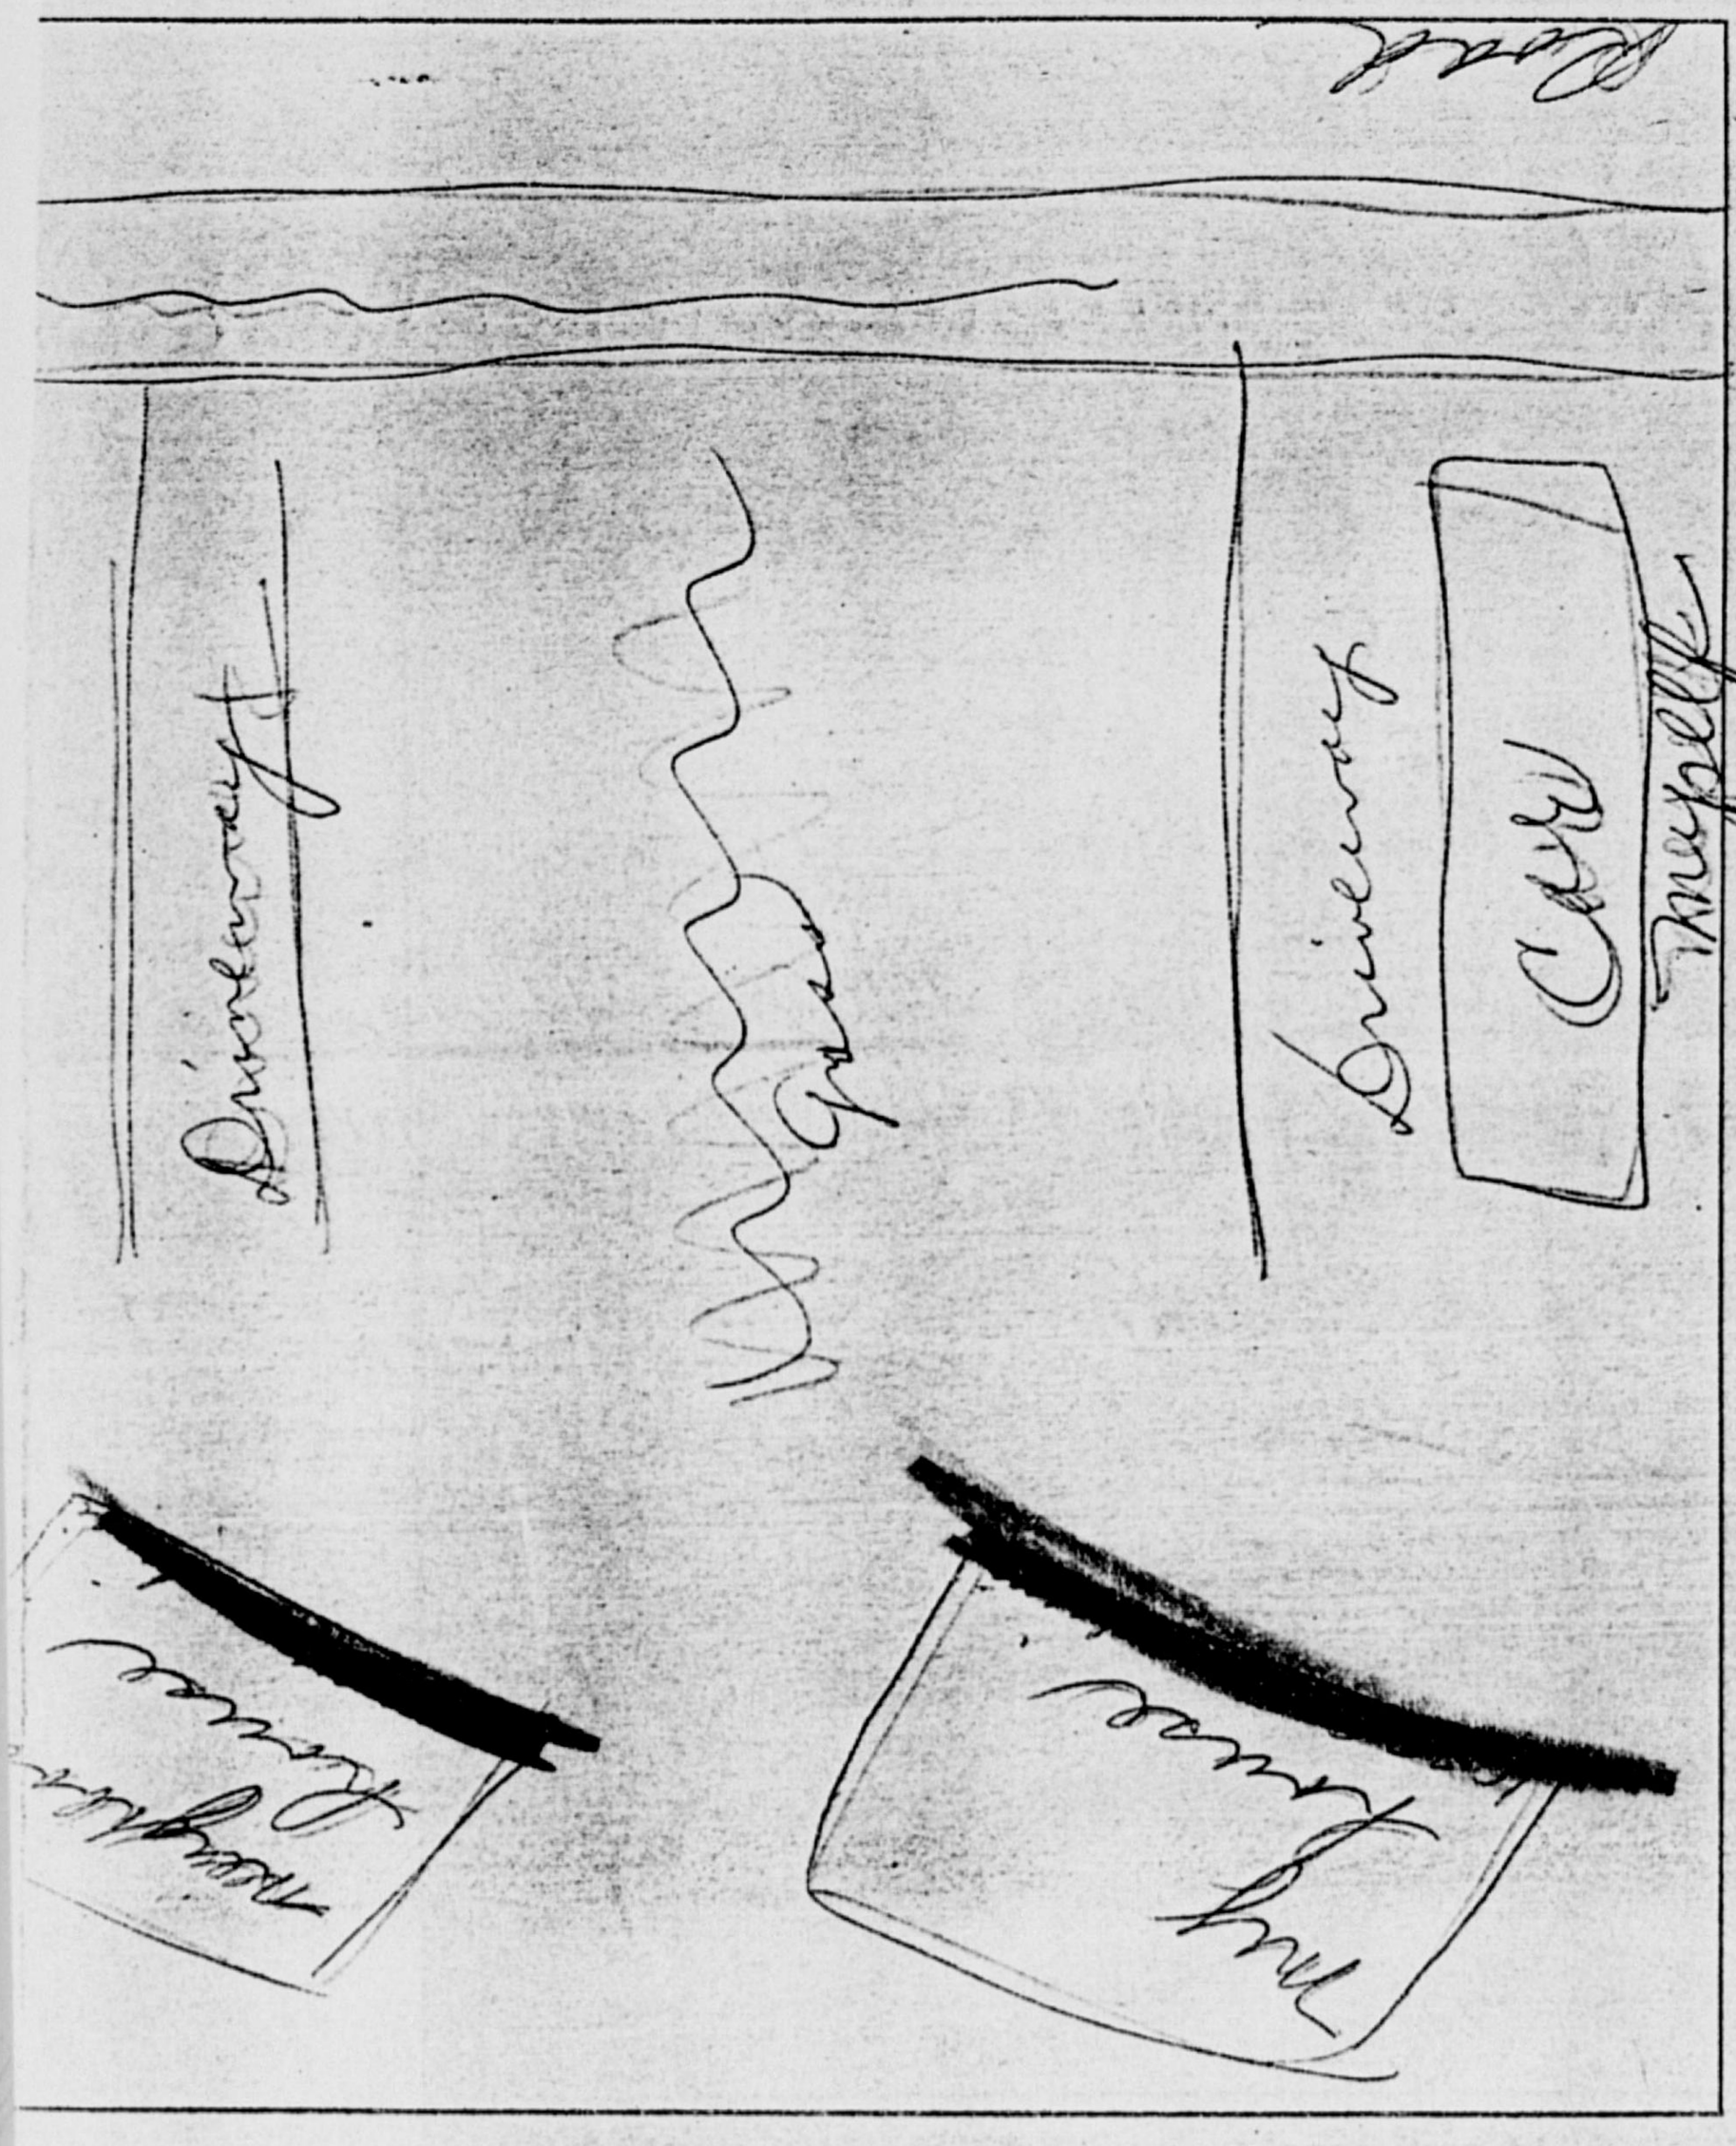

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? 3
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

Dear Gentlemen:

During the October month, I [redacted] and my friend, [redacted] witnessed a series of UFO sightings.

One of the earliest sightings was seen by [redacted]. This occurred during the month of July. The time was approximately 9:00p.m. she, with two other girls, [redacted] An object, zoomed by above the school building, and headed southeast. It had various antenae projecting from around the object. It had no blinking lights, and made no noise. When the girls saw it, they paniced and ran away, and therefore unable to observe other details.

In the month of October, was when we witnessed the many UFO sightings. One night approximately 9:30 P.M., my friend and I were in my dark room, we had no lights on. As we were singing, I happened to glance out of my window. I saw a large object approximately 50 feet above the neighbors house. Since [redacted] and I were very much interested in UFO's, I immediately called her attention to it and said, do you think it's one? Then, we both suddenly KNEW it was one, I called my father and, on doing so I ran out to the back yard with Carol. When I did so, it was gone. No trace at all, no fumes in the air, nothing, not even a hum.

Later that night, after [redacted] had gone home, I stood out in the balcony with my two sisters. The little one (age 8) frantically pointed to an object on a faraway hill (1 mi.) and said, "[redacted] is that a UFO?" My sister, (age 16) and I both looked, it was an object with red blinking lights and a constant white light. We could not determine the shape. Suddenly, it did an amazing thing: it shot up in the air with incredible speed. Although we live very close to an Air Base, I know, they are not advanced enough to have a veicle with that speed.

Dear [redacted] Miss [redacted]

Reference your letter concerning sightings of alleged unidentified flying objects (UFOs) in the Azores. The information you submitted was insufficient for a comprehensive evaluation; however, it is being filed for information purposes. It is not the policy of this office to investigate sightings outside the continental limits of the United States.

Enclosed is a copy of the February 1966 Project Blue Book and additional material for your interest and retention.

B3+3

Around the last week of October, [redacted] and I were walking along a darkened alley. Time: 10:30 p.m. We were looking up at the stars. Suddenly, [redacted] spotted a stalite (or presupposed) but this satelite had double lights! This still remains an objective in my mind: Was it or wasn't it?

The first week of November, I had just come back from the movies with my mother, when I spotted a satlelite, I showed it to my mother. However, this one had and extraordinary brighter light than others I had seen. Then, the satlelite (?) stopped in mid air. The time: 10:00P.M.

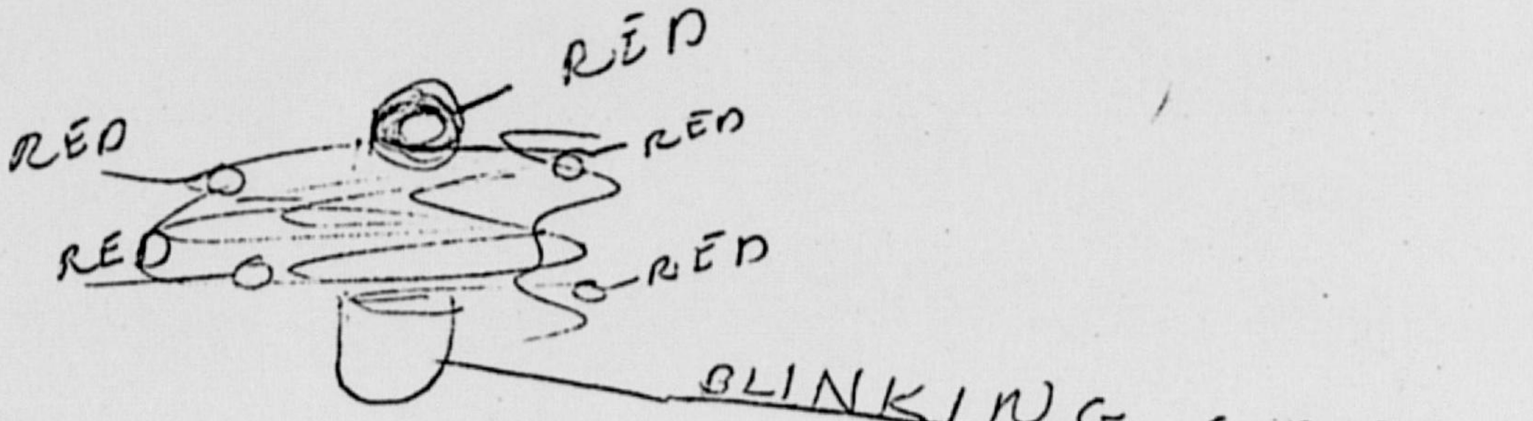

Sirs, I live in the Azores. Since not only I but many of my friends have spotted numerous UFO's, I feel that you could find something extra if you established an observatory here on the Lajes Air Force Base. Any information will be given readily by me.

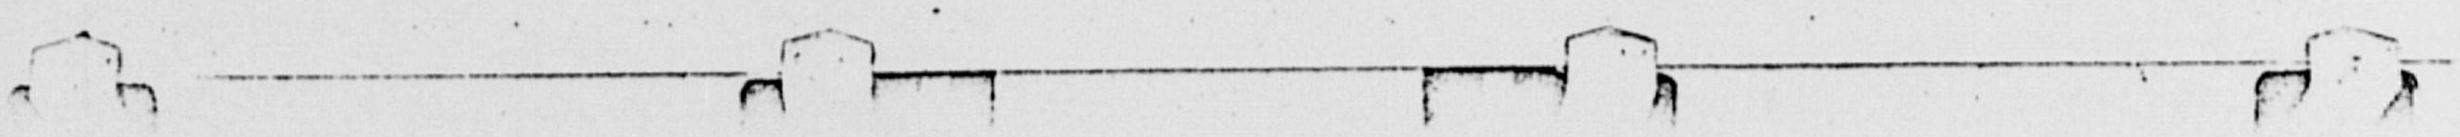

Also, could you please send me some more information on your Project Blue Book, and how I might help you with any of my ideas possible?

Thank-you

Dear Sir:

I am writing to you at the time because I could not think of anyone else who would believe me. About eight weeks ago, I, that is, my sister and I were outdoors Running around. It was fairly dark when we decided to go in,. It was about 6:30 or 7:00 in the evening, and since it gets dark here in Iceland very early, We decided to come in. Just as we were almost home, I was looking over the sky to see if I could see any stars with my telesope. The sky was clear, and there was no moon. Every thing was Perfect Iq still. I was talking to my sister when we both heard a sharp, humming sound. we were about home now and we both looked over the little town of Keflavik, about a half of a mile from where we live. It was something; I know that it was not a airplane or anything like that It looked something to the effect of being like the diving

It was something to this effect

Actual color.

saucer designed by [redacted]
It sat over the city FOR about half an hour
Then it zipped over toward the Naval Base where
my Father works, and swooped in Low as if it were
taking Reconnisance Pictures of something.
My SISTER ran INTO the house. and, since I suddenly
lacked the strength to run, I just stood there and watch
ed. The thing sat there and then suddenly Shot into the
Starry sky and disappeared. I can give you a picture
Or drawing to show you what it looked like.

Signed, and Sealed,

[redacted]

[redacted]

Reference your letter concerning your observation of an unidentified flying object over the town of Keflavik, Iceland. Your observation was indeed interesting, however, it would be extremely difficult to investigate your sighting since it occurred outside the continental limits of the UnitedStates. Also there has been a time lapse since you observed the object. Your sighting will be filed for information purposes.

The above letter was intended to go to [redacted], however, he gave an imcomplete address.

MEMORANDUM FOR: SAFOI

SUBJECT: UFO

1. The attached correspondence is forwarded for preparation of a proposed reply (double-spaced draft in duplicate). Strict adherence to all provisions of HOI 10-20 is imperative, with particular attention being given to meeting the established suspense date.

2. SAFLL Action officer is LtCol Weart, Extension 57218.

3. Please return this memorandum and attachments(s).

4. Remarks:

Lawrence S. Lightner

LAWRENCE S. LIGHTNER
Major General, USAF
Director, Legislative Liaison

Dear Mrs. [redacted]

The President has asked that I reply to your letter of October 1 concerning the aerial object you and your husband observed at approximately 9:30 p.m. October 1.

Possibly, you saw "Echo 2" or another satellite or object in an earth orbit. Echo 2s position over Alaska (East of Martin Point) at 9:15 p.m. October 1 was 140 degrees West, 70 degrees North. Based on the apogee and perigee of the satellite, Echo 2 probably would have been visible not longer than 10 minutes.

It is possible that you viewed some other man-made object in orbit. The Smithsonian Astrophysical Observatory at Cambridge, Mass., reports that there are more than 50 satellites, satellite components, rocket particles or debris in orbit and visible at various times. Some of these objects are in an orbit higher than Echo 2 and therefore visible longer than 10 minutes.

We hope this information is helpful.

Sincerely,

Oct. 1, 1966

Dear Sir:

Several times in the past month several people have spotted odd objects flying in the sky. They say they were flying saucers. Until tonight I wouldn't believe them.

Tonight my husband, another couple & I saw something (it looked like a bright star) going over over island. It was traveling from the South-East going into the North-West.

What I would like to know is, if possible; Was there a satellite flying on that course at 9:30 P.M. on October 1, 1966.

We live on the Southern

end of Kosciusko Island
in Southeastern Alaska.
The object probably passed
directly over Prince of Wales
Island. It was quite a
distance up. We looked at
it thru field glasses but
couldn't distinguish anything
other than it looking like
a bright star.

I would very much appreciate any information you could give me concerning this "thing."

Thank you.

Yours truly,

[redacted]

UFO form continued

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? Faster than a jet fly far.

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? Nearer than the stars - but higher than a plane because one case one was watching

22. Where were you located when you saw the object? *(Circle One):*

a. Inside a building
b. In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you *(Circle One)*

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? *(Circle One)*

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

a big bright star

64

Official U.S. Air Force

14. Did the object disappear while you were watching it? If so, how?

Went over the heaven - completely out of sight.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

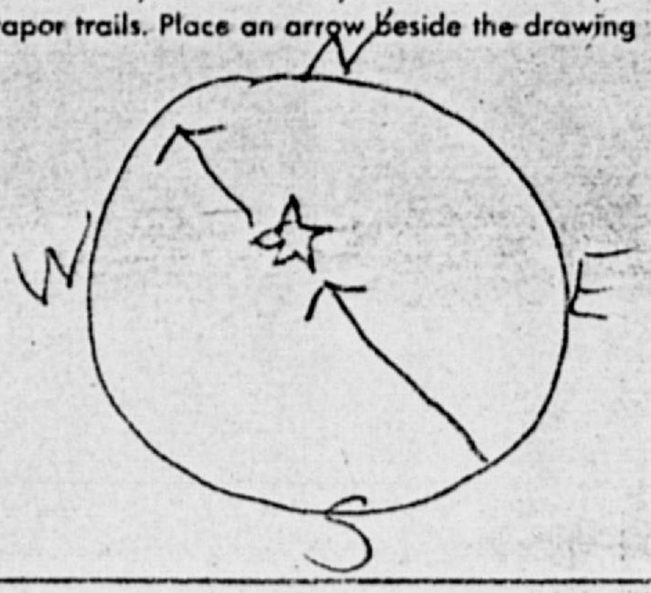

a. Sound None

b. Color Bright

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

FFICIAL U.S. AIR

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

3 (Day) Oct. (Month) 66 (Year)

2. Time of day: 5 (Hours) P.M. (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
(b.) Standard

4. Where were you when you saw the object?

[redacted] St. S.W. (Nearest Postal Address) Birmingham (City or Town) Ala. (State or County)

5. How long was object in sight? (Total Duration)

_____ (Hours) 5 (Minutes) Or More (Seconds)

(a.) Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes_____ No_____

6. What was the condition of the sky?

DAY
~~a. Bright~~
b. Cloudy

NIGHT
(a.) Bright
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, jul 61, which is obsolete.

FORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight—pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

— like a bright star

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

12. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other

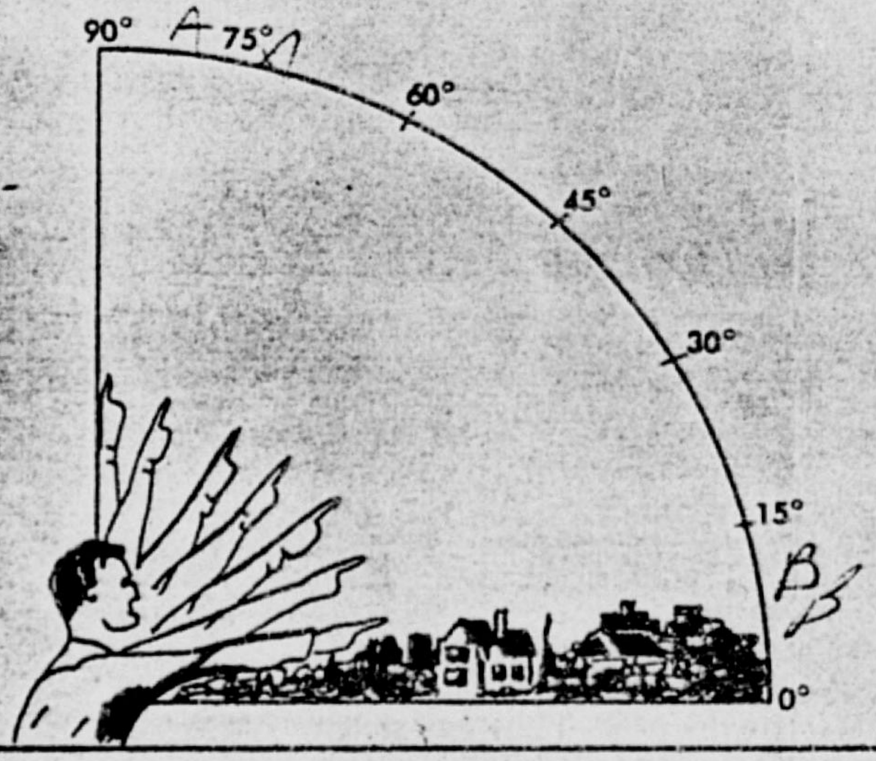

13. Did the object: *(Circle One for each question)*

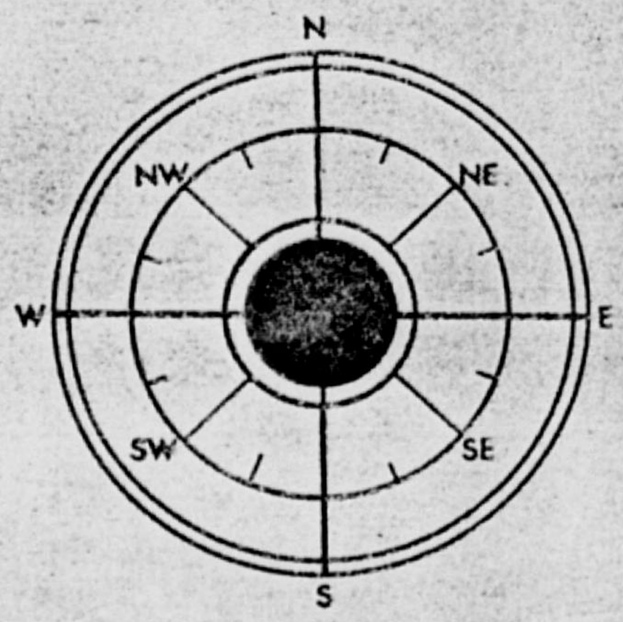

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

Went in a steady path across the sky.

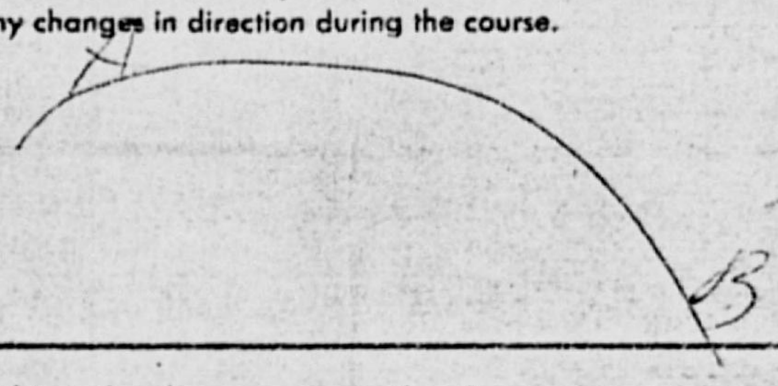

Official U.S. Air Force

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there?_____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

UFO form continued

I was alone at this time

30. Have you ever seen this, or a similar object before. If so give date or dates and location.
2 red balls for about 2 or 3 seconds traveling at a tremendous speed - coming from nowhere - and just disappearing

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* (Yes) No

31.2 Please list their names and addresses:
Mother - 4 son
[redacted] St. Ala

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS [redacted] (Street) B'ham (City) - 35211 (Zone) ALA (State)

TELEPHONE NUMBER [redacted]46 SEX Female

Indicate any additional information about yourself, including any special experience, which might be pertinent.
Have been reading quite a lot of material on U.F.O's. Do believe that there is something out there - It is a very deep subject. Too deep for me to comprehend - Have talked with a few highly intelligent people - Dr's + Engineers who also have seen strange sights in the sky.

33. When and to whom did you report that you had seen the object?
Day Month Year
My husband - who thinks I'm a little Ha! off - not really - he has become almost a believer - after our son described this to him.

UFO form continued

Brother - They were engrossed in a T.V. show and didn't come for a minute or 2 - but we three watched together, while they did come, until it disappeared over the horizon

Signed -

Official U.S. Air Force

34. Date you completed this questionnaire: Sunday April 2 - '67
(Day / Month / Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

Just one more thing - which will
sound far-fetched I know - but
the first strange sight I saw or I saw
birthday Oct. 3 - that is why I
remember it so well, on this
particular day - I had a feeling
that I would see a saucer
that night - at dark I went
out in our back yard to watch -
This feeling of great excitement
was something I can't quite
describe, but nevertheless I
did have it. I watched for
some time and first saw only
planes & stars - I went into the
house did the dishes and went
out again - It wasn't long before
I saw a movement in the sky
and there was this bright star
sailing over the heavens in
a steady path - very fast. I
called for [redacted] my

2 1/2 SOUTHWEST OF ORANGE SIGHTING

Persons making sighting;

Rushville Ind. Age 20 , Employed -International Furniture Co Rushville. Education - 10 grade.

Glenwood, Ind. Age 22, Employed D-M Co Connersville, Education 10 grade.

Date of sighting; Sat. Sept; 24, 1966 at approx. 8;30 PM

Sky conditions; Clear warm dark night, no moon, no wind, normal night time visibility.

Total time seen; approx. 45 minutes.

Note- The object observed appeared as 3 brilliant flashes of approx. one second duration each and with approx. one second time interval between each flash. To be seen at the instant of the flash was a glowing firey redish orange sphere surrounded by a zone of brilliant white light approx. 1/3 that much larger still. The center globe seemed about the size of a volley ball but since the distance was not known the true size cannot be known accurately. The witnesses were never able to discern any shape or form , justthhe globe of brilliant light seen at the flash.

Narrative;

Witnesses were southbound on the Orange Pike which is located in the southeast corner of Rush County. When about 1/2 mile southwest of Orange this strange eerie light flashed three times above the trees some distance away. The witnesses continued on southward and the firey globe later flashed again off over a field near the Wilson Pike. On this occasion one witness seen it out across the field slightly to the rear, but her boy friend who was driving knew it had flashed because it illuminated the road ahead much farther than his headlight beams. On the third occasion they stopped at the intersection of Wilson Pike and State Road 52 turned out the car lights and watched. It flashed its three familar brilliant flashes from a position over a field between and behing a house and a small barn and in front of woods some 2 or 3 blocks to the rear. It seemed closer to them and appeared larger than a basketball, was very brilliant and illuminated the sky, woods, field , buildings etc. This closer approach made one witness to use his discription "Leery". He stepped on the gas and left the scene.

Note; This was the female witnesses second encounter with this strange thing. Her previous meeting took place during the last week in April in the same area when with her now divorced husband. Apparently the object was always distant enough to arouse curiosity but not fear. At least not in these witnesses who are at that young and daring age and wanted to find out what it was. The mysterious globe played a fantastic game of hide and seek with them since it could have left at any time being completely invisable when moving about. It was noticed that it would come closer when they turned out their lights. Another thing noticed was the total silence of the country side, all natures night creatures fell silent. Another fact- this was the same night when so many sightings of strange objects was reported in Greensburg, Shelbyville, Anderson, and throughout the midwest.

The witnesses told their parents and relatives this fantastic story. Only the parents beleived them and everyone ~~laughbdughethem~~ laughed them. They told no one else , not wanting to be laughed at some more.

Oct. 25, 1966

CAMERON SIGHTING

Persons making sighting;
Ronnie Cameron, RR 6 , Rushville, Ind. Phone 932-2305 , Employed -Produce Clerk, Kroger Co. , Education- High School
Other witness wife- Judy Cameron, age 20, house wife.

Date of sighting; Oct. 8, 1966 at approx. 10;CO PM

Locality of observation: SE of home on State Road 44 west of Rushville Ind.

Sky conditions; clear , no moon.

Total time object seen: Estimated 6 minutes. Sound heard estimated 15 or 20 seconds by two witnesses ,also brother Bennie Cameron, sister Diana Cameron and sister in law Nancy Isgrigg.

Narrative;

Wife heard what she described as a screaming sound. She looked out the window and seen a blinking red light going southeast at approx 70 degrees elevation. Sister in law in next house west experienced TV interference when the sound was heard. The Cameron TV was on and they do not recall any interference on it. Ronnie described the sound as a whistling sound of moderate volume, and no other sound was heard. He looked out the front window of the home and seen a red and white light side by side. They were about the same as an ordinary light seen from a distance. He ran upstairs to get a better look at the lights. The lights did not blink and seemed to be hovering above a field in a SE direction barely above the tree tops. He and his wife watched the lights as they hovered there always keeping the same brightness and position for an estimated 6 minutes. Some police dogs in a pen next door put up a howl. But they often howl. Suddenly the lights started moving in what seemed to be a straight up direction. In an estimated 7 seconds he lost sight of them. He came downstairs and he and his brother got their guns and went out across the field in the direction the lights were seen. He said they were looking for prowlers (having been bothered with them lately.) and " anything else" .

NS Case Info of D

Connersville, Ind.
Dec. 20, 1966

To my fellow earthmen,

The enclosed East Connersville Landing shook me up somewhat, and I dont shake easily after some of the amazing things I have found out. I think I am mad because the sneaky little boogers got away with it so nicely. No more swamp gas jokes-- I know you afe under strict orders and would be shot at sunrise if you let anything slip. I know that when another so called air force spokesman stands up and give another fantastic "swamp gas"explanation , its not our true air force speaking. The stupid bumbling roll you are forced to play must be as bitter as gall in your mouth.

Enclosed are all my sightings that amount to much except one I havent as yet checked for fact or fiction. I have identified about 10 and threw out about 15 due to limited information or witness unreliability. I have been busyer than a cat on a hot tin roof for four months. I hope something here is useful to my side. If I dont #### get any answer(as usual) or have the envelope returned I'll assume you got them.

It looks like its cowboys and indians all over again--- this time we are the indians.

Your under the radar identifier 60 miles west.

No Case Info only

[redacted]
Connersville, Ind.
Phone [redacted]
Nov. 22, 1966

Commanding Officer (Radar Section)
ATIC Wright Patterson Air Force Base
Dayton, Ohio

Dear Sir,

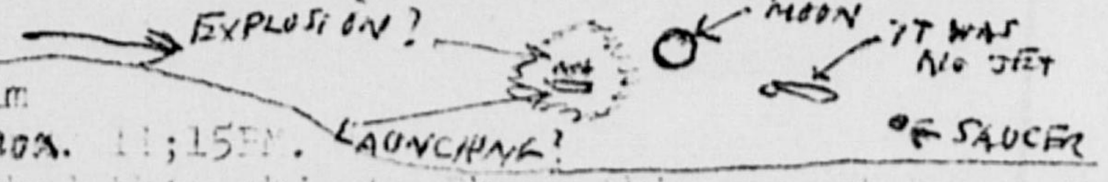

I know I wont get any answer to this but feel like I should write it anyway. You never know when some of the information may be useful. I am a fellow who investigates sightings of these non existant flying objects (UFO) over here in this section of Indiana. I am pratically in your pocket being just 60 air miles west by a little southwest.
I am just now digging out of a wave of sightings that hit in October. I guess you know what I mean, you have the radar. We have approximately 15 persons who have been very close observers, 25 who seen shape, and 75 who seen lights or a light. I have ignored the fun makers, wearyness, a peeved wife, and all the other obstacles and achieved my goal of finding out all that was humanly possible during the wave. Probably you couldnt care less but if I have anything that would be of interest to you, maybe for radar-visual comparison you are welcome to it. I KNOW ALL THE TWENTY YEARS OF "SWAMP GAS EXPLANATIONS" ARE NOT THE TRUE AIR FORCE SPEAKING. If I didnt think so, knowing what I know, I would be scared to death. If you got any single blips for the nights of Oct 5 or 21 they were snooping around the Federal Micro Wave Relay Tower and Telephone relay Tower area. One made a second visit the same night.

If on Oct. 10 about 4;00 am you got five strange acting blips this way. You would never guess their shape.

On Oct 6 starting at 6;58 PM until 11;00 you should have had at least several low widly soaring hovering, diving blips in this area. I think the two planes you finally sent were too low.

Sometime during the middle of October some farmers got excited about some of your Radar chaff that I have enclosed in this letter. They found some around this 5 inch flat and hard on the bottom hole with two other indentations making a triangle. At least they claimed the holes were there. I didnt get to see them because of the destruction of snow, rain and pigs. Some of the AF chaff was suppose to be found south of town in the area where the Citizens Band Radio Owners first started tracking their UFO. I think it is chaff but it it isnt the entire thing should be checked into better.

On the evening of Sat Oct. 21 your radar should a have really been cluttered in this direction. This drawing will give you some idea.

I hope you got a whole ream of moving picture film for your efforts on the night of Nov. 14. at approx. 11;15PM. A little later 4 scared coon hunters really spooked that object. Those things must be very touchy About possible laser beams. Well I know your files are bulging with sightings, but thought perhaps I might be able to do something for my side. I can put form and motive to some radar blips.

Your Friend,
[redacted]

and not a 4 legged cow. " Obs. B said " It sounded like a person walking slowly. There was the crush of weeds and stubble and a faint plop. It never got any louder. I was scared and my heart was pounding. We took off as fast as our bikes would go,and raced up John St. neck and neck. " Obs. A said " I had cold chills up my spine and we didnt slow down until we got to Vine St. I finished the rest of my route awfully fast that morning. I felt like something might be watching me." Obs. B said" I was too scared to care if I made a bad throw at a porch with a paper. I felt like something out there may have seen us." When he was asked where he looked for his enemy he said " Everywhere -ground or air."

Concerning the walking sound we have the following posibilities;

A. Something humanlike with two legs was walking. If so it may not have been too far distan because this type of sound is not audible beyond a certain distance.It is not known if dew was on the weeds or not.

B. Some type of machinery which started up on the object.

C. It was imagination on the boys part.

D. A cow walking in the field. (animals are terror stricken near these objects.Obs. B stated that he heard the sound of cattle down near the barn to the south.Both were certain it didnt sound like a cow walking.)

E. Wind or a light breeze.(It was a still morning.)

For the most part the boys were met with nearly total disbelief when they excitedly related what had happened once home. Obs. Bs mother said he was sure wound up and excited when he got home. She thought he was exaggerating something he had seen by adding something from TV or one of his books. He told his scout troop and although not all disbelieved it was decided it was best to remain quiet. Obs. As sister in law and her mother did take seriously his days of very excited talk about the event. He was urged to call me.

On the evening of the 5th. after school Obs B brave in daylight , returned to the scene and soon discovered the three strange holes and also noticed the faint sulphur smell again. He also noticed a small spot of light red dirt like material about 6 feet away from the three holes. But he didnt pay much attention to it being more interested in the holes. He also looked briefly for some holes left by the object on the first morning he noticed it . He looked in a southward diraction but dident see anything. On its first night there the object must have been quite close to the 2 strand barbed wire electric fence which runs across the field. Is it possible something got a"shock"?

During the next several days trips were made to the spot with friends and the holes were examined , felt and discussed. On Sunday the only adult to see the holes Obs As 27 year old sister in law , took her camera and forever recorded absolute proof on film that the holes actually existed, and were there.(See attached photographs.) She looked for any vehicle tracks and there were none. Even the cattle had avoided the area. The soil seen on the edge of one hole in a close up photo is some that Obs A dug out from the bottom of the hold where it had fallen.

A telehpone survey of the area near the sighting has not revealed any other witnesses.

EAST CONNERSVILLE LANDING

Observers to the event;
Name kept confidential . Henceforth known as Observer "A". age 14, Education-Freshman Senior High. Member Boy Scout Troop, Newspaper Carrier, Interested in Science. He is an intelligent and trustworthy boy.(See attached personal character statements from Pastor, Science Teacher, and Scout Leader.)

Name kept confidential. Henceforth known as Observer "B". age 13, Education- 8th. Grade Junior High. Member Boy Scout Troop, Newspaper Carrier, In Radio Controlled Plane Club, Interested in Astronomy. He is an intelligent and trustworthy boy. (See attached personal character statements from Sunday School Teacher , President Plane Club,and Scout Leader.)

Time of Observation; Wed Oct 5, 1966 at approximately 5;30 or 5:45 AM.

Locality of Observation; East Connersville, Ind. Seen by witnesses who stood at the end of John St. and viewed object in a field a by SW of there.See attached drawing of area.

Weather Conditions and Visability; Near total darkness , cool and cloudy, no wind, no mist or fog, no rain four previous days.

Total time seen; From 2 and 1/2 to nearly five minutes.

Narrative;

On Tuesday the day before Wed Oct 5 one of our young witnesses , Obs.B , was delivering his papers on John St. at approximately 5:00 AM. When he reached the last house on the dead end street he noticed a group of lights in the field west of the street. He glanced at them and since they seemed somewhere near or in line with where the electric sub station should have been he thought they were new lights placed on it and continued his route.

On Wednesday morning the boys were delivering their papers and usually keeping within sight of each other. This was their mothers wish because of so much crime recently. Obs. B invited his friend to come down to the end of John St. and see the new lights , thinking perhaps they might scare him a little. As they delivered their papers and approached the end of the street it was readily apparent that the lights had moved since the night before and were a little more to the north. The boys sat on their bikes and stared transfixed and half afraid at a dark object with lights some 280 yards out in the field. One said to me " I knew it was a UFO." The other said " It was eerie and I felt like something was there that shouldnt be." (See attached sheet for the boys drawings of what they could see.)

Obs. A heard a faint High pitched whirring sound from the direction of the object. It has been suggested that what he heard was Roots Blower Co. a local factory testing a blower. We can forget this because they were not testing at this time. Both of the boys noticed a faint odor which one described as smelling like sulphur. The other boy who has a chemistry set said it smelled like a mixture of sulphur and tannic acid. Our young observers are sure that they next began to hear a sound which in from 10 to 20 seconds by their estimates caused them to flee the scene in fear and at great speed. It was the sound of something walking slowly through the weeds and stubble in the field. Obs. A said "I could hear the sound of breaking weeds and stubble and it sounded like a person walking

(1)

Verifiable Fact No 1.

We have actual photographic proof of the holes impressed in the ground by the object. They were not created by any natural means that could be discovered. The farmer owning the field one Hollis Hanson, in spite of his belligerant attitude admitted he had nothing with that many lights on it and did not recall moving anything into the field.

Verifiable Fact No 2.

The witnesses are the better type of American boy, intelligent and truthful, with good family backgrounds. There is absolutely no possibility of dishonesty on their part. Of this I am certain after a week of off and on interigation. The were constantly reminded to tell exactly what the saw or heard no more and no less. Their storys were checked one against the other, questions were repeated at different times and indications of unreliability were looked for.

Verifiable Fact No 3.

With thousands of quiet fields to land on why land here? why sneak down two times and remain for an unknown legnth of time? One would have to be some kind of a dunce not to know that something interested them greatly in that area. Was it the sub station? Was it the sub station and its close connection to the State Police Post, and its transmitter. What an ideal spot from which to observe and study the earthlings power supply system, police and commercial transmitters, and general activity. 180 yards from a 69,000 to 12,000 volt bank of three transformers supplying power to southern and east Connersville, and a rural area 15 miles south. Two blocks from the State Police Post, 3.tenths of a mile from the fill, one half mile from the court house, and 9 tenths mile from WCNB radio tower

Verifiable Fact No 4.

When this sighting is placed in its proper context with four previous sightings we can easily perceive a definite and disturbing pattern. An indication of great interest in and secretive examination of our ~~electrical systems and forms~~ DEVICES of communications.

Sightings 1 and 2. -Two amazing sightings which should have been on the national news wir Over fifty owning or being friends or neighbors of a person owning a citizen band radio tracked for over an hour a hovering , circling and returning UFO . Then later in the evening two objects dove at a CB radio owner while he was transmitting , knocking him off the air. Much may have been learned about one form of our communications that night.

Sightings 3 and 4.- Some mysterious glowing object was very interested in our Federal Micro Wave Relay Tower . It made two visits in one night. Another object was seen and also felt due to its heat, in the area of a telephone relay tower.

Final conclusion concerning East Connersville Landing;

With this event we have the critics and disbelievers in a corner from which the only means of escape is to say the boys must be hoaxers and dug the holes or else dismiss the entire problem from their minds and go back to hiding their head in the sand.

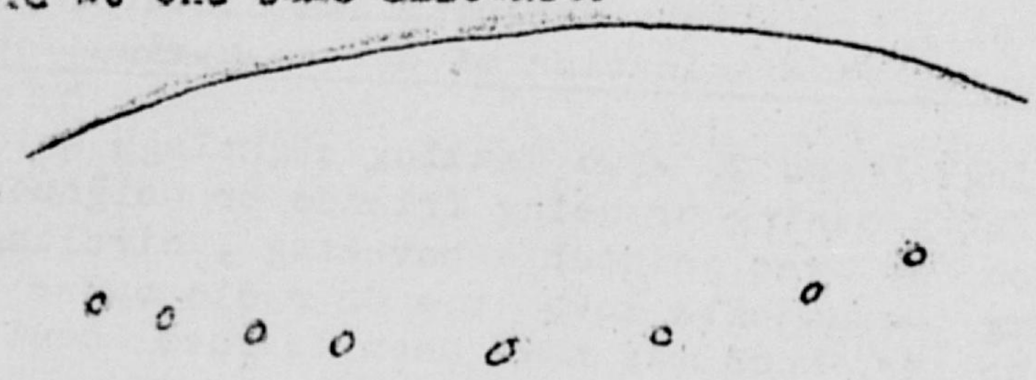

Don Worley
Investigator APRO
Dec. 18, 1966

I heard from one about 8, Tor lab for radiation evidence and plastic cuts of helmets.

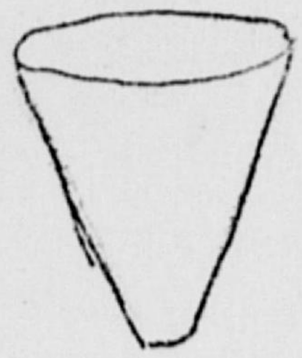

Obs. A s discription and drawing of the object;
The edge of the object was solid and smooth but it didnt raflect light very well. It sat level. He couldnt see the under part. He seen about ten red, green, another color he cant remember, lights . He didnt remember where they were on the object except four shown. The lights pulsated slowly. They were round and about the size of a light bulb. He estimated the objects size as 27 ft. long and 10 ft. high after observing an auto at the same distance in same estimated darkness. It was found that the object must have been a light color or he could not have seen it at all.

Obs B s discription and drawing of the object;
Seen a dark curved shape. He said it would be the same as if you shut all the lights off in a house. You could still see a dark something. He seen at least 8 red, white, green, clear bright lights . They were a little bigger than outdoor xmas light. At several places in between he could see faint dim lights. They pulsated slowly. Dont remember sequence. He estimated distance between the end lights to be 23 feet apart and 6 foot off the ground after observing two flashlights in the field at the same distance.

The adult witness and the boys all estimated the holes to be 8 feet from eachother forming An equidistant triangle. Obs. B stepped off the distance. The adult witness estimated the holes to be at least 7 inches in diameter at the top , tapering to around 1 inch at the bottom. This formed a cone shaped hole and was estimated and appears to be in the photographs taken, 7 or 8 inches deep. The adult witness described the holes as cleanly compressed with no dirt on the top edges and not even the weeds along the top edge disturbed. Obs. A said the sides of the holes were fairly smooth and "kinda hard". Obs. B said the sides of the holes felt like dirt that had water poured on it and then dried in the sun.

RELAY TOWER CASE

[redacted]age 32, RR[redacted], Rushville, Ind. House wife.
Date ; Wednesday Oct. 5, 1966 (night previous to the big event.)
Locality; 4 miles NE Rushville
Sky Conditions; clear, no moon, stars out, moderate to light wind.

Narrative;

The kitchen is on the east side of the house from the bedroom, and you can look into the kitchen from the bed in the bedroom. One large kitchen window opens to the east. A Federal Aviation Micro Wave Relay Tower is situated about two city blocks E by NE from the window. This lady lay awake in her bed and was startled to see her kitchen becbme all lit up in a steady blue green colored light. It was as light as it would have been had a florscent lamp been turned on. The light flooded in her east kitchen window and because of fear she did not leave the bed and go look out the window. Nor did she awaken her husband and he is quite put out about this yet. For nearly 10 minutes by her bedroom clock the light remained there. The the edge of light began to receed across the kitchen floor, as if something outside were moving away. It took an estimated 20 seconds for the light to go across the kitchen floor and darkness to return. Several hours later around 2;CC AM her daughter who was ill got up to go to the bathroom and Mrs. Chrisman awoke to again see her kitchen bathed in the light. And again after an approximate 10 minute time period it slowly receeded across the floor, faded from the window and darkness returned.

Sat- I rechecked her story again today. I am positive she is telling the truth and has no reason to do otherwise. The radio engineer and I discovered her when we were checking around the relay tower and she told her story spontainously. I can find no light from any source to explain this . The nearest light is too far away and behind trees. No other farm family's seemed to be awake that night.

Sun- Re-questioned her for third time in presence of URSA men and radio engineer and learned that refigerator ceased to run while light was present. It had been out of order and was comming on very often. It resumed this after the light left.

Conclusion based on facts; A highly luminous aerial object hovered in the vicinity of the Micro Wave Relay Tower for an undetermined legnth of time.

Don Worley
Oct. 8, 1966

Clark Sighting

Person making sighting; Howard Clark, 720 W. 2Pbst. St. Connersville, Ind. ,Phone 825 3680
Employed DM on line, Education 4 yrs. Service 4 yrs Navy, age 53.

Time; Fri Oct. 21, 1966 between 8;30 and 9;00 PM.

Locality of observation; same as address.

Total time observation; 6 seconds.

Sky conditions; Partly cloudy , Cumulus clouds , some stars, 1st quarter moon at approx. 60 degrees south, good visibility , no wind.

Narrative;

Person went out to roll up the windows of his car parked in the driveway next to his home. As he opened the door he felt a warm flush of heat such as one would feel from a distant furnace or stove. At first he thought his wife must have overheated the car motor. But the heat seemed to be on his face so he looked up. There in the sky hovering silent and perfectly motionless was sharply outlined dark oval shaped object. An area estimated at 50 feet around the object was moderately illuminated. It was in the E by NE at approx. 45 degrees elevation. And the strange object was the size of an orange, held at armslength or as he described it " bigger than a tub". Beneith it a light of seemingly light bulb size glowed with a rusty yellow color. From what seemed the rear of the thing there was sticking out a short rod or antenna. After hovering about 5 seconds it suddenly accelerated and within a second and a snap of the fingers it disappeared. During this departure toward the NE at a 45 degree angle in a banked curve a glimpse was caught of what seemed to be a short swept back fin or other projection on each side of the object. The witness said it reminded him of a devilfish in shape and things sticking out. It left behind a flat seemingly 5 foot wide brownish dust like trail. The witness felt the warm flush of heat no longer. He went into his home and told his wife and children. They thought he was joking and laughed at him. The finally came to realize he was not joking. In bed that night he lay debating with himself. " Did I really see something or didnt I?? The thing seemed too incredible and the time too short. He was reluctant to see me since he fears the reaction of his fellow employees at work.

Important note; An AVCO (Aviation Corp.) top secret explosives test ficility is located approx. 1/2 mile SW of the sighting location. A telephone micro relay tower is located approx. 1/4 mile NW of the sighting location.

Don Worley
Oct. 30, 1966

COX SIGHTING

Persons making sighting; Ray Cox, Laurel Ind. Phone 698 2314, Age 39, Employed Philco-Ford as Machine Maintance Man. Special Training Electronics School, Education High School

Date Of sighting; Oct. 6, 1966 between 10;30 and 11;00 PM

Locality of Sighting; On State Road 121 9 miles south of Connersville, Ind.

Sky conditions; Clear, starry, no moon , slight breeze , cool evening.

Total time seen; 10 or 20 seconds at most.

Narrative;

Witness who has a citzen band radio in his car was driving home from work south bound on highway. As he neared new bridge on highway he obsefved rapidly approaching from the south at about 300 or 400 feet and an estimated 1/4 mile away,a bright white light of what he thought must be an airplane maybe going to try to land. Object swooped over the top of a large house on a hill south of the bridge and dived at the bridge at faster than jet speed. And seemed to come at him down the highway. Witness said he felt very insecure , admits to fear and a desire to find a way to retreat. He swerved his car and jammed on the brakes. The object was described as being round, much larger than an aircraft searchlight , at least 6 foot in diameter, or the size of an orange held at arms legnth. It had a bright white arc welder like glow that rivaled the sun in brightness. It was smooth edged and left no trail. The object glowed from all angles.

The object suddenly made a right angle turn to the left and whizzed down the creek bed so low the observer could see it flash through the trees as it went east.and was quickly lost from sight.At no more than an estimated 10 seconds later another object this time with several small white lights on it followed exactly the same route.,This had had the same manauvers and speed as the first. The witness sat in stunned bewilderment.

As the Cox had approached the bridge he was on the air transmitting on his CB radio. And then all the above took place. All he was able to say was " Fellows I may need help it----" and the strenge light loomed near and his radio both transmitter and receiver were blocked by a transformer like hum. This is this persons second meeting with an unidentified flying object. He firmly believes in them.

Note; The fact that strange flying objectsthe object had been seen in that area. --

The fact that he was cut off in mid sentence. --

The fact that his transmitter was silent for short time. --

The fact that upon his return to the air he was excited to say the least and related what had happened to him.

These facts are all verified by those listening to him on the CB radio.

JACK LEWIS SIGHTING
(Citizen Band Radio Group)

Person making sighting; Jack Lewis , RR 4 , Connersville, Ind. Age. 27, Employed Design and Mfg. Co. on Line, Education 10 yrs. Service- 8 yrs National Guard.
Also his Wife Linda Lewis, Age 27, Housewife, Education 12 yrs, 2 yrs business College.
Also Approximately 7 Citizen Band Radion Transmitter owners in Fayette County and 5 owners of same in Rush County, and their wives,children , friends , neighbors etc. (Conservatively estimated at"at leasst 50 in all!")0

Date of Sighting;Thur. Oct. 6;1966 starting at 7.30 PM

Locality of Sighting; Various locations in Fayette and Rush Counties in Southeast Central Indiana.

Sky Conditions; Clear , stars out, no moon, cool night sweaters needed.

Total time seen; Over 1 and 1/2 hour.

Narrative;
Jack Lewis and wife and children were headed west on the Columbia road six miles southwest of Connersville, His wife noticed what she thought was an airplane with red , green, and white lights going east very low. No sound was heard. Suddenly the object stopped instantly and hovered at no more than cornstalk height over a field. Jack turned his car around and they drove back and watched the now one slowly pulsating flat on the bottom shallow domed bright white light for approximately 15 minutes. Jack and his wife were on the CB radion excitedly telling everyone what they saw. Suddenly after the object became much brighter it too off in a flat position(the light) at a rapid speed and a green and red light could be seen on each side and a little lower than the white light. Witnesses drove west again to friends home and 6 people assembled in the yard looking for the object. The lights soon came back from the south and hovered very low over a woods at estimated 500 yards south. It hovered for another 10 or 15 minutes. This time the object went completely dark then flew off at a rapid rate into the western sky. Then it stopped and hovered again momentary again. Then it turned a bright white and sped off west.Its speed was amazing- faster than a jet. It seemed to swing over part of Rush County and CB owners over there could be heard saying " I see it , I see it. " Then as a speeding white light it returned and seemed to fly north over Connersville. It seemed to stop in the N by NE and began to slowly change form red to white to green etc.A CB owner who is from Ohio was supposed to have made a tape recording of all this excitement.Hewas also supposed to have called a CB owner in Oxford Ohio who called Wright-Patterson AFB about some planes.No tape had been produced and this seems to be a lie. Another tale has it Wright#Pat AFB had blips on their radar in this area. Anyway it is true that two prop planes did arrive over here and flew all over the area. The object in the N by NE had receeded and seemed starlike. The planes never came near it. Finally it looked like every other star and was lost.in them.

Ship Learned a Lot about us from
of our communications that night.

CICIPEMB BAND RADIØ SIGHTING

Person Making sighting; Robert Zimmerman,566 Dora Ave. Connersville, Ind. Age 27, Emp-Philco Gun Welder. Education 12, (Citizen Band Radio Owner)

Date; Thur Oct. 6, 1966 at approx 9;00 PM

Location of Sighting; Witness observed object at different places in sky fovm home, south of city., and north of city.

Sky Conditions; Clear cool no moon.

Total time seen; Believed several hours.

Narrative;

Heard about object on CB Radio. Thought Linda Lewis who first told him what she was watching was pulling his leg, and the whole thing was a joke. Finally seen object appear in S by SW. Then it disappeared toward Rushville and he could hear others on CB radio reporting sight of the object. Witness went down to area where orginal Cb owner had reported object. Object came back east and passed over area again and passed between WCBB and State Police radiotowers and arched as though climbing through the sky to a fantastic speed toward the north over Connersville. It was seen to slow down then speed up and make an instant right angle turn without stopping. Object maneuvered faster than a jet but made no sound. When passing overhead going north it was a bright white light with a blurred greenish tint on the edge and almost as bright as the sun. Witness also said the object was a little larger than a full moon. Witness alerted several CB radio persons in towns to the north and received an answer from some 15 miles north in Pershing that they could see the object. During its maneuvers about everyone who happened to be listening seemit except the blind CB owner. It remained stationary north of Connersville and appeared three times brighter than the brightest star. Two other persons are known to have looked at it through telescopes and another thru binoculars.It was described as having lights of the most beautiful sharp florescent colors. The red greens and white lights slowly pulsated in estimated 15 seconds for each cobor.

Nov. 15, 1966

CITIZENS BAND RADIO SIGHTING

Person Making sighting; Bob Hamilton RR 6, Connersville, Ind, Age 38, Employed Philco as truck driver. Education 10 yrs.

Other witness - his wife Hazel

Date; Oct 6, 1966 at approx 8;00 PM

Location of sighting; 1 and 1/2 miles north of Columbia , 9 miles SW of Connersville.

Sky Conditions; Clear and cool

Total time seen; Several hours

Narrative;

Heard Jack Lewis call on CB radio and knew he was near because of carrier strength. Hurried outdoors and seen light passing east to west at what seemed 1 mile south of him. The bright red green and white glowing and pulsating lights seemed no 400 or 500 feet high. He says the lights stopped instantly and hovered two times then continued on. Then hovered again over the Mary Grey Bird Sintuary for nearly 10 minutes. Then the object suddenly sped off in the SE direction and quickly disappeared. He claims that no more than 5 minutes later a second one or the same one appeared in the SE and moved west stopping to hover twice. It had the same type of lights. He says that this one zoomed off in a westerly direction and disappeared, Then later came back and swung north passing between the two radio towers. Then it darted east and covered in the N oy Ma sky.

Nov 15,1966

CITIZENS BAND RADIO SIGHTING

Person making sighting; Richard Henry, RR 5 , Connersville, Ind. Age 24, Emp- Design and Mfg. Co. Press Operator, Education 10 yrs. Military service Army 6 yrs. 3 yrs special training -USArmy Oxford Ohio NIKI Mibble Site, Cincinatti Air Defense.
Also wife Sharon was witness
Date of sighting; Oct. 6, 1966 at approx 8;00 PM

Locality of sighting; 4 miles esst of Columbia and 5 miles S of Connersville.

Sky conditions; Clear starry cold

Total time seen; several hours.

Narrative;

Alerted by CB radio and first seen object in south going west at bout prop plane speed. It seemed a little above tree top height and was a ball of fire , blood red, and looked hot. It stopped instantly , seemed about 500 yards away and was the size of a half dollarr held at arms legnth. It hovered in the Sk for approximately 10 minutes where it pulsated red , green, and white. Then suddenly turned a glowing white and sped off toward the SW at 45 degeees at a speed faster than a jet. He said " It would run rings around any missile I ever seen. He thinks it swung west over Rush County then came back over Fayette Co , then went north and ended up in the NE.
Additional notes; This man and his wife claim to have seen dozens of pulsating objects of ast r size that suddenly take off and disappear in this area. He claims this has been going on since July. He claims he once seen five ofthem and three disappeared within a five minute period. His wife claims she watched on one evening in a cloudy sky that hovered and then disappe red.Claims she also seen a bright ball near the ground which disappe red instantly. His father and mother in law who live down the road about 4 miles make the same type of claims.

COON HUNTER SIGHTING

itnesses to sighting;
Dewey F. Isaacs 3303 Beeson Ave. Connersville, Ind. Age 28, Emp- Dond M as Leadman Assmebly Education 8 yrs.

Date of sighting; Mon Nov. 14, 1966 at 9;30 or 10;30 PM not sure?

Locality of sighting; 5 miles NE Brownsville in Union Co near the old sawmill woods.

Sky conditions; clear starry , cold

Total time seen; 5 to 10 minutes

Narrative;

Cut coon hunting with three friends. Aircraft began circling the area and bothered the hearing of their distant hounds.Only the lights of the aircraft could be seen. It sounded like a two motored aircraft. Didnt think it was a passenger plane. One man seen a light due east over Abbington, at approximately 30 degrees elevation. It was much larger than a star when first seen.It had a bright white color with an orange tint. The light seemed to be moving due west toward them.It would move then seem to stop then move again, and stedily got larger. On the third wide circle the plane went toward the light and when it got close the planes motors cut out for a second. The plane veered away and the object shot up in the sky some distance then came back lower. The plane must have left the area. He didnt watch the plane as he was too busy watching the light. Light now large as a grapefruit held at arms legnth, round, fuzzey edged. It seemed very weird and fear clutched his stomach. One man wanted to shine his flashlight at the object but the others didnt want him to. When the object at about 80 degress d elevation the person flashed his light up at the object. Object instantly took off and indistance looked a small ball like fire coal and disappered in 4 seconds.

When he got home he took 3 excedrins so he could sleep good because he had to get up early for work. Stood by wife who lay in bed and scratched nervous welts he gets when nervous and told wife of horrowing incident.

COON HUNTERS SIGHTING

Person making sighting; Paul Jenkins, 605 W. 34th. St. Connersville, Ind. age 26, Phone 825 2670 Employed- D & M Co. Shipping Dept. Education- 11 yrs. Military - 2 years Army

Date of sighting; Mon Nov. 14, 1966 at 11;CC bb 11;3C PM

Locality of Sighting; 5 miles NE of Brownsvill, Ind. near old sawmill woods.

Sky conditions; clear , starry, cold

Narrative;

Out coon hunting with his frinnds. They had been out about three hours. A plane started circling slowly and seemed about 1,CCC feet up. He noticed an extra bright star in the east. It was the brightest star he had ever seen. The star got larger and seemed to be coming toward them. Sometimes set still in mid air and had a yellow colored glow. As the light got about half way to them the circling plane flew to the right of it. He heardstheiplanes motors cut out for an instant.when it was at it closest point.to object. The big Wiibeeffettyy round object was about the size of an orrnge held at arms legnth. It was now nearly overhead by a tall walnut tree. Then the beam of the flashlight was flashed at it. The thingg took off almost instantly it seemed. In two seconds it got dimmer , turned into a small finger shape and disappeared . It left at about a 45 degree angle toward the west.
The persong who shined the light up at the object said he did so because he wanted to communic te with them.
Additional Infogmftiomgn Thisfm nsidife said he kept talking excitedly about what had happened to them on their coon hunting trip and was still telling her about it as they lay in bed after midnight. She finally said " I believe you , please shut up so we can get some sleep.)

Don Worley
Nov. 16,1966

COON HUNTERS SIGHTING

Witness making sighting; Ronald Collins, 3222 Richmond Ave. Connersville, Ind. Age 24, Employed- D & M on line, Education- High School, Service -4 yrs Navy

Date of sighting; Nov 14, 1966 (Mon) at around 11;CCPM

Locality of sighting; 5 miles NE of Brownsville near the old sawmill woods.

Sky conditions; clear ststarry cold.

Total time seen; 5 to 10 minutes

Narrative;

Out coon hunting with friends. He got irked at an airplane flying in circles overhead which drowned out the sound of their distant hounds tracking a coon. One man notice a very bright star like object grmwing larger and comming their way in the distance. It was a brgght white light with an orange cast. It come very slowly and sometimes may have stopped. Object grew much closer and the circling plane now flew near the object. He heard planes motors miss. Thought he heard them miss two times but only sure of one bdmassDont know where plane went to but thought he heard it leaving. Light nearly overhead now. Everyone afraid especilly two of the men. One said" I dont like this I think Ill get out of here."
He said he held on to this mans(his brother in law) shirt with one hand to keep him fromm running. Said he seen another man put his hand on the pistol on his belt. (Ready for quick draw, Ha.) When object nearly overhead he said it was a little larger than a full moon. He flashed his 5 cell sealed beam flashlight up at the object. He never did answer my question of why he did so. The object took off awful fast and was out of sight inohhe middle of the stars in by his estimate 3 seconds. On the wayyhome he said one of the men shook badly in the warm car but blamed it on the cold night.
Background Information; This mans wife said he was pale and excited when he got home. This man flashed his light on the object over the objections of his friends. After interviewing all four personalities I would have picked himeout as the one to do this even if he had not told me. He seemed to be a mild sort of " smart Abdeck" type. I interviewed him last and put less reliance on him than several of the others.

COON HUNTERS SIGHTING

Person making sighting; Jack Hall, 3365 Beeson Ave. Connersville, Ind. Age 24, Employed - D & M on line, Education- 11 years.

Date of sighting; Mon Nov. 14, 1966 between dfdntdk@l;30 PM

Sky conditions; clear, starry, cold

Total time seen; over 5 minutes

Locality of sighting; 5 miles NE of Brownsville in Union Co near old sawmill woodd.

Narrative;

He was out coon hunting with friends. They had been out about 3 hours. They noticed this plane circling above in the sky. the noticed an aircraft circling above in the sky. Not long thereafter another man noticed the brightest star he had ever seen in the east. It was a bright white star and seemed like it was coming closer and getting bigger. Finally he heendpplne fly near big bright thing and he distinctly heard the planes motor miss. The plane flew away. Whenobject was about 80 degrees elevation in an easterly direction overhead.oneeman shined his flashlight up at it. The object dimmed down and took off like a bullet. It just disappeared. IHe wouldnt say how many second it took to go out of sight because he said he couldnt be sure. Nor would he let me time him - just kept repeating he couldnt be sure. Concerming how he felt about the incident he said" It didnt do me any good to look up at that thing."
This mans wife said she didnt believe in those things before but she does now after seeing the expression ber husbands face and eyes as he told her about it.

Don Worley
Nov. 16, 1966

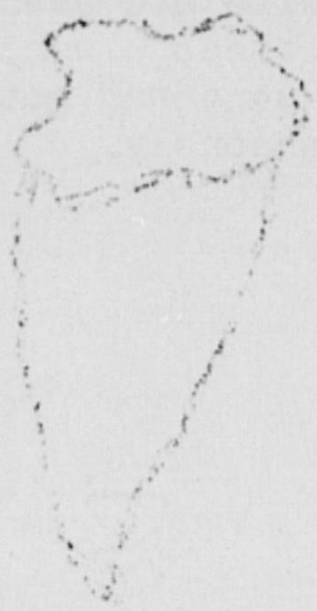

COX SIGHTING

Person making sighting; Robert Van Sickle, 419 E. 11th St. Rushville, Ind. Age 48,
Employed- Police Captain Rushville Force, Education - High School, Police Schools,
Military service- 5 years Army Tech. Sargent.
Date of observation; Monday Oct 10 , 1966 - he thought it was around 2 or 3 AM.
Locality seen from; North of Rushville on old State Road 3 near covered bridge.
Sky conditions; very clear sky full of brilliant stars, temperature a cool 55 or less,
Cresent moon at approx. 30 degrees elevation.
Total time seen; 10 to 15 minutes.
Narrative;

Mr. Grocoz came into station very excited and told him about 5 strange objects in the sky. He followed Grocox back out to the site. Watched two objects in the sky. One at approximately 70 degrees elevation due east and the other SE by SE same elevation. Objects changed brightness occasionly. The one in the east moved side to side a little. Never did see the one in the S by SE move. Both approximately size of pea held at arms legnth. The objects were triangle or cone shaped to him. The blunt end in front was a bright white. and the edges of the entire object had a white glow but not as bright as the front end of the object. The middle of the conesshaped back part seemed less bright than anywhere else. His drawing is reproduced below.

Note; Perhaps the difference in size as seen by different observers at different times was due to the objects sometimes moving farther away or getting closer. I did not manage to talk to this observer until about 4 weeks after the event and he seems to have forgotten some of the details or didnt care if he remembered. He kept cautioning me not to let his name be known in any newspapers. Also said he didnt want to know who the woman was in the car parked there. Maybe it was someone elses wife and he didnt want to see anything and get mixed up in a divorce case.

He said " Something was up there. I dont know what?" He did not see what you would call a tail on the object.

Don Worley
Oct. 27, 1966

GROCOM SIGHTING

Persons making sighting;
Rushville , Ind. age 25, Ph Maintance Man
Carthage Container Corp. Education -High School

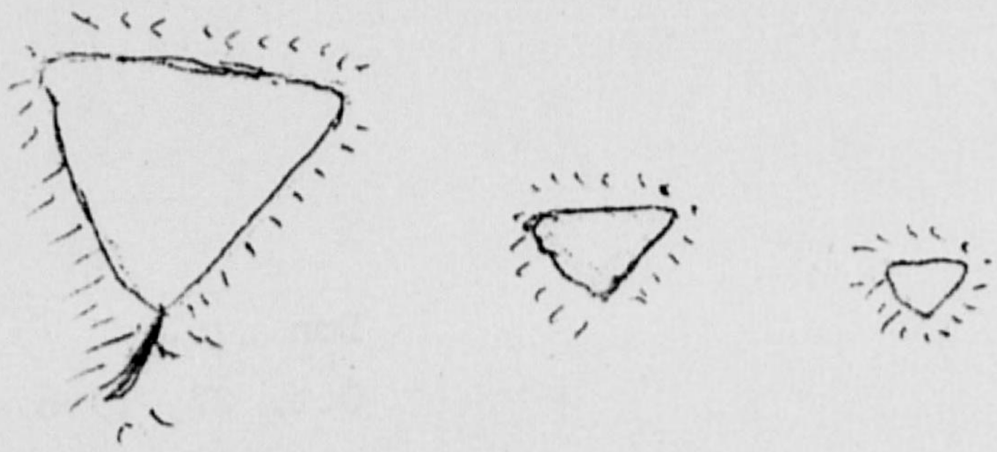

Date of sighting; Mon Oct. 10, 1966 at approx. 4;00AM

Locality of sighting; One mile north of Rushville on old state road 3.

Sky conditions; Clear , very good visibility, no wind , moon -cresent last quarter at approximately 30 degrees in eastern sky.

Total time seen; 20 to 30 minutes.

Narrative;
Witness called in early early on maintance job at factory. (See explanations below.) Noticed bright object in sky at approx 70 degrees north. Watched thru windshield of car and from outside as cluster of five objects moved across the sky at speed slower than a piper cub plane, He guesses objects were at 1,000 or 1,500 feet altitude going due east. Witnessesow apologized for what he was next going to say. He said the objects were triangular with rounded corners. Then further stated that all except the small starlike one had a thin slightly curved projection on the rear about 1/4 their body length and which he called a " tail". Witness held up his hands in a futile gesture and said. "That is what I saw . I dont know what in the world they were. Im sorry I ever said I saw them. I want my name kept secret . I have been bugged enough all ready. " Witness further stated that as they passed over the largest one appeared the size of an orange held at arms legnth. And the smallest one was starlike with the others being various sizes in between. They all glowed with a bright white glow at the edges , inside, and also the "tail." Witness now again speaking as though he hardly believed himself said" They jumped up and down in the sky in very quick jerks. What the big one did the others did each in his turn (Just like follow the leader.) Their tails always remained the same curve and legnth during the maneuvers. The amazed observer jumped into his car and made the 3 or 4 minute trip into the city to get police witnesses. Capt. Van Sickle followed him back out to the scene. Only three objects were now observed in the eastern sky at about 45 degrees elevation. The largest one approximately one half the size of a full moon , the other less than half as large and the remaining one slightly smaller. No tails could be seen on the two smaller objects. Their maneuvers were fantastic . The big one always moved first then the others followed suit in turn. They jumped up and down. And in turns became brighter then faded out then came on brighter than the orginal glow. However on several occasions the others did not jump after the big one did , nor did they follow the maneuver in which the big one instantly disappeared and then almost instantly reappeared in a part of the sky approxi 20 degrees distant.They gradually got smaller and disappeared at nearly the same elevation. Below is a drawing of the three objects as the witness drew them.
Note; Witness was interviewed at home of some friends with father present, and said he was called in on mantammnsee job.His wife had been deceased for about 4 months.The police officers mentioned about the fourth witness a woman being in the car.So the sight of these objects had so amazed him that he had went and got police witnesses even though doing so was untimely and detrimental to him personaly.

RUSH COUNTY SIGHTING

Cris Miller, age 14, Little Charm Motel, RR 3, Rushville, Ind. phone 932-9015, Freshman HS.

Date; Thur. Oct 6, 1966 at 7;15 PM (Seen time on motel clock that was in general direction of object and behind which object traveled in journey.)

Locality; seen from Little Charm Motel just north of city limits.on state road 3.

Total time observation; 15 minutes. 5 minutes in which object seemed to hover in east. 10 minutes seen traveling

Sky conditions; Clear crisp night, little light in east where sun had set, some stars, slight wind from west.

Narrative;

First noticed object 20 degrees elevation due east, a dingy yellow light brighter in center. Grew brighter than the moon and about half the size of the moon. Once seemed to fade and rise in the air. Was very very slow in flight. Seemed to go north then turn west. Two very bright lights like auto headlights became visibleLight from object shown on field across state road 3 from motel and grass could be seen clearly. A heard of cattle in the field were very disturbed and were heard mooing and milling about. It is believed they ran to a distant corner. At this time the two lights were so bright they bothered the viewers eyes momentarily. The object seemed to have veered north of the motel and was not flying level but in a sort of tilt. As the object passed overhead to the north at about 60 or 70 degrees elevation , the two white lights disappeared and a dark solid oval shaped object became visable. Its size was approximately that of a silver dollar held at arms legnth. Bright red lights were visable at intervals all around the objects outer edge. These lights pulsated in sequence. A circle of lights was not seen but a horseshoe shape of lights,indicating some on the upper side of the tilted object were not visable to him. On top of the object there appeared to be a large dome which contained or reflected a blueish white light. No sound was heard and this puzzeled the viewer. (The motel phone rang and as he was taking care of the motel for his absent father he had to answer the call. It was found that in several cases the sound was not heard until the object passed beyond the observer. This may be why he did not hear any sound. All other witnesses who were near enough did.) When he returned the object was gone. He call the Rushville Police. They did not arrive.

This thing crossed over rt. countryside
to the north of it.

CROOOK SIGHTING

Person making sighting;

Eda Clark , 601 1/2 N. Perkins, Rushville, Ind. Age 32, Patrolman on Rushville Police Force, Education 12 yrs.

Date; Mon Oct. 10, 1966 at Approx. 4;00 AM (not too sure of time.)

Location of sighting; One mile nBBth of Rushville on country road near Covered Bridge.

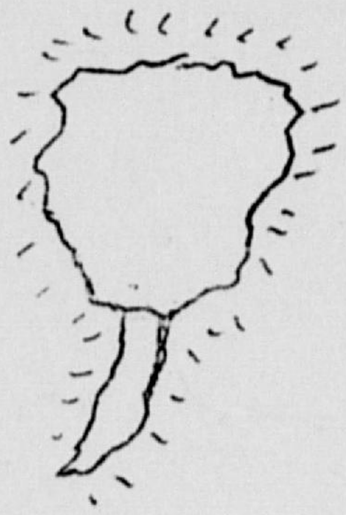

Sky Conditions; Very clear night , good visibility.

Total time seen; Approximately 10 minutes.

Narrative;

Police Captain Van Sickle came in from the area north of the city where he had been watching the strange objects in the sky. He told me to go out there and take a look and see what I thought. There were three objects in the sky . The largest was half the size of a full moon and the other two were smaller , with one being one third that size and the other maybe one tenth. The largest one appeared thus to me; (Exact copy of his drawing is reproduced below. He admitted he was not drawing the exact edge , but some of glow also. They were a bright white luminosity on all edges and on the tail of the larger one. The " tail on the large one seemed half as large as the main body. He didnt remember seeing any tail on the other two. He said they did seem to be triangle shpped with a slightly curved tail. During anymovement the tail always remained in the same position. The only maneuvers he remembered was when they raced across the sky due west to nearly overhead and then back to their orginal position. The three witnesses (woman in the car included) watched the three objects gradually get smaller and fade from sight.

Patrolman Clark said " I dont know what they were , but I saw something. " I have found that Police Officers as are afraid of the skeptical public as anyone else. They would rather not be quoted or associated with these events. Those that I seen in Rush county seemed to be poor and reluctant observers.

Oct. 28, 1966

Clifford Smolewood , age 36, RR3 , Rushville, Phone 930-4034, Emp. Waggoner Furniture, floor covering. Ed 9th grade, 4 Yrs. Navy.
Time ; Thur. Oct. 6, 1966 at 7;00(Looked at clock when he went in to tell wife.)

Locality seen from; NE of Rushville 5 miles.

Total time seen; 10 or 15 minutes.
other witness , wife Elsie Mae seen for 3 or 4 minutes.

Narrative; ...

Just arrived home happened to look up and seen stationary light 40 degrees elevation in the E NE. It was a sharp bright white light that shown like a diamond. It seemed almost as bright as the sun. It appeared about half the size of the moon and was not round but egg shaped, sometimes seemed to pulsate and reduce illumination stregnth. Soon became two bright lights as moved toward W-SW. Now viewed through trees at closest point, and observer didnt care to go out in open. Said he felt safer behind trees. Object now SE by S and guessed it was 400 feet high? At about 70 degrees elevation it seemed to be going about 20 or 25 miles per hour. It was going so slow he thought it should fall out of the sky. It was a solid dark oval shape sharp and clear in the night air. At least 10 red lights about the size of a spot light in relation to the object were visibbbe evenly spaced around the outside edge of the object. These twinkled in sequence , a little over a second in time for each twinkle. He heard a droning muffled sound . Hurried in and got wife. Object disappeared in SW direction. He went in and tried to call sheriff but line busy. Thought all this was "baloney" before now is not so sure.

Don Morley
Oct. 8, 1966

The 18 other observers to the RUSH COUNTY SIGHTING of Oct. 6, 1966 . (20 in all)
(There are no doubt numerous others.)

Orval WISLER 525 N. Main , Rushville, Ph. 932-2263, age 60, Wyatt-Moore Memorial Mortuary
Mortician.

Velma Wisler , Teacher in Jr. Hi. his wife.

Janet Hunsinger , 35, RR 2 Carthage , housewife, art teacher.

? Hunsinger , her son

Mrs John Koohns , 26, 221 W. 4th. Rushville, 938-3152. housewife

Mr. Kenney Cole RR2 Carthage

Mr. Weldon Carfield and wife

Mrs. Loyd Dyer, RR 5 Rushville

Mr. Osting and wife Farmer

Harvey Arnold Jr. , 45, RR7 Rushville, Farmer

John Arnold, 11 son

Clarence Arnold, 40 , RR 7 Farmer

Andy Ariens RR 7 Farmer

Mr . and Mrs. Ford Bedlane, Defiance , Chio. (were staying at motel)

Mr. and Mrs. Clarence Jensen , 2145 Russell , Lincoln Park , Mich. (were staying at motel)

All seen object between 7;00 and 7;30 for from 10 to 15 minutes.

Witnesses viewed object from Due East ,NE, Due N, directions around Rushville, and watched it fade in the SW or W.

It arrived from the NE or Due E and all agreed it was an unusually bright light.

All could see it become two bright lights except some persons in Carthage district.

All seen some flickering or blinking red lights.

All agreed it traveled very slow. Floated, thohght it was standing still etc.

Its sound was given many descriptions such as; Electric mixer, Helicopter, humming sound, farm combine, two motored aircraft, muffled car motor etc.

To the three farmers and son on RR7 who were working in field, the object seemed to rise into view from over a hill to their east. and at one time drop back and fade, then come on as two bright headlights like a car in the sky. A humming sound was heard after object passed overhead. One farmer thought he seen a hood around a red light on the front. A rear red light (They seen what appeared to be just three lights on it.) erracitly blinked.

The morticians wife reported the same phenomena. It is very interesting to note that the farmers (a nest of skeptics) east of Rushville saw only three lights. The morticians wife saw two red lights when she saw the object west of Rushville. But in between we have two relinble reports of a circle of red blinking lights. and Those on outer rim and not on front top and back, with only the rear one blinking. What goes on here???

RUSH COUNTY SIGHTING

Persons making sighting;

Delmonte Wagner, age 28, Box 105 , Arlington , Ind. Phone 663-2695 , Employed - Container Corp. Carthage, Occupation Milwright, Education High School, Service 2 years army.

Donna Wagner , age 26, wife, employed Container Corp. Education High School.

Date of sighting; Thursday Oct. 6 , 1966 at 7;15 PM.

Duration of sighting; 10 to 15 minutes.

Sky conditions; Clear , little light in west.

Narrative;

Wagners in car going north out of Arlington. The very bright light approached from the east. Was seen to bob up and down rapidly over some trees. Bright white light turned north then back to a westerly direction. Wagners turned east on country road and car and light approached each other. As light approached it became so bright that one could not look at it directly. Observers had stopped their car. Some 200 yards east and north side of the road at approximately 80 degrees elevation object stopped in mid air. Observer guessed height at 200 ft? The powerful white light went out and nothing but blackness could be seen for 10 or 15 seconds. But a sound could be heard. He said sounded like a May Tag Wash Machine. She said it was a rough roaring or rumbling sound. Observers were puzzled as to what it could be. Were positive it was not a helicopter. Said it didnt sound like one or act like one. Then one red light came on in the air. The light was steady for 10 or 15 seconds then started to blink as the object began to move toward the west. When asked wether the red light swung up or back or whether the pitch of the sound did not increase , they said it did not. When directly 80 degrees north from the Wagners the object again stopped in mid airfor approximately 10 seconds then went into reverse and moved back down the road due east. The observers followed in their car and object suddenly stopped in mid air again. The observers drove their car until they were due south of the object and it at 80 degrees elevation, then got out of their car and looked up at the red light . Try as they may they could not see any shape or form behind it. Suddenly accelerating without increase in sound level the object sped off toward the west. The husband hurredly turned his car around at the next cross roads and raced after the object hitting 80 mph. The object with the red light now rapidly blinking disappeared from sight within 10 seconds by the Wagners estimate.

Oct. 15, 1966

BASTAIN SIGHTING

Persons making sighting;

Mrs. Leonard C. Bastain , Age 38 , Golf Manor Dr. RR6, Connersville, Ind. Phone 825-6191

Housewife, Education 12 yrs, 2 yrs College.

Object also seen by son Kevin who was with her.

Date; Thur. Oct. 6, 1966 at 6;53 PM

Locality; Hill on W 12th. St , Western outskirts of Connersville.

Total time seen; approx. 80 minutes.

Sky conditions; clear, very good visibility, little breeze from west, no moon.

Narrative.

Driving east down hill on W 12th. St. They noticed in the E NE at about 45 degrees elevation a brilliant orange glow from an object shaped like a nose cone of a missile on its side. It seemed to be stationary, was twinkley and glittery, and had sparkling fuzzey edge. Its size was less than a dime held at arms legnth. She stopped the car and they watched as long as possible before the boys 7;00 meeting downtown.

As she drove on trees obscured her view occasionly. Object was in the north at approximately 70 degrees elevation. To be seen now were two big clear balls like the headlights of a car, but nothing like the lights of a plane . Whey heard no sound. She lost sight of it due to trees downtown.

Don Worley
0Oct 14, 1966

by a light point already above the cloud. All five traveled but a very short distance and disappeared in the haze. The haze had begun to break up and many dark places had began to be seen by the time the police arrived. The Saucer now began to move at about piper cub plane speed on an upward flight path toward the explosion site. When it almost reached the spot where the glow first appeared it just disappeared. At this point it was the size of a large star. At 9;15 the sky was almost clear again except for a few streaks of haze.
No other witnesses have been forthcoming as yet to this event.
Note; When I went to question her about this sighting , I placed before her a picture of what she had seen . It is on page 8 of the Sept-Oct APRO bulletin. She was quite supprised to say the least. This also seemed to reasure her that I did understand and believe her fantastic sighting and she went on and she went on to relate another incident she was not going to mention because she felt it was "all too much". and I might not believe her.
This incident was the 5 object launching? or what looked like one. The witness said the jet had little side fins just like the pictureandthat made her think if was a jet with a trail. She said its size was such that as she held her pencil at arms legnth the saser covered the jet part except for the glow and the trail. Due to a previous experience and my questions then , the witness was out with pencil and paper and measured with her pencil or fingers , timed and recorded everything that she could. I would without hesitation classify her an excellentobserver. She was ready this time.

BRENDA BUTTS SIGHTING

Persons making sighting; Brenda Butts, 227 E. 2nd. St. Rushville, Ind. Age 20, Employed International Furniture Co. Rushville, Education- 10 grade.

Date of sighting; Sat. Oct. 29, 1966 starting at 6;35 PM

Location of sighting; seen from above address in sky to S by SE, SE, and E by NE.

Sky conditions; Clear, bright stars; full moon flat approx. 45 degrees elevation in east, temperature 49 degrees, no wind.

Total time seen; Phenomena watched approx. one hour and 15 minutes.

Other Witnesses; Her mother- Mary Glenn age 36 (she seen the red glow and red and white clouds.)
Her brothers - David Glen, age 12, Mark Glen age 11, and neighbor boys , Russell Jenkins and Rex Fudge. They all seen many of the things Brenda seen.

Narrative;

Brenda was called outside by her two brothers to see a " Flying Saucer". She stood in the back yard with her brothers and their friends and watched a point of light smaller than a large star move slowly then stop at approximately 30 degrees elevation in the S by SE sky. It would alternate colors colors red or white and frequently disappear for a second. She compared the object with another large star nearby and its color changes were more pronounced. This object remained in this position for approx. an hour and 10 minutes.

At about 7;15 there appeared suddenlyin the SE sky at approx. 32 degrees elevation and some 15 degrees east of the saucer object an object she called" jet" because that is what she at first thought it was. This jet was very bright and shiney and it had a tail of light about 10 times as long as itself, which remained constant legnth. Its color and shape never changed as it traveled across the sky at faster than jet speed in an upward flight path . I disappeared at an approx. 40 degree elevation in the E by SE in an estimated 5 seconds. No one was looking directly toward the saucer before the jet appeared so it is not known from where it originated. Attention had been attracted to a simultaneous happening that took place in the E by NE some 20 degrees from the moon , and at the same elevation. The sky had a terrific red glow with a white haze spreading around it.very fast. The dull red seemed to be a curved layer and so did the white. The white was brighter than a cloud but not as bright as a light. The red began to fade as the white kept spreading.and turning into a haze.The red faded about three times faster than the white. The witness ran into the house and had her mother come out. The mother had son call police. The haze kept spreading to darken the moon somewhat and cover the stars in that area. In the midst of the thicker haze in the spot where the witness had first seen the explosion? there was now noticed , a slanted large dark grey band or layer of cloud. The band was approx. 1/4 the with of a full moon and seemed longer than a full moon with the ends lost in the haze. The witness was very uncertain about these dimensions.Shooting up out of this cloud? came two pairs of light points about the size of a regular star. All arose at the same time and were joined

REMY SIGHTING

Persons making sighting; Larel Remy RR 3 Rushville, Ind. USA age 45, Housewife, Education-8 yrs.
Also Harry Remy, age 45, Employed -International Furniture, Education 12 yrs., Service- 3 yrs. Army.
Daughter - Christine Lore , age 22, Housewife, Education-12 yrs.

Date of Observation; Oct. 12, 1966, (WED.) at approx. 8;00 PM

Location of Observation; 6 miles N by NE of Rushville near Gings. (Federal Rely Tower approx. 5 miles SE of here.)

Sky conditions; Clear starry sky , no moon , no wind, cool night.

Total time seen; she was uncertain, over 5 minutes?

Narrative;
Mr. Remy came in from outside and said " Well come outside and have a look at one of those airplanes that some people mistake for on of those flying saucers. " (Mrs Remy said he always laughed at the whole idea of such things.) So all three persons went outside with him to watch the airplane. The airplane was now a perfectly round object , a glowing red color, 3/4 the size of a full moon . It had stopped still and was hovering low near the tree tops due south of them.The husband now changed his mind and decided it was really the red light on the Micro Relay Tower. His wife pointed out to him the tower light over to the southeast. Suddenly the object made a leap thru the air and then stopped instantly. The legnth of the jump thru the sky was estimated as 10 full moons in legnth. This jump took place at such a speed that it was almost too fast for the eye to see. The object now remained stationary for some time then suddenly made another leap of the same distance and speed and stopped instantly. It was now in a more southeasterly direction. After a short pause it began to move east at slower than jep plane speed and seemed to curve around to a nottherrlyyheadingg. As it came up to pass them on the east it appeared no longer as a large red object but an object with a red a white and a blue green light on it. These lights seemed to move around the object in a horizontal plane as if the object were revolving at just under a speed that would not blur the lights. A dim grey outline could be seen at one time. It seemed to be egg shaped. Mrs. Remy said she heard a frying sound. An aircraft pssed high overhead going west. As the object moved farther north it became red and round again and growing dimmer faded from sight.

Note; Needless to say the father skeptic was disturbed when his airplane stopped in mid air. And was severely shaken when the object jumped thru the sky. His wife said he became quite excited. His wife (who wishes one would land so she could get a good look at it.) wanted to call the sheriff, but the husband cautioned her not too because people would think them " silley".

Don Worley
Oct. 29, 1966

BRENDA BUTTS SIGHTING

Person making sighting;

Don Carlton , 530 N. Perking , Rushville , Ind. age 30 , Employed- Patrolman Rushville Police Dept. Education- High School

Date; Sat Oct. 29, 1966 at 7:35 PM

Locality of sighting; Seen from eastern edge of Rushville Ind. Objects in S by SE , SE , and E by NE.

Sky conditions; Clear , Bright stars, full moon,at approximately 45 degrees elevation in enst. Temperature 49, No wind.

Total time seen; one half hour.

Narrative;

Received call about objects in the sky from east second street address.Dekayed in answering because of other matters. Watched sky in Bobby's yard near telephone pole but could see just a lot of stars in the sky. Did observe some haze over moon and stass in the east. After some time did see a star like point move across the sky on an ascending flight path and disappear to the east.It moved at about prop aircraft speed. Officer of the opinion that it was an airplane.

Note; Officer was not interested enough or did not want to be seen getting out of the patrol car and watching with other persons. He just sat in car at curb. He also told me about some fellow who called about seeing this glowing light near a transformer south of the city. He said he was of the opinion that it was a light near the transformer that fog made glow. Also told me how farmer told him that thing that flew over north of the city Oct. 6 was an airplane. (At first the police had said it was a satellite .)

As compared to Brenda who was out measuring and writing down everything she could , I would call this fellow a very poor observer.

Nov. 5, 1966

REMY SIGHTING

Person making sighting;
Don Remy , RR 3, Rushville Ind. age 15, phone 938 4569, Sophomore in High School.

Date of observation; Wed Oct. 12, 1966 at approx. 8;00PM

Location of sighting; 6 miles N by NE of Rushville Ind. 1 mile west of Gings.

Sky conditions; clear cool night , no wind.

Total time seen; Approx. 10 minutes.

Narrative;

Father had us come out to see object in southern sky. It seemed about 1 and 1/2 miles away and about 300 feet high. It was hovering there and was about as large as a full moon on high in the sky. It was round, a bright red and dimmed or pulsated about as fast as an ordinary heart beat. It hovered about 3 minutes then suddenly darted to the east and stopped. Then again it darted to the east and stopped. Then from its SE position it began moving east and curved around us to thennorth at about piper cub plane speed. As it passed to the east of us the light changed to a red , green, and white light and looked as if they were revolving around. The object became more oval shaped. An aircraft going west passed it high overhead. As it continued on north it became all red again and soon faded from sight. When it was due east of us and at its closest point I heard a faint whistling sound.

Don Morley
Oct. 29, 1966

1st. SOUTHWEST OF ORANGE SIGHTING

Persons making sighting;

Rushville , Ind. Age 20, Employee - International Furniture Co. Rushville , Education 10 grade.

Rushville, Ind.
Witness not contacted as yet.

Date of sighting; last week in April ? time uncertain - after 7;CC.PM.

Location of sighting; From southwest of Orange to near Gouty in southern Rush County.

Sky conditions; clear night.

Total time seen; Incident lasted over an hour.

Note; The object observed appeared as one brilliant flash or three brilliant flashes. Approximately one second in time separated the flashes when it was a multiple flash. Seen at the instant of the flash was a glowing firey redish orange sphere surrounded by a zone of white light approximately 1/3 larger still.. The center globe seemed about the size of a volley ball out the witness was not at all certain of the size or distance. No shape or form could ever be seen just the brilliant globe.

The witnesses engaged in a game with this eerie thing and by turning as often as they could on country roads in the direction of the last flash , they traveled some 22 miles over country roads and state roads52 and 3 in a more or less zig zag route on the map. The first several times the flash was seen it was thought to be a filling station light at a distance down the road . But when they arrived at the filling station they found this light broken and not operating.

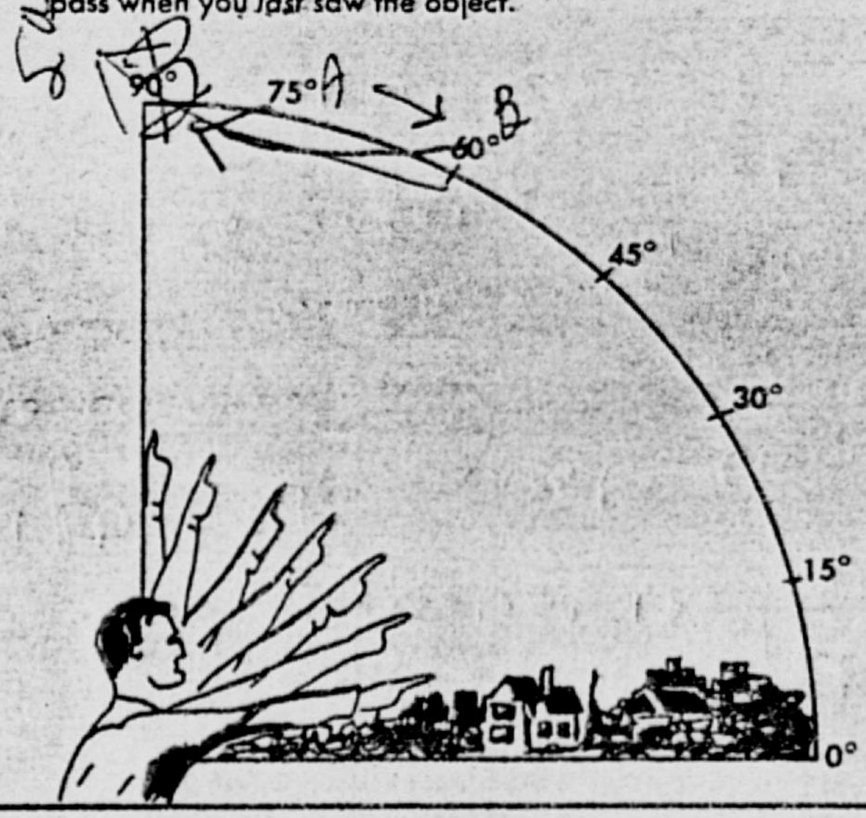

The mystery light blinked on seven different locations during the " game." On one occasion it flashed very low to the ground seemingly no more than 3 or 4 feet. This was in the front yard of a residence. It illuminated the sky , yard , house, trees etc. The interested observers planned to drive hurredly to the spot but before he could vewen begin to reach down and turn back on his lights,which he had turned off to see what would happen, the globe had flashed again some distance over a field. In a split second either it or another like it had flashed some distance away.

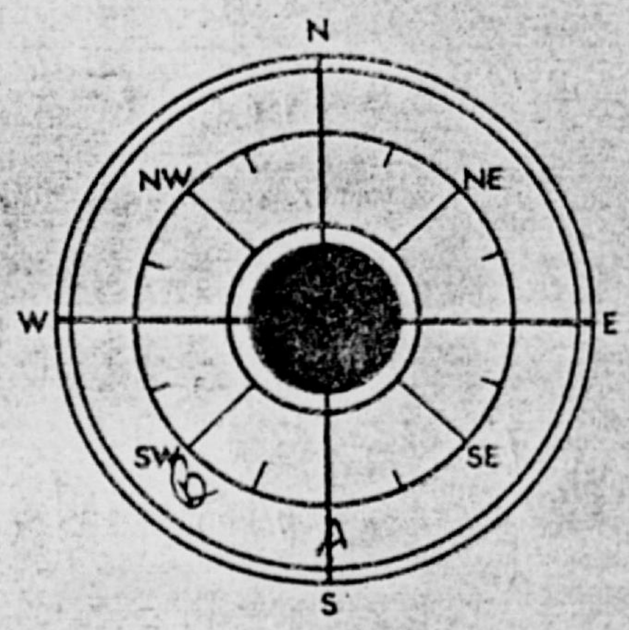

Another thing noticed was that on one occasion when the globe flashed to be seen beside it and 2/3 its size was another globe. The white layers touched but not the redish orange centers. Had another thing joined it or had it grown or swelled out to become two?

Don Worley

One of the
Remote controlled discs?

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF ~~there~~ was MORE THAN ONE object, then how many were there? 3
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

I saw each object at seperate times a month apart each time.

UFO form continued

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

I. October 1966 - ~~Sunday~~ Can figure out dates if necessary
II None. 1966 - Saturday would have to get 1966 calendar
III Dec. 9, 1966

31. Was anyone else with you at the time you saw the object? *(Circle One)* ~~Yes~~ No I + II

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes ~~No~~ = III

31.2 Please list their names and addresses:

My husband & I both saw the first two the third I saw alone, I was only person home on our street.

32. Please give the following information about yourself:

NAME [redacted] Last Name [redacted] First Name [redacted] Middle Name

ADDRESS [redacted] Street Worland City 5 Zone Wyo. State

TELEPHONE NUM [redacted] AGE 13 SEX female

Indicate any additional information about yourself, including any special experience which might be pertinent.

I had ~~a~~ weird dreams about it

Husband - witness

[redacted]

Same address - Works for Dept. of Interior

I am a beauty operator & hold beauty instructors license.

We go to church regularly & do not drink.

33. When and to whom did you report that you had seen the object?

~~Sun.~~ Day Oct. Month 1966 Year Federal Aviation

2:10 Jan. 1966 - Dr. [redacted] & wrote Ellsworth air force base Rapid City, S.D. Laramie, Wyo.

Did not report 3rd object since was obvious no one planned to do anything about it.

64

Official U.S. Air Force

14. Did the object disappear while you were watching it? If so, how?

I. We looked up & saw a disk shoot toward sun not sure it was same size as shape object we saw first

II Was dark & last saw smoke.

III Looked & it was gone.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound None at all on I & II - III - humming

b. Color I - Red of disc faded red to silver-aluminum oblong

II white III red.

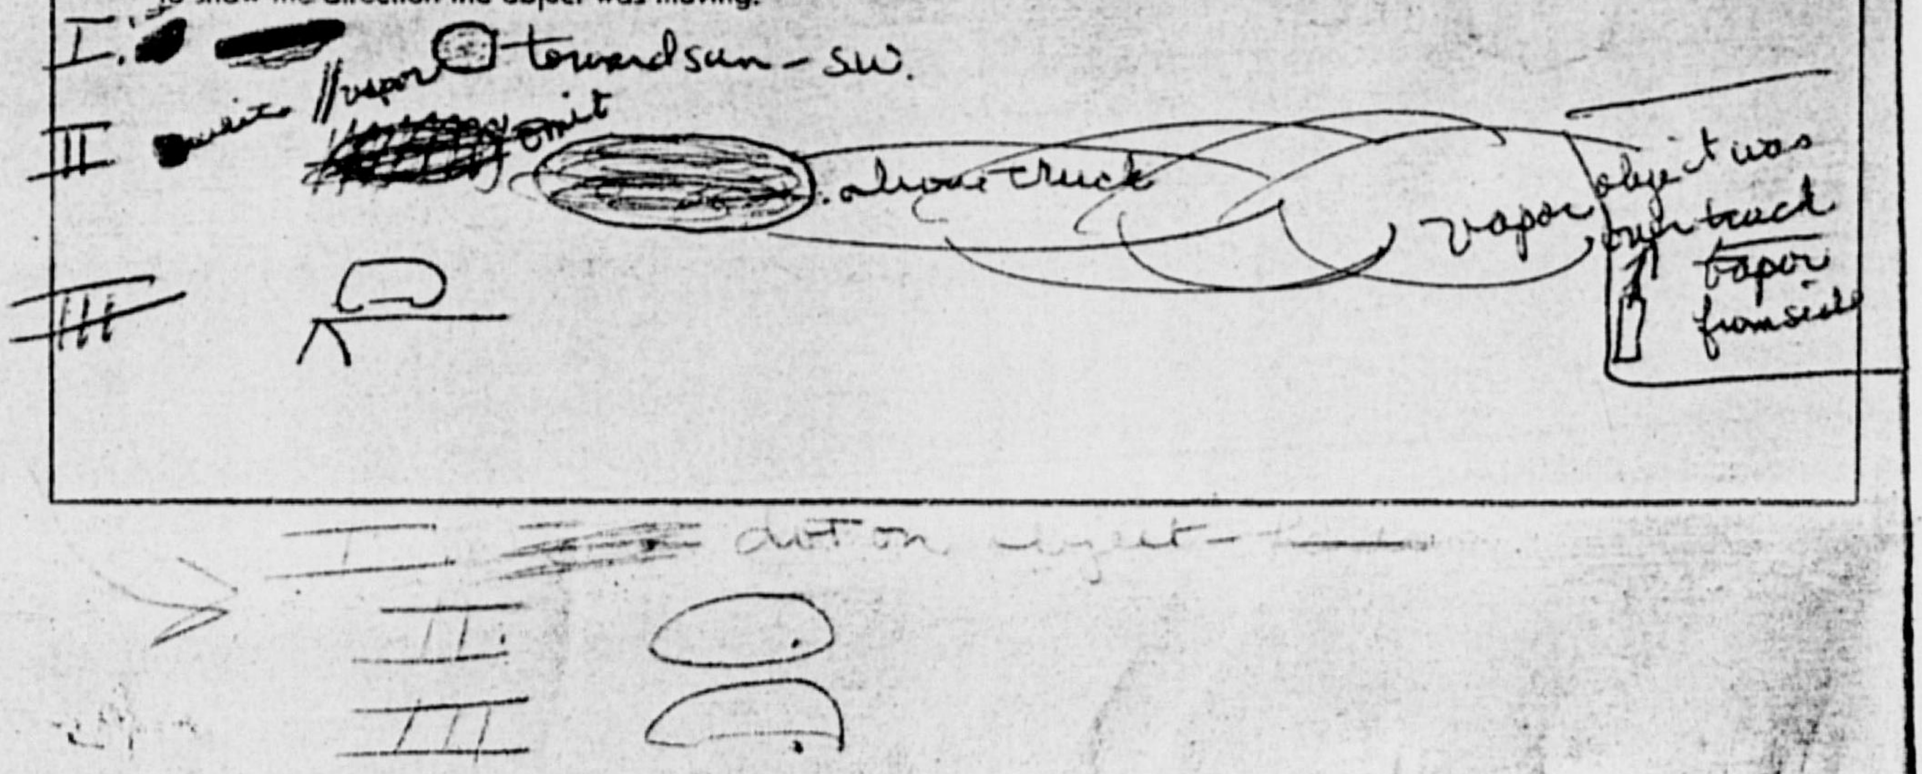

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? Very little

I - cigar shaped - about 1 ft. by 3" wide - changed in flash about 3 ft. long & maybe 9" wide - disc toward sun about 1 ft. di

II. light ahead size of baseball, over truck, size of complete truc

III. 4 ft by 1 ft. or 8 ft. - not sure

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

e UFO form continued

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No) faster than anything I've seen, can't half nothing so fast I don't will for 10 of 8 years

IF you answered YES, then what speed would you estimate?_____

21. Do you think you can estimate how far away from you the object was? F. first at about ½ mile + then I (just guess)

(Circle One) (Yes) No II first several miles ahead + climbing later 200 ft. above tanks

IF you answered YES, then how far away would you say it was?_____ III. several yards - across street later first 100 ft. or so, house next to it.

22. Where were you located when you saw the object? (Circle One):

III a. Inside a building
II b. In a car
I c. Outdoors
d. In an airplane (type)
e. At sea
f. Other_____

23. Were you (Circle One)

a. In the business section of a city?
I b. In the residential section of a city? III
II c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other_____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South (g) West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? 60 miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) (Yes) No once to look + again when noticed it flickering + moving ~~up~~ across auto-bruce when it was over us

25. Did you observe the object through any of the following?

a. Eyeglasses Yes No
b. Sun-glasses Yes No

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

I can't think of anything on this earth that would compare.

OFFICIAL U.S. AIR

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?
H. Oct. 9 1966
II. nove. 1966 - too confused on it
III Dec. 9, 1966
Day / Month / Year

I.
2. Time of day: 2 o'clock afternoon
II. 6 P.M.
Hours / Minutes
(Circle One): A.M. or P.M.
III. Around 9 P.M.

3. Time Zone:
(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
(b) Standard

4. Where were you when you saw the object?
I. [redacted] front across street about three
III. Worland
Nearest Postal Address / City or Town
Wyoming
State or County
I. a couple miles out of Worland

5. How long was object in sight? (Total Duration)
I. 0 Hours 1 or 2 Minutes _____ Seconds called husband & we saw it about to reach sky about second
II 15 seconds.
I + III (a) Certain
(b) Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? II. miles driven - 15 min & second to reach truck & it was in one spot
5.2 Was object in sight continuously? Yes _____ No _____
(yes on 1st & 2nd On 2nd took eyes off a second to call husband) hovered a minute or so

6. What was the condition of the sky?
DAY
I (a) Bright very clear & sunny
b. Cloudy
NIGHT
a. Bright II & III don't remember
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?
(Circle One): a. In front of you
b. In back of you
c. To your right
(d) To your left I
e. Overhead
f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, jul 61, which is obsolete.

FORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many III
d. Don't remember II

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight—pitch dark
d. Don't remember III II

Remember looking at stars earlier in night on III

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

I a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry I II III
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember II III imagine clear & bright since stars were out, don't know

10. The object appeared: *(Circle One)*:

a. Solid I II III
b. Transparent
c. Vapor
d. As a light solid III definite shape
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter red III
b. Dimmer II
c. About the same
d. Don't know

I - red - not bright disc toward sun faded to aluminum like not exceptionally bright

11.1 Compare brightness to some common object:

12. The edges of the object were:

(Circle One):

a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined I II III
d. Don't remember

I long - cigar shape - red seem to have something under it - when II oval light almost invisible edge earlier round white light taken 2 as large than stars not bright III oval - red - bright -

13. Did the object:

(Circle One for each question) seemed to curve down on edges

I a. Appear to stand still at any time?	Yes	No	Don't know
I b. Suddenly speed up and rush away at any time?	I II Yes III	No	Don't know
c. Break up into parts or explode?	Yes was really a string of them	No II	Don't know & when looked back was gone.
III d. Give off smoke? I seem to be changing shapes while tossing in sky	Yes	No	Don't know
I e. Change brightness?	Yes	No	Don't know
I f. Change shape?	Yes	No	Don't know
II g. Flash or flicker?	Yes	No	Don't know
II h. Disappear and reappear?	Yes	No	Don't know

I - thin ribbon like vapor left suspended up above in sky
II After got in & started home looked back & saw 4 large streams of vapor shoot one after another very fast.
III none

Observer noted object in the west southwest at shortly after midnight. Object appeared to be moving very slowly. Observer watched object for about 15 minutes and left; object being still visible. Observer went back outside about 0100, 6 Oct 66 to look for object. At this time object had moved slightly to the right and downward. Object had moved about 6 inches from original position. White was the predominant color observed. At 0300 observer again tried to find the object but at this time object had disappeared.

Observer was questioned about sighting. She thought it might have been a satellite. She had never seen a satellite previously. Movement puzzled her and then when she went back outside at 0300 and the object disappeared she became concerned. She wasn't reporting an UFO just an unusual light.

CONCLUSION

Witness was more than likely observing the star Altair. At 0015 EST Astair was on an azimuth of 268 degrees and at an elevation of 18 degrees. At 0100 EST Altair was at an azimuth of 275° and at an elevation of 8° at 0300 Altair would not have been visible to the observer because it set at approximately 0200 EST. Altair being a bluish - white star appears to be what the observer witnessed.

to nearly its orginal height , tipped up one side and becomming brighter, sped away to the SE at about a 35 degree angle. Total time of sighting estimated a 45 seconds. Departuer time estimated approx. 3 or 3 seconds.

Myrtle Bailey hung up the phone and went out on a small side porch to see what the kids may have been talking about. She thinks she watched the object for nearly 5 minutes. She and Eric Miller and company must have watched the ovject at the same time from different observation points after it returned from speeding off while the children watched. Mrs. Bailey described the object as almost round , big as a wash tub, almost as bright as the sun, soundless, self luminous, and fuzzey edged. She said it seemed to have a top like an iron that you iron clothes with or a submarine conning tower and on top of this had a periscope sticking up. She said it sometimes appeared like two saucers together and around the bottom had places that looked like hammered aluminum. (This occured when the object dropped down to its lowest point and woboled in the air probably.) She thought the object stopped still but Eric Millers sighting indicates the true movement. The 80 or 85 degree angle she viewed it probably made lowering or rising more difficult to realize.

She said the underside lit up like the color of a kerosene lamp flame, and the thing began to move picking up speed , leaving behind a sort of mist or light fog where it had been. Then rapidly becoming smaller and deminishing to a dot it disappeared in an estimated 5 seconds. Departing SE at about a 45 degree angle.

The Rushville Police reconded her call at 8:00 The did not answer the call as they were busy on a murder case. Her nephew Capt. Dick Fea said its the first time she has ever called the police in her life.

No planes were up from the local airport, No fairs or carnivals with search lights were operating near the town. Two flying boxcars from the Army airfield at Columbus Ind. went over about a half hour later.

Rushville Sighting

Persons who made observation; (ten in all)

Myrtle Bailey RR 1 , Rushville, Ind. Age 64 , Housewife.

Eric Miller, 538 N. Perkings St. Rushville, Ind. Age 15, Summer employee of American Promotions Inc. Indianapolis. Junior in High School.

Donna Gosser, RR 2, Rushville, Age 11, 5th Grade.

Four High School boys from New Castle who observed the object with Eric Miller . (They had returned to New Castle and were not available for questioning.)

Dirk Paugh, Age 10. Douglas Gosser Age 9, Tommey Gosser Age 7. These boys observed the object for about 15 seconds when it was about one city block away.)

Time of Observation; Monday Aug. 1, 1966, 7:30 to 8:00 P.M. Sun setting, moon not up yet, no stars, dusk.

Locality; South East of Rushville Ind. Near State Road 52 at a suburb know as Circleville.

Sky Conditions; Partly cloudy, the clouds were to the west and north clear of the area of the sighting.

Narrative;

Donna Gosserjjust happen to look up from the road where she was playing with Tommey Gosser and seen the object almost directly overhead filling a space between the top limbs of a tall maple tree. She watched it for about half a minute then yelled to Dirk Paugh and Douglas Gosser who were down the road half a block on their bicycles.

Donna describle the object as almost round, brighter than the moon, glowing silver, solid with fuzzey edge, making no sound, and four times the size of a full moon up high. She said it stood still but rocked a little in the air. As she yelled to her friends the object suddenly changed to a redish orange color mostly on the outer edge of the bottom, seemed to revolve, quickly flitted over highway 52 and in no more than 2 seconds and came to a instant stop about one block south over a house on a hill. Her friedds joined her and watched for an estimated 15 secs before the object suddenly zipped southward becomming smaller and disappeared in an estimated 5 seconds.

Everyone ran into Donnas nearby home all excited and yelling to Donnas mother about what they had seen. The mother Jean Bailey Gosser was on the phone talking to her mother Myrtle Bailey who resides 100 yards down the road. The ladies continued to talk and one remarked " Why dont they come down and have coffie with us?" Jean Gosser never went out. Eric Miller and four newly met acquaintances from New Castle were at the Dairy Delight Drive-In about one mile from the area of the sighting. Eric had just looked at his watch and seen it was 7:45 and he was due home. He described the object as having a greyish metallic shine with a faint glow on top, he could not see the bottom. Also self luminous, fuzzey at the edges, It was in the shape of a flat oval about the size of a dime held at arms legnth. It did not remain motionless but had a little side slip while hovering. When first observed it was well above some tall trees but rapidly dropped down until it was behind the very top of the tall trees between it and the observer. The object went out of sight but the glow from the top could be seen. Then it suddenly arose back

was elliptical in shape, a little smaller than the moon, a redish nebulus floating thing. He thought it seemed to move toward then recede from the observer at 2 second intervals, growing larger then smaller. (pulsating?). When the light on the electric stove was turned on son said object dimmed down. This was not verified by the others. Son rushed into other room to call local police. Object suddenly moved off in a level SE direction, diminished in size to a little round grey dim light and vanished from sight. Its time to accomplish this was estimated at 3 or 4 seconds. Son rushed down to the State Police Post some 2 miles distant and reported the incident there. They said let the city police handle it. City police finally drove down road nearly half an hour later. I met the officer later and he said " This guy call up all excited and says there was a firey circle over his house. Hell, I dident see anything. I dont believe in those things. "

Analysis;

An average sighting.

It is possible son is mistaken about object reacting to car and stove lights.

From my list of possible identities;

Moon - not up yet.

Ball lighting- Not in that size duration or movement.

Search light on clouds - None in area, would not be firey orange or be in the clouds but on them.

Stellar mirage or halo thru clouds - object too bright and wrong color forttthis. Also it would not move off and disappear in 3 or 4 secs.

Reflection of city colored light on clouds- same as latter reason above. Also reflection is not so concentrated but cover a larger area.

Hallucination - These were all good level headed sound of mind persons.

Conclusion; UNIDENTIFIED AERIAL OBJECT.

Connersville Sighting

Persons who made observation;

Mr. Wm. V. Murray, RR5, Connersville, Ind. Age. 52, Electrical Maintance local factory.

Mrs. Margret Murray, RR5, Connersville, Ind. Age 5C, Housewife.

Stanley Murray , RR5, Connersville, Ind. Age 2C, Part time industrial plant guard and University student.

Miss Linda Currie, Columbus,Ind.Age 19, University student . (not available for questioning

Time; Monday , Aug. 8, 1966, at 12:20 AM.

Locality; 2 miles SE of the Triangle , a suburb SE of Connersville, Ind.

Object in view: Stanley approximately 8 minutes, others approx. 7 or 7 minutes.

Sky conditions; Partial low cumulus cloud cover, average darkness visibility, no moon, stars seen occasionly, no wind.

Narrative ;

Stanley pulled into drive of isolated farm house. He noticed a funney looking moon in the sky E-SE at 4C or 5C degrees elevation. He gave it no more thought and went into the house. He had forgotten his books so had to return to the car. Now noticed the moon had moved somewhat from where he had first noticed it. He studied the strange moon and claims it dimmed when he oppened the car door and the dome light came on. He claims the object brightened when he shut the car door. I pointed out that perhaps the offect of the dome light in his eyes or perhaps the clouds partially moving over the object had made it appear that way. He doesnt think so , but was not as certain about cloud interference.

Now convinced it was no moon, he rushed into the house where all were in bed. Excitedly called out " Now dont get excited , keep the lights out and come and look at this thing. " All hurried to the back kitchen door to watch the luminous object in the bottom of the clouds. Asked why no one went into back yard to look , wife confessed to fear of the strange object. The son said girl friend Linda was afraid and did not want him to go out. Linda , left at the house alone several days later, locked all the doors in broad daylight.

Some clouds always around or under the object made it difficult to tell the exact shape . To the father the object seamed alliptical (football or egg shaped), almost as bright as a full moon, a firey redish ornage color or like an arc light. He seen flame fingers briefly on the left had side once. The object seamed to brighten and than dim (pulsate). To the mother the object appeared a blunt cone shape, larger than a full moon, bright orange in color, seemed to pulsate and just sat there in the sky. To the son the

~~NUTTY SIGHTING~~

Persons making sighting;

Paul Nutty, age 17, 1634 Georgia Ave. Connersville, Ind. Phone 825 6154 , Education 11th Grade now,

Date of Observation; Sunday Oct. 22, 1966at 30 minutes until 1.COAM

Location ; Just south of Milton Ind. on State Rd 1.

Total time seen; Approx. 15 seconds.

Sky conditions; clear cold starry night, cresent moon in 1st quarter in western sky.

Narrative;

Paul was riding Honda in company of two other friends on motorcycles. As he approached Milton on state road 1 he looked up to see if he could see the seven sisters star group. His eyes caught sight of a rapidly moving (he said much faster than a jet.) pale orange oval shaped object in the sky at approx. 80 degrees east. It appeared solid,sharp , smooth edged, and was dimmer than the moon. It was about 3/4 the size of a dime held at arms legnth. He yelled at the other riders but they did not hear him. Object disappeared at 30 degrees elevation when he went behind some trees along road.

Conclusion; Unidentified- Insufficient data.

Official U.S. Air Force

34. Date you completed this questionnaire: 14 (Day) Feb (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I. We were out in yard that afternoon & was setting on steps, looked up & as if hypnotized stared, called husband pointed up and as if it had eyes & saw me it shot toward sun. Very terrific speed - very clear & easy to see.

II. Heard noises early in afternoon but probably wasn't connected. Also saw white light & red light behind us for several miles then disappeared ahead of us. Not sure though were same lights. Actually feel there could be some possible explanation for it.

III Large red solid light suspended in sky, no sound, reflected the whole backyard. After the first incidents & since I was home alone I didn't take the chance to waste much time observing I felt I needed to get to safety which was neighbor's house across street since they had lights on but they weren't home after all.

UFO form continued

I hadn't read anything but one article in Reader's Digest a couple years ago so when we saw the object I thought ~~I was~~ we were the only few people to see it. It never bothered my husband & interests him the least actually he would go up in one & come down & probably never think about it again. I was afraid though and for 7 nights I was afraid to go to sleep. Had only dream after 3rd object. Every time I think about it or read anything on it I get very nervous. Especially when I read the air force claiming we're all liars It is frustrating to know the truth & yet not convincing anyone.

I thank you for your time. Hope you can make this out. I really need 3 forms.

P.S. Feb. 15

I have just heard some more from [illegible] UFO's [illegible] heard [illegible]

October 12, 1966

Dear Sirs;

On monday October 10, 1966 I was playing with our friends dog on the athletic field behind our house. At about 7:20 PM I looked up at the constellation of Pegasus and saw a very bright star just under the square of Pegasus. A few minutes later I looked up again and the object had moved from a position on the south east horizon to a point just under Aries. I then walked down the field and watching the object all the time. A few minutes later at about 7:25 PM the object when below the north east horizon. The movement of the object was from south east to north east. The movement was slow and steady and the light given off by the object was steady and even. There was no vapor trail or sound given off and there was no burning effect as in a meteorite. During the time I saw the object three jets went over going to land at Newark airport and they gave off no light like the object. I do not think it was a small airplane because I have seen many small airplanes land at night at the Princeton Airport and the object did not look like a small aircraft.

10 OCT 66

No Case Info only
- 2nd hand report -

18 Oct. 66

Personnel interview with Neil Gallomore of Bowersville, Ohio revealed the following:

The alleged UFO has landed between route 73 and 128 for three straight nights and hovered over the ground for a forth night. On the forth night the object hovered about 1000 feet off the ground. 4 boys went up to about 100 yards from the object. The object was making a beeping sound at this time. As the boys approached the object they shined a flashlight at the object. All of a sudden the object shined a light back at the boys. The boys then turned and ran.

The object was banana shaped and red in color. There were lights on the landing gear. Also visible were red, green, and white lights. On all four the object was visible from 2130 to 2200 hours. The shierff and some other men were keeping the crowd away from the object. Mr. Gallomore never saw the object except on one hight he saw a white light slowly move toward the SE. The shierff gave Mr. Gallomore a bum stear.

Also at the scene of the dighting there was grass smashed down but there were no burnt marks. Mr. Gallomore said that he thought the sighting should be reported even though it was about a week late. He called Clinton County AFB on Saturday and they told him that they would contact WP AFB about the sighting.

18 Oct. 66

Contact was made with Major Wilson Clinton County AFB, Ohio regarding the observation of UFOs over the Hillsboro area. The only report that they had received was from a Mr. Gallomore who called and asked if the base knew of the sighting. The actual observers did not report the observation to the Air Force. Major Wilson said that from time to time the Army has manuvers in the area. He said that if could be possible that the people involved could have seen a chopper landing. Major Wilson did not know what the people could have seen. He did not know of any definite activity that was going on at the time.

I thought it might be a rocket but it not
resemble the ones I have seen going up
while I lived at Indialantic, Florida which
is just south of Cape Kennedy. I also saled
out meteorites because the movement was very
slow and no very fast like the big one that
went overhead last June which I saw. I think
it might be a satellite but my friend told
me they don't move from south to north.
The satellites I have seen were small points
of light in the sky but this one was brighter
then the brightest star. The sky was
completely clear during the entire sighting
and the temperature was in the low 60's.

I would like it very much if you could
tell me what it was because it did not look
like a rocket, meteorite, or satellite; all
which I have seen at night.

Sincerely yours

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes No

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME _____ _____ _____
Last Name First Name Middle Name

ADDRESS _____ _____ _____ _____
Street City Zone State

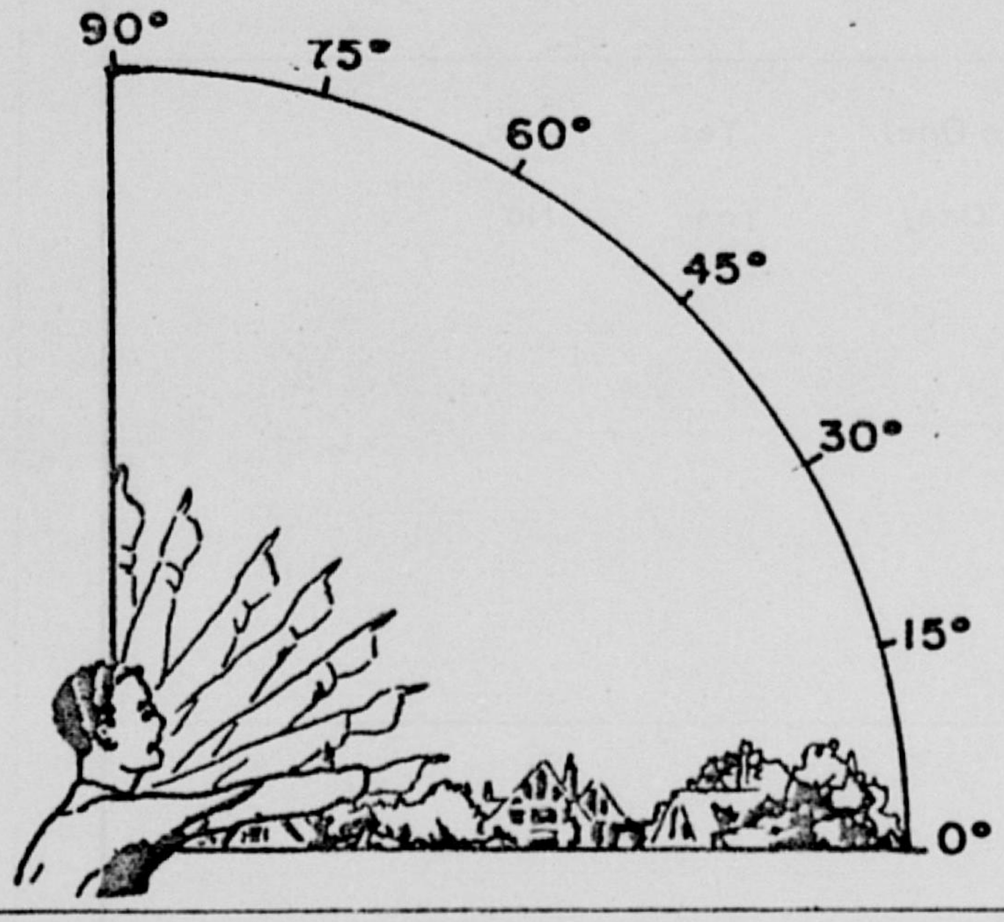

TELEPHONE NUMBER _____ AGE _____ SEX _____

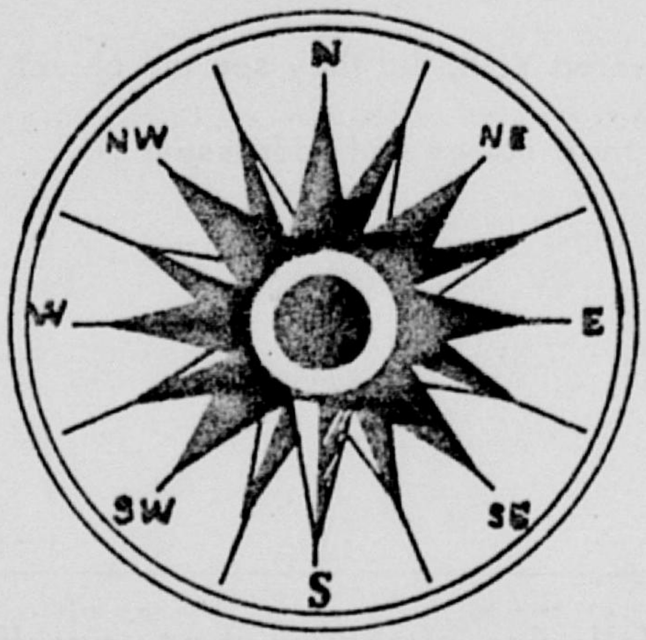

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

_____ _____ _____
Day Month Year

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Do you think you can estimate the speed of the object?

(*Circle One*) Yes No

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(*Circle One*) Yes No

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? (*Circle One*):

a. Inside a building
b. In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (*Circle One*)

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (*Circle One*)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? _____miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(*Circle One*) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

14. Did the object disappear while you were watching it? If so, how?

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what it moved behind: _____

_____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what in front of: _____

_____

17. Tell in a few words the following things about the object:

a. Sound _____

b. Color _____

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

_____

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other _____

13. Did the object: *(Circle One for each question)*

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

_____ Day _____ Month _____ Year

2. Time of day: _____ Hour _____ Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One):
a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One):
a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

_____ Nearest Postal Address _____ City or Town _____ State or County

5. How long was object in sight? (Total Duration) _____ Hours _____ Minutes _____ Seconds

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes _____ No _____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	a. Bright
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. FORM FTD OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

Received 17 Oct 66

14. Did the object disappear while you were watching it? If so, how?

yes — flew away

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No (Don't Know.) IF you answered YES, then tell what it moved behind: ____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No (Don't Know.) IF you answered YES, then tell what in front of: ____

17. Tell in a few words the following things about the object:

a. Sound emitted constant beeping sound

b. Color white

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

no angular size.
stated object was larger than a car.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving. N/A

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

_____

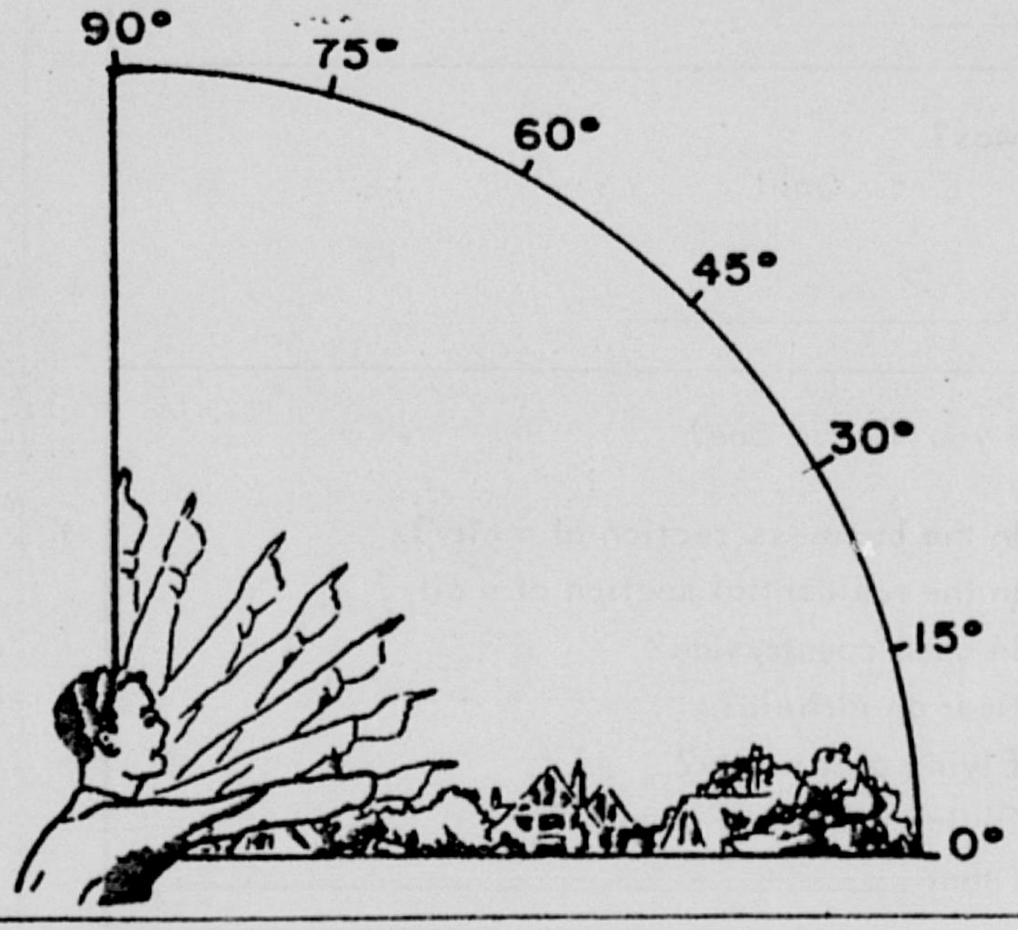

12. The edges of the object were:

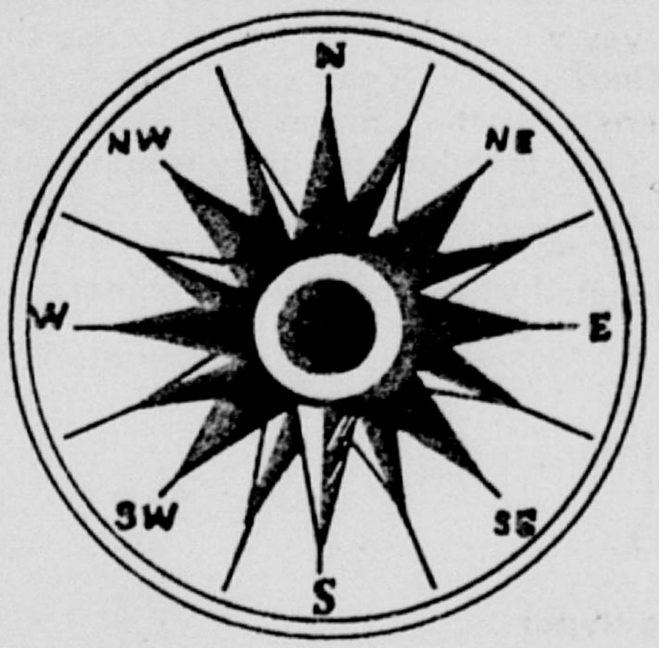

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other _____

13. Did the object: *(Circle One for each question)*

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? ? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? ? _____

22. Where were you located when you saw the object? *(Circle One):*

a. Inside a building
b. In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you *(Circle One)*

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? *(Circle One)*

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following? ?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes No

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME _____ _____ _____
Last Name First Name Middle Name

ADDRESS _____ _____ _____ _____
Street City Zone State

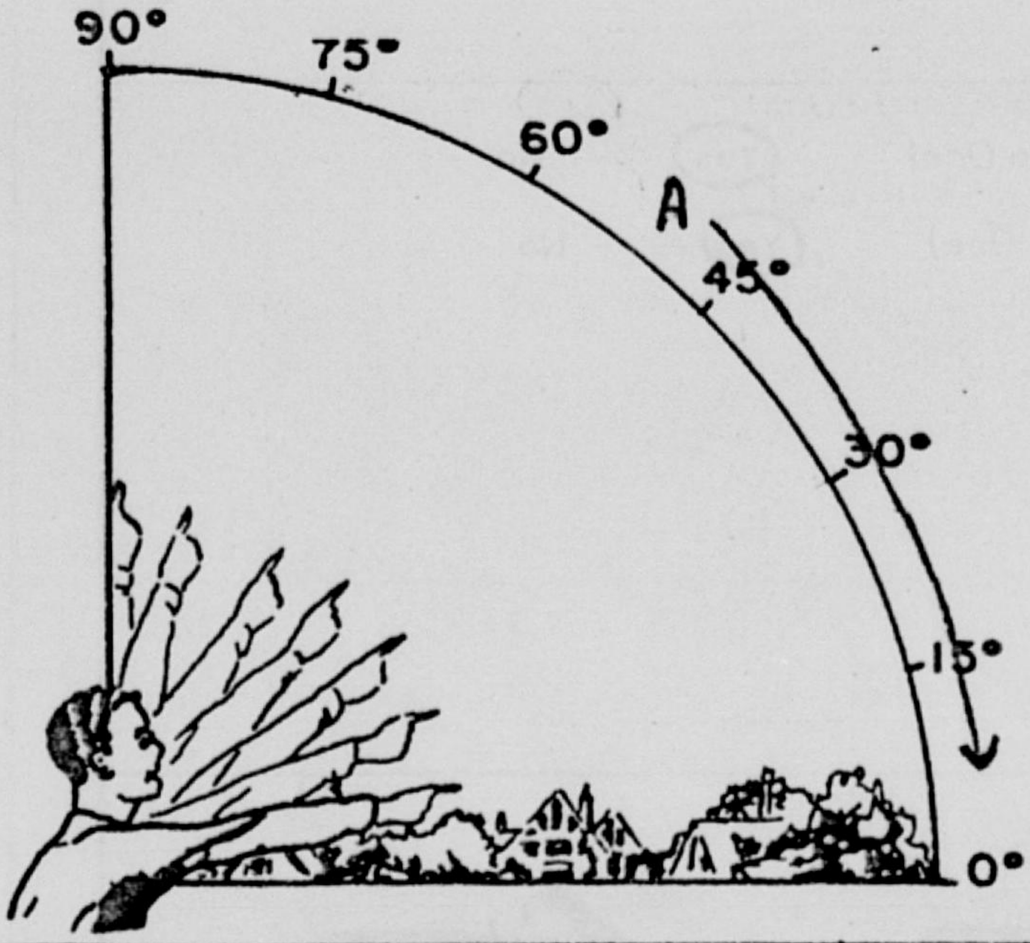

TELEPHONE NUMBER _____ AGE _____ SEX _____

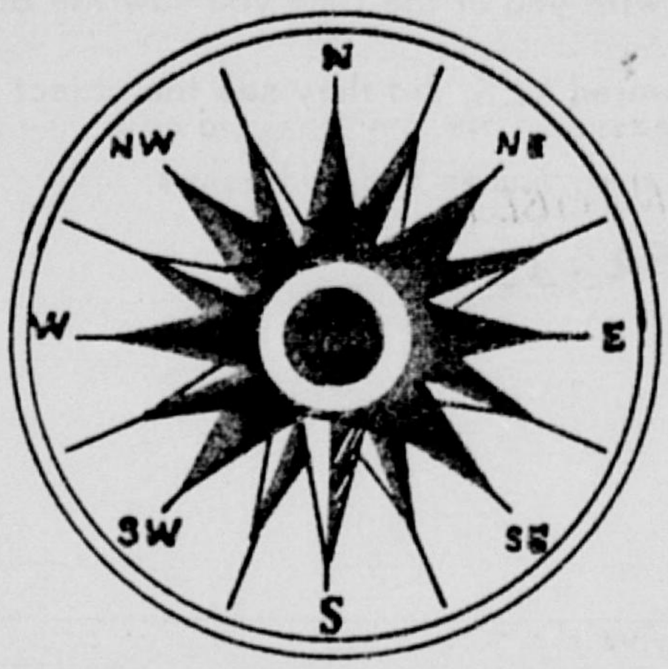

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

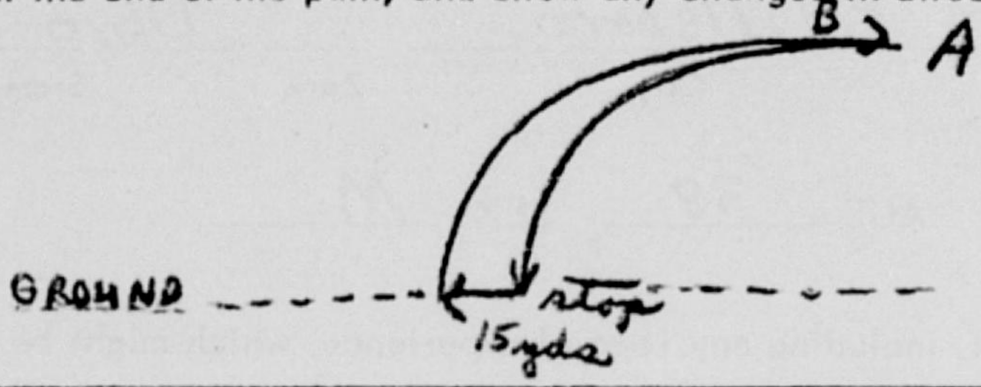

_____ _____ _____
Day Month Year

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO!

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* (Yes) No

31.2 Please list their names and addresses:

SEE NUMBER 35

32. Please give the following information about yourself:

NAME [redacted] [redacted] [redacted]
Last Name Middle Name

ADDRESS [redacted] Hillsboro Ohio
Street City Zone State

TELEPHONE NUMBER [redacted] AGE 38 SEX M

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

10 OCTOBER 1966
Day Month Year

1. HILLSBORO CITY POLICE
2. HIGHLAND COUNTY SHERIFF DEPARTMENT

14. Did the object disappear while you were watching it? If so, how?

The object appeared for a few seconds at a time and disappeared 10 seconds (at first). Later, the objects light stayed off at longer intervals of time

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what in front of: The object landed in a field with a well-outlined small forest in the background

17. Tell in a few words the following things about the object:

a. Sound A series of high to low "electronic" sounds

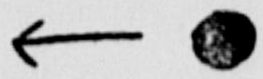

b. Color Fire-engine red

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

The flame of a paper match and that of a wooden match covered about one-third of an object of comparable size to that which we saw.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 75 to 100 yards

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
(c.) Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
(c) In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other naked eye		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

a bright red streetlight

the information of a slighting on a close
object to the ground I will report it to you
but getting in contact with you in seconds
you can pick this up. With some device that
I could get a good reading I would be
more than glad to help you. My parents
are thinking of buying a pair of good binoculars
for me or I could borrow a high powered
telescope, but that takes to long to arrange it
into order and I am out of luck.

In this form you sent the FTD form
my father wouldn't let me put this information
in the form. The form is on its way to you.
Anyway if you disregard this letter I still
will be looking and watching. My time is
put in watching these things and not letting
anyone of importance know it hurts me.
I promise no one will know about this. I have
more to tell if you are interested. I will allow
a little time for you to decide on what to do.
I write this letter in study hall at school, so my
parents won't know about it. If you decide to do
anything let me know. My address is

[redacted]
45133.

Sincerely

[redacted]

[redacted]
Hillsboro, Ohio

Dear Gentlemen:

I am the boy, who with fourteen others saw the other night on October 10, 1966, the unidentified observation. The same thing appeared on Friday night October 21st. By now I think you should have the report, but to add with it, I to saw it. I was going to report it to you instantly, but my cousin down in Prictown, Ohio, phoned and told me that not over twenty minutes he had saw one come within 20° degrees from where he was. He told me it was about the size of a dime. Since then people from all over the county have called me on strange sightings over a few years.

The main reason I am writing is because I spent many hours at night watching these things. Every clear night with maybe a few clouds is the best time to watch. Watching these UFO's play tag, or watch them do their crazy eight patterns is a sight to see. But the worst thing is watching airplanes coming over and seeing these UFO's come down a play with the plane and then disappear.

... This all I can see from where I live on a high elevation just right out of Hillsboro. I know from what I have seen that if they were something else, how could so many of these things be within a twenty-five to fifty-mile radius. Watching these lights go on and off and seeing these objects move around in the sky and looking like it is trying to be something else is amazing. Anymore if anyone asks me if I seen any in the last couple days I just refuse to answer. Besides seeing these two at close distance there has been at least two more, I have seen within the last month at this close of range. I then too wonder if these were what I have been seeing. My father is stubborn and thinks I am nuts, but I refuse to take that as an answer.

If you wish I could watch for these things and with the Air Force Data of some kind I can record these things. I'm in your need of a camera to take these pictures if anything comes in close like these sightings. I know you could get some good pictures and some information on these things. If I can get

NO CASE INFO ONLY - 10 OCT 66 MINN.

APR 12 1967

Dear [redacted]

Reference your letter reporting an unusual object sighted by you and your friends on October 10, 1966.

With the information submitted, it would be extremely difficult to offer much of an explanation. Essential data such as flight characteristics, maneuvers, and duration of sighting are quite important in a comprehensive evaluation. If you had reported your observation to the Air Force in October 1966, an evaluation would have been possible.

Thank you for reporting your observation to the Air Force.

I have attached some material on this subject which I think you will find interesting.

Sincerely,

GEORGE P. FREEMAN, JR.

During the duration of the object, several people in town reported interferance of their television broadcasting. We all felt definitely that no helicopter entered or left the area. Apart from the series of high and low "electronic" sounds, the object made no noise. When it moved, no noise could be heard.

When we shined a flashlight at the vicinity of the object and called to it, it responded with more regular flashing. When we started to approach the object, the flashing became constant and very regular - at intervals of approximately one-half second. It also responded with much more "electronic" sound.

March 12, 1967

Dear Sir,

After reading the article on Flying Saucers in the Picture Magazine (todays) Something pried(preyed?) on my mind. One night around October 10, 1966 3 friends of mine and I were working on a science project outside and we saw what we thought was a UFO. It was made up of red, green, and blue lights (on a disk-shaped background) and it flashed back and forth. Valerie Ulstad's father agreed with us that this what-ever-this-is could be a UFO. Carol Martin and

[redacted] thought it
was a weather balloon
but after a while gave
up the idea and so did
everyone else. My friends
and I were talking about
it together and we ~~desi~~
decided to write you a
letter. If you have any
idea about what this is
please send some ideas
if you can. My address is:

Hoax Report

DEPARTMENT OF PUBLIC SAFETY

(West Virginia State Police)

W. E. BURCHETT
SUPERINTENDENT

Grafton, West Virginia
November 2, 1966

HULETT C. SMITH
GOVERNOR

Foreign Technology Division
Air Force Systems Command
Wright Patterson Air Force Base, Ohio

Dear Sir:

The undersigned submits the following information to you which has been given to me by [redacted] West Virginia. An adult, 33 years of age, public service number [redacted]

[redacted] stated to the undersigned that while enroute to her place of employment at Fairmont, West Virginia, from her residence in Grafton, at approximately 5:55 a.m. DST, October 12, 1966, she did observe the following: A light moving in the sky at a low altitude which appeared to her at first to be a jet aircraft. She stated it had a red flame approximately three feet to the rear of the craft and was gliding toward the Earth. She was of the opinion that it was going to crash. She further stated that she applied her brakes not knowing whether she completely stopped the vehicle or reduced to a slow rate of speed. She watched the object descend over the crest of a large hill and into the valley to her right. She stated that the object was close enough now that she could see it had no running lights such as those found on aircraft and that the object had no wings.

Her description of the object is as follows: Approximately 20 feet in diamenter, round in structure, and three to four feet in thickness at its thickest point. She stated it was giving off a soft bluish glow. No other lights were visable with the exception of the flame from the rear as previously described.

She stated that she became alarmed and frightened when she realized that she was seeing ab object that she had only read and heard about previously. She watched the object as it glided into the valley. It stablized itself hovering or moving very slowly, parallel with her vehicle. Her direction of travel at that time was West on U.S. Route 50. She stated that she observed the object for at least 15 seconds or more and then it gained altitude and passed out of her field of vision, over the top of her vehicle and over the crest of the hill to her left. She stated that she believed the object was silver or aluminum in color with the soft bluish glow. The glow she

Proposed reply to letter from Jaimie Boone, 12 March 1967

Dear [redacted]

Reference your ~~recent~~ letter reporting an unusual ~~observation~~ object sighted by you[redacted] and ~~others~~ your friends on 10 October 1966. With the information submitted, it would be extremely difficult to offer much of an explanation. Essential data such as flight characteristics, maneuvers, and duration of sighting are quite important in a comprehensive evaluation. If you had reported your observation to the Air Force in October 1966, an evaluation would have been possible.

Thank you for reporting your observation to the Air Force.

I have enclosed some material on this subject which I think you will find interesting.

UFO SIGHTINGS #2.

FM: 15th AF Det 1 Fresno, CALIF.

AMN WATSON was told by MR Dick Schilmilhorn from FRESNO, that two TV enigneers (MR EMORY MILBURN & MR SCOTT) at a TV broadcast sight 40 miles East of Castle AFB had seen a UFO.

The object was sighted on an azimuth of 150° from top of 4500 ft tower 3 nights (12, 13, & 14th Oct) in a row from 1945 L to 2020 Local. Sighting was "visually" and with binoculars. (Capella)

The object is large and circular. It has bright white lights with reddish tint that revolve around the object. The UFO is larger than a normal aircraft. It normally hovers but moves vertically and horizontally. It departs rapidly when an aircraft passes by, but then returns to (near) original position and hovers.

Several Castle AFB residents have seen it, also.

Normal hovering but when
a/c approaches departs at a hi rate
of speed

& a/c passes it returns

34. Date you completed this questionnaire: _____ Day _____ Month _____ Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

15° above town

flickering white lite with red tint

more always when A/C approach then returned

1945—2020 last three nites

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes No

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME [redacted] _____ _____
Last Name First Name Middle Name

ADDRESS Pat (SAE) at Fresno Calif
Street City Zone State

TELEPHONE NUMBER _____ AGE _____ SEX _____

Indicate any additional information about yourself, including any special experience, which might be pertinent.

Belayed thru SAE Com Post from AF Com Post also Mr. Emory Melbourne & Mr. Scott

33. When and to whom did you report that you had seen the object?

_____ _____ _____
Day Month Year

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? *(Circle One):*

a. Inside a building
b. In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you *(Circle One)*

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? *(Circle One)*

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? _____miles per hour.

24.3 Did you stop at any time while you were looking at the object?

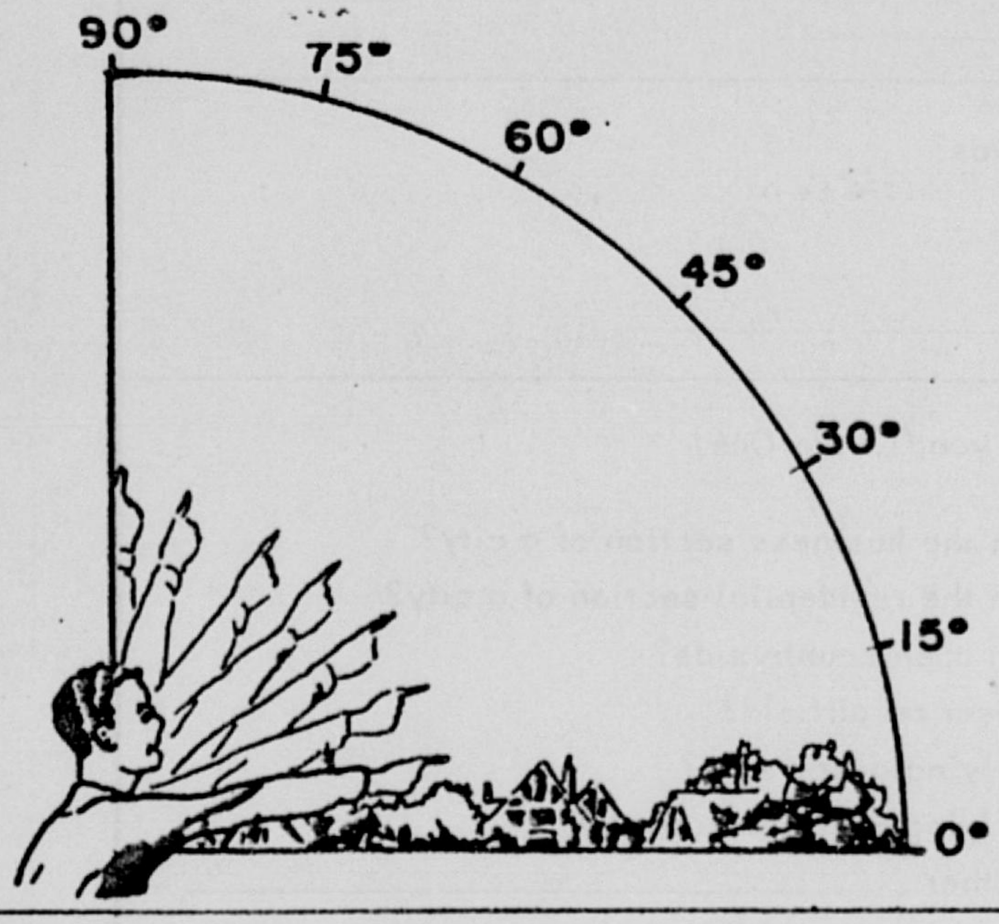

(Circle One) Yes No

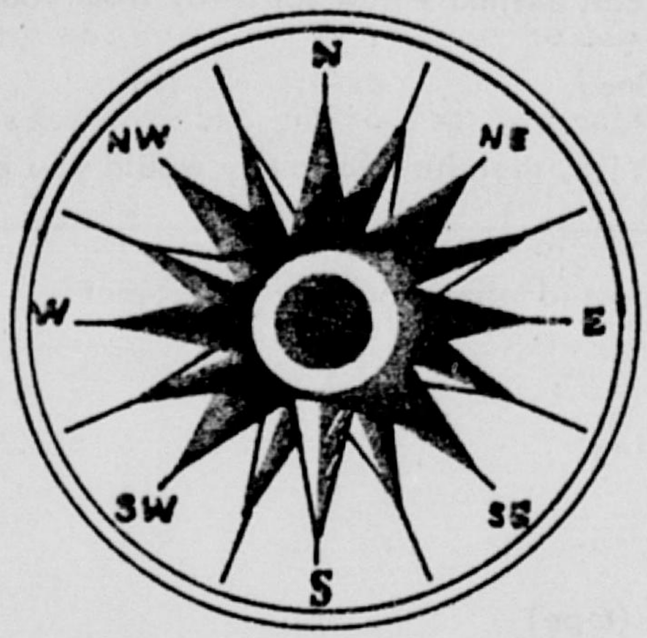

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

_____

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other _____

13. Did the object: *(Circle One for each question)*

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

14. Did the object disappear while you were watching it? If so, how?

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound _____

b. Color _____

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

described as being similar to the soft glow of a flouresant light.

This information is being forwarded to you as received by the undersigned for your information and disposition.

Very truly,

D. L. Lake
Corporal, Company "A"

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

_____ Day _____ Month _____ Year

2. Time of day: _____ Hour _____ Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One):
a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One):
a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

_____ Nearest Postal Address _____ City or Town _____ State or County

5. How long was object in sight? (Total Duration) _____ Hours _____ Minutes _____ Seconds

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes _____ No _____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	a. Bright
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember
