FOR THE COMMANDER

JOSEPH E. ZAINEY, Major, USAF Director of Information

1 Atch: Ltr, Mrs., 12 Dec 66 Grand Forks, 47. B.

File Try and explain about the night I sow the objects. Denirally - it was dark and cloudy all around, and raining quite heavely. Refore I saw the blue objects the area let up. The light was bright white like fluoressent. Dall met was maybe for me whead, I he area let rig, then the beg ball was there - seemed to set on the road. It desappeared after an instant. I drove slowly and hall miz. showed up in The same way. It seemed to turn and go to The left slightly of disappeared. I was quite startled by then. Withen seconde the bright light came above the car to the left of where I sat. If the window had been apen & could have reached the stars that durst from it of dont remember a noice when it durat as it was so surprising anyway. Shortly after came the light no 4 to the the tighty the car of slightly higher up but noticable thru the corner og the windshield. It hurst & was Jull of yellow stars also. I still hadn't gathered all my wits defore the last light came sos from the rear of the Car. Everything was The same as other two and I looked in my rear wiew merror and watched ut. Invas really too excited to work that night but I did. And believe it or not, I stayed on the road thru it all - I think. Vous heen really thrilled whent this as ets mysteresus and well be waiting tell it Can be explained. Hickory 17. Dale

142 halls didn't show any stars. Shout the same of the blue halls; the 3, 4, + 5 were about the sege og big plates or better. no. 1, and 2 were much larger about like a tector less. It a fireta distance land 2 would be harder to judge the size. When it burst and the stars came down et was deautiful. This is the hest I can make sø hope it helps some.
