PROJECT 10073 RECORD

1. DATE - TIME GROUP 19 Feb 67 1923582	2. LOCATION North Andover, Mass two
3. SOURCE Civilian	10. CONCLUSION Astro(s/p) Jet Very prob.
4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION 20 minutes	11. BRIEF SUMMARY AND ANALYSIS Observer watched a star like object in the NE portion of sky. The witness said that the objed was dimmer than the dimmest star in the sky. The object appeared to be slowly moving downward. The object appeared to be standing still, changing brightness, and was flashing or flickering. The object only appeared to be setting. The description is consistent with that of an astronomical observation. The clouds in the sky could have caused the effect that the object was setting.
6. TYPE OF OBSERVATION Ground Visual Tx	
7. COURSE Stationary	
8. PHOTOS ☐ Yes XX No	
9. PHYSICAL EVIDENCE ☐ Yes XX No

Answers on U.F.O.'s Report

Dear Sirs,
I'm filling out a U.F.O. form in the book magazine. I'm very interested in U.F.O.'s. Could you please send me some information on it? If so, please send it to:

(This may is on U.F.O.'s only)

[redacted]
North Andover, Mass. 01845

Thank You
[redacted]

1. I saw the object Sunday the 19th of February 1967

2. The time of day is 7:00-7:20 (20 minutes) P.M.

3. Time Zone was Eastern Standard Time. - Regular -

4. When I saw the object I was in the town of Port Credit and in my backyard.

5. The object was in sight for 20 minutes.

5.1 The time in sight was determined by a certain matter.

5.2 The object was in sight continuosly for 20 minutes.

6. It was nighttime and the sky was cloudy with light and heavy cloudy in some places. In other places it was bright.

7. I didn't see the object during daylight.

8.1. I saw the object at night & there were many stars.

continued

8.2. The moon had a bright moonlight.

9. At the time there were scatted clouds in some places and thick clouds in other places. When I saw the object, the clouds were scatted. It was cold (but not to cold comparing to the weather we've been having) and the air was sharp, crisp, & stinging.

10. The object apeared as a light.

11. It wasn't brighter than the brightest star.

11.1. It was dimmer than the dimmest star in the sky.

12. The edges of the object were like a bright star.

13. The object appeared to be standing still, changing brightness, and was flashing or flickering.

14. The object disappeared while I was watching it, & when I was beyond the horizon just as a rocket would.

15. The object did not move behind something, but as I was watching it, and as it was disappearing it seemed to be moving behind a cloud. And then after it appeared lower to the Earth.

16. It did not move in front of something.

17. The object had no sound. It had sort of a red and

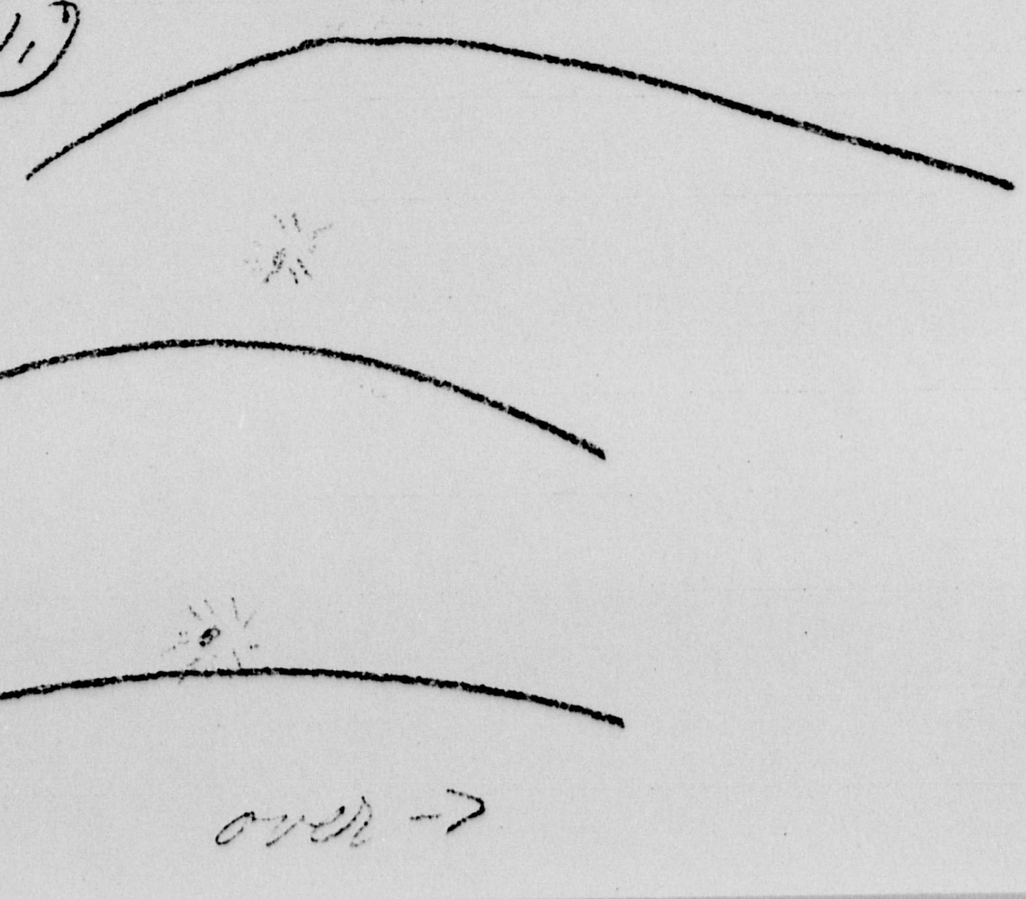
continued

white light together. I made a faint pinkish orange reflection.

18. The object was completely covered by a metal shield at arm length. It was about the size of a pinhead.

19. The object would move. But when it was behind a cloud (diagram)

• = object
⁘ = light



over →

(4)

(5)

(Gone)

20. As I can estimate the speed of the object. When it was moving behind the clouds (or seemed to) it looked as if it was going 400 miles per hour.

21. I can't estimate how far away the object was. It looked as if it was 5-7 miles up.

22. I was outdoors when I saw the object.

23. I was in an open back-yard in a town when I saw the object.

24. I was in an automobile

(1)

continued

25. I observed the object through a telescope & with my naked eye.

26. A star (at night) east of flashing red and white, and very close to the earth with out heat & fast movement would be like what I saw.

27. The object was North-east. When I first saw the object it was about 20° When I last saw the object it was about 90° (according to the diagram)

A

28.

29. I like wars only a little.

30. I've seen scenes scene like before in my life (as far as I can recall)

31. There was someone else with me at the time. (My uncle)

31.1. He saw the object too.

31.2. [redacted]
Lawrence, Mass. 01845

32. [redacted]

I'm a girl. I go to
school until 3:00.

33. We told my family, but

continued

they didn't believe me.

34. Monday 20, Feb., 1967 I completed the questionnaire.

35. At the time I was observing the stars, I moon through my 50 power telescope. The object changed color. There was a little breeze blowing North. I didn't report this to anyone else. It was always in back of some trees. We have a shed about 5 ft. & 3 inches & I stood on it (at the end when the object disappeared) and I couldn't see the object anymore. I was standing on the roof so I could see 10 ft. above everything. (Also about 5 ft. & 1 in.) Please do not send anything to Louis Riggs, but from

could send it to me.

Thank you very much
