FOR IDETR. REFERENCE DOOI 34318 MAR 67 AND PARA 6C AFR 83-17 DATED
19 SEPT 6S. REQUEST YOUR REVISE CONCLUSIONS I PARA 14K TO INDICATE
THAT THE MOST PROBABLE CAUSE OF THIS SIGHTING WAS THE KC-135 WHICH
PENETRATED AT THE WALNUT RIDGE VOR AT 988287Z MAR 67. AIRCRAFT
WOULD HAVE BEEN IN THE AREA AT THE TIME OF THE SIGHTING AND IN FACT
LANDED AT BLYTHEVILLE AFB FOLLOWING A SIMILATED INSTRUMENT APPROACH
TO LAND TO THE SOUTH. OBSERVATIONS OF BOTH 8-52 AND KC-135 AIRCRAFT DURING APPROACH AND LANDING AND WHEN IN THE LOCAL TRAFFIC
PATTERN CREATE MANY OF THE ILLUSIONS DESCRIBED IN THIS REPORT.

PHOTO ANALYSIS REPORT

NR 67-26

PAGE | OF ____ PAGES

DATE OF REPORT 20 April 1967

SUBJECT UNIDENTIFIED FLYING OBJECT

LOCATION HOLLAND, MISSOURI

DATE 10 March 1967

PHOTOGRAPHY

PNRS One roll 8 mm motion picture film (color)

- 1. PURPOSE: This report is in response to Work Order Number 67-41, submitted by Major H. Quintanilla, requesting an analysis of a roll of 8 mm motion picture film which allegedly contains photography of an unidentified flying object.
- 2. ANALYSIS: The entire roll of film was scanned and was found to be blank with the exception of approximately ll feet. Within this footage are two small, roughly circular bright spot images. A detailed photographic analysis of these images is not possible due to the lack of camera data, specifically focal length and range to the subject.
- 3. An examination of the film by a photo processing specialist reveals several similar circular bright spot images occurring outside of the normal frame area. On the entire roll of film there is no evidence of the frame lines which would be expected on a normally exposed 8 mm motion picture film. This raises the possibility that the film was not exposed or was run through a camera where the light path from the lens to the film was obstructed.

4. Further analysis could possibly be accomplished if more data was furnished in regard to the comments in Paragraphs 2 and 3.

UFO Report SUBJECT:

> TDETR, Wright-Patterson AFB, Ohio 45433 TO:

- 1. Reference our message DCOI 04018 Mar 67, subject same as above.
- 2. Forwarded for your information and exploitation is a roll of 8mm movie film which is alleged to contain photography of the same or a similar UFO as that reported in the referenced message. The film was exposed on 10 March 1967 by Mr the information in the original report. At the time of the original report, Mr. advised that he would attempt to photograph the object and, if successful; would release the film to this organiza-The inclosed film was obtained from Mr. on 23 March 1967.
- 3. Mr. I was unable to describe the camera or to provide any information as to the type of camera or lenses, the lense opening or shutter speeds or processing method, except to say that the camera was "borrowed" and "wide open."
- 4. The inclosed film was reviewed on 23 March 1967 but availabel technical equipment does not permit further exploitation or a logical conclusion as to the cause of this sighting.
- 5. A brief evaluation of this film would be appreciated. Further, requests the return of the original film when exploitation has been completed.

Peace... is our Profession

SAF-OICC/Mrs Cassel/bp/79079/18 May 67

MAY 1 8 1967

Dear Mr.

Thank you for submitting your roll of 8 mm movie film for evaluation.

The entire roll of film was found to be blank with the exception of approximately 11 feet. Within this footage are two images. A detailed photographic analysis of these images is not possible due to the lack of camera data.

On the entire roll of film there is no evidence of the frame lines which would be expected on a normally exposed 8 mm motion picture film. This raises the possibility that the film was not exposed or was run through a camera where the light path from the lens to the film was obstructed.

Photographic analysis reached the conclusion the film does not contain photography of the same or similar unidentified flying object (UFO) as first believed.

Your interest in our program is appreciated. Your film is inclosed.

Sincerely,
