U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object? 1. It or 2 nd SUNDAY MARCH 1967 Doy Month Your	7. Time of day: OG Have Minutes. (Circle One): A.M. or P.M.		
3. Time Zone: (Circle One): a Eastern b. Central c. Mountain d. Pacific e. Other (Circle One): a Daylight Saving by Standard			
4. Where were you when you saw the object?

	La L
	YONKENS, N.Y.
32.	Please give the following Information about yourself:
	NAME
	Laut Name Middle Name
	Street Store Store
	TELEPHONE NUM
	TELEPHONE NON.
	Indicate any additional information about yourself, including any special experience, which might be pertinent.
33.	When and to whom did you report that you had seen the object? 1 MARCIA 1967 TO FWRIGHT PATTERSOIN
1	IR BASE IN DAYJON, OHIO.

34. Date you completed this questionnaire:

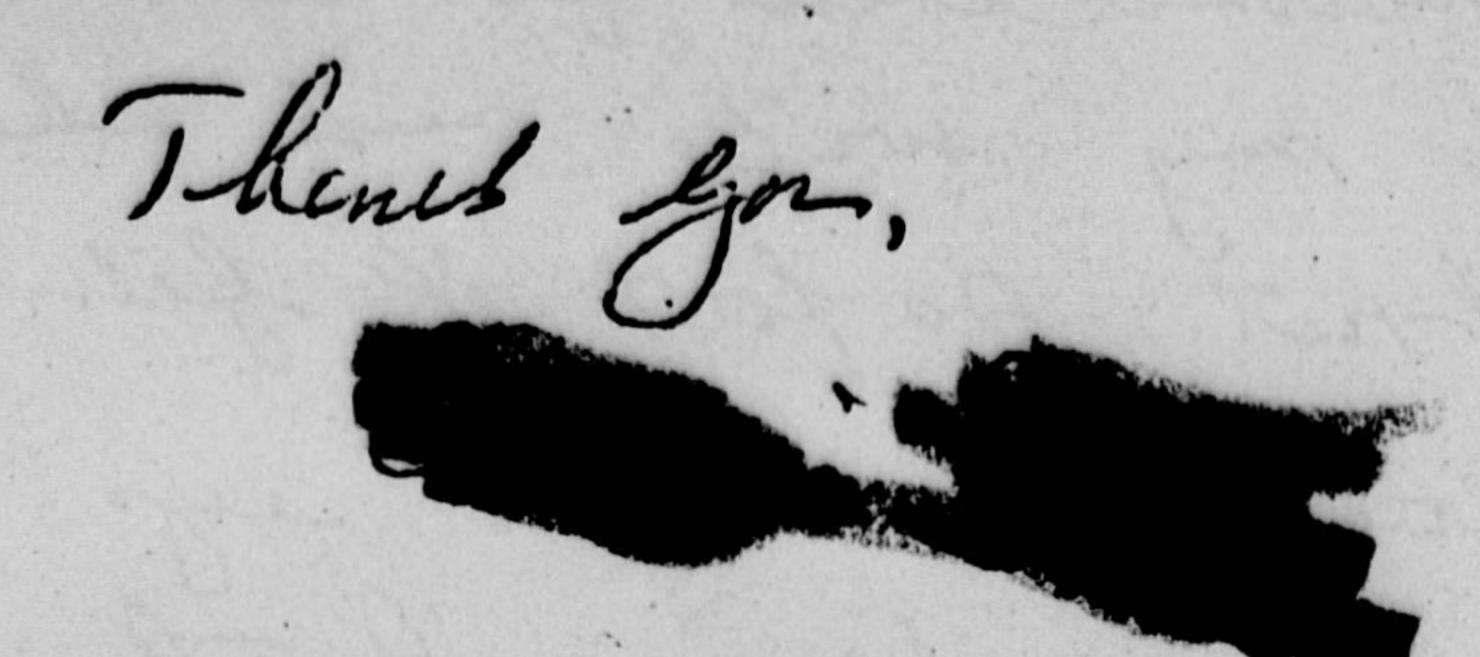

22 MALI 1967 Doy Month Your

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The dates I have filled in on this questionair are approximat. Exact det of sighting you write find in my original letter to you. Ces I mentioned in the letter I awake early that particular Tunday morning and some standing on my terras obsering the shyling of the East and watching the sky get lighter as the sun was about to rise. I sighted The objects and observed them for about 1/2 hour. Murring whis truit I avoke my wrife and she saw then and I also trak about 20 feet of film (all I had not the time.) When the sem came up I could me longer see the object brane of the glave: The larger of the objects seemed to worke a bit but that was the only motion that I could notice. Os you view the film you will find the larger object is much clearer toward the end of film. I found that with my projection I saw the objects cleaus who I made a smæller image. That is I had the projecter rather close to the screen. Toward the beginning of the film you will notice all the objects (although very small) are in a straight line. The object on the for left is the one that eggears tome to be larger and this is the one of encentrated on later in the film. The last few froms

of the film are of the sun rising.
I would greatly appricable your letting me han
an enlargement print of these objects when you
return the film to me. I have no copies of these films and would like to here then returned

I shall look forward to heaving from you in the new future.

Dear Sirs;

I would like to report seeing several unidentified flying objects sighted last Sunday (3/19/67) morning from 6:00 AM thru 6:45 Am. I live in Yonkers New York and made this sighting from my living room window which faces to the east toward Long Island Sound. The Objects appeared to be flying or floating just above the sound I would guess about 150 feet high. I hesitated reporting this to any one until the 8 mm movie film I took of the objects came back developed. To be honest I really wasn't sure myself after thinking about it all week. However the films did come back and the objects are definately there. I live on the 16th floor of a 19 story apartment building and although the objects were quite some distance away from me I did see them fairly clearly as my pictures will prove.

Kindly write me as to what you feel I should do with these films. I will in the meanwhile hold on to them until I hear from you.

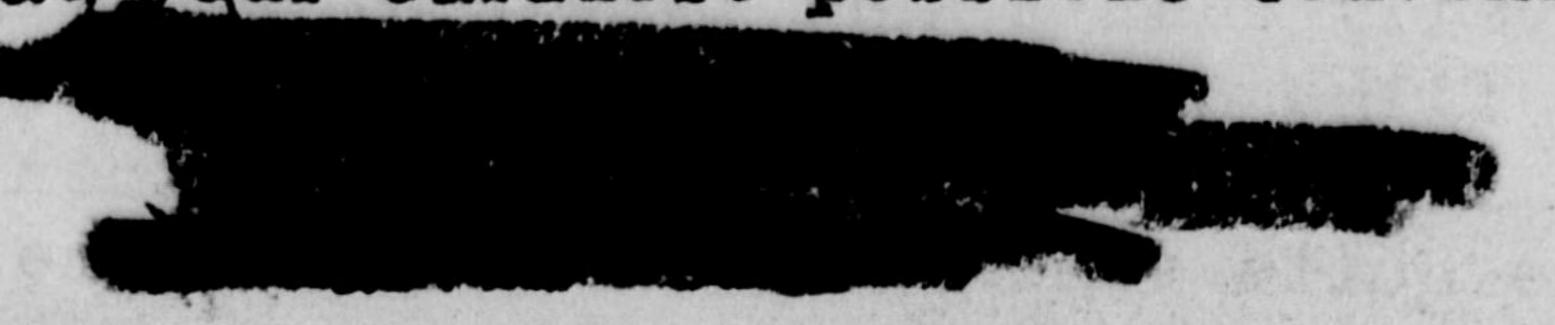

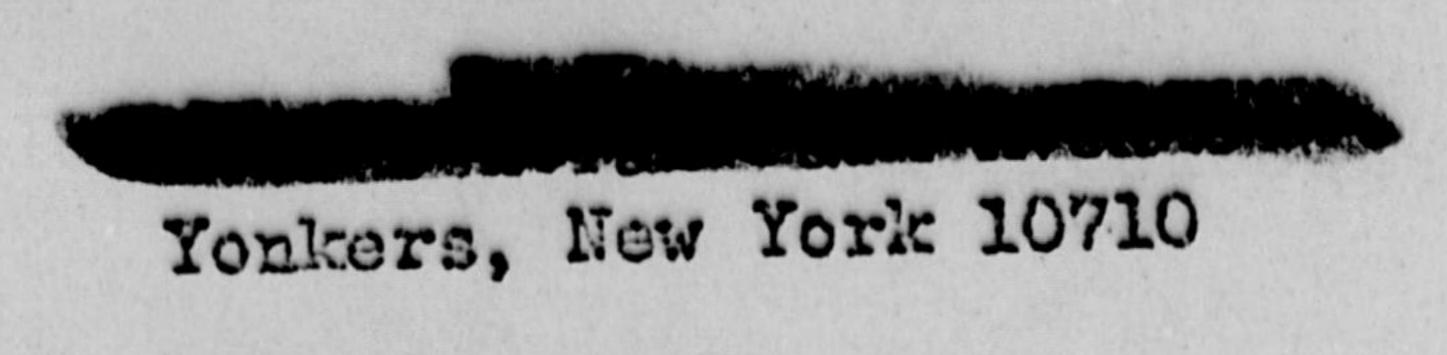

Colonel James C. Manatt Project Bluebook Wright - Petterson Air Force Base Dayton, Ohio 45433

Dear Sir:

In March of this year I notified your department of an unusal sighting and subsequent 8 mm movie films I made of this sighting. I was advised by your office to fill out a questionaire sent me and to forward the questionaire and film to your command for evaluation. I was further advised that my film would be returned to me along with a report on your findings. I filled out the questionaire and mailed it and my film to you in May of this year. As of this date I have had no reply from you other than an answer to an inquiry I had made several months ago stating that 'Due to the number of unusual sightings being made there was a slight delay in the processing of my film'. Sir, I believe that six months is surely enough time for your people to examine the film I have sent you and while you may for some reason be reluctant to offer an explanation, (or unable to) I would greatly appreciate the return of my film.

I look forward to hear from you at your earliest possible convenience.

July 13, 1967

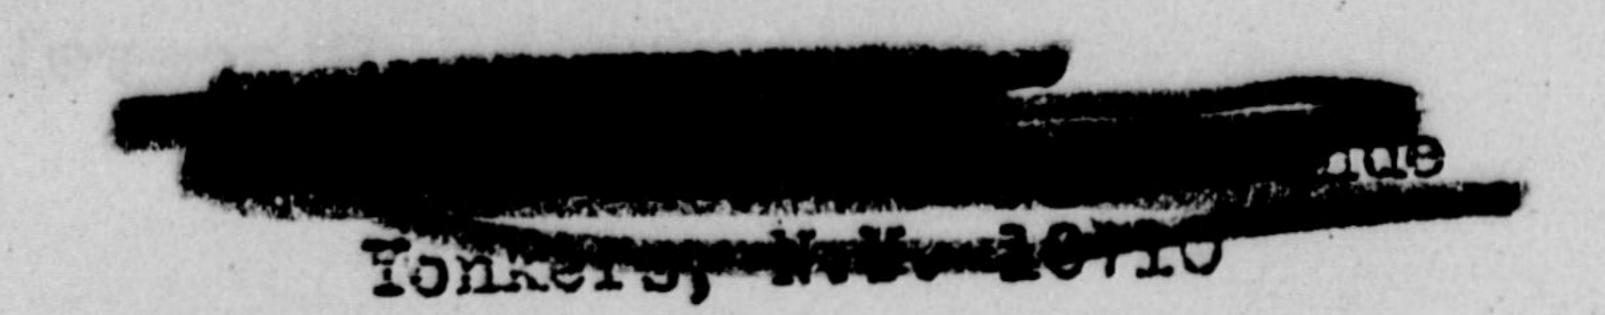

Major Quintanilla Project Blusbook Wright Patterson Air Bass Dayton, Ohio 45433

In May of this year I contacted your outfit regarding the sighting of several U F Os. Twenty five feet of 8mm color films were taken of the sighting and at your instructions I forwarded the film to you. I was to me with the results of your investigation. As of this date I have to me with the results of your investigation. As of this date I have to me with the results of your investigation. As of this date I have to me with the results of your investigation. As of this date I have to me with the results of your investigation of the films. I heard nothing from you concerning either the sighting or the films. I am needless to say very much interested in finding out exactly what it was that I observed. I am also very much interested in having my films returned to me.

I would very much like to hear from you about the above mentioned at your earliest possible convenience. If it is at all possible I should also like to receive some enlargments of the pictures. Thanking you also like to receive some enlargments of the pictures.

in advance for a speedy reply I remain

Truly yours,

me 67

JUL 3 1 1967

Dear Mr.

Reference your recent correspondence concerning your observation and subsequent film strip of an unidentified flying object (UFO).

Please excuse the delay in returning your film; however, our present heavy workload has precluded an early evaluation. The film has been submitted to the photo analysts and as yet, we have not received an answer.

I wish to assure you that upon completion of analysis we will return your film strip, along with our findings.

Thank you for your interest in our program.

Sincerely,

EARNETT B. YOUNG
