Date 5 Apr 67

SUBJECT: Unidentified Flying Objects (UFO)

4 April 67
05/0415Z
DENVER, Colo.

TO:

When unidentified flying objects (UFO) are reported, the following information will be filled in and then forwarded immediately to Plans/Program attention XPCP.

a. Description of the Object(s):

(1) Shape. Flat

(2) Size compared to a known object (use one of the following terms: Head of a pin, pea, dime, nickel, quarter, half dollar, silver dollar, baseball, grapefruit, or basketball) held in the hand at about arm's length.

Dime

(3) Color. Red, Blue Green, Yellow

(4) Number. 1

(5) Formation, if more than one. None

(6) Any discrenible features or details. None

(7) Tail, trail, or exhaust, including size of same compared to size of object(s). None

(8) Sound. If heard, describe sound. None

(9) Other pertinent or unusual features Changing color

b. Description of course of Object(s):

(1) What first called the attention of observer(s) to the object(s)?

Just looking up

(2) Angle or elevation and azimuth of the object(s) when first observed. 45 degrees - 50 degrees angle

Southwest

(3) Angle or elevation and azimuth of object(s) upon disappearance.

(4) Description of flight path and maneuvers of object(s).

Not moving

(5) How did the object(s) disappear? (Instantaneously to the north, etc.)

(6) How long was the object(s) visible. (Be specific, 5 minutes, 1 hour, etc)

15 minutes

c. Manner of Observation:

(1) Use one or any combination of the following items: Ground-visual, ground - electronic, air electronic. (If electronic, specify type of radar.)

N/A

(2) Statement as to optical aids (telescopes, binoculars, and so forth) used and description thereof.

(3) If the sighting is made while airborne, give type of aircraft, identification number, altitude, heading, speed, and home station.

N/A

d. Time and date of sighting:

(1) Zulu time-date-group of sighting. 05/0455Z Apr 69

2155

h. Any other unusual activity or condition, meteorological, astronomical, or otherwise, which might account for the sighting.

Auxiliary Power report star in general area

i. Interception of identification action taken (such action may be taken whenever feasible, complying with existing Air Defense directives).

N/A

j. Location, approximate altitude, and general direction of flight of any air traffic in the area at time of sighting.

None

k. Position title and comments of the preparing officer, including his preliminary analysis of the possible cause of the sighting(s).

Star

l. Existence of physical evidence, such as materials and photographs.

None

Donald E. Vyse

Donald E. Vyse, Major, USAF
Chief, Operations Services Division

(2) Light conditions. (use on of the following terms: Night, day, dawn, dusk) Night

e. Location of Observer(s). Exact latitude and longitude of each observer, and/or geographical position. A position with reference to a known landmark also should be given in electrical reports, such as "2mi N of Deeville; "3mi SW of Blue Lake". Typographical errors or "garbling" often results in electrically transmitted messages, making location plots difficult or impossible.

EXAMPLE: 89 45N, 192 71W for 39 45N, 102 21W.

Southwest 191 Lowry

Sheridan

f. Identifying Information on Observer(s):

(1) Civilian - Name, age, mailing address, occupation, and estimate of reliability. [redacted] Age 18, [redacted] Student

Deemed to be reliable

(2) Military - Name, grade, organization, duty, and estimate of reliability.

g. Weather and winds -- Aloft conditions at time and place of sightings:
110/Warm

(1) Observer(s) account of weather conditions.
Clear

(2) Report from nearest AWS or U.S. Weather Bureau Office of wind diection and velocity in degrees and knots at surface, 6,000', 10,000', 16,000', 20,000', 30,000', 50,000', and 80,000' if available.
110 AT 4

(3) Ceiling. 11,000' scat

(4) Visibility. 20

(5) Amount of cloud cover. High scat

(6) Thunderstorms in area and quadrant in which located. None

PROJECT 10073 RECORD

1. DATE - TIME GROUP 5 Apr 67 06/0240Z	2. LOCATION Denver, Colorado (1 Witness)
3. SOURCE Civilain	10. CONCLUSION Astro (VENUS) Very prob. JHB Venus was on an elavation of 14 degrees, azimuth of 080 degrees at time of sighting.
4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION 25 minutes	11. BRIEF SUMMARY AND ANALYSIS Object was orange at larger end, yellow and blue on small end. Object appeared as a GEMINI space ship.
6. TYPE OF OBSERVATION Ground-Visual (BX)	
7. COURSE Stationary	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No	

FORM
FTD SEP 63 0-329 (TDE) Previous editions of this form may be used.

b. Description of course of Object(s):

(1) What first called the attention of observer(s) to the object(s)?

Just walked outside (sort of looking for something since reading recent articles).

(2) Angle or elevation and azimuth of the object(s) when first observed. Cannot determine (45° NW of Little Dipper).

(3) Angle or elevation and azimuth of object(s) upon disappearance.

Still visible.

(4) Description of flight path and maneuvers of object(s).

None.

(5) How did the object(s) disappear? (Instantaneously to the north, etc.)

Still visible.

(6) How long was the object(s) visible. (Be specific, 5 minutes, 1 hour, etc)

25 minutes.

c. Manner of Observation:

(1) Use one or any combination of the following items: Ground-visual, ground - electronic, air electronic. (If electronic, specify type of radar.)

Ground-visual.

(2) Statement as to optical aids (telescopes, binoculars, and so forth) used and description thereof. Binoculars 4 X 4

(3) If the sighting is made while airborne, give type of aircraft, identification number, altitude, heading, speed, and home station.

d. Time and date of sighting:

(1) Zulu time-date-group of sighting. 06/0240Z April 1967

1940

Date 5 March 67

SUBJECT: Unidentified Flying Objects (UFO)

Denver, Colo.
5 April 67

TO:

When unidentified flying objects (UFO) are reported, the following information will be filled in and then forwarded immediately to Plans/Program attention XPCP.

a. Description of the Object(s):

(1) Shape. Indistinguishable - like a Gemini space ship.

(2) Size compared to a known object (use one of the following terms: Head of a pin, pea, dime, nickel, quarter, half dollar, silver dollar, baseball, grapefruit, or basketball) held in the hand at about arm's length.

(3) Color. Orange on larger one, yellow and blue on smaller one.

(4) Number. One.

(5) Formation, if more than one.

(6) Any discrenible features or details. Very bright.

(7) Tail, trail, or exhaust, including size of same compared to size of object(s). None.

(8) Sound. If heard, describe sound. None.

(9) Other pertinent or unusual features None.

h. Any other unusual activity or condition, meteorological, astronomical, or otherwise, which might account for the sighting. None.

i. Interception of identification action taken (such action may be taken whenever feasible, complying with existing Air Defense directives).

j. Location, approximate altitude, and general direction of flight of any air traffic in the area at time of sighting.

Buckley Tower could locate nothing but stars.

k. Position title and comments of the preparing officer, including his preliminary analysis of the possible cause of the sighting(s).

Capt Doby

l. Existence of physical evidence, such as materials and photographs.

Visible to Center CA (Sgt Stewart) for about 1:05 gradually moving away (straight line) (slightly NW) diminishing in intensity and dropping toward horizon at 2106 hours. Changed color from bright white to yellow, orange before disappearing.

Edward E Vigie Major USAF

(2) Light conditions. (use on of the following terms: Night, day, dawn, dusk) Night.

e. Location of Observer(s). Exact latitude and longitude of each observer, and/or geographical position. A position with reference to a known landmark also should be given in electrical reports, such as "2mi N of Deeville; "3mi SW of Blue Lake". Typographical errors or "garbling" often results in electrically transmitted messages, making location plots difficult or impossible.

EXAMPLE: 89 45N, 192 71W for 39 45N, 102 21W.

W 72 Ave & Federal Blvd (approximately 6 blocks North).

f. Identifying Information on Observer(s):

(1) Civilian - Name, age, mailing address, occupation, and estimate of reliability. [redacted] (38) [redacted], Paintaintaer, AF Finance Center, Phone Home [redacted] Office [redacted]

(2) Military - Name, grade, organization, duty, and estimate of reliability.

g. Weather and winds -- Aloft conditions at time and place of sightings:

180, 4 knots.

(1) Observer(s) account of weather conditions. Clear.

(2) Report from nearest AWS or U.S. Weather Bureau Office of wind diection and velocity indegrees and knots at surface, 6,000', 10,000', 16,000', 20,000', 30,000', 50,000', and 80,000' if available.

(3) Ceiling. Clear

(4) Visibility. 25

(5) Amount of cloud cover. None.

(6) Thunderstorms in area and quadrant in which located. None. Temp 42.

SUBJECT: Unidentified Flying Objects (UFO)

Denver, Colo.
6 Apr. 67

TO:

When unidentified flying objects (UFO) are reported, the following information will be filled in and then forwarded immediately to Plans/Program attention XPCP.

a. Description of the Object(s):

(1) Shape. Light Bulb.

(2) Size compared to a known object (use one of the following terms: Head of a pin, pea, dime, nickel, quarter, half dollar, silver dollar, baseball, grapefruit, or basketball) held in the hand at about arm's length.

Base Ball

(3) Color. White changing to Red, Green and back to White.

(4) Number. One.

(5) Formation, if more than one.

(6) Any discrenible features or details. Very bright with light bulb effect.

(7) Tail, trail, or exhaust, including size of same compared to size of object(s). None.

(8) Sound. If heard, describe sound. None.

(9) Other pertinent or unusual features None.

b. Description of course of Object(s):

(1) What first called the attention of observer(s) to the object(s)?

By chance caught eye while out in yard.

(2) Angle or elevation and azimuth of the object(s) when first observed. Not far above mountains (horizon).

(3) Angle or elevation and azimuth of object(s) upon disappearance.

Same as (2) above.

(4) Description of flight path and maneuvers of object(s).

Stationary.

(5) How did the object(s) disappear? (Instantaneously to the north, etc.)

Stationary, faded out.

(6) How long was the object(s) visible. (Be specific, 5 minutes, 1 hour, etc)

10 minutes.

c. Manner of Observation:

(1) Use one or any combination of the following items: Ground-visual, ground - electronic, air electronic. (If electronic, specify type of radar.)

Naked eye.

(2) Statement as to optical aids (telescopes, binoculars, and so forth) used and description thereof. None.

(3) If the sighting is made while airborne, give type of aircraft, identification number, altitude, heading, speed, and home station.

d. Time and date of sighting:

(1) Zulu time-date-group of sighting. 07/0400Z April 1967

2100Z

h. Any other unusual activity or condition, meteorological, astronomical, or otherwise, which might account for the sighting. Unknown.

i. Interception of identification action taken (such action may be taken whenever feasible, complying with existing Air Defense directives).

j. Location, approximate altitude, and general direction of flight of any air traffic in the area at time of sighting.

Unknown.

k. Position title and comments of the preparing officer, including his preliminary analysis of the possible cause of the sighting(s).

SSgt Kuster: Observer stated she and her husband had sighted same object on several occasions recently and at approximately same time (2040 - 2100). Informed observer her report was similar to several others received in last few days.

l. Existence of physical evidence, such as materials and photographs.

None

Edward E. Wyce Major USAF

(2) Light conditions. (use on of the following terms: Night, day, dawn, dusk) Night.

e. Location of Observer(s). Exact latitude and longitude of each observer, and/or geographical position. A position with reference to a known landmark also should be given in electrical reports, such as "2mi N of Deeville; "3mi SW of Blue Lake". Typographical errors or "garbling" often results in electrically transmitted messages, making location plots difficult or impossible.

EXAMPLE: 89 45N, 192 71W for 39 45N, 102 21W.

7309 [redacted] Denver, Colo

f. Identifying Information on Observer(s):

(1) Civilian - Name, age [redacted] (29), [redacted], occupation, and estimate of reliability.

(2) Military - Name, grade, organization, duty, and estimate of reliability.

g. Weather and winds -- Aloft conditions at time and place of sightings:

10,000 scattered

(1) Observer(s) account of weather conditions. Clear

(2) Report from nearest AWS or U.S. Weather Bureau Office of wind diection and velocity indegrees and knots at surface, 6,000', 10,000', 16,000', 10 knots. 20,000', 30,000', 50,000', and 80,000' if available.

(3) Ceiling. 10,000 scattered

(4) Visibility. 20 miles

(5) Amount of cloud cover. 10,000 scattered none

(6) Thunderstorms in area and quadrant in which located.

Albuquerque, New Mexico
6 Apr 1967

10 April 1967

1. The following agencies were contacted in regards to this UFO report in an attempt to determine if object was an aircraft, fixed wing or helicopter.

a. Interstate Helicopters (blue and white chopper): Negative - aircraft has not flown during past week.

b. Cutter Aviation (green chopper): Negative - neither chopper nor light aircraft airborne during that period.

c. Carco: Negative - nothing airborne in that vicinity. They did report hearing (on radio) a tri-pacer call in at approximately 2245 MST for landing at Kirtland arriving from that direction.

d. Alameda Airport: Seven Bar Aviation: Negative - nothing airborne during that period.

e. Coronado Airport - Southwest Skyways: Negative - nothing airborne.

f. Flight Service Station (FSS-FAA): Negative - no helicopter or flight plans, transient or local, during that period. (Individual on duty very reluctant to look up desired information.)

g. FAA Tower (very cooperative): The tower personnel on duty at the time reported watching a bright light in that vicinity for approximately 10 - 15 minutes duration. A check with ARTC Center revealed it to be a jet commander, inbound from the northeast, with high intensity strobe lights mounted on fuselage. Following identification of the object, the tower personnel turned their attention elsewhere. This sighting coincides with the time period in Mrs. Coy's

report. (The glare created by the strobe lights would probably distort the shape of the object being viewed.) I have personallywitnessed the rotating beacon on top of the Empire State Building of an airborn distance in excess of 75 miles at night in atmospheric conditions less desirable than those which prevailed on the night of the sighting. At jet altitudes, high intensity strobe lights would be visible at distances well in excess of 100 miles, possibly 200 miles. An aircraft approaching Albuquerque from that direction would maintain a fairly constant relative bearing towards the viewer and with head winds varying between 50 and 75 knots, would be visible for a considerable length of time - 20 to 40 minutes. During its approach, while maintaining a constant bearing, it would appear to weave from side to side and up and down due to airspeed, course and altitude deviations.

2. Since missiles were not in the area and free balloons cannot travel against the wind and all available information indicates that the sighting was indeed the strobe light, equipped jet commander, this incident is considered closed.

C H Van Diver

CHARLES H. VAN DIVER, Capt, USAF
Chief of Safety

(3) Angle of elevation of object(s) upon disappearance. (Use theodolite or compass measurement if possible.)

Going S toward Kirtland

(4) Description of flight path and maneuvers of object(s). (Use elevations and azimuth, not altitude.)

Moved Up + Down near Sandias and then went straight toward Kirtland.

(5) How did the object(s) disappear? (Instantaneously to the North, for example.)

Instantaneously when aircraft from Kirtland went toward it.

(6) How long were the object(s) visible? (Be specific--5 minutes, 1 hour, etc.)

45 min

c. Manner of Observation:

(1) Use one or any combination of the following items: Ground-visual, air-visual, ground-electronic, air-electronic. (If electronic, specify type of radar.)

Ground-visual

(2) Statement as to optical aids (Telescopes, binoculars, etc. used and description thereof.

binoculars

(3) If the sighting occurred while airborne, give type of aircraft, identification number, altitude, heading, speed, and home station.

d. Time and Date of Sighting:

(1) Greenwich date-time group of sighting and local time.

0500Z to 0545Z 6 Apr 1967

Capt Ward ext 3663
(Name & Telephone Nr. of Individual Receiving Rept)

UNIDENTIFIED FLYING OBJECTS (UFO) - Outline of Reporting Format
(AFR 80-17, 19 Sep 66)

a. Description of the Object(s):

(1) Shape: Disk

(2) Size compared to a known object Size of a large aircraft

(3) Color: Silver with a flashing red and white lights

(4) Number: 1

(5) Formation, if more than one

(6) Any discernible features or details None

(7) Tail, trail, or exhaust, including its size None

(8) Sound None

(9) Other pertinent or unusual features None

b. Description of Course of Object(s):

(1) What first called the attention of observer(s) to the objects Irregular flight pattern. It was moving up & down and from side to side

(2) Angle of elevation and azimuth of object(s) when first observed. (Use theodolite or compass measurement if possible.)

W of town
Object was [redacted] over 60 yds - two
[illegible] Returned to 20 yds
[illegible]

(6) Thunderstorms in area and quadrant in which located.

None

(7) Vertical temperature gradient There was a temperature inversion at 18000 to 20000' and one at 20000' to 23000'

h. Any other unusual activity or condition, meteorological, astronomical, or otherwise, that might account for the sighting.

Tropopause at 41000 ft

i. Interception or identification action taken (such action is authorized whenever feasible and in compliance with existing air defense directives).

None

j. Location, approximate altitude, and general direction of flight of any air traffic or balloon releases in the area that might possibly account for the sighting.

Balloon released at 0515Z 6 Apr 1968 direction of flight 250°

k. Position title and comments of the preparing officer, including his preliminary analysis of the possible cause of the sighting(s).

SDO, Capt Ward. The original report was received by Maj Watts the SDO at Hq Field Command, Sandia at 0340Z.

It appears that an aircraft experienced turbulence near the Sandias and then landed at Kirtland. However, Mrs said that there was not any sound from it.

(2) Light conditions (use one of the following terms: Night, day, dawn, dusk).

Night

e. Location of Observer(s). Give exact latitude and longitude coordinates of each observer, and/or geographical position. In electrical reports, give a position with reference to a known landmark in addition to the coordinates. For example, use "2 mi N of Deeville"; "3 mi SW of Blue Lake," to preclude errors due to teletype garbling of figures.

N. E. Albuquerque, N. Mex

f. Identifying Information on Observer(s):

(1) Civilian -- Name, age, mailing address, occupation, education and estimate of reliability.

[redacted] (called Louise on base - no answer) [redacted], 37 yrs, [redacted] N.E., Albuquerque, N. Mex., house wife

(2) Military -- Name, grade, organization, duty, and estimate of reliability.

g. Weather and Winds-Aloft Conditions at Time and Place of Sightings:

(1) Observer(s) account of weather conditions. Clear with some clouds to N

(2) Report from nearest AWS or US Weather Bureau Office of wind direction and velocity in degrees and knots at surface 6,000', 10,000', 16,000', 20,000', 30,000', 50,000', and 80,000', if available. surface 270° @10k; 6000', 210° @20k, 10000', 230° @20k; 20000', 250° @ 65k; 30000', 240° @ 80k 50000', 240° @ 50k, 80000', 330° @ 5k

(3) Ceiling None

(4) Visibility 60 mi

(5) Amount of cloud cover 1/8

SAFOICC/Mrs Cassel/jad/79079/17 Apr 67

APR 17 1967

Dear [redacted]

The Secretary of Defense referred your letter concerning the unidentified flying object (UFO) which you have sighted to our office for reply.

Within the Department of Defense the Air Force has the responsibility of investigating UFOs reported to us and determining whether or not these objects constitute a threat to our national security. This program is carried out under the designation Project Blue Book which is explained in the attached brochure.

Project Blue Book personnel at Wright-Patterson Air Force Base, Ohio report that they have not received any UFO reports from your area.

I have attached an FTD Form 164 which is used in officially reporting a sighting to the Air Force. If you will complete this form, an attempt will be made to evaluate the sighting in your area. You may use the attached envelope to mail the completed form.

I hope this information will be of interest to you.

Sincerely,

GEORGE P. FREEMAN, JR.
Lt Colonel, USAF
Chief, Civil Branch
Community Relations Division

Sec of Defense
Robert S. McNamara
Washington D.C.

Dear Sir :-

I am writing you concerning
U.F.O. of which I have been seeing
for sometime now. I would like
you to direct this letter to who
ever is in charge of investigating
them ones.

I have never seen them in the
daytime yet but have seen their
lights at night: when I first started
seeing them I thought it looked
like a big star and I called

(over)

. My husband to look. It was in
southwest but as I looked the
light was moving to the north
and getting bigger and brighter and
it turned straight west blinking
red lights and disperred. When
I first saw it it was standing
still but just floated until it
turned west and then it was really
moving and moved out of sight
fast. I have watched the same
one every night but never
it stays longer than I see
another in the north east or
straight east sometime always
I can see the other one too and
they blink red lights when they
take off.
I work in a store about 4 miles
from my home on weekends
and have to come home at

as I turned into our driveway
I was headed west facing the
road & had just come down
there was another Bright light
which had been behind me.
and it moved over and was
just over our garage. I stoped
by the house quick and run
in got my husband to look
and get my shepard dog to wait
in the garage while I closed in
I closed the door and run into
the house. They scare me
because when they want to
they can go out of sight in minute
Thats why I wonder if they
could land in front of you and
block you. I have gotten up in
the night and seen them too: I
just cannot understand why the
air force doesn't do something

7:30 P.M at night.

Last Friday night <u>April 7</u> as I was driving home. I turned onto
140th St of which we live on the
corner of and 24th St. I did not
see anything until I got within a
mile of home and then I saw
this Bright light out to my right
moving right along ~~same speed~~ with
me not much higher than the
tallest trees light poles. It scared
me and as I was not going to
fast as it is a country road I
steped it up to 65 but it stayed
right along with me. I got to
24th St and then I turned right as
my driveway is on 24th St. as I
turned the light started changing
to red blinking and shot ahead
fast and stoped dead still about
300 feet or as it seemed to me.
over

or till we something to ease
our minds. I cannot rest
good thinking of whatever they
are and wondering if they are
watching us. There have been
other people within 7 miles of
my home seeing them too.
They surely cannot be balloons
because they move right into
the direction the wind is coming
from and disapear.
I hope you will read my
letter and give it to whoever
is investagating U.F.O. now.
Thanking you,
I am
[redacted]

.S. Air Force UFO form continued

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate?_____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

IF you answered YES, then how far away would you say it was?_____

22. Where were you located when you saw the object? *(Circle One):*

a. Inside a building
b. In a car
(c.) Outdoors
d. In an airplane (type)
e. At sea
f. Other_____

23. Were you *(Circle One)*

a. In the business section of a city?
(b.) In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other_____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? *(Circle One)*

a. North	c. East	e. South	g. West
b. Northeast	d. Southeast	f. Southwest	h. Northwest

24.2 How fast were you moving?_____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	(No)	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	Yes	(No)	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other_____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It was like an army helmet.

64

Official U.S. Air Force UF

14. Did the object disappear while you were watching it? If so, how? Disappeared due to homes blocking view of it's path

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't know. IF you answered YES, then tell what it moved behind: Chimneys + Homes.

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of:

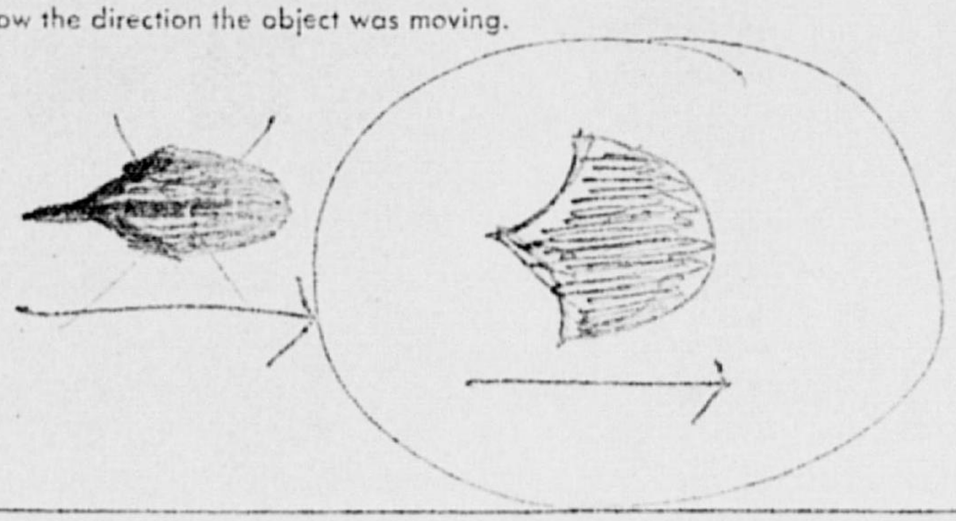

17. Tell in a few words the following things about the object:

a. Sound None

b. Color Bright Red then Pale Yellow

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? about ¾ of it

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

FORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight—pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

like a magnesium Wire Burning

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other_____

13. Did the object:

	(Circle One for each question)		
a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

OFFICIAL U.S. AIR

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

SAT. (Day) APRIL 1 (Month) 1967 (Year)

2. Time of day: 8 (Hours) 45 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): (a. Eastern)
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

[redacted] (Nearest Postal Address) FLOSHING; NEW YORK (City or Town); NY. (State or County)

5. How long was object in sight? (Total Duration) — (Hours) — (Minutes) 40 (Seconds)

a. Certain
(b. Fairly certain)
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? approximation

5.2 Was object in sight continuously? Yes ____ No ✓

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a. Bright)
b. Cloudy	b. Cloudy

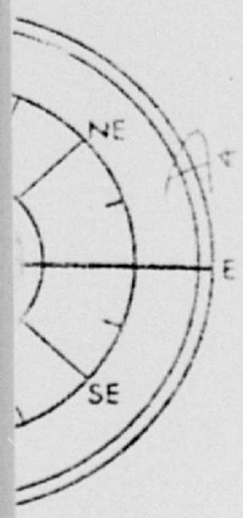

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No) but it was quite fast

If you answered YES, then what speed would you estimate?_____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

If you answered YES, then how far away would you say it was?_____

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building
b. In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other_____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city? Sparsely
c. In open countryside? Populated
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other_____

24. If you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North b. Northeast c. East d. Southeast e. South f. Southwest g. West h. Northwest

24.2 How fast were you moving?_____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

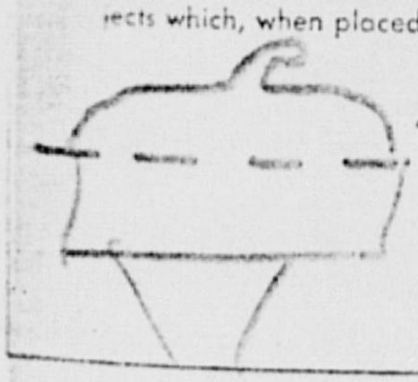

(Circle One) Yes No

I got stuck in a car by the stop light and stopped.

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	(Yes)	No
b. Sun glasses	Yes	No	f. Telescope	(Yes)	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	(Yes)	No	h. Other_____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other MY EYES		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

IT WAS LIKE PUTTING FOR SPOT LIGHTS IN THE SKY

64

Official U.S. Air For

14. Did the object disappear while you were watching it? If so, how?

GOT DIM THEN I DIDN'T SEE IT ANY MORE

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): (Yes) No Don't know. IF you answered YES, then tell what it moved behind: A CLOUD THEN APPEARED

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): (Yes) (No) Don't know. IF you answered YES, then tell what in front of: A CLOUD JUST WENT IN FRONT OF THE MOON

17. Tell in a few words the following things about the object:

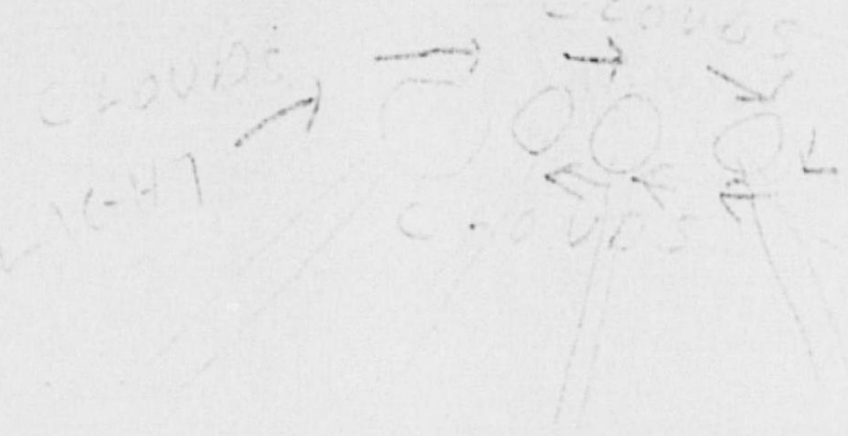

a. Sound NO

b. Color WHITE

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of t object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much the object would have been covered by the match head?

ABOUT HALF

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the obje that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawin to show the direction the object was moving.

ORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight—pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

SPOTLIGHT

12. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other _____

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

34. Date you completed this questionnaire: 4 (Day) 4 (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was over at my Grandparents on the night of the sighting. I left their house about 9:10. As me my dog and I were walking down Hickory St., I just happened to glance up a little, when I saw the object. I tried to keep my eye on it but in a few moments, it couldn't hold it and any longer and ran to the house. As soon as I opened the door, I hollered at the top of my lungs and got my father to come out. At this time, we could see nothing of the object. After looking for it for about 3 minutes, I came in a phoned the police Dept.

Tonight, I read in the Des Moines Register from yesterday, the 3rd on Page 3-S, that the Echo II was flying on this direction

orce UFO form continued

Another subject

This summer my girlfriend, [redacted] and I are going to buy a $25 telescope by earning our own money.

At nights, we would like to keep eye out for U.F.O's. If you have any helpful suggestions about doing this, I would appreciate hearing them.

We are very enthused about this and definitely believe that there is another form of life on some other plane. Even if U.F.O's aren't controlled by another form of life.

I hope I have been of some help to you.

Sincerely,

[redacted]

Chicago Tribune - Monday 3 April 1967

PROF TO CHECK SPACE 'TRASH'

Hynek to Investigate Libertyville Metal

Metallic fragments found on a road four miles northeast of Libertyville may be from a United States or Russian space vehicle, a Northwestern university astronomer who also is an air force investigator of unidentified flying objects, said last night.

Dr. J. Allen Hynek said the particles, the size of little beads, definitely were not parts of a meteorite but could be explained as either "space garbage or residue of an unusual flare."

The fragments showered the roadway in front of the home of Edward Dehler, 2002 O'Plaine rd., in Lake county Saturday night. Dehler said he was in the living room of his home when a "brilliant flash" lit up the room, altho the lights were on.

No Sound with Flash

He said the 2-to-3-second flash had no sound, but caused "little green spots in front of my eyes." Dehler said he

[Continued on page 2, col. 6]

PROF TO CHECK LIBERTYVILLE 'SPACE TRASH'

[Continued from first page]

looked out of his picture window, thinking someone may have driven into his driveway.

Seeing no one, he called to other members of his family. On taking a second look out the window, he saw smoke coming from a spot on the road. "Little red fires" lit up the area, he said.

With his wife, Betty Jane, and sons, Michael, 19, and Carl, 13, Dehler went outside and investigated. He said he couldn't touch the spot where the fires were because "it was too hot."

Finds Gray "Beads"

When the area cooled, Dehler found about a half dozen "beads" of some kind of gray, crisp material.

Dehler called Deputy Bernard Walther of the Lake county sherifff's police, who made a report to the sheriff's office.

A reporter for THE TRIBUNE took a sample of the particles along with Dehler's story to Hynek, who immediately ruled out a meteorite. He based his conclusion on the fact that Dehler said that the particles smelled like burning rubber and sulphur. Hynek said meteorites have no sulfur.

Dehler said he would take the particles, which left a six-inch wide and one-inch deep tear in the roadway, with him to Wright air force base in Dayton, Ohio, Friday. He said that there the air force will be able to take a spectroscopic analysis.

34. Date you completed this questionnaire: 4 Apr. 60
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The object appeared just above the southern horizon. It traveled across the sky in a straight line and disappeared close to Polaris. It was traveling about 3 times as fast as any plane ~~helicopter~~ or other aircraft I have seen at that height. It was definately not a weather ballon or satillite as I have seen many. It was much too low & traveled too fast for any man-made vehicle. A very high-pitched whine traveled in its wake.

It also couldn't have been a plane or jet. It didn't have the conventional lights or shape, to put it mildly. It couldn't have been a star or planets for obvious reasons.

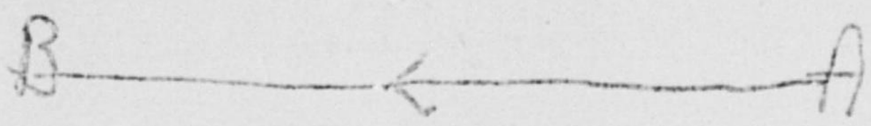

Official U.S. Air Force

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the objec was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object wa above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there?_____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

UFO form continued

30. Have you ever seen this, or a similar object before. If so give date or dates and location. no

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* (Yes) No

31.2 Please list their names and addresses:

[redacted]
Cambridge, Ohio
43725

32. Please give the following information about yourself:

NAME [redacted]
Last Name First Name Middle Name

ADDRESS [redacted] Cambridge City Zone Ohio State

TELEPHONE NUMBER [redacted] AGE 14 SEX female

Indicate any additional information you desire, including any special experience, which might be pertinent.

I am an am amateur astronomer & have ~~Earlier~~ observed many planes meteors, stars, planets etc. under the prevailing weather.

33. When and to whom did you report that you had seen the object?

4 Day Apr. Month 67 Year family & close friends

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate?_____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

IF you answered YES, then how far away would you say it was?_____

22. Where were you located when you saw the object? *(Circle One):*

a. Inside a building
b. In a car
(c.) Outdoors
d. In an airplane (type)
e. At sea
f. Other_____

23. Were you *(Circle One)*

a. In the business section of a city?
(b.) In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other_____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? *(Circle One)*

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving?_____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	(Yes)	No	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	Yes	(No)	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other_____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

a none I have never seen anything
like it

64

Official U.S. Air Force UFO

14. Did the object disappear while you were watching it? If so, how? NO

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): (Yes) No Don't know. IF you answered YES, then tell what in front of: it was below the few scattered clouds present at the time

17. Tell in a few words the following things about the object:

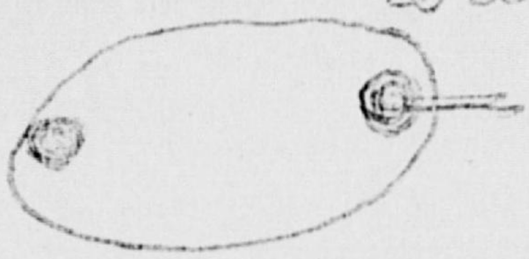

a. Sound was a high pitched whine

b. Color was a dull red with two red lights

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? about 1/4

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

American Meteor Society Report
1967

5 Apr. 67
Rochester, New York

Ended over	λ = 83° 13′ W, Ø = 43° 40′ N at 44 ± 21 km	
Projected path	204 km	
Path	226 km	
Observed velocity	42.3 km/sec	
Uncorrected radiant	a = 285°,	h = +26°
Radiant corrected for curvature and zenith attraction	a = 285°,	h = +23.1°
	α = 348°.5,	δ = 5°.6
	λ = 351°.7,	β = +9°.7
Parabolic orbit	i = 6°.4, Ω = 174°.4,	π = 290°.9, q = 0.73 A.U.

A search in the Hoffmeister-von Niessl Catalogue gives several fireballs of about same date and similar radiants. These are:

			R.A.	*Decl.*
No. 338	1899 Sept. 8	greater V	347	+3
345	1875 Sept. 14	great	348	0 ± 2
346a	1901 Sept. 14	greater V	345	+1
361b	1865 Sept. 24	greater J	347	+3
371	1900 Sept. 27	greater V	354.5	+6.5
372	1906 Sept. 27	greater J	345	+2
575	1914 Sept. 8	3 x V	347	+3

When we remember that probably not one fireball in a hundred has its orbit computed, it is reasonable to conclude that there is a stream of meteoroids furnishing fireballs whose radiants lie near the celestial equator and 5° to 15° west of vernal equinox. Evidently the radiant of the 1966 fireball fits in quite well.

It is understood that Prof. V. D. Chamberlain, Abrams Planetarium, East Lansing, Mich., will publish a paper on this fireball based upon very extensive data from presumably different reports.

FIREBALL of 1967 April 5.52 G.M.T.
A.M.S. No. 2392

This brilliant fireball appeared on the above date at 7:34 p.m., E.S.T. It seems to have started about 10 miles S.W. of Rochester, N.Y. and ended above a point very near Barrie, Ontario. It is believed that the sub-end point is quite accurate, the sub-beginning less certain. The solution depends on 8 reports from this side and 24 reports from Canadian side. All but one of the first lot were sent me by H. E. Roth, Project Director, Volunteer Flight Officer Network, National Air lines, and the 24 Canadian by Bruce A. McIntosh, National Research Council, Ottawa, Canada. But for the invaluable help of both, no solution would be possible. We received only one report from a ground observer in New York, and two thirds of the Canadian were from Ottawa or near by. The reports from airline pilots fortunately were from widely scattered points.

The fireball was very brilliant and observers were almost unanimous in giving its color as green. Venus was near its end point for most Canadian observers and most state that the fireball was far brighter. Also two say that it was brighter than Moon, one that it was equal, one that its magnitude lay between that of Moon and Venus. Probably about −10 would be near the truth. No long-enduring train was left. Both Venus and Belt of Orion served as reference points for a few observers. Even after discarding altitude estimates of 45° and over as being obviously impossibly great, there is wide range in the calculated heights of beginning and end points. Retaining estimates less than 45°, H1 is 121 km, H2 81 km, based upon 7 and 14 reports respectively. The observed duration, based on 18 estimates, is 5.64 ± 2.13 seconds. As path length was 226 km the velocity is 41 km/sec. This indicates a hyperbolic orbit, but due to the large average error in duration, it seems needless to calculate this. Hence the usual parabolic orbit only is given. The Ottawa reports give only a small slope which is borne out by the calculated data. Due to the great height of H2 the chances of finding meteorites is small.

American Meteor Society Report
1967

Date	1967 April 5.52 G.M.T.
Sidereal time at end point	304° 53′
Began over	λ = 77° 45′, Ø = 42° 58′ at 122 km
Ended over	λ = 79° 50′, Ø = 44° 23′ at 81 km
Projected path	226 km
True path	228 km
Duration	5.64 ± 2.13 sec
Observed velocity	41 km/sec
Radiant with curvature correction	a = 312°, h = +9°.3
Parabolic zenith correction	= −5°.3
Radiant corrected	a = 312°, h = +4°.0
	α = 177°.6, δ = −25°.4
	λ = 188°.4, β = −24°.2
Parabolic orbit:	i = 19°.7, Ω = 193°, π = 266°,
	q = 0.65 A.U.

FIREBALL of 1967 July 24.69 G.M.T.
A.M.S. No. 2396

This fireball is unique, so far as the writer knows, in that it appeared over the Atlantic and its solution wholly depends upon reports from four airplanes. These were kindly sent me by H. E. Roth, Project Director, Volunteer Flight Officer Network, United Airlines, Denver, Colo. It appeared at 16:36 G.M.T. The essential data follow in order; flight number, longitude and latitude of airplane, estimated bearing and altitude of beginning point, same for end point, notes of path slope, and duration of fireball's visibility:

857 16° 20′ W, 53° N; 49°, 30°; 49°, 20°; 10-15 sec.
812. 12° 51′ W, 54° 35′ N; ??, 15°-20°, same; 5-10 sec.
815. 15° 30′ W, 57° N; 118°, 10°; 113°, 0°; 5 sec.
814. 15° W, 57° N; 93° ?, 10°, 123°, 10°; 3-4 sec.
811. 16° W, 50° 50′ N; ??, 0°, 19°, −1; slope 80° to S; 4-5 sec.
(a few data illegible or meaning uncertain).

It is obvious that as two longitude and three latitudes are given only to whole degrees any solution will be very approximate. The duration was 6.6 ± 2.7 sec., but its smoke trail lasted from 10-15 min. as seen from 811 and also assumed a zigzag shape. It was bright twilight at all stations. Sun reported rising at 815. Reported colors vary widely; probably it was green-white. 857 reported no break-up, 814 into 3 or 4 pieces, other three no comment. Estimates of brightness vary greatly due to proximity of sunrise point. 811, which was in most favorable position even if most distant, gives 5 to 10 times that of Venus. At night its zenithal magnitude may well have been −12 or even more. For solution, the usual chart, but with scale 1mm equal to 3′ in latitude, was prepared. The most probable solution seems to be as follows:

Date	1967 July 24.69 G.M.T.
Began over	λ = 11° 00′ W, Ø = 55° 47′ N, at 97 ± 46 km
Ended over	λ = 10° 26′ W, Ø = 55° 47′ N, 81 ± 50 km
Projected path	35 km
Path	39 km
Radiant uncorrected	a = 92°, h = 24°.5
Radiant cor. for $\Delta z'$	a = 92°, h = 22°
	α = 246°, = δ + 19°

It is obvious that the solution is too approximate to warrant calculation of an orbit, but, despite the excessive probable errors in the heights, the conditions are too unique not to place this fireball on record.

BASHEV APPRAISES POLISH-BULGARIAN TREATY

Moscow Domestic Service in Russian 1030 GMT 7 April 1967--L

(Statement made to Moscow radio's Sofia correspondent Oleg Vlasov, by Bulgarian Foreign Minister Ivan Bashev--in Bulgarian, fading into translation)

(Summary) The visit of the Polish Party Government delegation is an important event for our countries. The talks between Gomulka and Cyrankiewicz, and Zhivkov and other Bulgarian leaders were warm and cordial. They stressed unity of views on both bilateral relations and international problems.

Recently great progress has been made in scientific and trade relations between the two countries, which gives opportunities for both greater scientific and economic cooperation and for more trade turnover. Both delegations decided to create the appropriate economic organs in their countries: first, a bilateral economic commission for devising concrete practical measures--particularly for the further deepening of specialization and cooperation in all fields of industry. Undoubtedly our cooperation in the fields of culture, information, and tourism will also develop successfully.

In the international area, both countries affirmed their wish to continue their efforts for European security, cooperation between the socialist countries within the framework of CEMA, and strengthening of the unity of the socialist community.

"The two countries resolutely condemned the aggression of U.S. imperialism in Vietnam and affirmed their readiness to give all help to the struggling Vietnamese people."

Both countries also drew attention the danger of the revanchist policy of militaristic and imperialist circles in West Germany in their attempt to obtain nuclear weapons for the Bundeswehr. Our countries consider it essential to make all efforts to mobilize the democratic and peace-loving circles of Europe against this peril.

As a result of the talks, a 20-year treaty of friendship, cooperation, and mutual aid was signed which will make an important contribution to both strengthening the national security of Poland, and Bulgaria and European security, and the strengthening of the unity of the socialist countries.

UNIDENTIFIED FLYING OBJECT SEEN ON 6 APRIL

Sofia BTA International Service in English 1440 GMT 9 April 1967--L

(Text) Sofia--A heavenly body moving from West to East passed over the town of Stara Zagora, in southeast Bulgaria, at about 1830 hours local time on 6 April. Observed with the naked eye, the body seemed to have the form of a sphere. When observed by means of telescopes from the local astronomic observatory the body, already in its zenith, seemed triangular in shape. Its radiance gradually faded and this made it difficult to take good pictures of it. But in spite of that, the photographs showed its triangular form with a poorly outlined tail.

Experts are highly interersted in the phenomenon. It is their opinion that it might be a drifting meteorological balloon. As far as is known, no observations of such a body have so far been carried out in Bulgaria.

Official U.S. Air Force UF

14. Did the object disappear while you were watching it? If so, how? Yes - within a few min. the object gained altitude and gained speed and changed direction and soon was out of sight.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

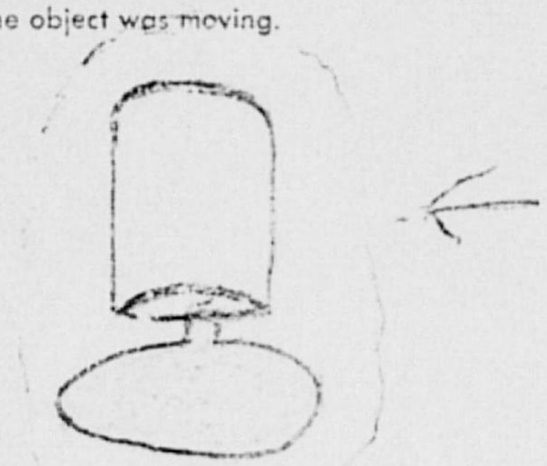

a. Sound no sound at all.

b. Color top part was a white glow and bottom area dark looking up at bright steady light.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

Approx. a third of the bottom section.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

. Air Force UFO form continued

21. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

If you answered YES, then what speed would you estimate?_____

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

If you answered YES, then how far away would you say it was? Approx. 400 yds.

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other Sat apt in front window in the house & then ran outside to watch it.

23. Were you (Circle One)

a. In the business section of a city?
(b.) In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other_____

24. If you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving?_____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	(Yes)	No	h. Other Just from outside		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

We have never seen anything like it.
