Dear ~~██████████~~

This replies to your recent correspondence regarding your unidentified observation in mid-April 1967.

We are unable to make a positive identification without the exact date. The description you submitted is consistent with that of a satellite; however, without an exact date and time, we cannot reach a definite conclusion. The information will be filed as insufficient data for evaluation.

If in the future you should observe another unidentified flying object (UFO), you should report it to the nearest Air Force installation as soon as possible. This will enable them to perform a prompt and comprehensive investigation.

April 28, 1967

Dear Sirs,

I am a amateur astronomer, age 14, I am also interested in U.F.O.'s and their origin. But some of the magazines tell such stories of these saucers that it makes you feel like a child that imagines all these things for pleasure. But I do have one thing to tell that deserves a good explanation. About one month ago I was outside with my 150X telescope and 7 x 35 binoculars. I had no special purpose that night so I just scanned the sky for a double star, and then I saw it coming from the west to the east, it was as bright as venus only it traveled at the velocity that was approximitly three times the speed of a jet. It had no special shape because I only seen a light and no other figure, though it did change brightness from high to low magnitude while it raced across overhead. I tried to figure it out but I couldn't, it was no meteor because it traveled across the sky and didn't disintegrate, it was no comet because it traveled to fast and had no tail. I would be very grateful if you would send me an explanation or at least what you think it is, I would also like to help you in any way I can.

Sincerely yours,
