35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

It looked like a planet a big one bigger and brighter than any star in the sky that I have ever seen. It was moving North West when we saw it. I had just got out of my car and was walking up to the front door when I saw it. And I went in and got my folks to look at it. Then I went and got my Binoculars which are 7X50 power and took a good look at it. It was about 50 ft. or more over the ground when we was looking at it then it went over the mountain out of sight.
