5. LENGTH OF OBSERVATION 3 minutes	11. BRIEF SUMMARY AND ANALYSIS Observer sighted an object that he first thought was a star but then he noticed that it had two beams at angles from its bottom, and was moving toward the clouds. At this time the object was under the clouds. About 20 minutes later he sigted another similar object from near the same place. No noise was heard. COMMENTS: Observer stated that a helicopter would look similar to the object. Wright-Patterson AFB is located near Dayton and usually has numerous aircraft departing and on approach. The witness was sent a 117 but failed to return it. There is nothing to indicate that the object could-not have been an aircraft. Ther is not real data on second sighting however, sihce it is similar to first it too may have been an aircraft.

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

The moon

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

The only motion was change in color.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.
The year 1966; On the S.W. skies. It will explain on page 7.

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes (No)

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS 10 [redacted] (Street) Dayton (City) 10 (Zone) Ohio (State)

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

Fri. May 26 (Day) May (Month) 1967 (Year)

34. Date you completed this questionnaire: 26 (Day) June (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

May 26.
I do not know how long the object was in the sky when I first noticed it. I thought it was the moon, but then realized the sky was cloudy and light rain was falling. The object was very dim at first, then rapidly grew as bright as a ball of fire. I went downstairs to close windows, went back upstairs to look at the object, and it had disappeared. I looked all over the sky and saw it nowhere. It had disappeared in a matter of 3 to 5 minutes.

1966. In the mid-summer of 1966 my husband and I saw a very fast moving object high in the SW skies. Approx. 80° up. This object looked like a star. Suddenly it stopped, started up, very fast, then disappeared; reappeared some distance away. An airplane flew by (the plane was also up very high); then the object reappeared and, moving very slow, it began to trail the airplane. My husband saw a similar incident around the month of October of the same year.
