DET 23 1967

Dear Mr.

We are unable to identify positively the object you observed on September 4, 1967, without additional information.

The description you provided is consistent with rotating satellite packages. It would be nearly impossible to determine which satellite component you might have observed since there are more than forty visible to the naked eye.

The State of New York is heavily ringed by SAGE stations, but none of these stations reported any unidentified flying objects. We did not receive any other UFO reports from the State of New York.

In the future, if you should observe another unidentified object, please contact the nearest Air Force installation immediately; it will be glad to conduct an on-the-spot investigation.

Thank you for bringing your observation to our attention.

Sincerely,

DAVID L. STILES
Major USAF
Acting Chief, Civil Branch
Community Relations Division

September 15,195?

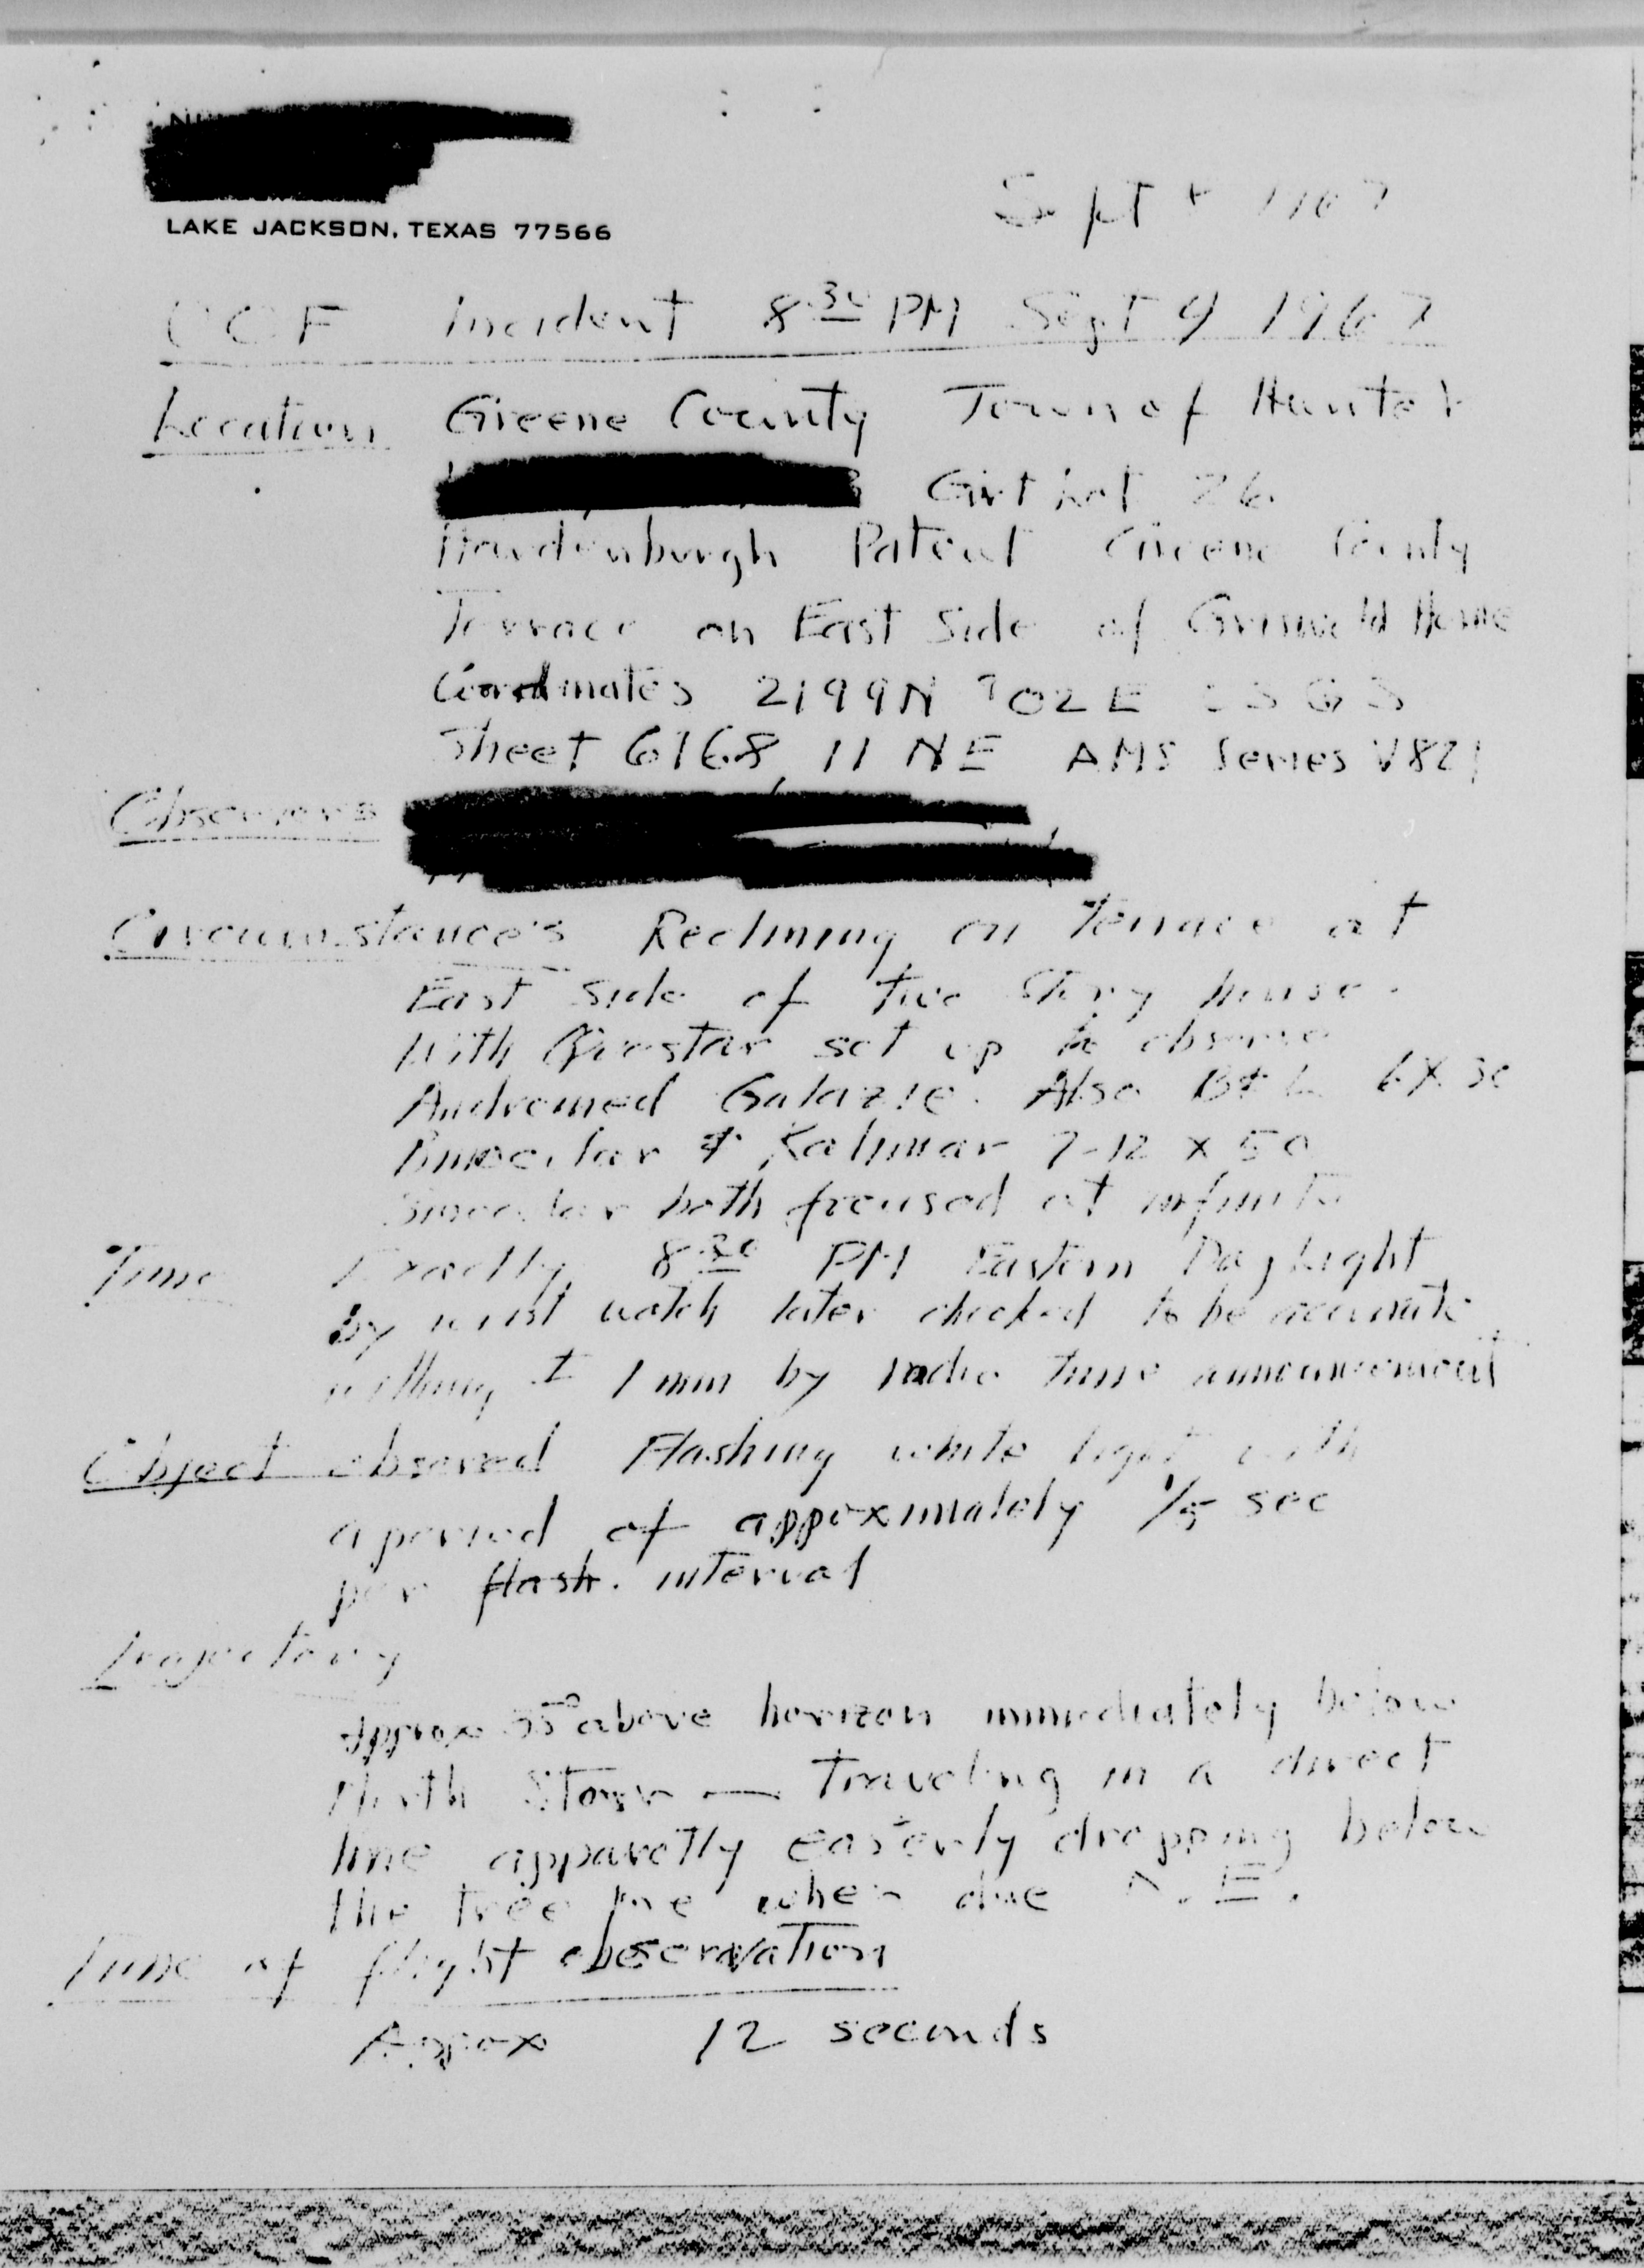

The House of Representatives
Washington, D. C.

Dear Carleton:

I am enclosing a comprehensive report on the UFO or UOF which you and I discussed on your last visit to Saratoga. You said you would give it to the Defense Department. Hope to hear from you soon or will the Blusbook gobble it up in its confusion?

Best regards to Connie. Keep well
