See attached supplemental sheet B.

32. 11 July 1967, Macon, Georgia.

Temporarily misplaced. Check to see whether this has any relation to the sighting the previous day in Azalea, Mississippi.

33. 25 July 1967, Manchester, New Hampshire

The only Manchester, New Hampshire case I have is for a different date.

34. 12 October 1967, Ocalaosa County, Florida.

Although this had four witnesses, the data are very poor. A balloon is ruled out because of wind at all levels. Two objects, one trailing the other, nighttime observation, went from the northern to the southern horizon in three minutes. Anyone of three evaluations: (1) insufficient data (2) probable aircraft (3) possible unknown.

35. 31 October 1967, Denver, Colorado.

Do not have in my files. Will do in Dayton.

My neighbor and I had for several weeks been sitting on the roof of her carport looking and watching the stars. This particular night I was reading in the house in my bedroom which is next to her carport. She shouted to me to come in a hurry, that she was observing something.

When I got there they were straight up in the sky moving east, southeast very fast. They did not make a complete arc over the horizon. They disappeared at about 45° . She decided to report it the next day.

I don't remember about the moon. It was a clear night with many stars.
