Question 30:

The objects in the Washington D.C area were also traveling South. They were of similar size and their speed appeared to be extremely fast. They had a similar formation - more of a cross or X shape though. Length of time under observation was around 7 or 8 seconds - instead of moving out of sight they made a 90° turn (toward ground) and disappeared from sight.

They were not white - an amber or yellow color. Height seemed to be similar to the ones in Colorado - if the size was close.

ONE OBJECT THAT SEEMED TO CHANGE INTO ANOTHER

On the night of Sept. 28 at 8:00 P.M. Three of us were sitting on the bank of the Colorado River, we were facing dead west. The night was very clear and bright, we could see the North Star to our right. The moon was directly behind us but had not risen yet. We were at the 33 mile marker, 33 miles below Hoover Dam, 8 miles below Eldorado Canyon. Then directly across the river and at a distance of about two miles this bright object suddenly appeared, we all saw it at the same time. It was as clear and bright as a television screen. The object was silver white, extremely clear and bright, it had a small bright light in the center that shined like a diamond. The object was exactly square. My first thought was to get the binoculars, they were in my boat which was 50 feet away. I got the glasses, we all took turns watching. The object remained stationary and bright for about five minutes, then it seemed to give off a blue green haze that came from the lower left side of the object. The haze kept becoming more bright and formed into an object about the size of the moon. As this was formed the bright white object seemed to slowly disappear, but the blue green object remained and became very bright. We could see the reflection in the river, it looked like the moon. Then from the lower right side of the object a bright beam of light shined down toward the ground, in the binoculars we could plainly see moving smoke or dust in the beam, also there was some kind of light coming up from the ground at this time. This object remained stationary and bright for about 20 minutes then very slowly it faded away. Our estimate of the distance may not be accurate, but it definitely was under five miles as there was a high mountain range about five miles away, and it was definitely between us and the mountain.
The following day when we returned to Las Vegas I reported the incident to Nellis A.F.B. Later I talked to many people in Las Vegas who had seen the same object the same nite at the same time, but they had seen it higher in the sky and moving slowly at a westerly direction. I was so interested in the object that the following week I went back to the area in the daytime and hiked in two miles to see if I could find any evidence of any thing on the ground. We did not make a good search, we found nothing, but we did see areas where you could hide a battleship.

In August of 1965 I was fishing 100 miles east of Las Vegas, I was with [redacted] At about three in the morning on a bright moonlight night we were both looking up at two extremely bright stars, suddenly one of them started slowly moving to the right, then it came straight down, very slowly, when it neared the ground it went to the left and slowly went alongside the lake. The object was very bright, lots of color, blue, green, orange. We had binoculars and took turn watching it for about five minutes, then it went behind a low mountain and seemed to land there. NNE of where we were. About an hour later we saw an enormous explosion which looked as if it could be an atomic blast, this seemed to be about 10 miles away, due east which would be near Pierces Ferry, Very remote country. When I returned to Las Vegas I phoned the newspaper and told them what I had seen and I asked if any planes had been reported missing as I thought the explosion could have been a plane crash. There had been none.

Exactly two weeks later in the same spot we saw three more U.F.O.S. Two were silver and one was the color of the first one seen and it followed the same general pattern except it came down farther to the east, but it seemed to land where the first one landed. The silver ones did not land and flew from west to east. We were in an area where many planes flew over we could always hear thair motors and they were clearly different.

1. All were seen on a clear moonlight nite.
2. All were seen in totally remote country.
3. They could not have been an airplane.
4. They were not a falling object.

These last two sightings were on Lake Mead in the area past Ice Burg Canyon in a spot called Rattle Snake Cove. I would gladly take someone in and spend the night with them. Most fishermen who have spent nights on the lake have seen similar objects.
