Mr. [REDACTED]
[REDACTED]
Denver, Colorado 80222

Your name has been given to the Aerial Phenomena Branch (Project Blue Book) as being a witness to an unidentified flying object. If you were a witness to a UFO sighting on October 9, 1967 would you please complete the attached FTD Form 164 and return it in the self-addressed envelope. If you were not a witness to this sighting would you please make a statement to this effect on the attached form. The information which you provide will be used in evaluating this observation. Thank you for your assistance in this matter.

Reference your message XPCP 00202 OCT 67, on an unidentified flying object observation of 0410Z/10 Oct 67. Your paragraph I indicated that [REDACTED] also observed the same object as Mr. [REDACTED]. Additional information from the two witnesses does not indicate that they observed the same object.

- a. What led your office to believe that both observers were seeing the same UFO?
- b. Due to discrepancies in the information from the witnesses and your report, request you forward the initial reports that your office received from both witnesses. This information is necessary prior to our office making an evaluation.

17. Tell in a few words the following things about the object:

a. Sound None

b. Color looked like series of white light bulbs

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

$1/20^{th}$ or less - cannot accurately estimate in that I do not know the actual or even approximate distance between my position and that of the object.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

X OBSERVED FROM THIS LOCATION

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? + 300 M.P.H.

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was?

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

A FLIGHT OF geese WOULD BE IN THE SAME CONFIGURATION

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

This could have been a single object with a series of low intensity lights or a group of approx. 17 objects in a tight formation

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO.

31. Was anyone else with you at the time you saw the object? (Circle One)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

Just a recap of the information covered in the questions above:

I was in a deserted parking lot talking with Ron Weiner and for no reason looked up into the northern sky and saw this (these) object. It passed much faster than a bird or flight of birds making no sound and holding a formation so perfect that I cannot personally accept the idea that I saw a flight of birds of any kind - also I have never seen birds which reflect light without having it vary in intensity as they moved away from the light source - in fact I have never seen a bird reflect light in any manner.
