Dear Sir,

SECRETARY

I would like to report a siting of a U.F.O.,

ofer Staten Island on the night of Friday, December 1. I am speaking

for my club of which most of them saw this object.

having a viewing session(our club is basicly an astronomy club for younger boys) when 1 of the older boys called to my attention an object over Staten Island much brighter than a star and 4 times as big, the color was an orange-red and it was in the shape of an circle. The object came from behind a church steeple and headed directly for us, then it made a 90 degree turn to the north. Then it headed north and discappeared in a group of smokestacks. Several people saw this including myself, and one of the boys saw this thru a telescope but lost it because of it's rate of travel. We verafy this to be the truth to the best of our knowledge and there is a diagram on the bottom of this page to show the path taken.

We would appreciate any help you can give us, on our observation.
