I have not heard from you concerning my reports back to Devonport Dockyard, Chatham regarding the refitting of HMS Penelope and Tenacity. Please let me know if you require further information from me. Please find enclosed Defence Form 1250 Application for Payment of Travelling Expenses and Subsistence Allowance. I am awaiting a copy of the letter to my bank manager authorising payment of my subsistence allowance. Should I be receiving a similar letter from Chatham also?

I also have not heard from you regarding my last request for Plans Keep data for the Mediterranean/Red Sea Campaign covering the period 2 January 1968. I realise it will take time to obtain such data but hope I shall hear from you in time.

Thank you very much for your cooperation in these matters. I look forward to hearing from you.

As you know, Prof [redacted] has a policy objective in to determine whether UFO's pose a threat to national security and to discover the stimuli which cause the UFO sightings. In this connection, the Air Force has the responsibility to investigate all UFO reports and to disclose to the public the results of such investigations. Civilians are the principal source of UFO reports over the United States.

We do not agree with your statement that "UFO sightings received from civilians at the local level cannot be followed up" since Air Force base is required by AFR 80-17 to report UFO's of possible significance. If the sighting is identified at base level, the base commander is authorized to release the information to the news media and it then becomes a matter of Public Information. If the sighting cannot be identified at base level, the UFO investigator must forward his findings to Wright-Patterson AFB and request assistance from the Foreign Technology Division which does any follow-up work necessary. To the best of our knowledge all significant UFO reports received from civilians (or a military person) are investigated. For obvious reasons, second-hand reports are not investigated nor do we comment on them.

Although we appreciate your offer and desire to mutually exchange information we regret that we cannot accede to such an arrangement.

Attention: George P. Freeman, Jr.
Lt. Colonel, USAF

Dear Colonel Freeman:

Enclosed is a copy of a cover letter with an attached letter of introduction and recommendation from the Colorado University UFO Study Group which I have sent to the Commanding Officers, Public Information Officers, Aerial Phenomena Officers of Hanscom Field, Otis AFB, Pease AFB and Westover AFB in an attempt to obtain some sort of cooperation regarding our investigation of UFO sightings in the Massachusetts area.

No doubt, my request will be brought to the attention of SAFOI for comment and direction. I would appreciate hearing from the SAFOI level myself as regarding how much mutual cooperation can exist between the local AFB and our unit and in what form it could take.

My own feeling is that many UFO sightings slip through the crack because of the reasons outlined in the enclosed cover letter and others. I do feel that the local AFB and our unit can be of some mutual help to one another. The reports certainly, as always, would be forwarded FTD WPAFB as well as NICAP and the CU UFO Project.

May I hear from you? Thank you very much for giving this matter your attention.

Sincerely,

Raymond E. Fowler

SUBJECT: Local AFB cooperation with Colorado UFO Study Early Warning Network

Chairman: NICAP MASS SUBCOM

TO: Commanding Officer *

cc: Base UFO Officer *
Base PIO *
SAFOI, Washington, D.C.

* - Sent to: Hanscom Field, OTIS AFB,
Pease AFB and Westover AFB

Attached is a letter of introduction and recommendation from Dr. Robert J. Low(*), Project Coordinator, UFO Study - University of Colorado. Dr. Low verifies my relationship to the CU UFO Study both as a member of the CU Early Warning Network and as the Chairman of the Massachusetts Investigating Subcommittee for the National Investigations Committee on Aerial Phenomena, Washington, D.C. which is cooperating with the CU UFO Study. In his letter, Dr. Low has encouraged you to cooperate with me in any way possible. How you could help us is outlined below.

Although local AFB's do conduct initial investigations of significant UFO sightings as per AFR 80-17A, it is apparent that all UFO sightings received from civilians at the AFB level cannot be followed up for such reasons as listed below:

1. The inability on the part of the Officer or Airman to always truly determine which sightings might be significant on the basis of a telephone call from one of the witnesses.

2. The lack of sufficient personnel to personally field-check all UFO reports in detail.

3. The fact that most sightings, especially by civilians, are due to misidentification of man-made objects or phenomena and misinterpretation of natural phenomena, and, thus in most cases do not warrant the effort required to investigate.

This is where the NICAP MASS SUBCOM could provide valuable coverage. If the Base UFO Officer or PIO would relay those reports not being followed up by

to FTD (TDETR) Wright Patterson AFB, the CU UFO Study, Boulder, Colorado and NICAP, Washington, D.C.

Another way the local AFB through SAFOI has been and could continue to be of help is to provide data, upon request, pertaining to USAF Flare Drops and other type of similar data to better enable us to make a field-level evaluation of UFO sightings. This has been done to some extent but closer and more rapid cooperation is desired in this area.

I have at my disposal a 17-man team comprised of Engineers(Aeronautical(1) Chemical(1)Electrical(2); Administrators(4); Psychologist(1); Astronomy Lecturer(1); Missile Tracking Director(1); Geologist(1) and a variety of Specialists including a Detective(5). A variety of pertinent equipment is available to us. Standard NICAP and CU UFO Study questionnaires are used.

In short, cooperation on your part in this or other way(s) would be greatly appreciated as well as being of great value to private and governmental UFO research. If required, certain aspects of such cooperation would be kept strictly confidential. Names and Addresses, etc. of UFO witnesses are always kept confidential if so requested.

NICAP Massachusetts Investigation Subcommittee

Dear Mr. Fowler:

Dr. Craig has asked me to write you a letter that explains the relationship between the Massachusetts Subcommittee and the UFO Project in Colorado. I am glad to do this.

As you point out in your information sheet, NICAP has been cooperating closely with the Colorado group in its scientific study of unidentified flying objects. NICAP headquarters in Washington has provided duplicates of some of the best known cases for study by the Colorado project, and they have kept the Colorado group informed of current sightings of interest. This last function is a very important one, and you of course act as one of the members of our Early-Warning Network, which serves as the cornerstone of our program to develop a communication system that will give us news of sightings soon enough for us to get out into the field before the trail gets cold and the evidence stale.

While the relationship between your subcommittee and our project is informal, and there is no direct administrative connection, nevertheless the work you are doing is of great importance to the success of our investigation. Hence, I would encourage persons having information on UFOs, whether in the government or outside, to cooperate with you in every way possible. It is certainly true that anyone who helps you is, indirectly, helping us. Our work, in turn, which is being done with federal funds, was authorized in response to a widely expressed public need for a careful review of the entire UFO problem.

Feel free to show this letter to anyone you wish.

Sincerely yours,

Robert J. Low

1 WITNESSES WERE DRIVING FROM CRANES BEACH, IPSWICH TO THE CENTER OF IPSWICH ON ARGILLA ROAD IN A SW DIRECT'N ALONG ARGILLA ROAD BETWEEN 9:15 AND 9:30 PM EST. (1/17/68)

2 BRIGHT LIGHTS SUDDENLY APPEARED TO THEIR RIGHT AT 260° W/45° ELEVATION AND SEEMED TO BE ATTACHED TO A SOLID OBJECT.

3 TED CIOLEK'S INITIAL IMPRESSION WAS THAT THE OBJECT WAS BOOMERANG-SHAPED WITH THE POINT UP BUT LATER WHEN IT CAME CLOSER, IT LOOKED CIGAR-SHAPED.

4 BARBARA CAMPBELL'S FIRST IMPRESSION WAS THREE LIGHTS FORMING A TRIANGLE THAT CHANGED TO 5 LIGHTS IN A ROW (HORIZONTAL) WHEN IT CAME CLOSER.

5 IT APPROACHED THEM, THEN STOPPED AND HOVERED FOR ABOUT 15 SECONDS BEFORE CROSSING THE ROAD DIRECTLY IN-FRONT-OF THEM SLOWLY. IT THEN ACCELERATED AND WAS WATCHED UNTIL OVER HORIZON.

6 WHEN LAST OBSERVED IT WAS MOVING AWAY IN A 230° W DIRECTION. THE 5 WHITE LIGHTS ALWAYS FACED THE OBSERVERS.

7 DURING THE ENCOUNTER, TED HAD SLOWED THE CAR TO A NEAR HALT AND TURNED OFF HIS RADIO AND HEATER TO SEE IF THE OBJECT WAS MAKING ANY NOISE. NOTHING WAS HEARD.

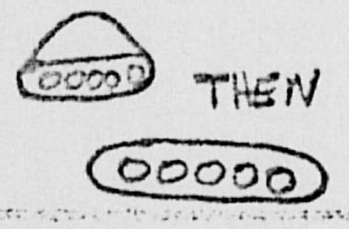

8 AT ITS CLOSEST, THE OBJECT APPEARED TO BE AT AN ALTITUDE OF 80 FEET AND A DISTANCE OF 250-400 FEET AWAY.

9 WHEN IT CROSSED THE ROAD IN-FRONT-OF THE CAR, TED FLASHED HIS HEADLIGHTS AT IT BUT GOT NO RESPONSE.

10 TED'S REACTION WAS HIGH CURIOSITY, KATHY WAS JUST STUNNED AND SPEECHLESS BUT BARBARA BEGAN SHAKING AND CRYING. LATER, HER MOTHER SAID SHE WAS STILL UPSET.

11 AFTER IT WAS OVER, THEY WENT BACK TO THE BEACH BUT DID NOT SEE ANYTHING ELSE SO THEY CALLED THE REPORT IN TO THE COAST

On the evening of January 17th around 9:30 pm. Ted Ciolek, Kathy Ril, and I were riding home from Crane's Beach on Argilla Rd. toward the center of Ipswich. Suddenly Ted slowed the car and told us to look at the object in the sky. I got scared right away. Teddy turned the radio off and brought the car to a near stop. I noticed how large and bright the lights were. The object seemed to be standing still. Suddenly it crossed the road in front of us toward our left. It moved faster than anything I have ever seen. I think it rose a little, but I didn't want to look at it but rather begged Teddy to leave and bring me home. Then it disappeared and I realized how stupid it was to be scared and we turned around & headed for the beach again.

[redacted]

On the night of January 17 appx 9:15 I was driving home from Cranes Beach. About 1 mile from the Beach parking lot, as I was driving, approx 5 bright lites in a horizontal sequence about a thumbs length apart. I shut off Radio & heater and brought car to a stop. I heard no noise of a conventional aircraft. The lites were turned towards me. I caught the outline of a boomerang shaped object. Then while the lites faced me with the brightness of full moon I could only see the outline of a Boomerang shaped object according to the set ups of the lites. My son was stationary and so was the object although it were observing me. Myself and my female passenger observed the object. It remained stationary for about fifteen seconds then crossed the road directly in front of me keeping its lights pointed in my direction about 60 feet above the ground. When it crossed the road slowly, it then seemed to accelerate and disappear over the trees in the horizon.

My reaction of the sighting was curiosity. I wanted to get a longer look at it flashed my car lites but it kept on going out of sight. The girls reactions differed [redacted] reaction was that of fear she started shaking and crying while holding on tight to me. Kathy's reaction was just being stunned I don't think we recall if any of us said anything until the observation was over. Total time of 45 to 60 seconds

MEMO FOR THE RECORD 11 July 1968

Subj: Physical Specimen, Cypress Gardens Florida, 2 June 1968

Lt Carmon L Marano spoke with Mr Edward Williams, ACIC, regarding a specimen recovered at Cypress Gardens, Florida. The approximate content of 90% silicone dbxide and 10% iron oxide would not be a meteorite. Normally a meteorite is quite heavy and this sample is light and appears to have a lot of air holes. The specimen is probably volcanic rock (pumise) and could have come up from the hot springs. The gases escaping would cause air holes and the specimen could be warm to the touch when it arose to the surface of the water.

Reference your note concerning the gray porous object found at Cypress Gardens, Florida. We have examined the object and find no reason to extend the evaluation any further. We are unable to determine if the object is martensitic in origin. Possibly Lt/Col Quintanilla's shop would be helpful in this regard.

SUBJECT: Evaluation of Foreign Object Recovered at Cypress Gardens, Fla., 2 June 1968

TO: FTD (TDAM)(Mr. E. P. O'Keefe)
Wright-Patterson AFB
Ohio 45433

Dear Mr. O'Keefe:

With reference to our telephone conversation this morning at 0815, 20 June 1968, I am sending you the material found in the lake at Cypress Gardens, Florida, on 2 June 1968. The substance was found by a Mr. Raymond Videtto. Mr. Videtto was water skiing at that time and he heard a sudden terrific "whoosh" behind him simultaneous with something striking the water causing geysers of steam and spray. The noise was sufficiently loud to scare him and he turned around to go back to see what had impacted in the water and found the material contained in this package floating on the surface still warm to the touch. Mr. Videtto turned the material over to Dr. Joseph H. Purser, Polk Junior College, Winter Haven, Florida, 33880, whom I understand is head of the Department of Science there. I talked with Dr. Purser by phone and he sented the material to me after promising to do so. We obtained permission to evaluate it with the stipulation that analysis techniques used leave the object structurally undisturbed.

Dr. Purser would like to retain the object for his school laboratory and, therefore, we are asking that you return it in as good condition as possible to this office so that we can forward it to Dr. Purser when you have completed your investigation. We would appreciate some feedback on your findings which would be appropriate to give to Dr. Purser in exchange for his cooperation in the matter. Dr. Purser told me that he believes the object to be meteoritic in origin, unrelated to man-made space objects. He stated his preliminary tests showed that it was about 90% silicon$\not$ dioxide and 10% iron oxide. He said that he believed most of the iron content had been burned out by the heat of re-entry which was evidently sufficient to cause the silicon$\not$ dioxide to melt and even boil, which would condense into an extremely light weight, very porous structure by the cooling effect of the water.

2125

From experience, I know that we will within the next thirty days receive a call from some of the interested parties to ascertain what we have done with or found out about the object so far. Anticipating this query, I would be most appreciative if you could give me some progressive or interim feedback with which to answer the questions.

Copies of my correspondence with Mrs. J. L. Green, who reported the finding of the object by telephone after learning of it from her neighbor, Mr. Videtto, and with Dr. Purser are enclosed for your information on the action which I have taken to date.

Dear Major Quintanilla,

I am a sixteen year old boy and have many interest. One of my interest is photography. (I developed all pictures sent) I do believe in flying saucers but have never really seen any myself, so I decided to make a few of my own. Of course I tell my friends that they are real, and they look at them with amazement and really believe it. It's starting to get out of hand, so I thought I'd let you know about it and how I did it. I'm sure you will agree with my friends that they look quite real.

Here are the pictures and how I faked them:

Pictures #1, #2, #3, and #4 are all done by ~~d~~ double exposure. First I cut out different sizes and shapes of flying saucers out of paper and pasted them on a black cloth. Then I made the first exposure. The second exposure is taken over a house and trees which gives it the effect of it flying

Pictures #5 and #6 are simply done by pasting a small picture of a flying saucer on a window and taking the picture through the glass. I focused the camera on the trees and house so it gives the saucer a blurred and moving effect.

I hope these pictures will give you some idea of how easy it is to fake flying saucers. Maybe they will help you to prove some of the hoaxes that are sent in.

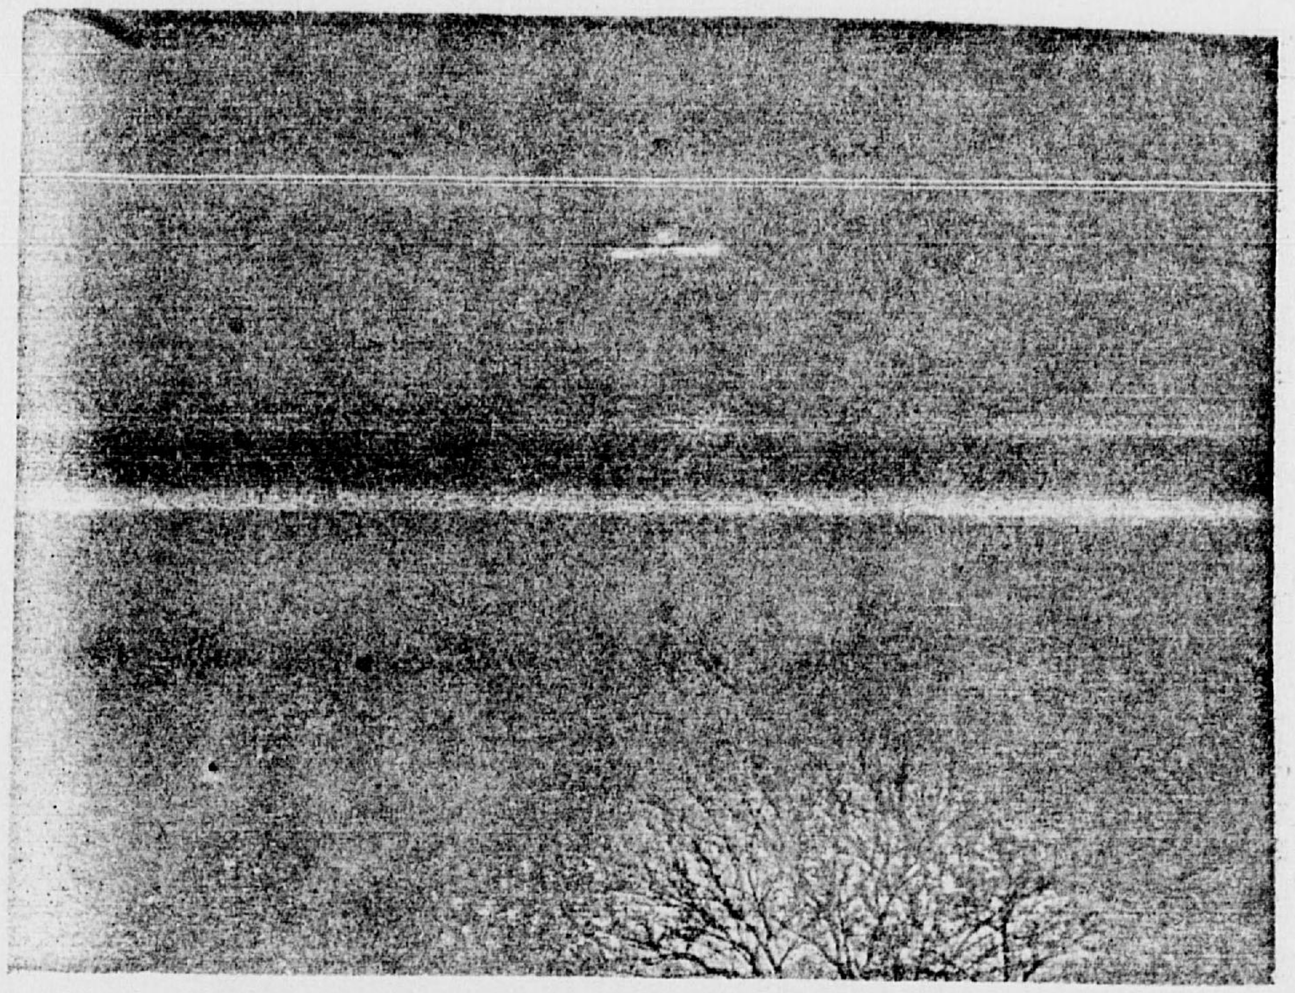

Yours Sincerely,

[redacted]

P.S. If you are to publish these could you please let me know when and where they will be published.

Large inversion from surface to 10,000 ft. No interceptive identification taken, no aircraft in the area at the time, nothing unusual on radar. Reporting officer: TSgt JJ Wedge, SDT. Comments Received many calls on same sighting, all same basic area. Passed it on to the

the first Air Force. Lt Marano requested that they contact the local police and have them see if they saw anything or had any unusual reports, and if so send copies to us. Contact the Control Tower and see if anyone saw anything unusual and make a statement (Hancock) that we/have radar coverage and that nothing unusual was sighted during this time period..

Lt Marano and Capt St. John discussed the UFO reports that had been made to us incorrectly. Captain St. John said that they realized that they had had a slip shod program on these UFOs so Col Sheppard set up new policies and decided to have the Intelligence Officer investigate the reports. Now they turn the reports over to the Intel people for investigation and they in turn send them back to the Info office upon completion. Lt Marano explained that and solved if a report was investigated/they did not have to send it to Wright-Patterson. Lt Marano told him that we would finish up the reports they had previously sent to us since they are so old, however, they should investigate the report of 27 January and submit inaccord with the regulation.
