REMARKS

Aircraft reported an unidentified aerial phenomenon off the front side while E bound at 37,000 feet, 1350 mile NNW of SOK. The unknown phenomenon correlates with a STARLINK train traveling SE bound and at a time that would likely light them up from rising easterly sun. NORAD concurs. ATSC briefed OMIC on Satellitemap.space and how to identify possible reports that may correlate to these activities. ATSC also encouraged OMIC to continue reporting these events as they are received.. TY notified.
